

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

BIENNIAL REPORT

OF THE

STATE TREASURER.

TO

HIS EXCELLENCY JOHN L. BEVERIDGE,

GOVERNOR OF ILLINOIS.

DECEMBER, 1874.

TREASURER'S REPORT.

STATE OF ILLINOIS, TREASURER'S OFFICE,
SPRINGFIELD. *December 1, 1874.*

His Excellency JOHN L. BEVERIDGE,
Governor of Illinois :

SIR—In compliance with Sec. 21, Article V, of the Constitution, I have the honor to submit for transmission to the General Assembly, the following report of receipts and disbursements of the Treasury Department, for the two fiscal years beginning with December 1st, 1872, and ending November 30th, 1874.

The total of the outstanding indebtedness on December 1st, 1874, is shown in the following abstract, viz :

23 Normal University Bonds, payable after 1879.		\$23,000	00
86 Thornton Loan Bonds	" 1879.	86,000	00
51 War Loan Bonds, at \$1,000,	" 1879.	51,000	00
110 " " 500,	" 1879.	55,000	00
363 " " 100,	" 1879.	36,300	00
Interest Stock	" 1877.	921,450	39
251 Refunded Stock, Coupon Bonds,	" 1877.	251,000	00
35 " " "	" 1876.	35,000	00
250 Revenue Deficit, " "	" 1874.	250,000	00
Total		\$1,708,750	39

There has been paid of State Indebtedness on Bonds and Stocks since Dec. 1st, 1872 \$329,180 48

There is still outstanding Bonds and Stocks called in by Governor John M. Palmer's Proclamation, and not yet surrendered to the State, as follows, to-wit :

New Internal Improvement Stock		\$6,085	70
1 Old " " Bond		1,000	00
13 Canal Bonds		13,000	00
2 Bonds of Interest Stock		2,136	00
Total called in and not yet surrendered		\$22,221	70

In conclusion I would cheerfully bring to favorable notice, the services rendered to this Department by George A. Sanders Esq., my chief clerk and deputy, who has, with remarkable faithfulness, integrity and skill, performed the complicated duties assigned to his care in the Department.

EDWARD RUTZ,
State Treasurer.

							\$13,885,668 85
							11,759,136 79
							\$2,126,532 06

The sum of \$1,317,859 91, so reported as being in the Treasury on the first day of December, A. D. 1874, includes the sum of \$430,466 11 which was collected under the provisions of "An act to fund and provide for paying the railroad debts of counties, townships, cities and towns," in force April 16, 1868. The Supreme Court of the State having determined, in the case of Ramsey vs. Hoeger, that the provisions of said act, so far as they required a higher rate of taxation for State purposes on property in one municipality than on property in another, could not be enforced, the character in which I hold said fund is extremely uncertain. Whether the fund should be considered "in the State Treasury," or not, I report it as having been received by me. In what capacity I hold said funds—whether officially or otherwise—must hereafter be determined.

EDWARD RUTZ,
State Treasurer.

STATEMENT NO. 25.—Local Bond Interest Fund.

EDWARD RUTZ, STATE TREASURER, in account with the State of Illinois.

BIENNIAL REPORT.

AUDITOR'S OFFICE, ILLINOIS,
Springfield, December 15th, 1874.

JOHN L. BEVERIDGE, *Governor of Illinois:*

SIR—I have the honor to submit the following report for the two years commencing December 1, 1872, and ending November 30, 1874.

You will find the following items embraced in the report, viz :

1. Statement of Receipts and Disbursements of General Revenue Fund.
2. Statement of Receipts and Disbursements of Special State Funds.
3. Statement of Receipts and Disbursements of Local Bond Funds for payment of principal and interest of Registered Bonded Indebtedness of Counties, Townships, Cities and Towns.
4. General Statement of Warrants drawn on the State Treasury for all purposes.
5. Detailed Statement of Warrants drawn on the Treasury for all purposes, and to what account and appropriation charged.
6. Statement of Warrants outstanding December 1, 1872, and November 30, 1874.
7. Statement of the condition of the School, College and Seminary Funds.
8. Statement of Fees collected and paid into the State Treasury by the Auditor of Public Accounts from January 13, 1873, to November 30, 1874.
9. Statement of State Indebtedness redeemed with the Illinois Central Railroad Fund.
10. Statement of State Indebtedness redeemed and purchased with State Debt Fund.
11. Statement of the accounts of the State Treasurer with the several State Funds, and Local Registered Bond Funds of Counties, Townships, Cities and Towns.

12. Statement of Bonds issued by Counties, Township Cities, and Towns, registered in Auditor's office, in pursuance of an act entitled "An act to fund and provide for paying the Railroad Debts of Counties, Townships, Cities and Towns," in force April 16, 1869.
13. Statement of Bonds registered in pursuance of the act of February 13, 1865.
14. Statement of Registered Bonds issued by Commissioners of Suq Island Levee (of Adams, Pike and Calhoun counties,) in pursuance of act of April 24, 1871, and registered in the Auditor's office under act of April 9, 1872.
15. Statement of the aggregate amount of State Taxes charged, the amount of abatements, commissions, etc., the net amount collected, the amount paid to State Treasurer, and the amount remaining due in each county for the year 1872.
16. Statement of the aggregate amount of State Taxes charged, the amount of abatements, commissions, etc., the net amount collected, the amount paid to State Treasurer, and the amount remaining due in each county for the year 1873.
17. Detailed Statement of "abatements, commissions, etc.," in each county for the year 1873, (explaining second column of Statement No. 16).
18. Statement of the condition of that portion of the State Tax levied upon assessment of 1873, in excess of the amount needed to raise \$3,500,000, being seven thirty-sixths of the amount charged.
19. Statement of School Fund Tax levied in the year 1872, showing the aggregate amount charged, the amount of abatements, commissions, etc., the net amount collected, the amount paid to each county, etc.
20. Statement of School Fund Tax levied for the year 1873, showing the aggregate amount charged, the amount of abatements, commissions, etc., the net amount collected, the amount paid to each county, etc.
21. Statement showing the amount of interest on School Fund, and the amount of School Tax Fund distributed to the several counties in the State, for the years 1872 and 1873.
22. Statement of the aggregate amount of taxes charged on account of Local Bond Funds, the amount of abatements, commissions, etc., the amount paid over by collectors, and the amount remaining unpaid for each locality for the year 1872.

23. Statement of the aggregate amount of taxes charged on account of Local Bond Funds, the amount of abatements, commissions, etc., the net amount collected, the amount paid State Treasurer, and the amount remaining unpaid for each locality for the year 1873.
24. Statement of the amount of State, County, City, Town, District and other Local Taxes levied on the assessment of 1872.
25. Statement of the amount of State, County, City, Town, District and other Local Taxes levied on the assessment of 1873.
26. Statement of property assessed for the year 1873, in the several counties, as returned to the Auditor's office.
- 27 and 28. Statements of rates per cent. of addition and deduction determined by the State Board of Equalization, on assessment of 1873.
29. Statement of the assessment of railroad property by the State Board of Equalization for the year 1873, showing the assessment of "Railroad Track," "Rolling Stock" and "Capital Stock" of railroads in the State of Illinois, and the distribution thereof to the several counties in which the roads are located, etc.
30. Statement of the aggregate equalized assessment of the property of railroads, for the year 1873.
31. Statement of the assessment made by the State Board of Equalization against the capital stock of telegraph companies, for the year 1873, and the distribution thereof to the several counties in which the telegraph lines are located, etc.
32. Statement of the assessment made by the State Board of Equalization against the capital stock of corporations, (other than railroad and telegraph) for the year 1873.
33. Statement of the equalized assessment of all taxable property in the State of Illinois, for the year 1873, showing the valuation of the several classes of property in each county, as equalized or assessed by the State Board of Equalization.
34. Statement of property assessed, for the year 1874, in the several counties, as returned to the Auditor's office.
- 35 and 36. Statements of rates per cent. of addition and deduction, determined by the State Board of Equalization, on assessment 1874.
37. Statement of the assessment of railroad property by the State Board of Equalization, for the year 1874, showing the assessment of "Railroad Track," "Rolling Stock," and "Capital Stock" of railroads in the State of Illinois, and the distribution thereof to the several counties in which the roads are located, etc.
38. Statement of the aggregate equalized assessment of the property of railroads, for the year 1874.

39. Statement of the assessment made by the State Board of Equalization against the capital stock of companies and associations incorporated under the laws of this State, (other than railroad companies,) for the year 1874.
40. Statement of the equalized assessment of all taxable property in the State of Illinois, for the year 1874, showing the valuation of the several classes of property in each county, as equalized or assessed by the State Board of Equalization.

RECEIPTS AND DISBURSEMENTS.

The amount of all funds in the State Treasury, December 1, 1872, was as follows:

General Revenue Fund	-	-	-	\$588,577	26
Canal Redemption Fund	-	-	-	454,312	47
Delinquent Land Tax Fund	-	-	-	331	06
State Debt Fund	-	-	-	333,765	37
State Interest Fund	-	-	-	17,855	46
State School Fund	-	-	-	62,964	00
Local Bond Funds	-	-	-	587,485	07
					\$2,045,290 69

The receipts from all sources from December 1, 1872, to November 30, 1874, inclusive, are as follows:

General Revenue Fund	-	-	-	\$5,076,229	87
Canal Redemption Fund	-	-	-	1,288,834	72
Illinois Central Railroad Fund	-	-	-	827,781	96
Illinois River Improvement Fund	-	-	-	188,668	34
State Interest Fund	-	-	-	213,805	08
State School Fund	-	-	-	2,007,629	38
Unknown and Minor Heirs' Fund	-	-	-	5,367	85
Local Bond Funds	-	-	-	2,231,755	58
					11,840,072 78
Total	-	-	-		\$13,885,363 47

The disbursements from December 1, 1872, to November 30, 1874, inclusive, are as follows:

General Revenue Fund	-	-	-	\$4,346,947	22
Canal Redemption Fund	-	-	-	1,743,147	19
Illinois Central Railroad Fund	-	-	-	621,751	46
Illinois River Improvement Fund	-	-	-	154,221	31
State Debt Fund	-	-	-	333,765	37
State Interest Fund	-	-	-	231,660	54
State School Fund	-	-	-	2,029,389	65
Local Bond Funds	-	-	-	2,297,948	67
					11,758,831 41

Balance of all funds in State Treasury December 1, 1874,	\$2,126,532 06
As follows :	
General Revenue Fund - - - -	\$1,317,859 91
Delinquent Land Tax Fund - - - -	331 06
Illinois Central Railroad Fund - - - -	206,030 50
Illinois River Improvement Fund - - - -	34,447 03
State School Fund - - - - -	41,203 73
Unknown and Minor Heirs' Fund - - - -	5,367 85
Local Bond Funds - - - - -	521,291 98
	2,126,532 06

The total of receipts and disbursements, as shown above, includes \$707,020 60 of constructive receipts and the same amount of constructive disbursements, representing the transfer of funds made in pursuance of law, as follows :

General Revenue Fund, to other funds - - - -	\$179,421 40
Canal Redemption Fund, to other funds - - - -	34 79
Illinois Central Railroad Fund, to other funds - - - -	512,620 77
Interest Fund, to other funds - - - - -	431 06
State School Fund, to other funds - - - - -	14,512 58

Therefore, to arrive at the actual receipts and disbursements of the State Treasury for the past biennial period, the sum of \$707,020 60 should be deducted from the total of receipts, and the same sum from the total of disbursements, as above stated, which will give the following result:

Total receipts charged - - - - -	\$11,840,072 78
Funds transferred - - - - -	707,020 60
	\$11,133,052 18
Actual receipts - - - - -	\$11,133,052 18
Total disbursements credited - - - - -	11,758,831 41
Funds transferred - - - - -	707,020 60
	\$11,051,810 81
Actual disbursements - - - - -	\$11,051,810 81

WARRANTS DRAWN ON TREASURY.

During the biennial period covered by this report, warrants have been drawn on the Treasury to the amount of - - - -	\$11,754,282 06
Dec. 1, 1872, there were outstanding warrants amounting to - - - - -	11,462 22
	\$11,765,744 28
Total, - - - - -	\$11,765,744 28
During the two years ending Nov. 30, 1874, the State Treasurer has returned to this office and received credit for Auditor's warrants paid by him, amounting to - - - - -	11,758,831 41
	\$6,912 87
Leaving amount of warrants outstanding Dec. 1, 1874,	\$6,912 87

The following is a comparison of the assessed values of the most important of the enumerated items of personal property :

LIVE STOCK.

YEAR.	HORSES.		CATTLE.		MULES AND ASSES.		SHEEP.		HOGS.	
	No.	Assessed value.	No.	Assessed value.	No.	Assessed value.	No.	Assessed value.	No.	Assessed value.
1873.	932,002	48,855,005	2,015,819	35,776,899	98,512	5,823,602	1,092,104	2,135,593	3,560,192	11,279,720
1874.	926,573	42,549,370	2,042,327	31,928,374	107,554	5,419,724	1,036,831	1,676,090	3,452,213	8,972,402

ACRES IN CULTIVATION, ETC.

ALL TAXES CHARGED ON STATE ASSESSMENTS FOR THE YEARS 1872 AND 1873.

Statements Nos. 24 and 25 show, in detail, the amount of State tax, county tax, and town, district and other local taxes, and the total thereof, levied in each county in the State on the State assessments for the years 1872 and 1873.

These include all taxes levied in the State, except city taxes in certain cities which make a separate assessment and do not levy city tax on the State assessment.

The aggregate of all taxes levied on the State assessment is as follows :

FOR THE YEAR 1872.

State taxes	-	-	-	-	-	-	-	-	\$3,947,014 73
County taxes	-	-	-	-	-	-	-	-	5,168,667 39
City taxes	-	-	-	-	-	-	-	-	1,400,658 09
Town, district and other local taxes	-	-	-	-	-	-	-	-	9,305,282 78
Total,	-	-	-	-	-	-	-	-	\$19,821,620 99

FOR THE YEAR 1873.

State taxes	-	-	-	-	-	-	-	-	\$5,023,609 50
County taxes	-	-	-	-	-	-	-	-	5,533,091 20
City taxes	-	-	-	-	-	-	-	-	1,583,942 32
Town, district and other local taxes	-	-	-	-	-	-	-	-	9,823,178 27
Total,	-	-	-	-	-	-	-	-	\$21,963,821 29

STATE BONDED DEBT.

The principal of the bonded debt of the State, November 30, 1872, was \$2,060,150 63

The State has paid of the principal of bonded debt, from Dec. 1, 1872, to Nov. 30, 1874, as follows:

With State Debt Fund	\$328,036 00	
With Illinois Central Railroad Fund	1,142 48	
		<u>329,188 48</u>

Bonded debt of the State Dec 1, 1874,		<u>\$1,730,972 15</u>
---	--	-----------------------

The bonded debt outstanding Dec 1, 1874, is classified as follows:

250 Revenue Deficit Bonds—payable after 1874	\$250,000 00
35 Bonds Refunded Stock “ “ 1876	35,000 00
251 “ “ “ “ 1877	251,000 00
Interest Stock “ “ 1877	921,450 39
23 Normal University Bonds “ “ 1879	23,000 00
86 Thornton Loan Bank “ “ “	86,000 00
51 \$1000 War Bonds “ “ “	51,000 00
110 \$500 “ “ “ “ “	55,000 00
363 \$100 “ “ “ “ “	36,300 00
Called in by Gov. proclamation and not surrendered	22,221 76
Total	\$1,730,972 15

The bonds called in by the Governor's proclamation, and not yet surrendered, are as follows:

New Internal Improvement Stock	\$6,085 76
New Internal Improvement—Interest Stock	2,136 00
1 Old Internal Improvement Bond	1,000 00
13 Canal Bonds	13,000 00
Total	\$22,221 76

The 250 Revenue Deficit Bonds falling due January 1, 1875, will be paid at maturity with Illinois Central Railroad Fund, which will reduce the bonded debt of the State at that date to \$1,480,970 15.

The receipts of the Illinois Central Railroad fund will more than suffice to pay the interest on this debt, and the principal as it falls due.

BONDS REGISTERED IN AUDITOR'S OFFICE UNDER ACTS OF APRIL 16, 1869, AND FEBRUARY 18, 1865.

Statements Nos. 12 and 13 furnish a full descriptive list of all the bonds registered for each locality in the State, and all the information necessary to show the amount and character of the railroad debt registered under the acts of 1865 and 1869. Bonds which were registered

under the act of 1865, and have been re-registered under the act of 1869, are omitted from the second table. Of bonds so re-registered—

Adams county has	- - - - -	\$200,000
City of Quincy “	- - - - -	175,500
Brown county “	- - - - -	12,600
Hancock county “	- - - - -	11,800
Schuyler county “	- - - - -	55,000
Total,	- - - - -	<u>\$454,900</u>

A synopsis of these tables gives the following :

Bonds registered under act of 1869,	- - - - -	\$14,243,951 58
“ paid and canceled,	- - - - -	189,600 00
Balance outstanding Nov. 30, 1874,	- - - - -	<u>\$14,054,351 58</u>

Which is apportioned as follows :

45 counties have registered bonds outstanding,	- - - - -	\$5,116,004 00
226 townships “ “ “ “	- - - - -	7,400,247 58
18 cities “ “ “ “	- - - - -	1,079,100 00
26 incorpora'd towns “ “ “ “	- - - - -	459,000 00
Total,	- - - - -	<u>\$14,054,351 58</u>

Bonds registered under act of 1865,	- - - - -	\$1,908,434 71
“ paid and canceled,	- - - - -	83,610 00
Balance outstanding Nov. 30, 1874,	- - - - -	<u>\$1,824,824 71</u>

Which is apportioned as follows :

7 counties have registered bonds outstanding,	- - - - -	\$409,240 00
4 cities “ “ “ “	- - - - -	1,415,584 71
Total,	- - - - -	<u>\$1,824,824 71</u>

Under the drainage and levee law of April 9, 1872, the commissioners of the Sny Island levee of Adams, Pike and Calhoun counties have issued and caused to be registered in this office bonds to the amount of \$473,500—for a detailed description of which, see Statement No. 14.

Statements Nos. 22 and 23 give, in detail, the taxation in each locality in the State, having registered bonds, on account of said bonds, and the benefits enuring to each locality under the operations of the act of April 16, 1869. The aggregates of said tables are as follows :

FOR THE YEAR 1872.

Total amount charged,	- - - - -	\$1,483,622 00
Amount of abatements, commissions, etc.,	\$101,693 23	
“ collected on levies for interest,	979,549 25	
“ of State Rev. and Int. Tax on increased valuation over 1868,	61,127 48	
“ of State Rev. and Int. Tax on property of railroads aided,	25,767 43	
“ of County Tax on property of railroads aided,	53,704 30	
“ of local tax on property of railroads aided.	133,671 75	
“ of tax enjoined from collection,	77,080 77	
“ of tax enjoined in collectors' hands,	41,447 99	
“ due (for which suit is pending,)	9,579 80	
	<hr/>	\$1,483,622 00

FOR THE YEAR 1873.

Total amount charged,	- - - - -	\$1,296,938 73
Amount of ordinary abatements, commissions, etc.,	\$163,532 78	
“ of tax on property of railroads and other corporations, enjoined from collection,	117,389 66	
“ collected on levies for interest,	866,788 88	
“ of State Rev. tax on increased valuation over 1868, credited McLean county Bond Fund,	20,388 88	
“ of County Tax on property of railroads aided,	10,316 67	
“ of local tax on property of railroads aided,	32,850 56	
“ of tax enjoined from collection,	49,766 20	
“ of tax enjoined in collectors' hands,	19,065 10	
“ due from collectors,	16,840 00	
	<hr/>	\$1,296,938 73

As a consequence of the decision of the Supreme Court in the case of Ramsay vs. Hoeger, the Treasurer and Auditor have done nothing under the provisions of the act approved March 27, 1874, in force July 1, 1874, entitled “An act to provide for the payment of the registered indebtedness of counties, townships, cities and towns.”

ILLINOIS AND MICHIGAN CANAL, AND ILLINOIS RIVER IMPROVEMENT.

On the 26th of Dec., 1873, the State made the final payment to the city of Chicago, under the provisions of the act of Oct. 20, 1871, entitled "An act to relieve the lien of the city of Chicago upon the Illinois and Michigan Canal, and revenues, etc.," and the city executed and delivered to the State a release of its lien, which has been approved by the Governor.

The amount paid to the city of Chicago, of principal and interest, and the sources from which the same was derived, is as follows:

Amount of acknowledged debt of State to the city, -	\$2,955,340 00
Interest on same, - - - - -	166,080 08
	\$3,121,420 08
Total, - - - - -	
Paid from following sources :	
Revenue deficit bonds, - - - - -	\$250,000 00
Illinois Central R. R. fund, - - -	1,197,885 97
Illinois and Michigan Canal revenue,	258,545 79
Canal redemption fund, - - - - -	1,414,988 32
	\$3,121,420 08

The Legislature, by act approved April 17, 1873, in force July 1, 1873, appropriated the net earnings of the Illinois and Michigan Canal and of the lock at Henry, on the Illinois river, until the expiration of the first fiscal quarter after the adjournment of the next General Assembly, to be expended by the Canal Commissioners in the construction of a lock and dam across the Illinois river at or near Copperas Creek.

Such net earnings were required to be paid to the credit of a special fund designated the Illinois River Improvement Fund, and it was made the duty of the State Treasurer to invest the same in United States or other interest-bearing bonds as might be designated by the Governor, until there should be in his hands at least \$100,000 of such funds. The interest accruing on such investment was directed to be placed to the credit of the same fund. As soon as the Illinois River Improvement Fund should reach \$100,000, the Commissioners were empowered to place under contract the building of the lock and dam.

The receipts and disbursements of the Illinois River Improvement Fund have been as follows :

RECEIPTS.

Net earnings paid by Canal Commissioners, - - - - -	\$183,000 00
Interest on investments paid by E. Rutz, State Treasurer,	5,668 34
	\$188,668 34
Total, - - - - -	

DISBURSEMENTS.

Cost of \$90,000 United States bonds,	\$98,266 50
Expended by Commissioners on account of construction of lock and dam at Copperas Creek,	55,954 81
Balance in treasury November 30, 1874,	34,447 03
	<hr/>
Total,	\$188,668 34

There was to the credit of the Illinois River Improvement Fund on the 30th of Nov., 1874, in cash \$34,447 03, and in United States \$90,000.

CHARLES E. LIPPINCOTT,
Auditor P. A.

* Of this amount (\$372,766 59), \$74,350 86 is for tax of 1873, "appealed and enjoined," which is not an "ordinary abatement."

† \$23,181 53 includes \$20,368 88 tax on increased valuation over 1868, which had been placed to credit of McLean county bond fund, prior to decision of Supreme Court forbidding such diversion of State tax.

‡ Estimated.

No. 18.

Statement of the condition of that portion of the State Tax levied upon assessment of 1873, in excess of the amount needed to raise \$3,500,000, being seven thirty-sixths of the amount charged.

COUNTIES.	SEVEN THIRTY-SIXTHS OF STATE TAX OF 1873.

No. 30.—Statement of the assessment made by the State Board of Equalization against the Capital Stock of Companies and Associations, incorporated under the laws of this State, other than Railroad Companies, for the year 1874.

NAME OF COMPANY.	LOCATION.	Capital stock paid up.	Total indebtedness except for current expenses.	Market or actual value of paid capital stock and debt, as determined by the State Board.	Capital stock equalized with the aggregate assessment of the State, by deducting 40 per cent of market or actual value.	Total equalized value of tangible property assessed where located.	Assessed and equalized value of capital stock, being excess of value of tangible property assessed where located and debt over equalized value of tangible property.

BIENNIAL REPORT

OF THE

SECRETARY OF STATE.

—

DECEMBER 15, 1874.

REPORT OF SECRETARY OF STATE.

STATE OF ILLINOIS, DEPARTMENT OF STATE,
OFFICE OF SECRETARY, December 15, 1874.

To His Excellency, JOHN L. BEVERIDGE, Governor :

SIR: In conformity with the law defining the duties of the Secretary of State, I have the honor herewith to submit for your consideration and transmittal to the General Assembly of the State my first biennial report, which embraces a statement of all the record work of this office for the two years commencing November 30th, A. D. 1872— at which date the last biennial report of my predecessor closes—up to and including the 30th day of November, 1874. Also, a statement of all the fees received by me and paid to the State Treasurer since January 13th, A. D. 1873—the date at which I had the honor to assume the duties of the position I occupy—up to and including November 30th, A. D. 1874, the close of the fiscal year; together with such other matters as are required of me by law to report.

For a number of years past each General Assembly has enacted some new law the effect of which has been to multiply the varied and manifold duties of the Secretary of State, and so largely increasing the clerical work necessary to be performed in the office, that, even with the increased force now in this office, it demands the closest attention, and unceasing labor on the part of not only myself, but also of every clerk in the office—each averaging more than the usual number of hours of labor each day.

When I assumed the duties of this office the whole system of the salary and emoluments of the Secretary of State, which had been in operation under the old constitution, were radically changed. Instead of being paid a salary, and in addition thereto receiving *all the fees* of the office as his *personal* emoluments, this, like all the other state offices under the new constitution, was made exclusively a salaried office, and by law the Secretary of State now pays *all fees* received by him into the State treasury.

The law also makes the Secretary of State the custodian of all the property of the State in this city, the stationery and other articles for the use of the officers of the State and General Assembly and directs that officer to deliver the same upon the proper order; to keep an accurate account of all stationery, printing paper and fuel furnished the State on contract or otherwise, and also of all such articles furnished by him to any State officer, the General Assembly, or any contractor, showing distinctly how much has been furnished to each.

In order that this provision of the law might be complied with, and that I might properly perform these duties and many others of similar na-

ture not enumerated, I was obliged to employ on my clerical force an experienced book-keeper, who has charge of the accounts of the office. I have also made it a rule, that no purchases should be made of any article for the use of this office or for the General Assembly, except upon a written order, for the article purchased, from some person duly authorized to make the same. Thus, with the help of my most efficient corps of clerks, I have been enabled to keep the detail work of this department in a most excellent and satisfactory condition; every item of expense from any appropriation over which I have any control can at a moment's notice be ascertained.

I also found that the new law authorizing incorporations, which took effect in 1872, had largely increased the clerical labor of the office, and in this department the work has steadily increased from year to year, and the mass of manuscript which in this branch alone has to be copied is simply immense.

RECORD BOOKS.

A few years ago, when I was serving as clerk in this office, the record books used did not exceed a half dozen; but the various branches of work in the office, with the natural growth of the State, and the operation of new laws, already referred to, imposing additional duties upon the Secretary of State, has increased the records wondrously. Instead of a half dozen books then in use, the matters now required to be entered of record demand the use daily of over forty record books, besides many others necessary for the use and convenience of the office. I mention this only for the purpose of showing the magnitude of the varied interests of the State as represented by this branch of the executive department, and also as one among the many substantial reasons for asking the usual necessary appropriations which are required, and will be asked for, of the General Assembly.

INCORPORATIONS.

Since November 30, 1872, applications have been received and license issued for the formation of eleven hundred and forty-three corporations, classed as follows :

Manufacturing.....	322
Miscellaneous.....	129
Benevolent.....	126
Mining.....	125
Loan and Building Associations.....	116
Printing and Publishing Companies.....	61
Literary.....	38
Cemeteries.....	39
Driving Park and Fair Associations.....	29
Distilling.....	17
Library.....	15
Gas Companies.....	18

The number issued by my predecessor after the law came in force, July 1, 1872, was one hundred and eighty, making a total since the law has been in operation, to the date of this report, of thirteen hundred and twenty-three (1,323).

The whole number of incorporations that have fully completed their organizations and certificates issued thereto, since November 30, 1872, is eight hundred and fifty-five (855), and divided among the different classes as follows :

Loan Associations.....	121
Manufacturing.....	126
Benevolent.....	128

Mining.....	59
Cemeteries.....	27
Printing and Publishing.....	25
Literary.....	21
Library.....	21
Agricultural and Driving Park Associations.....	18
Distilling.....	13
Gas Companies.....	13
Miscellaneous.....	191

Certificates were issued by my predecessor to the number of ninety-five (95), making the total number of certificates issued and corporations fully organized since July 1, 1872, of nine hundred and fifty (950).

The following is a list of railroad companies organized under the general law of 1872, during the period covered by this report, numbering in all forty-seven (47), to-wit :

Orion and Minersville Railroad Company.	Chicago, Danville and Vincennes Railway Co.
Chicago, Millington and Western Railway Co.	Dixon and Rock River Railroad Co.
Chicago and Southwestward Suburban R. R. Co.	Chicago Belt Railway and Transfer Co.
Chicago and Westward Suburban R. R. Co.	South St. Louis and Belleville Railroad Co.
Havana, Rantoul and Eastern R. R. Co.	Chicago Transfer Railway and Clearing House Co.
Collinsville and Venice Railroad Co.	Chicago and South Atlantic Railroad Co.
Wilmingon, Piper's City and Vincennes E. R. Co.	Paris and Terre Haute Railroad Co.
Chicago and Western Springs R. R. Co.	Keithsburg and Eastern Railroad Co.
Joliet and Valparaiso Railway Co.	Chicago and Maywood Railway Co.
Chicago, Joliet and Peoria Railway Co.	Mendota, Ottawa and Eastern R. R. Co.
Paducah and Northeastern Railroad Co.	St. Louis, Edwardville and Marine R. R. Co.
Keithsburg, Lacon and Eastern Railroad Co.	Belleville Railway Company.
Baltimore, Pittsburg and Chicago Railway Co.	Chicago and Southern E. R. Co.
Lafayette, LaSalle and Clinton Railroad Co.	Union Railway and Transit Co.
Marine and Collinsville Railroad Co.	Chicago and Paducah Branch R. R. Co.
South Chicago and Western Railway Co.	People's Freight Railway Co.
Kewanee, Wilmington and Eastern Railroad Co.	Joliet and Northwestern Railway Co.
Varna, Peru, Mendota and State Line R'y Co.	West Chicago Suburban R. R. Co.
Chicago and Indiana Railway Co.	Chicago and Waldheim Railway Co.
Indianapolis, Streetor and Northwestern R. R. Co.	Fond du Lac, Amboy and Peoria Railway Co.
Chicago and Midland Railway Co.	Watertown Railroad Company.
Chicago and Atlantic Extension Railway Co.	Grape Creek Railway Company.
Mendota, Rockford and Beloit Railroad Co.	Chicago, Rockford and Northern R. R. Co.
Chicago and New York Railway Co.	

The number reported by my predecessor was twenty-three (23), making a total since the law came into force, July 1, 1872, of seventy (70),

CITIES, TOWNS AND VILLAGES.

Under the provisions of section 208, chapter 24, page 247, of Revised Statutes, in relation to cities, towns and villages, it is made the duty of the Secretary of State to "communicate with the clerks of the several counties of this State, and ascertain the names of all the cities, towns and villages or other municipal corporations therein, and arrange such names in alphabetical order for convenient reference." In obedience with this section of the law my predecessor addressed a circular letter to each of the county clerks requesting the desired information. When I assumed the duties of the office only about one half of the counties had reported. I immediately took steps to complete the work begun by my predecessor, and have the honor to report that all the counties have responded, and this office is now in possession of a full list of cities, towns and villages, and other municipal corporations, as contemplated by the law, alphabetically arranged and recorded, a transcript of which is herewith published as an appendix to this report.

Section thirteen (13) of the above mentioned act, page 213, Revised Statutes, provides that within three months after the organization of any city or village under this act, the corporate authorities shall cause to be filed in the office of the recorder of deeds, in the county in which such city or village is organized, a certified copy of the records showing the result of the election whereby such city or village became so

organized, which certificate shall be recorded, and further provides in the language of the statute as follows :

“And such corporate authorities shall also cause a like certificate to be filed in the office of the Secretary of State, who shall file the same, and keep a register of cities and villages organized under this act.”

Under the provisions of this section certificates of incorporation have been filed as follows :

CITIES.

Name.	Date of Organization.	County.
Mason City.....	August 5, 1872.	Mason.
Mount Vernon.....	“ “ “ “	Jefferson.
Virginia.....	“ 12, “ “	Cass.
Hamilton.....	September 16, “ “	Hancock.

CHANGE OF NAME OF CITIES AND VILLAGES.

Section 211 of the same chapter, page 247, Revised Statutes, in regard to a change of name, reads as follows :

" If said change of name is made, said corporate authorities shall cause a copy of the order making such changes to be filed in the office of the Secretary of State, who shall thereupon make known the fact of such change, by publication in some newspaper of the county in which such city, town or village is situated, and also in some newspaper in the city of Chicago; and all the courts of this State shall take judicial notice of the change thus made."

In my opinion the provisions of this section are so indefinite that it ought to be amended. The form of the notice to be given should be designated, the number of times it should be inserted in the papers, whether in daily or weekly, and also state who should pay the cost of publication. There has been but nine (9) changes of name, and the publication of the notice has been left to the discretion of the Secretary of State so far as form and time were concerned. The expenses have been paid by those interested.

To make a detailed report of *all* the various and manifold duties of this office, and to submit a transcript of the records and the work performed, would be unnecessary for the purposes of this report, even if possible, and confine it within reasonable limits. The information which would be thus given can be readily obtained from the records themselves, to which reference is respectfully had, confining this report to such matters as cannot be readily obtained and understood by the records without considerable labor.

FEES RECEIVED, ETC.

The total amount of fees received by me since January 13, 1873, and including books and furniture sold up to and including November 30, 1874, is \$14,125 35.

The amount paid by me to the State Treasurer, as directed by law, is \$12,658 70.

Balance in my hands November 30, 1874, \$1,466 65.

APPROPRIATIONS AND EXPENDITURES.

The expenditures of this office paid from appropriations under my control, for the period commencing January 13, 1873, and ending November 30, 1874, are as follows :

For stationery, furniture, repairs of office, postage, expressage and other incidental expenses, the sum of \$8,419 88. Included in this amount is the special appropriation of \$5,000 made by the Twenty-eighth General Assembly for extra labor and expenses of this office, and \$121 05 of said expenses was for indebtedness incurred prior to January 13, 1873. There is still unexpended a balance of the appropriation of \$580 12, which will be all that will be required until the regular appropriation made by the Twenty-ninth General Assembly.

There has been expended for clerk hire the sum of \$13,731 11, leaving of the appropriation therefor \$4,666 67 unexpended and available for this purpose.

For porter in this office during the same time the sum of \$1,134 74, leaving a balance of \$465 26 unexpended and available.

For State House Janitor, provided for by the Twenty-eighth General Assembly, the sum of \$1,133 33, leaving a balance of \$466 67 unexpended and available for the purposes of the appropriation.

Of an appropriation made by the Twenty-seventh General Assembly for the employment of a watchman for the State House, an unexpended balance of \$546 has been applied for the purposes of the appropriation; since which balance expired the watchman has been paid from the incidental expense fund, under the act approved and in force February 9, 1865.

An unexpended appropriation for the State Library of \$500, made by the Twenty-seventh General Assembly, has been expended for the purposes designed by law.

For arranging, classifying and indexing enrolled laws, papers and records, preparatory to removal into the new State House, as provided by law, the sum of \$1,278 33 has been expended, leaving a balance of \$1,721 67 to be applied to this purpose.

An unexpended balance of a special appropriation made by the Twenty-seventh General Assembly for State House and grounds, of \$1,211 80, has been expended for the purposes designed by law. Vouchers for all above expenditures filed with the Auditor.

CUSTODIAN OF STATE PROPERTY AND INCIDENTAL EXPENSE ACCOUNT.

The law designating the duties of the Secretary of State, among other things provides that he shall be the custodian of State property, and places in his charge all the houses, lots, grounds and appurtenances in the city of Springfield belonging to or occupied by the State, the care of which is not otherwise provided for by law; also to take charge of and keep in repair the same, and all the furniture thereof; to superintend all the work necessary in the distribution of the laws, journals and reports which by law may be ordered printed and distributed.

To provide for the necessary expense incidental to these duties appropriations are made biennially, known as the appropriation for incidental expenses, from which are paid not only the expenses above noticed, but also the payment of all purchases made by order of the General Assembly—furniture and repairs for the use of the same while in

session, water rents, gas and fuel for the State House, the various state offices, offices rented for the use of the State in differ parts of the city, express charges on all books, etc., received or sent in exchange between the several States and Territories, and any and all incidental expense necessary in the discharge of the complex duties imposed upon the Secretary of State by law, and for which no other provision or appropriation is made. From the appropriations for the purposes above mentioned there has been expended the sum of \$29,901 46, leaving a balance in the State treasury to defray the incidental expenses of the General Assembly and State, until another appropriation is made, the sum of \$1,098 54.

Heretofore special appropriations have been made for the payment of expenses of keeping the State House and grounds in repair, and for the State Library. No appropriation for this purpose having been made for the year just passed, I have been obliged to pay these also from the incidental expense fund. An additional expense has also been incurred and paid from this fund which heretofore has been paid by the various counties of the State, viz: the cost of packing and preparing for transmission the printed volumes of laws, journals, reports, etc., etc., which by law the Secretary of State is directed to send to the different county clerks. Section 3 of the law under which the distribution has heretofore been made, and by which the Secretary of State was guided until the contract awarded in September last took effect, reads as follows:

§ 3. It shall be the duty of each county clerk to receive and receipt for any package of books transmitted in compliance with this act, and he shall immediately pay the charges for the transmission at the cost of the county, etc."

My predecessor construed the law to mean that the cost of packing and preparing the books for distribution as part of the cost of "transmission," and the cost of this work and materials used followed the books with the cost of actual transmission to be paid by the several counties, and which was paid by them, but under protest. The cost of this work, etc., is no small item, and when I assumed the duties of this office, and my attention having been called to the subject, I ruled that the law contemplated the cost of packing, etc., of all books, etc., to be sent to the counties should be paid by the State, and the *transmission* thereof to be paid by the counties receiving them. (In this construction I am sustained by the present law on the subject.) This additional expense has also been paid out of the appropriation for incidental expenses.

The acts making the several appropriations provides that vouchers for the expenditures therefrom shall be filed with the Auditor. This provision of the law has in all cases been complied with, and can be referred to by those interested.

LETTING OF SPECIAL STATE CONTRACTS—COPYING.

In conformity with the provisions of an act entitled "An act to provide for copying the laws and journals of the General Assembly," passed by the Twenty-eighth General Assembly, and in force April 29, 1873, on the 28th day of May, 1873, the contract for copying the said laws and journals of the Twenty-eighth General Assembly was let to Wm. P. Einory & Co., at 2 1-16 cents per 100 words, they being the lowest bidders therefor. An appropriation of \$5,000 was made to defray the expenses of said copying. I am gratified to report to your Excellency that the work has been well done, and carefully compared

with the original copies, at an expense of \$2,117 51, leaving unexpended a balance of \$2,882 49, which by law reverts to the State treasury.

REVISED STATUTES OF 1874.

On the 30th day of March, 1874, the act of the Twenty-eighth General Assembly, entitled "An act to provide for the publication of the Revised Statutes of the State," was approved by your Excellency; but by reason of it having passed without the emergency clause was not actually in force until July 1, 1874. Section 7, of said act directed the Board of Printing Commissioners to proceed within "ten days" to advertise for proposals for binding the statutes. Section 7 of the statute reads as follows:

"Within ten days after the adjournment of this session of the General Assembly, the State Treasurer, Secretary of State and Auditor of Public Accounts shall advertise in one daily newspaper published in Springfield, one in the city of Chicago, and one in the city of St. Louis, for bids for binding such statutes in the manner required by this act, and let the contract therefor to the lowest responsible bidder, which contract shall be subject to the approval of the Governor: *Provided*, they shall not contract to pay more than seventy cents per volume for folding, stitching, binding and delivering the same to the Secretary of State."

The final adjournment of the last General Assembly took place March 31, 1874, three months prior to the taking effect of the law. A meeting of the commissioners was held immediately after the adjournment of the session, at which the inconsistency of the law was discovered, and duly considered by the commissioners. After consultation with the Attorney General, and acting for what appeared to them to be for the best interests of the public, they decided to follow what seemed to be the true intent of the law, and caused the advertisement required by the law to be duly published in a daily newspaper printed and published in the cities of Springfield, Chicago and St. Louis, in the manner and form therein provided, soliciting proposals to do the binding of the statutes as required to be done by the act aforesaid.

CONTRACT FOR BINDING REVISED STATUTES.

On the 28th day of April, 1874, as stated in the advertisement for bids, the commissioners met, and after opening and duly considering each proposal, awarded the contract for said binding to Abraham E. Smith, of Rockford, Illinois, at 59 cents per volume, he being the lowest bidder therefor, being 11 cents less than the maximum price fixed by law.

PRINTING THE STATUTES.

Section 5 of the act providing for the publication of the statutes reads as follows:

"The printing shall be done by the contractor for the State printing. The text shall be in new long primer or small pica type, and the head notes in nonpareil or brevier type. The paper used shall be super-calendared book paper, of the weight of fifty pounds to the ream. The size of the pages in said volume shall be, as near as may be, the same as those of Gross' Statutes, volume one, third edition, and shall contain, on an average, at least as much printed matter per page as said Gross' Statutes: *Provided*, that the contractor for public printing shall receive no more or greater sum for furnishing the paper, doing the printing, and furnishing to the binder the entire edition of said volume than nine cents and one-sixth of a cent for each one hundred pages contained in said edition. And said volumes, when published, bound and delivered, shall not, in any event, cost to exceed one dollar and ninety cents per volume."

It will be seen that by this section the law specifies the paper to be used as "super-calendared book paper of the weight of *fifty pounds* to the ream." Before the work was commenced the contractors for State printing were directed to lay before the Board of Commissioners on

Printing a sample of the paper required to be used in the printing of the statutes. This was done by the contractors and the sample found in all respects to conform to the law, and was proven before the commissioners to be super-calendared book paper of the weight of fifty pounds to the ream. The commissioners did not feel satisfied that the paper was heavy enough for the use contemplated, and were satisfied that the members of the General Assembly made a grave mistake in thus peremptorily fixing the kind and weight of the paper to be used for this important work, and were sorely tempted to act upon their judgment and order the state printer to use paper of the same quality but of more weight to the ream. This of course would add something to the cost of the book, but would also greatly add to the substantial value of the statutes when printed. But the commissioners, guided by experience, decided they would follow the letter of the law, and let the responsibility for any fault which might be found in the quality of the paper used rest where it belongs—in the act passed by the members of the Twenty-eighth General Assembly on the subject.

CORRESPONDENCE WITH THE ATTORNEY GENERAL.

Soon after the adjournment of the Twenty-eighth General Assembly in March last, I found that there were a number of difficulties that beset me in the discharge of my duties as Secretary of State concerning the publication of the acts of the General Assembly as provided by the then existing laws upon the subject. In order that I might act as nearly in conformity with law as possible, I laid the matter before the Attorney General for his consideration and advice. The whole subject cannot be better explained than by giving the correspondence in full, which is as follows:

LETTER TO THE ATTORNEY GENERAL.

STATE OF ILLINOIS, SECRETARY'S OFFICE,
SPRINGFIELD, April 21, 1874.

HON. J. K. EDBALL, *Attorney General*:

DEAR SIR: Feeling the responsibility resting upon me as one of the executive officers of the State, and desiring to act in strict conformity with the laws, and also at the same time in all my official actions to do that which will result in the greatest good to the people of this commonwealth, I desire to lay before you for legal consideration several difficulties that meet me in the discharge of my duties regarding the publication of the regular edition of the acts of the Twenty-eighth General Assembly, required to be published by the act of 1865, providing for the public printing and binding, now in force and effect. I find that the letter of said act is in direct conflict with the letter and spirit of the act providing for the publication of the Revised Statutes, which will be in force July, 1874, the provisions of which I am expected to carry out before it takes effect. By reference to section 6 of the act of 1865, now in force, you will see that the law directs that at the close of each session of the General Assembly 8,000 copies of the public and general laws of the State shall be printed; and by section 12 of the same act the Secretary of State is directed to cause true and accurate copies of all laws, joint resolutions, etc., to be made and delivered to the State printers. This law, as is well known to you, is the only statute on the subject now in force, and will continue so until July 1, 1874, when the act to revise the laws in relation to State contracts will take effect. In the act of the Twenty-eighth General Assembly, in force July 1, 1874, to provide for the publication of the Revised Statutes of the State, section 11 reads as follows: "As soon as it can be ascertained with certainty what acts passed by this General Assembly are included in the Revised Statutes herein provided for, the Secretary of State shall have printed in pamphlet form 8,000 copies of the acts of this General Assembly, not included in the Revised Statutes, and none of those published shall be published therein; which edition shall be printed and distributed as nearly as may be as provided by law, and shall be in lieu of the publication of the laws of this General Assembly provided for by general law. The session laws of the Twenty-eighth General Assembly shall not be published except as herein provided." This, as will readily be seen, is in conflict with the present law regarding said publication, and is retroactive in its provisions, affecting, as it does very materially, sections 6 and 12 of the act of 1865.

There is but little doubt in my mind that the bill for the act to publish the Revised Statutes of the State was written with the intention and belief that it would pass the General Assembly with the emergency clause, and thus take effect from and after its passage. But this was not the result, and though the emergency clause was stricken out, still section 7 reads as if the law was now in force, and the Commissioners of Public Printing have accepted the instruction made to them to advertise for bids for binding the statutes according to said section, believing that nothing but benefit to the people would result therefrom, though the act does not take effect until July 1, 1874.

But I particularly desire to call your attention to the following: I am daily in receipt of letters from county attorneys, county clerks, and other officers of the various counties, asking when they can

expect to receive the State edition of the laws of the Twenty-eighth General Assembly, and desiring especially to receive official copies of many important acts which, by the provisions of section 11 of the act to publish the Revised Statutes, will not appear in the State edition of the laws, if the retrospective directions of said act are complied with by me. Although section 4 of said act aforesaid provides that said edition of the Revised Statutes shall be published on or before July 15, 1874, yet I have very serious doubts if this provision of the law will or can be carried out in the time specified; indeed, I doubt very much if I will be furnished with enough copies to make the distribution provided in section 8 of said act before September 1, and I fear it may be much later. If the doubts and fears expressed should prove to be true, and I should decline to act in conformity with the provisions and directions of the present law, choosing to be guided by the directions of a law not yet in force, the result will be that the people, the various courts and county officers, will be entirely deprived of all official knowledge of the existing laws of the State, in force on and after July 1, 1874, until months thereafter.

I am fully aware that the publication of the regular edition of the acts of the Twenty-eighth General Assembly, in addition to the Revised Statutes, will add to the expense of printing and binding; but whether I would be justified in neglecting my plain duty, as set forth in the laws now in force, is a question of grave doubt in my mind. There seems to be a just and proper demand from all parts of the State for an official copy of the laws of the State. Radical changes have been made, and sweeping repeals passed, to take effect on July 1; and if it is possible, this information should be placed before the people at the earliest day. There may be those who are not particularly interested in the laws of our State, who will say that a needless expense has been incurred by the publication of the regular edition of the laws of the State, when the Revised Statutes were to be published at an early day. Others will censure me very severely if I fail to strictly comply with the laws now in force, and furnish to the people as speedily as possible official copies of the statute laws of the State, for their information, and which they are bound to respect, obey, and enforce.

In view of all the facts and theories placed before you in this letter, and in addition thereto, of all the matters of which you have a personal knowledge, I would respectfully ask if, in your opinion, as the legal officer of the State, I would be justified, legally, or in consideration of public policy, in ignoring the provision of the law now in force, and accepting, in lieu thereof, the directions of the law, providing for the publication of the revised statutes of the State.

I am, sir, very respectfully yours,

GEO. H. HARLOW
Secretary of State.

THE ATTORNEY GENERAL'S REPLY.

STATE OF ILLINOIS, ATTORNEY GENERAL'S OFFICE,
SPRINGFIELD, April 21, 1874.

HON. GEO. H. HARLOW, *Secretary of State* :

SIR: Your communication of the 21st instant, asking my advice relative to your duty in the matter of causing to be printed the laws of the Twenty-eighth General Assembly, has been carefully considered, and I will state my conclusions thereon, together with the grounds upon which the same are based.

The sixth section of the act of February 16, 1865, directs that at the close of each session of the General Assembly 8,000 copies of the public or general laws shall be printed; and the twelfth section of the same act requires the Secretary of State to cause true and accurate copies of such laws to be made out by the person or persons to whom the contract for copying such laws has been awarded, and delivered to the public printer as fast as he may need the same.—*Gross Statutes*, pp. 521-522.

The first section of the "act to provide for the publication of the Revised Statutes of the State," approved March 30, 1874, provides: "That immediately after the close of this session of the General Assembly, all the general Statutes of the State which will be in force on the first day of July next, shall be compiled and published in a volume to be entitled 'The Revised Statutes of the State of Illinois, A. D. 1874.'"

The third section of the same act also provides that "H. B. Hurd, Acting Commissioner of Revision, shall compile, annotate and edit all the volume, superintend its publication, and prepare a full and complete index to the same. In such compilation he shall observe, as nearly as may be, the alphabetical order of the arrangement of the Revised Statutes of the State of Illinois of 1845."

The fourth, fifth and eleventh sections of the act are as follows:

"Sec. 4. An edition of 15,000 copies of said Revised Statutes shall be published and distributed and sold as hereinafter provided. Said edition shall be published on or before July 15, A. D. 1874.

"§ 5. The printing shall be done by the contractor for the State printing. The text shall be in long primer or small pica type, and the head notes in nonpareil or brevier type; the paper used shall be super-calendared book paper, of the weight of fifty pounds to the ream; the size of the pages in said volume shall be as near as may be the same as those of *Gross' Statutes*, volume one, third edition, and shall contain on an average at least as much printed matter per page as said *Gross' Statutes*; *Provided*, that the contractor for public printing shall receive no more or greater sum for furnishing the paper, doing the printing, and furnishing the binder the entire edition of said volume than nine cents and one-sixth of a cent for each one hundred pages contained in said edition; and said volumes when published, bound and delivered, shall not, in any event, cost to exceed one dollar and ninety cents per volume.

"§ 11. As soon as it can be ascertained with certainty what acts passed by this General Assembly are included in the Revised Statutes herein provided for, the Secretary of State shall have printed, in pamphlet form, eight thousand copies of all the acts of this General Assembly, not included in the Revised Statutes, and none of those published in said Revised Statutes shall be published therein; which edition shall be printed and distributed as nearly as may be, as provided for by general law. The session laws of the 28th General Assembly shall not be published except as herein provided."

The only difficulty in the determination of the duty of the Secretary of State arises from the fact that the act of March 30, 1874, relative to the publication of the new Revised Statutes, will not be in force until the first day of July next, while the act of 1865, before cited, will remain in full force until that date.

There is an apparent, if not real, conflict between the two acts. If you should attempt to publish the usual edition of the session laws, and should not have it completed by the first day of July, you would be compelled to stop in *medias res*, as the law then in force would absolutely prohibit its publication. And, if the publication of the same was completed before that time, while it would be a strict com-

pliance with the statute of 1865, now in force, it would, nevertheless, defeat the clearly expressed will of the Legislature as declared in the act of March 30, 1874.

If these two acts are susceptible of a construction which will preserve the substance and spirit of both, and at the same time work out harmoniously and secure the earliest practicable publication of the laws without unnecessary expense to the State, all will concede that construction should be adopted and that course pursued.

It appears from the Journals of the Senate that on the 24th day of March last the contractors for public printing presented to the General Assembly the following proposition:

SPRINGFIELD, ILLINOIS, March 24, 1874.

"To the Honorable Senate and House of Representatives of the Twenty-eighth General Assembly:

"The undersigned, acting for and in behalf of the contractors to execute the public printing for the State of Illinois, hereby stipulate and agree that in lieu of the contract rates set forth in the award and contract with the State of Illinois, certified by the Secretary of State, dated September 7, 1873, they will furnish the paper, measuring 28x42 inches, super-calendered, and of the weight of fifty pounds to the ream, and compose, print and deliver to the Secretary of State, or as he may direct, in the city of Springfield, in a good and workmanlike manner, as may be provided by law, the sheets of the Revised Statutes of Illinois, at the rate of 9½ cents for each one hundred pages, said pages to be of the same size, and on an average to contain the same amount of printed matter as those of Gross' Statutes of 1869, volume 1, and that no additional charges shall be made on account of said paper, composition or press work, and that all claims for additional pay on account of such paper, composition or press work, under the contract hereinbefore referred to, are hereby waived and abandoned.

"It being understood that the said Revised Statutes, so far as they include the session laws of the Twenty-eighth General Assembly, are to supersede and take the place of the publication of said session laws, and that we are to publish under our contract only such of said session laws as are not included in said revision.

"ILLINOIS JOURNAL COMPANY.

"By D. L. PHILLIPS, President,

"For Public Printers."

This communication was so presented while the bill was pending to provide for the publication of the Revised Statutes, and before its passage. Its provisions appear to have been incorporated in that act. The proposition of the public printers, taken in connection with the action of the General Assembly, amounts to an agreement between the public printers and the State as to the manner in which the laws of the Twenty-eighth General Assembly should be printed. We have no reason to suppose that the public printers are not ready and willing to carry out this mutual understanding in good faith, and print the laws of the Twenty-eighth General Assembly accordingly.

When we recur to the provisions of the act of 1865, as to the publication of the usual edition of the session laws, we find nothing which necessarily requires the same to be printed in a mode or style different from that required by the act of March 30, 1874, for printing the Revised Statutes. It is undoubtedly true that the session laws have usually been printed in a less expensive and less durable manner than that proposed for the more permanent edition of the statutes. But if the public printers agree thus to print the same under their contract for the public printing, and in lieu of the unnecessary edition of the session laws, no other person has any just ground of complaint. Under the 12th section of the law of 1865, now in force, you can cause the contractor for copying the laws to make the required copy from the enrolled laws. Mr. Hurd, the acting commissioner of revision, can use this copy, and under the act of 1874, "compile, annotate and edit the volume, superintend its publication, and prepare a full and complete index to the same." The public printers can print the same in accordance with their agreement in that behalf and the act of 1874, and thus substantially comply with the act of 1865 requiring the laws of each General Assembly to be printed at the close thereof. I do not perceive the necessity for any unusual delay in such publication. The "acting commissioner of revision" will undoubtedly proceed with all necessary dispatch to "compile, annotate and edit the volume, superintend its publication," and prepare the required index thereto. If the public printers were required to print at the same time two editions of the public laws—one in the usual style of the session laws, and the other in the style required for the Revised Statutes, it is reasonable to suppose that the work upon one would materially obstruct and delay work upon the other, and thus, instead of securing an early publication of the laws, would most effectually defeat this object.

The fact that the act of 1865 requires the publication of an edition of 8,000 copies of the public laws, while the act of 1874 provides for 15,000, need not cause any embarrassment. The publication of 15,000 will certainly be a full compliance with the act of 1865 in that regard, and the public printers will incur no hazard in the printing of the extra 7,000 copies, for if they have them ready on the first day of July, they can deliver them under the act of 1874 and be paid therefor accordingly. While the act of 1865 does not, in terms, require the session laws to be printed in the style contemplated by the act of 1874 for the Revised Statutes, it does not prohibit their being so printed. Printing them in this manner will, therefore, violate no law now in force; on the contrary, it will constitute a reasonable compliance with such law. There exists no necessity why you should ignore the provisions of the law now in force in order that the publication of the laws may be immediately proceeded with in such manner as is consistent with the act of 1874 making provision for the publication of the Revised Statutes. The present law may be so executed as to form the foundation for the completion of the publication and distribution of the Statutes under the law of 1874. The manner in which this may be accomplished has been sufficiently indicated.

I have the honor to be, very respectfully, yours,

JAMES K. EDSELL, Attorney General.

The Attorney General having thus decided that the proper construction of the laws of the State did not require me to publish the acts of the General Assembly in a separate volume, I suspended all further action in the matter, and took as my guide the act in force July 1, 1874.

The labor of revising, editing, printing and binding the Revised Statutes was found to be a work of much greater magnitude than the General Assembly conceived, and my own fears as to the delay in getting the books into my possession for distribution to the public were

fully realized. Although the work in each stage of progress—editing, indexing, printing and binding—was pushed forward as rapidly as possible, I was not in receipt of a single volume of the Statutes until October 1, 1874.

DISTRIBUTION OF REVISED STATUTES.

My official duties as Secretary of State, in the publication of the Revised Statutes, did not commence until the volumes were ready for distribution, as provided by law. On the 1st day of October last, I was notified by Abraham E. Smith, of Rockford, contractor for binding the same, that he was ready to deliver a limited number of the bound Statutes, and for the first two or three weeks after that date he could deliver at the rate of one hundred copies per day, and thereafter, at the rate of one hundred and fifty copies per day. By this time the demand for the books had become very urgent from all parts of the State. I found, should I wait until enough were bound to justify him shipping them to Springfield, here to be unpacked and repacked for distribution, much valuable time would be lost, and weeks would elapse before even the courts would be supplied. I determined to economize in time as much as possible. With this object in view, I at once proceeded to Rockford, accompanied by my shipping clerk, Mr. A. J. Ludlam, and made satisfactory arrangements for shipping the volumes direct from the bindery to their destination, as fast as they were bound, thereby saving much valuable time, and with no additional expense to the State for distribution.

Owing to my urgent demand upon the contractor for copies of the Statutes—time being more precious than style—the workmanship on the first few hundred volumes was not up to the standard desired, but since that time I am gratified to say that the work has been much better, and it is expected the remainder of the books will be up to the standard and fully as good as could be desired.

The following is a statement of the distribution made up to the 15th day of December, 1874, the date of this report:

To each of the State officers one copy, as follows: Governor, Lieutenant-Governor, Secretary of State, Auditor of Public Accounts, Treasurer, Superintendent of Public Instruction, Attorney-General, State Geologist—total, eight copies.

To each of the Judges of the courts of this State, one copy; Supreme court, seven copies; United States, circuit and district court, three copies; superior court of Cook county, three copies, circuit court, thirty-one copies; Alton city court, one copy; court of common pleas, Aurora and Elgin, one copy; recorder's court, El Paso, one copy; county courts, one hundred and two copies—total, one hundred and forty-nine copies.

To each of the clerks of the courts of this State, as follows: supreme court, three copies; criminal court, one copy; superior court, one copy; common pleas, two copies; recorder's court, one copy; circuit courts, one hundred and two copies; county courts, one hundred and two copies—total, two hundred and twelve copies.

To each State's Attorney in this State, one copy—one hundred and two copies; to the Attorney-General of the United States, one copy—total, one hundred and three copies.

To each Board of State Commissioners, one copy, as follows: The Board of new State House Commissioners, one copy; State Board

of Public Charities, one copy; Board of Railroad and Warehouse Commissioners, one copy; Board of Canal Commissioners, three copies; Commissioners to revise the Statutes, one copy to each, eight copies—total, fourteen copies.

To the State and Charitable Institutions, namely: Penitentiary, Reform School, Soldiers' Orphans' Home, Asylum for the Education of the Blind, Asylum for the Education of Feeble-Minded Children, Asylum for the Insane, at Jacksonville, Southern Insane Asylum, Northern Insane Asylum, Normal University at Normal, Southern Normal Industrial University, Chicago Eye and Ear Infirmary, one copy each—total, thirteen copies.

To the State and territorial libraries in the United States, one copy—total, fifty copies.

To the supreme court libraries in this State, five copies each—fifteen copies.

To the United States general land office, one copy.

To each college and library in this State, one copy—total, one hundred and twenty-six copies.

To each of the justices of the peace and police magistrate in this State, one copy—total, three thousand five hundred and thirty-six copies.

Delivered to county clerks for sale, five thousand copies; grand total number of copies distributed, nine thousand two hundred and twenty-seven.

<i>To whom distributed :</i>	<i>No. of copies.</i>
State officers.....	8
Judges of courts.....	149
Clerks of courts.....	913
State's Attorneys.....	102
United States Attorney-General.....	1
Boards of State Commissioners.....	14
Penal and charitable institutions.....	13
State and territorial libraries.....	59
Supreme court libraries.....	15
Colleges and public libraries.....	126
General land office.....	1
Justices of the peace and police magistrates.....	3,536
Delivered to county clerks for sale.....	5,099
Total.....	9,227

The distribution being still incomplete at this date, I am unable to report upon the expense attending the same, further than to say that the cost properly chargeable to the State has been paid, so far as progressed, from the funds appropriated by the General Assembly for that purpose.

There has up to this date been expended in the publication of the Revised Statutes, the sum of \$23,436 80, leaving of the appropriation an unexpended balance of \$6,563 20 to meet additional expense.

The attention of your Excellency is called to the fact, that under the operation of the law providing for the sale of several thousand copies of the edition, a portion of the above outlay will be refunded to the State. The law authorized the sale of these copies to be made only by the clerks of the several counties, by whom return is made to the Auditor. As is well known by your Excellency, I am not authorized to make sale, though having frequent application, and have no part of the funds arising therefrom in my hands.

PUBLIC PRINTING.

The contract for State printing which terminated on the 2d day of November last, was awarded in 1872, by the former Commissioners of Public Printing, to Messrs. E. L. Merritt and W. H. Bailhache. The State work was done under this contract, and the contractors paid, from time to time (as the law directs) as the work progressed, until the second session of the 28th General Assembly, in January 1874, when the contract and the performance of the same was thoroughly inquired into by a committee of said General Assembly, (the results and conclusions of which were reported to that body, and made a part of the journal of its proceedings) and upon the recommendations of said committee a new law was enacted upon the subject of State printing and other State contracts.

In relation to the settlement of the accounts of the State printers, the Commissioners of State printing were directed by a resolution of the General Assembly to advise with the Attorney General as to the construction and true intent of the law of 1872 on State printing, for the future action of said commissioners under the contract then in force.

As directed by said resolution, the advice and opinion of the Attorney-General was solicited, and is fully set forth in the following correspondence :

LETTER OF COMMISSIONERS OF PUBLIC PRINTING TO ATTORNEY-GENERAL.

STATE OF ILLINOIS, SECRETARY'S OFFICE,
SPRINGFIELD, March 31, 1874.

HON. J. K. EDSALL, *Attorney-General of the State of Illinois :*

DEAR SIR—Agreeably to a series of resolutions adopted by the House of Representatives, on the 27th instant, we have the honor to transmit herewith the reports and resolutions of the committee on printing, also the printed testimony submitted therewith. We desire your careful perusal of the same and would particularly request your consideration of the question, whether by reason of the alleged frauds in obtaining the contract for printing, and the evidence bearing thereon, the State would be justified in avoiding such contract, if such contract is voidable at the election of the State. But if in your opinion the interests of the State will be better served by not avoiding the same, then we would respectfully call your attention to the items in said report, purporting to be an over charge, and charging beyond the maximum rates allowed by law in the accounts rendered by the contractors for public printing, and ask your advice thereon.

We are, sir, very respectfully yours,

GEO. H. HARLOW, *Sec'y of State,*
C. E. LIPPINCOTT, *Auditor,*
ED. RUTZ, *Treasurer,*
Commissioners of Public Printing.

LETTER OF THE ATTORNEY-GENERAL TO THE COMMISSIONERS OF PUBLIC PRINTING.

STATE OF ILLINOIS, ATTORNEY-GENERAL'S OFFICE,
SPRINGFIELD, April 15, 1874.

GENTLEMEN—Your communication of the 31st ult. was duly received, with the stated enclosures of documents, whereby in pursuance of the resolution adopted by the House of Representatives on the 27th of March last, you request my opinion on the following questions:

1. Whether by reason of the alleged fraud in obtaining the contract for public printing, the State would be justified in avoiding the same.
2. If such contract is voidable at the election of the State, then to determine whether, in my opinion, the interests of the State would be better served by not avoiding the same.
3. And should the latter conclusion be reached, you then direct my attention to the items in the report of the printing committee purporting to be overcharges of the contracts for public printing above the maximum rates prescribed by law, and request my advice thereon.

The facts found by the committee on public printing, upon which the question of fraud in procuring the contract is predicated, are briefly as follows:

There were ten persons, besides those to whom the contract was awarded, who proposed to bid for each class of the public printing at various rates less than the maximum prescribed in the law, who, with one exception, respectively gave the requisite bond, approved by the Governor, to comply with the contract in case it was awarded to them. The assignors of the present contractors made out and filed a bid for at least the maximum rates, and, to prevent competition, paid each of the other proposed bidders sums varying from \$300 to \$1,500, amounting in the aggregate to \$10,500, to induce them not to put in the bids they had severally made out. By this means competition was avoided and but one bid was filed; upon which the Commissioners awarded the contract at the highest rates named in the law.

The Constitution, (Art. IV., Sec. 25), as well as the statutes of the State, required the public printing to be "let by contract to the lowest responsible bidder." That a combination of the charges above indicated is so clearly in conflict with the policy of the law, and so contaminated with fraud that the successful bidders acquired thereby no right to the contract, is too plain a proposition to need a minute of argument.

[1. Story, Equity Jurisprudence, § 293; Smith vs. Greenlee, 2. Devereaux, 196; Gardiner vs. Moe 25 Me., 140; Wooten vs. Hinkle, 30 Mo., 200.]

Had the Commissioners of Public Printing then been informed of these facts, it is not probable they would have awarded the contract to bidders who had resorted to such means to prevent competition. As soon as the facts were discovered, the State had the right to elect whether it would treat the award of the contract as void, or ratify the same and hold the contractors bound thereby. If, after the discovery of the means used to prevent competition, the State, through its legislative and executive departments, treated the contract as having a valid existence, and ordered public printing to be done thereunder, this, in my judgment, would constitute a waiver of the right on part of the State to declare the contract void, and would be construed in law as a ratification thereof.

The bidding took place August 26, 1872, and the contract was awarded the 7th of September following, for the period of two years, from November 4, 1872. Since that date, the parties to whom the contract was awarded, or their assignees, have been recognized as the public printers, and have received and executed the orders for public printing issued from both branches of the General Assembly, and from the Executive Departments. The contract will expire by its own limitation in a few months, when a new letting will take place under the law. It is doubtful, at least, whether the right has not been waived by the State to declare the contract void. The new Revision of Statutes is required to be published by the first of July next, when the same will take effect.

In view of all the circumstances, I think it is not advisable to attempt to declare the contract void at this late day.

Upon the matter of charges above the maximum rates prescribed in the law, two questions arise viz :

1. The number of pages constituting an "impression" for press-work ; and,
 2. What is the maximum rate, if any, prescribed for press-work for the fifth class of printing?
- These questions will be considered in their order. The second section of the "Act to provide and regulate the public printing," approved April 9, 1872, (laws of 1872, p. 612,) divides such printing into five classes, and defines each class.

The third section of the act contains this provision :
 "The Commissioners of Printing shall, between the 3d day of July and the 1st day of August next after the passage of this act, and biennially thereafter, within the same period, cause to be published in at least one daily newspaper printed in each of the cities of Springfield, Chicago, Peoria, Rock Island, Cairo and Quincy, an advertisement, which advertisement shall continue two weeks from the date of its first publication, giving notice that sealed proposals will be received at the office of the Secretary of State for the execution of the several classes of public printing, in separate contracts for the term of two years, from and after the first Monday of November next ensuing. Said proposal to be filed in the office of the Secretary of State on or before the fourth Monday of August next, after said public notice, which proposals shall distinctly and specifically state the price per 1,000 ems in the composition of all matter embraced in the proposals for any or all of such classes of printing; the price per 100 impressions for all press-work embraced in the first, second, third and fourth classes and the price per 25 impressions for the press-work contained in the fifth class, at which the bidders will do the work embraced in the class or classes of the printing covered by his proposals."

The fifth section of the act provides that "The maximum rates of printing done under this act shall be as follows: Plain composition, 60 cents per 1,000 ems, figure work, 90 cents, rule and figure work \$1.20, press work, 25 cents per 100 impressions: *Provided*, that no job shall be counted at less than 200."

The number of pages which shall constitute an "impression" is not defined in this act. The first section of the act of March 9, 1867, relative to public printing, fixed the maximum rates therefor as follows: "The maximum price of public printing shall be as follows, to-wit: For plain work, 70 cents per 1,000 ems; for figure or rule work \$1.05 per 1,000 ems; for figure and rule work, \$1.40 cents per 1,000 ems; for composition, and 70 cents per token of sixteen pages for press work; for blanks of any description, \$1.50 for the first quire, and for each additional quire of the same kind, ordered at the same time, \$1 per quire, excepting when said blanks are larger than a sheet of flat cap paper, or contain a much composition as to require additional compensation, then the public printer shall be allowed to charge a reasonable advance upon the prices above specified for printing blanks, which said advance charges shall be passed upon by the officers authorized to settle the printer's account, as hereinbefore provided." [Gross Statutes 1869, p. 521, § 5.]

It will be observed that the word "impression" is not here used, except as to the printing of blanks the maximum price there fixed "is 70 cents per token of sixteen pages." The important words used appear to be technical terms of art peculiar to the vocation of printers. In Webster's Unabridged Dictionary we find the word "token," as used in printing, defined thus: "In printing, ten quires of paper; an extra quire is usually added to every other token when counted out for the press."

In the illustrated addition of 1869 of Webster's Dictionary, we find the definition of the same word as used by printers, modified thus: "Ten quires of paper. A white token is 250 sheets of paper printed on both sides, or about 10½ quires of 24 sheets."

In the "Printers' Price List," which purports to be a manual for the use of clerks and bookkeepers in job printing offices, by Theo. L. DeVine, and published in New York by Francis Hart & Co., in 1871, it is thus stated: "All kinds of book and pamphlet press work are computed by tokens instead of thousands. Prices are consequently made by tokens only. The token, as here used, is 250 impressions, or any fraction thereof."

As variously defined by Webster, a token would consist of 240 or 250 sheets of paper printed on both sides, which is equal to twice that number of impressions.

According to DeVine it consists of 250 sheets of paper printed on one side, or 125 sheets of paper printed on both sides—in other words, 250 "impressions."

If the word "token" is regarded as representing a certain number of sheets of paper printed on both sides, than "a token of sixteen pages" must refer to such number of sheets having eight pages each side, or on each impression.

On the contrary, if the same designates a certain number of impressions, than the words "per token of 16 pages" refer to such number of impressions of 16 pages each. The definition of the term given in dictionaries and books pertaining to the art of printing are conflicting, and shed a very uncertain light on the question.

The testimony taken before the committee on printing (page 6.) seems to show that the term "token," as used by printers and publishers, has various meanings attached to it in different parts of the United States. Here it is said to represent 240 impressions in New York 250 impressions in New England 250 impressions, and in some of the large houses in Boston 300 impressions. It seems to be conceded, however, by all parties, that the word "token," as used in the fifth section of the act of 1867, was intended to mean either 240 or 250 impressions, so that the clause "and 70 cents per token of sixteen pages" should be read or understood as if written "and 70 cents per 240 (or 250) impressions of sixteen pages each."

Under this construction the law of 1867 designated sixteen as the number of pages which should constitute an "impression" or "form," from which the impression is taken, although neither of these words are used in the statute.

If it seems to be the case from the unanimous concurrence of the committee on printing, and the uniform understanding of all parties in interest, the law of 1867 is to be understood as establishing sixteen pages as the size for the "form," or "impression," upon which press work is to be computed in book and pamphlet printing done under that law, the same furnishes an important guide to ascertain the proper construction of the act of 1872.

It is the established rule that, in the construction of a doubtful statute, and for the purpose of arriving at the legislative intent, all acts on the same subject matter are to be taken together and examined, in order to arrive at the true result. (Sedgwick on Statutory and Constitutional Law, 247.)

The rule, that statutes *in pari materia* are to be consulted for the construction of each other, obtains, although the statutes to which such reference is made may have expired, or been repealed. *Ibid*, 250. The prior acts are consulted, not necessarily as laws still in force, but as aids to discover the intent of the Legislature, when, in subsequent statutes, language is used of uncertain import.

That part of the 5th section of the act of 1867, which fixes the maximum rates for press-work, is in conflict with the corresponding provisions of the 5th section of the act of 1872, and was repealed thereby.

But the words "sixteen pages," in the clause of Section 5 of the act of 1867, in these words: "and 70 cents per token of sixteen pages for press-work," if construed as defining the number of pages in an impression, are not necessarily in conflict with the clause of Section 5 in the act of 1872, fixing the maximum rates of press-work at 25 cents per hundred impressions." Yet it would appear like cutting up Section 5 of the act of 1867 into exceeding fine particles, to regard the residue of that part of the section repealed, and these three words, "of sixteen pages," as still in force.

However this may be, I am clearly of opinion that if these words, as used in the act of 1867, were intended as defining the number of pages in an "impression" at sixteen, the same may be consulted to solve any doubt as to the meaning of the word "impression," when applied to the same classes of printing, in the act of 1872.

It is, I think a proper application of the rule that statutes *in pari materia* are to be consulted to ascertain the proper construction of a later statute, the meaning of which is doubtful, although the prior act may have been repealed.

It appears from the testimony taken by the committee, that from 1839 up to the time of the passage of the act of 1867, it had been the custom for the Public Printers to charge for press work done for the State at the rate of eight pages to the form, or impression,—and the contracts seem to have been made on that basis. But the act of 1867 introduced a new rule, and, for the first time (as all parties appear to have understood the act), gave a statutory definition of the number of pages which should constitute an impression, *viz*: sixteen. The committee on public printing all concur in the proposition that, in book and pamphlet work like that done for the State, sixteen pages is generally recognized as a form, or impression, in printing and publishing houses, when it is not otherwise provided in contracts for doing such work.

It is not within my province to determine, or express an opinion upon, a question of fact of this character, which depends for its solution upon the testimony of experts. But assuming the facts to be as found by the committee on printing, and regarding the act of 1867, while in force, as defining an impression to be sixteen pages, and construing that act as *in pari materia* with the act of 1872, my conclusion is, that in the estimation of press-work, in book and pamphlet printing, under the act of 1872, sixteen pages should be considered as an "impression."

It is a fact worthy of attention, that the law required the letting of public printing to be advertised in many of the principal cities in the State. Such construction should be placed upon the word "impression" as printers and publishers in the State would generally place thereon. A particular local custom, even at the capital, should not prevail over the general understanding of printers in the State; otherwise, the various bidders would not stand upon an equality. (Sedgwick on Constitutional and Statutory Law, 257; *Evan Myers*, 35 Penn. State R., 114.)

If, however, it is true, that in book and pamphlet press-work, eight pages is regarded as the size of a form, or impression, by the printers generally in the State, when the contract is silent or no other number specified, then I think the same rule should be applied in the estimation of work done under the acts of 1872, notwithstanding the provisions of the act of 1867.

If such were the case, there would be no room for the application of the rule that where the construction is doubtful all statutes *in pari materia* should be construed together, for the construction of the word "impression," on that hypothesis, would not be doubtful.

This, however, is not a question of law, but of fact, to be determined upon the testimony of experts. The commission of public printing are better able to ascertain this fact than myself.

You have the benefit of the unanimous opinion of the committee on public printing, which seems to have been arrived at as the result of their investigation. You have also the voluminous testimony taken by that committee. If further investigation is desired, you have the power to make it. But unless you are satisfied that eight pages, instead of sixteen, is, in the practice of printers generally throughout the State, estimated as a form, or impression, for book and pamphlet press-work, the rule recognized in the act of 1867 should be considered as explanatory of the indefinite language of the act of 1872, to this extent: that an "impression" is to be composed of sixteen pages for book and pamphlet press-work.

The question of law remains to be considered, whether the act of 1872 prescribed any maximum rate for press work in the fifth class of printing.

It cannot be questioned that if any maximum is fixed for the press work in that class of printing it is "twenty-five cents per hundred impressions," for no other maximum is named in the act for any class of press work. A serious difficulty in the construction of this part of the act arises from the fact that the various kinds of printing are divided into five classes; that parties filing bids or proposals for the work are required to file separate proposals for each class, in which they are required to specify "the price per hundred impressions for all press work embraced in the first, second, third and fourth classes, and the price per twenty-five impressions for the press work contained in the fifth

class, at which the bidder will do the work contained in the class or classes covered by his proposals.' (Laws of 1872, page 614, Sec. 3.)

The clause of the fifth section fixing the maximum rates for press work quoted above, does not separately name any maximum for the press work of the fifth class, at any specified rate per twenty-five impressions, as the proposals for that class are required to be made. If the maximum is fixed at all for this class of press work, it must be included in the clause which specifies press work "twenty-five cents per hundred impressions." It must be conceded that these words are more strictly applicable to the classes of press work which is required to be specified in the proposals as so much per hundred impressions; and not unnaturally, officers charged with their practical enforcement may have construed them as solely applicable to the first four classes of printing. The words are susceptible, however, of a broader interpretation. It should be observed that the constitution is mandatory that "the General Assembly shall fix a maximum price" for the public printing to be let by contract to the lowest responsible bidder. [Art. 4, Sec. 25.]

The law of 1872 purports to regulate the entire subject of public printing, and in obedience to the constitution to fix a maximum price therefor. If we give the fifth section of the act the broader construction, then the General Assembly performed their entire duty in this particular.

If the narrower construction prevails, then it must be held that, without any apparent reason therefor, the General Assembly neglected to perform this part of their plain duty.

At the conclusion of the section it is "provided that no job shall be counted at less than two hundred." In the practical application of the law, no case could arise where it would be necessary to estimate press work at less than two hundred impressions. This being the case, it may have been deemed as convenient as any other mode to fix the maximum for all classes at a specified rate per hundred.

I am, therefore, of the opinion that the section in question should be construed as fixing the maximum rate for the press work of each of the five classes of printing at twenty-five cents per hundred impressions.

It is not improper to add that the vagueness and uncertainty of the language of the statute in the particulars herein discussed, is such as to be greatly embarrassing to the officers charged with its practical construction and enforcement.

In cases of this character, honest differences of opinion as to the true meaning of the law are almost inevitable. I have experienced no small amount of difficulty in satisfying my own mind upon some of the questions presented, and the conclusions to which I have arrived are the result of the best consideration I have been able to give the subject.

I have the honor to be, very respectfully,

JAS. K. EDSALL,
Attorney General.

TO HON. GEO. H. HARLOW, Secretary of State.
HON. C. E. LIPPINCOTT, Auditor Public Accounts.
HON. EDWARD RUTZ, Treasurer.
Commissioners of Public Printing.

On the first day of July, 1874, the new law on State contracts took effect. By its provisions the old board of printing commissioners was abolished, and in its stead the law directed the organization of a board to be known as the Commissioners of State Contracts, which board, by provision of the law, not only took the place of the Commissioners of Printing, but had imposed upon them additional responsibilities and duties, said board to consist of the following State officers, to-wit: Attorney General, Secretary of State, State Treasurer and Auditor of Public Accounts.

In pursuance of said law, the officers above designated did, on the first Monday in July, A. D. 1874, organize as said board of State contracts by the election of a chairman and secretary for the board, and since that date have had frequent sessions for the transaction of business; complete records of which proceedings have been kept at each session of the board.

The contract for State printing aforesaid for the past two years, as provided by law, expired on the 2d day of November, 1874, and in the performance of my duties as Secretary of State, a final settlement of said contract was asked for in order that I might be able to comply with the law and report to your Excellency the total cost to the State for printing under said contract for the past two years.

A meeting of the Commissioners of State Contracts was called for the purpose of examining the accounts and bills of the contractors for State printing, and not being fully advised or satisfied as to their duties and authority under the law and contract aforesaid in making the final settlement asked for, determined to further advise with the Attorney General on the subject, and the following correspondence was had in relation thereto:

LETTER OF THE COMMISSIONERS OF STATE CONTRACTS TO THE ATTORNEY GENERAL.

STATE OF ILLINOIS, SECRETARY'S OFFICE,
SPRINGFIELD, Nov. 17, 1874.HON. JAS. K. EDGALL, *Attorney General*:

DEAR SIR: The contract for the printing for the State during the past two years expired by limitation on the first Monday of the present month: the contractors have rendered their accounts and asked for a final settlement of the same by the Commissioners of State Contracts. In a few days the Board of Commissioners will be called together for the transaction of business, and this matter will be brought before them for their consideration. But before this is done they desire to ask your further advice and opinion on matters in this connection, and, that the subject may be brought fresh to your mind, it is hoped that it will not be considered supererogation in reviewing the action of the State officers upon whom is imposed the duty of passing upon the bills of the State contractors and adjusting the same. As is well known to you, the award of the contract for the State printing done during the two years just closed, was made to Messrs. Ballinchee and Merritt, September 7, 1872, by the then commissioners of State printing, viz.: Hon. Edward Rummel, then Secretary of State, Hon. C. E. Lippincott, then and now Auditor of Public Accounts, and Hon. K. N. Bates, then State Treasurer, and said award and bond for the contract, approved by Hon. John M. Palmer, then Governor of the State.

When the present State officers assumed their duties on the 13th of January, 1873, the work by the State printers under the award had been in progress for more than two months, a large amount of work had been done by the contractors upon the orders of the State department and the General Assembly, and no question of the validity or construction of the award was raised until more than a year afterwards.

A committee of the General Assembly was appointed to inquire into the cost of printing, etc., and to frame a new law, with whose labors and report you are familiar. It was shown before this committee that but one bid was made for the printing, and that at the maximum rates allowed by the law. It was also shown before the committee that the commissioners who made the award were in doubt as to their duty in the premises, and, before making the award consulted with Hon. Washington Bushnell, then the Attorney General of the State, and also with other distinguished legal gentlemen of the State, and upon the advice of all these gentlemen, as was shown before the committee, the commissioners became satisfied that there was no help but to award the contract upon the one bid that was technically and formally made, which was done.

In the month of December last in order that the present Secretary of State might be able to make his report to the Governor of the annual cost of State printing, the contractors were instructed to furnish an itemized account of the work done by them up to December 1, 1873. Up to this date, and not until the January following, was any question raised by any one as to the legality of the award or the correctness of the legal opinions of Attorney General Bushnell on the subject, and the accounts of the public printers, above referred to, were examined, item by item, by the printer expert as provided by law, and certified by him as correct, and then laid before the board of commissioners for their approval. Upon examination by the board it was found that the prices charged for the items in the several classes of work, as designated by the law, were in conformity with the award made by the former Commissioners of Printing and with the original bid filed, and the copy thereof recorded by the former Secretary of State in his office. Thereupon, it appearing that the work having been done in compliance with law, and the prices charged being in accordance with the award aforesaid, the present State officers and Commissioners of State Printing decided that they had no alternative but to obey the law and conform to the award, which had been officially declared by your predecessor as being strictly legal and binding upon the State, and the accounts of the contractors up to the dates mentioned were finally adjusted and allowed, so far as the bills rendered were concerned, errors and omissions excepted; but as the work was not completed, no final settlement of the contract was or could be made then; and also for the reason that in the accounts rendered for paper used for printing blanks, commissions, circulars, etc., the prices charged for paper were not satisfactory, and the bills for such paper were referred to the heads of the various departments for which the work was done to be examined, and if found satisfactory and correct, to be so certified.

In the month of January following the whole subject of printing was thoroughly investigated, and a different construction of the law and the effect of the award arrived at by the committee than that made by the former Commissioners of Printing upon the legal advice of the former Attorney General, and upon which the present commissioners acted in their adjustment of the contractors' accounts in December, 1873, as stated.

The whole subject, in the General Assembly, was finally referred to you, as the legal officer of the State, to advise and instruct the Commissioners as to their future action. Your advice was solicited by the present Commissioners, and your construction of the law proved to be different from that of the former Attorney General, and the advice as to our action in relation to the official award on file in the office of the Secretary of State, contrary to what the Commissioners supposed was their duty. Yet still we most cheerfully comply with the wishes of the General Assembly as expressed by the resolution referred to, and will be guided by your opinion on the subject; but before the final settlement of the contract is made, your opinion and advice is further solicited upon the following questions, viz.:

What would be the proper course for the Board of Commissioners to pursue, in order that justice and equity to the contractors and that the interests of the State may be fairly served, with the accounts rendered and adjusted in December last, as explained heretofore in this communication?

Would it be right, proper or equitable, or in conformity with the resolution of the General Assembly referring the subject to you, for the Commissioners to reopen the adjusted accounts rendered in December last, calculated and adjusted as they were, upon the basis of the award made and the construction of the former Attorney General, and make a new adjustment of the same in conformity with your decision as to the number of pages in a form, and the price of press-work in the fifth class of printing?

Or, in other words, was the resolution of the General Assembly intended, and does your advice to the Commissioners contemplate, the settlement of unadjusted accounts only upon your construction of the law and award? or are they to reopen all the accounts of the State printing contractors from the date of the first order, and compute the same upon the construction given by you?

The Commissioners desire to act in conformity with the law, and at the same time to do justice to all parties interested; not only to the people of the State collectively, but also to every individual citizen of the State. It would be a favor conferred if you would make an early response to the information sought.

We are, dear sir, very respectfully, yours,

GEORGE H. HARLOW,
Secretary of State.
C. E. LIPPINCOTT,
Auditor of Public Accounts.
EDWARD RUTZ,
State Treasurer.

LETTER FROM THE ATTORNEY GENERAL IN REPLY.

STATE OF ILLINOIS, ATTORNEY GENERAL'S OFFICE,
SPRINGFIELD, November 26, 1874.

GENTLEMEN—In your communication of the 15th instant, relative to the contract for public printing for the past two years, you propound the following questions:

"What would be the proper course for the Board of Commissioners to pursue in order that justice and equity to the contractors, and that the interests of the State may be fairly served, with the accounts rendered and adjusted in December last, as explained heretofore in this communication?"

"Would it be proper, right and equitable, or in conformity with the resolutions of the General Assembly referring the subject to you, for the Commissioners to reopen the adjusted accounts rendered in December last, calculated and adjusted as they were, upon the basis of the award made and the construction of the former Attorney General, and make a new adjustment of the same in conformity with your decision as to the number of pages in a form, and the price for press work of the fifth class of printing?"

"Or, in other words, was the resolution of the General Assembly intended, and does your advice to the Commissioners contemplate, the settlement of unadjusted accounts only upon your construction of the law and award, or are they to reopen all the accounts of the State printing contractors from the date of the first order, and compute the same upon the construction given by you?"

In respect to the proper construction of the law as to the number of pages constituting an impression, and the maximum rates which can lawfully be paid for press-work of printing of the 5th class, my views were fully expressed in the opinion furnished your Board on the 15th of April last. So far as any accounts of the late public printers remain unsettled or unpaid, I think that the same should be settled and paid upon the basis of the law as construed in that opinion.

As to any past transactions and accounts which the Commissioners of Public Printing have fully settled and paid under the construction given to the law by my predecessor, as stated in your letter, I do not regard it as within my province to advise the Commissioners to re-open such settlement upon the mere ground that my opinion of the proper construction of the law differs from his.

Very respectfully,

JAMES K. EDSALL.

To HON. GEO. H. HARLOW, *Sec'y of State*;

" HON. C. E. LIPPINCOTT, *Auditor*;

" ED. RUTZ, *State Treasurer*.

Guided by the law, the contract, and the advice of the Attorney-General, a settlement was made with the State printers and the contract finally closed. This settlement shows that the cost of the State printing for the two years ending November 2d, 1874, is \$112,109 57.

Of this amount the contractors have received the sum of \$101,983 26, leaving still unpaid the sum of \$10,126 31—for which the contractors hold approved vouchers.

REGULAR BIENNIAL STATE CONTRACTS.

In accordance with the provisions of the "Act to revise the law in relation to State contracts," in force July 1st, 1874, the Board of Commissioners of State Contracts caused to be inserted in the various daily newspapers provided for by the act aforesaid, advertisements for proposals for State contracts provided to be let, and on the 12th day of September, 1874, the provisions of the law having been fully complied with, contracts were awarded as follows: (1), printing; (2), binding; (3), stationery; (4), book and other papers; (5), copying laws, etc.; (6), distribution of laws. The contracts are as follows:

PRINTING.

1st Class. The contract for the public printing in the first class was awarded to D. L. Phillips at the following prices: Composition per

1000 ems, plain, 15 cents; figure, 15 cents; rule and figure, 15 cents. Press-work per 100 impressions, 25 cents.

2d Class. Awarded to D. L. Phillips, as follows: Composition per 1000 ems, plain, 26 cents; figure, 30 cents; rule and figure, 40 cents. Press-work per 100 impressions, 24 cents.

3d Class. Awarded to D. L. Phillips, as follows: Composition per 1000 ems, plain, 26 cents; figure, 30 cents; rule and figure, 40 cents. Press-work per 100 impressions, 24 cents.

4th Class. Awarded to Thomas S. Pinckard, as follows: Composition per 1000 ems, plain, 28 cents; figure, 50 cents; rule and figure, 65 cents. Press-work per 100 impressions, 12½ cents.

5th Class. Awarded to D. L. Phillips at the following rates: For each election register complete, 5 cents.

6th Class. Awarded to J. D. Roper at the following rates: Composition per 1000 ems, plain, 18 cents; figure, 30 cents; rule and figure, 56 cents. Press-work per 100 impressions, 5 cents.

PRINTING PAPER.

1st Class—Printing paper.—Awarded to the Cleveland Paper Company, of Cleveland, Ohio, at the following prices: Book paper, weighing 45 lbs. per ream, \$4 69; 60 lbs. per ream, \$7 96.

2d Class—Paper for blanks, covers, etc.—Awarded to George W. Chatterton, Jr., of Springfield, Illinois; the aggregate in this class amounting to about the sum of \$5,000.

3d Class—Office stationery, paper, ink, pencils, envelopes, etc.—Awarded to George W. Chatterton, Jr., of Springfield, Illinois; the aggregate in this class amounting to about \$9,000.

BINDING.

The contract for binding in the several different classes was awarded to Henry W. Rokker, of Springfield, Illinois, at the following rates: First class, per volume, 18 cents; second class, per volume, 29 cents; third class, per volume, 17 cents; fourth class per 100 pages, ¾ of a cent; fifth class, per 100 pages, 1 cent.

DISTRIBUTION OF THE LAWS, ETC.

The contract for the distribution of the laws, journals, etc., was awarded to E. C. Matheny, of Springfield, Illinois, at \$350 per annum.

COPYING THE LAWS, JOURNALS, ETC.

The contract for copying the laws, journals, etc., of the 29th General Assembly, was awarded to Wm. P. Emery, of Springfield, Illinois, at the rate of 2¼ cents per 100 words.

FUEL.

On the 17th day of October, A. D. 1874, the contract for furnishing fuel to the State as provided by law, was awarded to J. C. Canfield and P. W. Harts, both of Springfield, Illinois, at the following rates: Shell-bark hickory wood, per cord, \$5 97; other kinds of wood, per cord, \$4 99; bituminous coal, per ton, \$2 49.

The delay in awarding the contract for fuel was occasioned by the throwing out of the bids presented at the date of the first awards, on

account of statutory prohibitions disqualifying the bidders, and necessitating advertising for proposals a second time. No bid for anthracite coal was presented. If any should be required, it will be purchased in the manner provided by law.

Bonds were required for the faithful performance of the several contracts by parties to whom awards were made, in the following sums, to-wit: Cleveland Paper Company, \$10,000; George W. Chatterton, Jr., first, \$4,000, second, \$10,000—\$14,000; D. L. Phillips, four bonds \$10,000 each, \$40,000; T. S. Pinckard, \$10,000; J. D. Roper, \$10,000; E. C. Matheny, \$3,000; Wm. P. Emery, \$5,000; H. W. Rokker, \$10,000; which have been duly executed, and are now on file in this office.

The Commissioners are fully satisfied that the prices at which the contracts were let are very favorable to the State, and that they will be faithfully performed they have no doubt. Practical printers will see at a glance that the prices at which the State printing has been awarded are extremely low. The contractors for the 4th and 6th classes have since the award, with the approval of the Commissioners of State Contracts, made an assignment of their contracts to the Illinois State Journal Company. Notwithstanding the low prices at which the contracts have been let, the experience, facilities and business reputation of the Illinois State Journal Company are sufficient guarantees that the work done for the State will be fully up to the requirements of the law in every respect.

STATE BINDING.

The contract for the binding of the laws, journals, volumes of reports, etc., for the two years past ending November 2, 1874, was awarded by the former State officers in 1872 to Charles Edwards, and by him transferred and assigned to H. W. Rokker. The Commissioners of State Contracts have examined and adjusted the accounts of Mr. Rokker, and from this settlement I find that the total cost of the work under this contract amounts to the sum of \$29,852 90. Mr. Rokker has been paid on his contract the sum of \$26,960, leaving a balance still due him of \$2,892 90, and for which he holds vouchers duly attested.

The quality of the binding in every respect has been fully up to the standard of the work heretofore done for the State and in accordance with law.

The present contract for State binding heretofore mentioned as having been awarded to Mr. Rokker is at prices favorable to the State and at rates much below, in the several classes, of those paid, under any contract heretofore made. Mr. Rokker's reputation as a binder is considered by the Commissioners a sufficient guarantee that the work in the future, as in the past, will be fully up to the requirements of the law.

PAPER AND STATIONERY.

In the absence of any law upon the subject, since the adoption of the Constitution of 1870, regulating the purchase of paper and stationery for the use of the different State officers and the General Assembly, purchases for each office or department have been made independent of the other, by the officer or department using such supplies. The purchases thus made being paid for out of special appropriations made for that purpose, and over which I had only partial control, and as the de-

mands of my office required, I am therefore unable to make the report on the subject required by the law which took effect July 1, 1874. By this law the Commissioners of State Contracts are authorized and instructed to solicit bids for proposals to furnish all the paper, stationery, etc., required for the use of the General Assembly and officers of the State government above referred to, and directs the Secretary of State to report the amount used by each. In my next biennial report this provision of the law can and will be cheerfully complied with. Under its provisions (which practically was not in force until November 2, 1874), the Secretary of State is made the custodian of all paper and stationery, and required to keep accurate accounts with the General Assembly and each of the officers of the State government, of all paper and stationery used by them.

Under the contract for furnishing paper and stationery, heretofore mentioned in this report, the articles contracted for are being received and are duly inspected by myself as well as the Commissioners of State Contracts, in order that the terms of the contract may be properly enforced, and the interests of the State fully protected. With but few exceptions the articles delivered are fully as good as the samples upon which the contract was awarded. All inferior goods have been promptly rejected, and with the few exceptions noted, the articles delivered have been received for and paid.

BOOK PAPER.

Owing to the vast amount of work ordered to be done by the Twenty-eighth General Assembly requiring the use of book paper, a very large quantity of such paper has been used by the contractors for State printing during the past two years. The records of this office show that during the term of the two years' contract for State printing ending November 2, 1874, 3,800 reams of book paper has been furnished upon the order of the contractors for State printing. The amount used by them in the performance of their contract, deducting the three per cent. for waste, as is provided by law, was 3,800 reams. The amount expended for paper and stationery for use of General Assembly and State officers, was \$44,034 30, leaving a balance unexpended of \$5,965 70 to be applied in further purchases.

THE NEW STATE HOUSE.

The new capitol of the State is fast approaching completion, and when finished will be one of the finest structures of the kind in the United States. It was anticipated that the building would be in readiness for occupancy this winter by the General Assembly and State officers, and with that view I had commenced the work of arranging and preparing the papers and records of the State for removal. But after consultation and due consideration among the officers, the idea of occupancy this winter was abandoned for the reasons set forth in the correspondence between the new State House Commissioners and the State officers on the subject, which is given below :

LETTER OF THE COMMISSIONERS TO STATE OFFICERS.

OFFICE OF THE COMMISSIONERS OF THE NEW STATE HOUSE,
SPRINGFIELD, Oct. 31, 1874.*To the Governor, Secretary of State, Auditor and Treasurer :*

GENTLEMEN : The work on the new State House has now so far progressed that we feel warranted in saying to you that the apartments intended for your several offices can be made ready for occupancy on or before January 1, 1875. Also the law library and supreme court room for the two houses of the General Assembly.

It will not be possible, however, to furnish all the store rooms intended eventually for the use of the Secretary of State and Auditor, these rooms being now necessarily occupied as workshops, and cannot well be surrendered. Nor will it be possible, without incurring considerable additional expense, to furnish water for use in the closets and wash rooms. The tanks for the supply will be located in the upper dome, and cannot be put up until that is constructed.

We are not prepared to say that the rooms will be sufficiently dry to make it safe to occupy them. In fact, the heavy rains just prior to the completion of the roof of the east wing so thoroughly saturated the walls and work of the rooms intended for the Governor and Secretary of State, that it is highly probable that the health of the occupants would be endangered ; but we leave it with you whether to remove to the new building or not.

We trust you will advise us as early as possible of your determination, as on that will depend in some measure the order in which we shall prosecute the work in future. If you conclude to occupy your several departments at the time designated, we will be obliged to concentrate our forces on that portion of the work, which we will do only in that event, as it will be more economical and advantageous to prosecute the work more generally, not crowding the workmen together.

It is not necessary for us to call your attention to the nature and condition of the surroundings, approaches, etc., as you are fully advised.

We have the honor to be, most respectfully, yours, etc.

JACOB BUNN,
JOHN T. STUART,
JAMES H. BEVERIDGE,
Commissioners.

LETTER IN BEHALF OF STATE OFFICERS IN REPLY.

STATE OF ILLINOIS,
EXECUTIVE DEPARTMENT, SECRETARY'S OFFICE,
SPRINGFIELD, Nov. 5, 1874.HON. JACOB BUNN, HON. JAMES H. BEVERIDGE, HON. JOHN T. STUART, *Commissioners of the New State House :*

GENTLEMEN : For and in behalf of his excellency the Governor, and other officers of the executive department of State, I have the honor to acknowledge receipt of your official communication of the 31st ultimo, giving the information that the rooms in the new State House designed for the use of the State officers, and the rooms set apart for the temporary use of the General Assembly, would be ready for occupancy on January 1st, 1875 ; but also giving as the opinion of the members of the Board of State House Commissioners that it might not be prudent, and would not be economical, to occupy the building this winter.

Your communication was presented to the several State officers, and the subject matter fully discussed, and after taking into consideration the various obstacles presented by you, it was decided that the interests of the people of the State, and the convenience and comfort of the members of the General Assembly, would be better served by remaining in the old State House.

It is presumed that next spring or summer the condition of the various apartments in the new State House will be such as to justify their occupancy by the officers of the various departments.

With assurances of the highest respect for the members of the Board, I have the honor, gentlemen, to be

Your ob't serv't,
GEO. H. HARLOW,
Secretary of State.

The present State House, as is known to your Excellency, was years ago purchased of the State, to be used by this county as its court house, and the State has occupied it since. It is now desired, and expected by the county officers, that they be permitted to take possession of this building next spring ; and there is no doubt that, with proper effort, all the State offices located in the old State House and other buildings in different parts of the city can be removed to the new State House by June 1, 1875. But in order to do this, with safety to the health of the occupants, and the proper preservation of the books, records, papers, stationery, etc., stored therein, the heaters designed for the use of the several offices should be placed therein this winter, and fuel supplied for heating them, in order that the walls may be thoroughly dried ; else, the objections presented by the Commissioners, and the principal reasons assigned why the building should not be occupied this winter, will still remain.

The following letter from the Secretary of the Board of State House Commissioners will more clearly explain this matter :

OFFICE OF THE COMMISSIONERS, SPRINGFIELD, Dec. 8, 1874.

COL. GEO. H. HARLOW, *Secretary of State* :

SIR: The offices in the main story of the new State House are all plastered, except the private office of the Attorney-General and the finishing coat of the office of the Secretary of State. If you desire to occupy them early next season, it is very important that they be kept thoroughly heated during this winter, to dry out the walls; but as we are limited by the constitution in our expenditures, we do not feel justified in expending the moneys appropriated to building, for that purpose. We will warm those parts occupied by our workmen. If you desire the other parts made fit for occupation, you will take such action as you may deem meet to secure that object.

Yours truly,

JAMES H. BEVERIDGE, *Secretary*.

The subject was deemed of such importance that I at once consulted with all the executive officers of State, all of whom advised me to furnish the necessary fuel and assistance that the exigencies of the case demanded. Thereupon, I wrote the Commissioners, in answer, as follows :

STATE OF ILLINOIS, SECRETARY'S OFFICE, }
 Springfield, Dec. 10, 1874. }

HON. JAMES H. BEVERIDGE, *Secretary of New State House Commission* :

DEAR SIR: I have the honor to acknowledge receipt of your communication of the 8th instant, relating to the occupancy of the new State House, and in reply have to say: After consultation with the officers of the executive department of State, and after the subject matter of your letter had been duly considered, it was decided, for many reasons, that the offices of the various departments, and the ~~main rooms of the State~~, ought, at the earliest day practicable, be removed to the new State House; and in order that there might be no delay, I was advised to take the necessary steps, and co-operate with the Board of Commissioners, in order that the offices and rooms required might be put in readiness for that purpose.

I am, sir, very respectfully, yours,

GEO. H. HARLOW,
Secretary of State.

OCCUPANCY OF THE NEW BUILDING.

The people of the State, through the General Assembly, having, by the erection of the new capitol building, provided new quarters for the various State officers, the supreme court, the agricultural, geological and legislative departments of the State, it will be readily perceived that an additional expense will be incurred by the State in providing for the care and custody of the new State House, and the largely increased expense in the heating and lighting of the same. The new building soon to be occupied by the State officers is an immense structure, magnificent in all its details, and always will be a pride to every citizen of Illinois. The law of the State makes the Secretary of State the custodian of this building, and responsible for the books, papers, property, etc., therein. The duties thus imposed are onerous, and the responsibility very great. I have no desire to shrink from the performance of the duties thus imposed upon me, and I will cheerfully assume the additional responsibility, and to the best of my ability will perform my duty; but I would respectfully suggest to your Excellency, and through you to the members of the 29th General Assembly, that, in order that the Secretary of State may be able to do his duty, they must bear their share of the responsibility, and make such appropriations this session as will be required for the purpose of enabling the Secretary of State to do his duty. Your Excellency is well aware that if the appropriations suggested are not made by this General Assembly, two years will elapse before there can be further action on the subject; and I trust that, as it is now known that the State will be obliged to occupy the building next summer, the General Assembly will appreciate the situation, and not, by neglect, embarrass, not only the custodian of the building, but all the judicial and executive officers, who will be obliged to make necessity a virtue, and occupy the rooms de-

signed for these various departments. I have had no time to make the necessary inquiries and calculations upon which to base an estimate of the amount that may be required to be appropriated for these necessary incidental expenses, but this can soon be ascertained when the subject is referred to the proper committee of the General Assembly, and who, I doubt not, after that due consideration and inquiry the subject demands, will recommend a proper appropriation for the purposes required.

REMOVAL OF STATE ARCHIVES—CLASSIFYING AND INDEXING LAWS, RECORDS, ETC.

One of the most important duties naturally devolving upon the Secretary of State in connection with the removal of the State archives from the "old" to the "new" State House, is the arranging, classifying and perfecting the files and records of the State, and making an index thereto, for ready reference and convenience in this office, and much to the benefit of the people of the State at large.

This work is now being done under authority of an act of the last General Assembly.

State officers, members of the General Assembly, and others who have occasion in any manner to refer to the files and records of the State, on file or deposited in this office, are disagreeably impressed with the confused state of the original papers, and documents and executive records. Since the earliest history of our Territorial or State Government these State papers and records have been accumulating, and now, after three-quarters of a century has past, present a confused and chaotic mass of important documents, without arrangement, classification or index by which reference may be made thereto.

In case of a demand upon this office (which frequently occurs) for a certified copy of an enrolled law, paper or document, or transcript of executive record, a long and tedious search must be instituted to find the particular paper or document wanted, consuming, or rather, wasting, valuable time of clerks whose time and services are urgently demanded elsewhere in the discharge of legitimate and specific duties. In some instances, days have been spent in searching for a single paper, which, with a carefully prepared index, could have been found in five minutes by any well informed and competent clerk. Nor does the trouble always end in success; the chances are even against success. It frequently happens that the search is given up before the paper has been found, and if ever found it is the result of accident, and turns up while searching for another document, under similar circumstances, and ends again in failure, annoyance and perhaps loss.

This was and is still the case with the enrolled laws, with the exception of those of the 26th and 27th General Assembly, which were temporarily indexed by my predecessor, and those of the 28th General Assembly have been similarly indexed by me. With this exception, all the enrolled laws on file since the earliest organization of the Territorial and State Governments are without arrangement, classification or index.

It is my purpose to classify and arrange the files and records as systematically and convenient as possible, and to index so fully and comprehensively that any clerk familiar with them can, in a few moments, produce any paper or document, or refer to any executive record in the office. To do this will require considerable time, and a large amount of clerical labor. The supervision of this work will, of necessity, increase

my labors and responsibilities, and although not imposed by the law, I assume it willingly, with no wish or desire for further remuneration than the satisfaction of knowing that when completed the results will be of incalculable value to the people of this State, and a convenience which cannot fail to be appreciated in the years to come, growing more and more useful and important as the years recede.

The plan adopted by me in this, in my opinion, most important undertaking, is, in brief, as follows: Commencing with the Territorial organizations, embracing the Northwestern Territory, organized in 1788; the Indiana Territory, organized 1801; Illinois Territory, organized 1809, each exercising legislative and executive jurisdiction within the present limits of this State during the several periods of their existence. The files and records relating to these Territorial Governments will be collected, and, so far as possible, all missing papers replaced by certified copies from the printed records, or transcripts from the originals whenever and wherever they can be found. Then, commencing with the organization of the State Government in 1818, the same course will be pursued, the object being to make full and complete files, forming an archive of the State, in which may be traced, with reasonable accuracy and genuine satisfaction, its political history properly authenticated.

To do this many important papers and documents, and, in some instances, the acts entire of a legislative session must be replaced with certified copies, the originals having been lost or misplaced, and not to be found. In such cases the certified copies are made from the regular authorized edition of the printed laws of the Territory or State, when they can be obtained, or, in the event of no printed copy being obtainable, from manuscript copies taken from the printed laws in the hands of private parties. As the State is not in possession of complete files of the printed editions, either of the Territorial or State laws, I have been under the necessity of relying upon private enterprise and generosity to supply many lost and missing laws. To Wm. L. Gross, of this city, compiler and publisher of Gross' Revised Statutes of Illinois, and who is now engaged in collecting for publication all the laws which have ever been in force in this State or the territories above mentioned, I am indebted for this favor. Mr. Gross has kindly given me access to his complete and valuable collection, from which I have caused certified copies to be made of all those not in the possession of the State, so far as I have been able to do in the progress of the work. As there remains many gaps in the files yet to be filled, the extent of these favors cannot now be stated. I take pleasure in thus publicly acknowledging my obligations to Mr. Gross for the favors already conferred.

The plan of the indexes is at once as simple, systematic and comprehensive as experience, the wants of the office, and the good of the public would seem to indicate. And while absolute perfection is not expected or promised, my confidence in the system adopted is such that I have no fears as to its success. The following explanation will give a very correct idea of the plan adopted:

First—There will be an index to all the original enrolled laws on file, under each important appropriate head, designating the number of the box and file in which the enrolled law may be found. In case of application for reference, the subject being known, the law can be readily found and referred to. This will be called the "Index to the Enrolled Laws."

Second—There will be a “General Index,” in which under appropriate headings and subjects will be entered an index to all papers and documents on file not included in the index to the enrolled laws.

Third—Each book in which has been entered the acts and orders of the Governor, will be indexed and classified in such manner as to conveniently refer to the acts of the different chief executives since the organization of Illinois territory. This will be known as the “Index to the Executive Records.”

Fourth—In addition to the foregoing, and in a manner duplicating all three, will be a “County Index.” This index will be classified by counties, and under each county heading subdivisions of subjects will be made, and under these subdivisions will be entered indexes of every subject matter in any law or executive record in any manner affecting such county. The object of this index is to supply a want long felt, and to create a kind of general encyclopædia of information, for the benefit of the public, which is constantly calling upon the Secretary of State for information upon all kinds of subjects, which happened sometime in the history of the State. To illustrate: A. B., county clerk of county, writes to know “whether a public road was authorized to be laid out through this county, by the Legislature. It is *very important* that our people should be advised upon this point.” Without date, without knowing even what road is referred to—without knowing anything, in fact, except that the people of blank county want to know about a certain road, the Secretary is expected to furnish this “important information” without delay. When completed, from this index can be learned whether or not any law passed by the Territorial or State Legislature, or order of the Executive has affected any given county in the State, and the Secretary of State can then give an intelligent and satisfactory answer to the many demands for information of the character above described.

The importance of these indexes, as a convenience to this office, is difficult to appreciate, and its value to the public is more likely to be under than over estimated by those not conversant by actual experience with the demand upon this office in the regular course of business. It is a matter too long neglected already, and its completion is alike demanded by public interest and economy. In my years of practical experience as a clerk in the State department, as well as in the capacity of principal, I have seen and felt the necessity of this work, and I only follow the example of my predecessors, who also “learned in the school of experience,” in calling the attention of the General Assembly, through your Excellency, to a matter of such pressing and growing importance, and I most respectfully ask that you recommend such appropriation for the necessary clerical labor which may be required to continue the work, as in the good judgment of the members of that honorable body may seem best.

Your Excellency will pardon me for dwelling upon this subject, and giving to it the prominence it occupies in this report. But I feel justified in treating it as I have, and calling attention to it in so conspicuous a manner, for in my judgment the importance of the subject demands it. Each year adds to the difficulties and expense attending the prosecution of the work, increases the danger of loss among the files, and thus lessens the value when completed. Important laws, papers and documents now possible to be obtained with reasonable trouble and expense, ere long will pass beyond the possibility of recovery at any cost. The pro-

gress of the work thus far has of necessity been slow and tedious, yet very satisfactory results have been obtained, considering the difficulties and perplexities attending the commencement of so vast an undertaking. One thing has been demonstrated beyond a possible doubt, namely: the necessity and importance of continuing the work to completion.

In this connection, I would also respectfully suggest to your Excellency the necessity and importance of the enactment of a law by the General Assembly in relation to the certified copies of enrolled laws heretofore mentioned as missing from the files of this office, and being made from the authorized printed editions. These certified copies should be placed, so far as the law can do so, on an equal footing with the original copies. As has been stated, in many instances, neither the original enrolled law, or the authorized printed edition containing the law, is in the possession of the State, the certified copies having been made from books owned by private individuals. In order that a certified copy of these certified copies may be used as evidence in the courts, should it in the course of litigation become desirable to do so, a law upon the subject is necessary.

CENSUS REPORTS.

There is a law specifying who shall have the care and custody of the copy of the census returns required to be made by the United States Marshals to the State government, but no law upon the statute book in relation to taking the census of the State, by authority of the State. In my opinion, it is a matter of great importance to the people of Illinois that there should be some means of ascertaining the population, wealth and resources of the State, independent of that employed by the general government, which information should at least be collected and published every ten years, if not oftener, not only for our own citizens but for the information of foreigners who may be seeking a home in the great west. Duplicate copies of the census taken by authority of the general government in 1870, are now stored in the basement of the State House, a huge mass of manuscript of no use in its present condition to any one. If the General Assembly see fit to authorize a continuation of the work of indexing heretofore set forth, these returns can be placed in a much better condition and made available for reference if desired. This whole subject deserves the serious and thoughtful consideration of the General Assembly, and to which I trust your Excellency will call attention.

STATE LIBRARY.

By statute, the Governor, Secretary of State, and State Superintendent of Public Instruction constitute the Board of Commissioners for the State Library, of which board the Governor is president, and the Secretary of State is made State librarian; but the detail duties of the position, and care of the books and the keeping of the records of such as may be desired by the State officers and members of the General Assembly, have been and are still performed by Mrs. E. M. Boilvin.

My predecessor, in his first biennial report, says that when he assumed the duties of the office of Secretary of State, that the library was in a deplorable condition so far as the number, quality and condition of books were concerned. He also reported the purchase of seven thousand dollars worth of books in 1869, which in a measure, but only partially so, gave the library a respectable status. In his last biennial re-

port, my predecessor says: "There was no appropriation by the 27th General Assembly for replenishing or adding to the State Library, and in consequence, but few books have been purchased, and none except such as were believed to be invaluable or seemed indispensable; these were paid for from the regular annual appropriation of \$500 made for that purpose by an act of the General Assembly, approved February 16, 1865."

For the past two years the condition of the State library has not changed. The annual appropriation of \$500 mentioned in the above extract, lapsed by the provision of the new constitution, and was not renewed or any other appropriation for the library made, by the 28th General Assembly, for the reason that there was no room in the building now occupied by the State to store books if purchased, and therefore, no appropriations were asked for. The small balance left from former appropriations, so far as required, has been expended; and when deemed necessary, the expenses of the State library have been paid from the incidental appropriation for this office.

The following miscellaneous works have been added to the State Library within the past two years by purchase, exchange, gift, or as otherwise noted below :

Date received.	Title of book.	Name of donor.	Name of author.

The system of exchange, for many years in vogue between the State and territories, still exists, and by this means the law department of the library has been kept fully supplied with the printed volumes of laws, journals, reports, etc., of the States and territories.

From this source, since the date of my predecessor's last report, there has been received and added to the library fifteen hundred and seventy-one volumes, embracing the statutes of the States and territories and of the United States; reports of the supreme courts of the States and of the United States supreme court, congressional documents, department reports, assembly journals, legislative documents and reports, geological reports and surveys, reports of State officers, etc., etc. It should be understood that, of the number received, many are in duplicate, while of others, several hundred volumes may be of the same publication—as in the case of the United States Statutes—so that less than one-half of the whole number receipted for in any year are actual additions to the library, and placed upon the shelves. These volumes have all been properly cared for, and disposed of when received, either by being placed upon the shelves, or put in store for future use. The surplus volumes published by this State, have also been properly preserved.

I take pleasure in acknowledging the receipt of the following newspapers and magazines donated to the State library by the several publishers thereof:

NEWSPAPERS.

- Daily Illinois State Journal, Springfield, Illinois.
- .. St. Louis Democrat, St. Louis, Mo.
- .. Leader, Bloomington, Ill.
- Weekly Republican, Joliet, Ill.
- .. Tazewell County Republican, Pekin, Ill.
- .. Anti-Monopolist, Bloomington, Ill.
- .. Independent, Grayville, Ill.
- .. Sentinel, Centralia, Ill.
- .. Gazette, Champaign, Ill.
- .. Herald, Washington, Ill.
- .. Carroll County Mirror, Mt. Carroll, Ill.
- .. Bureau County Herald, Princeton, Ill.

MAGAZINES.

- The Gem of The West, Chicago, Illinois.
- The American Bibliopolist, New York City.
- The Old and New, Boston Mass.

THE NEW STATE LIBRARY.

The design and arrangement of the rooms for the State library in the new State House contemplate the division of the books of the present library into two classes, and that each class be placed in a separate room. The room designed for the library of miscellaneous books, and which will consist of all classes of books, embracing historical, biographical, poetical, scientific, travel, fiction, reference, periodical, sacred or secular, will be located in the west wing of the new State House, on the same floor with the halls of the two houses of the General Assembly, and in close and convenient proximity to each. This will be one of the finest, most convenient, well lighted and elegant rooms for which it was designed, in the United States. The dimensions are 44 by 79 feet; from floor to ceiling 48 feet, and will be finished by two tiers of alcoves for the reception of books, the second tier of which will be reached by an iron stairway and surrounded by a gallery of the same material, tastefully designed and finished. At each end of the main floor of this

library will be a reading room, each 18 by 44 feet, designed for the use and occupancy of the members of the General Assembly during its sessions. In the alcoves will be appropriately arranged the miscellaneous books now composing the State library, and which will fill two or three perhaps, of the thirty or forty alcoves set apart for this purpose. That the present State library of Illinois is a small and insignificant affair no one denies who has seen it; indeed, there are a score or more citizens of the State whose private libraries are larger and more valuable; but if this fact is not now evident, it will be if the present number of books are placed in the new library rooms without extensive additions thereto.

Illinois now occupies the proud and honorable position of the fourth if not the third State in the Union, so far as population and wealth is concerned, and does she not stand equal to any State where the intelligence and educational interests of her people are considered? If this is true, the library of the State should be as complete and valuable in every respect as that of any other State. In order to make it so, the members of the General Assembly have a duty to perform, which they not only owe to themselves, but to the reputation of the proud name of our State. To make the library what it should be will require the expenditure of money, and that must be appropriated by the General Assembly. The appropriation should be liberal, in order that the thousands of books needed may be placed upon the shelves of the new library room by the time the members of the 30th General Assembly are called upon to take their seats in the new and commodious rooms designed for their use in the new capitol building.

The room designed for the library of laws, journals, etc., and in which will be placed the volumes from the different states and territories, is on the main floor of the State House and adjoining the office of Secretary of State. This room is large, well lighted and commodious, and arranged with alcoves two tiers high, in which will be placed the books as they are received from the several states and territories.

As there will be an entirely new classification of the books in both libraries when the State offices are removed to the new capitol, I have decided to make no change in the catalogue as now printed, or a rearrangement until that time.

Two years ago, the Secretary of State, in his report, estimated the number of volumes in the library as follows:

Miscellaneous works.....	2,550
Publications of U. S. and the different states.....	7,000
Surplus " " " " stored in basement.....	3,000
Surplus Illinois State publications, laws, etc., stored.....	20,000
Duplicated copies and incomplete miscellaneous works.....	200
Total	32,750

There has been bought and received in exchange, donations, etc., 1,603 volumes. Taking my predecessor's figures as a basis of calculation, the number of books now in the library and in store, is 34,353 volumes. It will be observed that only a small proportion of the whole number consists of miscellaneous works, there being of this class only about 2,582 volumes.

I would respectfully suggest to your Excellency the calling attention of the General Assembly to the important matter of making suitable appropriations, in order that the Library Commissioners may be able to make the library of Illinois, as it should be, one of the most complete and valuable State libraries in the country.

WEIGHTS AND MEASURES.

By the provisions of the "Act to revise the law in relation to weights and measures," in force July 1, 1874, the Secretary of State is made *ex-officio* State Sealer of Weights and Measures, and has the care and custody of the authorized public standard of weights and measures.

For a number of years the State has been in possession of the United States standard weights and measures, consisting of—

First. A set of weights from 50 pounds to 1 pound avoirdupois, and troy; a set of avoirdupois ounce weights from 8 ounces to .0001 of an ounce; a set of troy weights from 10 ounces to .0001 of an ounce.

Second. One standard yard.

Third. A set of liquid capacity measures, comprising the gallon, half gallon, quart, pint and half pint.

Fourth. A standard half bushel.

But the State has not been in possession of the balances required to make the proper tests.

In order that I might make myself perfectly familiar with the *modus operandi* of testing weights and measures, and to procure such information as would enable me to intelligently give instructions as to the preparation of a suitable room in the new State House in which to place the weights and measures, and apparatus necessary in the discharge of my duties in that respect, and also to make arrangements for the State to receive the elaborate and costly balances to be furnished by the general government for the use of the State, I visited Washington and had a very interesting interview with J. E. Hilgard, in charge of the office of United States weights and measures, who spared no pains to give me all the information desired on the subject of weights and measures, and in explanation of the best modes of testing and comparing the same by the standard.

He also furnished me with such information as has resulted in the fitting up of a room in the new State House to be exclusively devoted for the use of the custodian of the standard weights and measures, and in which will be placed the elaborate and expensive balances used. Mr. Hilgard also agreed to exchange the avoirdupois and troy weights, and the yard measure, which had become broken or damaged by reason of the dampness of the basement of the State House in which they have been kept, supplying the State with new and complete sets without extra charge.

The articles above mentioned are made of heavy, solid brass, and were furnished to the different States under and by authority of a joint resolution of Congress adopted in 1838. The standards being ready before the balances, they were distributed to the States before the latter, Illinois receiving her share many years ago; but the balances, for lack of a suitable fire-proof building or room, in which to place them, were never sent. But this objection being now obviated, I am daily expecting to receive them, and when received they will at once be placed in the room intended for them, heretofore mentioned. No State will then be better prepared to carry out and enforce the provisions of the very important law in relation to weights and measures than Illinois.

ENFORCEMENT OF THE LAW.

Prior to the law which took effect July 1, 1872, the surveyors of the various counties were made *ex-officio* county sealers of weights and

measures; but under the provisions of the revised law now in force the county clerk of each county has this duty imposed upon him, and is now *ex-officio* county sealer of weights and measures. It is impossible for me to know the operations of the law in the various counties. Although *ex-officio* state sealer of weights and measures for nearly two years, I have not been called upon by a single county officer to test any county weights or measures. Since the new law took effect quite a number of county clerks have written me on the subject asking information that would enable them to procure the standards required by the law; but not a single set of weights or measures has been sent to me to be tested by the standards fixed by law. As this is a new duty to county clerks its importance and the good resulting to the people of the various counties of the State by its enforcement, doubtless is not fully appreciated. In my estimation and judgment I consider this law, which is made for the good of the whole people, but more especially the poorer classes of consumers, one of the most important on our statute books. If strictly enforced, as it should be in every detail, it would be a guarantee to the buyer of all the necessaries of life. Thus protected they would get full measure and full weight in all their purchases, which I regret to say in many cases is not now done.

The law fixes the weight of certain enumerated articles that are now sold by the bushel. There are a number of other articles in which there is a large and extensive trade in our State, which in my judgment it would be well to add to the list already designated by law; and I would respectfully suggest that the legal weights of the following articles be fixed by law, and added to the list alluded to, viz :

Hungarian Grass Seed, per bushel.
Orchard Grass Seed, per bushel.
Red-top Grass Seed, per bushel.
Millet Seed, per bushel.
Broom-corn Seed, per bushel.
Top Onions, per bushel.
Osage Orange Seed, per bushel.

Peas, per bushel.
Charcoal, per bushel.
Coke, per bushel.
Beef and Pork, per barrel.
Flour, per barrel.
Whitefish and Trout, per half barrel.

STATE GEOLOGICAL COLLECTION.

By the act organizing the Geological Survey of Illinois, the Secretary of State was made the custodian of the collection of minerals and fossils to be accumulated in the prosecution of that work, probably without any definite realization as to what such a collection would comprise, and under the supposition that the results could be conveniently and readily placed in his office and retained under his charge, without serious inconvenience or responsibility in relation thereto. Up to the present time no change has been made in the law as relates to the custody and preservation of the collection, except to repeal the provision placing it in the care of the Secretary of State, and thus virtually leaving it without any one being held responsible for its safe keeping.

The collection is now one of the largest and most complete that has perhaps ever been brought together in the prosecution of a survey of this kind, and I feel assured that by a judicious disposition of the duplicate specimens belonging to the survey, in exchanging with other States and foreign countries, it could easily be made one of the largest and most complete geological museums in the United States.

No provision has yet been made for its preservation as a State cabinet, and no permanent place provided for its reception; the rooms originally set apart for it in the new State House having been subsequently assigned to the agricultural department, and no person has been espe-

cially charged with the responsibility of taking care of it, or with preparing and arranging the specimens for exhibition in a public museum. The State Geologist has virtually had the care of the collection to the present time; but as his duties and responsibilities end with the publication of the sixth and final volume of his report, to be printed during the coming year, it seems important that some provision should be made for its care by legislative authority, if the collection is to be retained as a State cabinet; if not to be so kept, to provide for its final disposal in some other way, so that the results accumulated with so much labor may not be entirely lost. Temporary quarters have been assigned to the collection in the basement story of the new State House; but it only remains there on sufferance, and is liable to be removed whenever the rooms it now occupies may be required for some other purpose.

The paper required for printing the fourth and fifth volumes of the State Geological Survey was purchased and the volumes bound as required by law, at an expense of \$10,336 40, an appropriation having been made for that purpose.

The sixth and last volume of the report will be published the coming year, appropriation for which has been made, but as yet no expenses have been incurred or outlays made in the publication of said sixth volume.

LEGISLATIVE MANUAL.

An annual or biennial legislative manual for the use of the members of the General Assembly at the commencement of each session of that body, has always been in great demand by the members thereof and others interested. This demand, in a limited manner and with imperfect work, has been supplied by private individuals. If of value enough, it ought to be published by authority of the State, and thereby give to the members of our legislative body something upon which they can depend. This subject was alluded to by my predecessor in his last report, as follows:

"I would respectfully suggest and recommend that the Secretary of State be authorized to compile and publish, in connection with his usual report, a manual, to contain the Constitution of the United States and of the State of Illinois; complete lists of all State and county officers; the officers of the several State institutions; the judiciary of the State; the population of the United States and of this State; the returns of the regular State elections, and such other matters for reference as are usually contained in the legislative manuals published by the authority of many of the older States."

No action on the subject was taken by the last General Assembly, and while the preparation for publication of a work like this, or manual recommended by my predecessor, would add to the labor of this office during a very busy season of the year, yet I cannot ignore the value and usefulness of such a manual when issued, and I would respectfully call attention to the subject and suggest that such steps be taken by the General Assembly as may seem proper by the members thereof.

APPROPRIATIONS.

I have hereinbefore alluded to the necessary appropriations required to be made for incidental expenses, State Library, etc. In addition to these matters, the General Assembly will be required to provide for the

expenses of the various departments of State, and the proper committee of that honorable body will doubtless recommend such sums for that purpose as, in their good judgment, may seem just and proper. The requirements of this branch of the Executive Department of the State will, at the proper time, be brought before the committee for their consideration and action.

DEFICIENCIES.

It is presumed that in the expenditures from the various appropriations made by the General Assembly, the greatest care and utmost economy is used in disbursing the same. Experience has shown, however, that deficiencies in the appropriations for the current expenses of a State officer and State institutions have and will, necessarily, occasionally occur. This, no doubt, is owing in a great measure to the impossibility of the General Assembly to provide specifically for all the expenses of an office or State institution, or to guard against any contingency that may arise in connection therewith. With this knowledge as my guide, I have, in the expenditure of appropriations over which I have control, been as guarded as possible consistent with the prompt and faithful discharge of the various duties imposed upon me by law; and I am truly gratified to be able to state that during the past two years no expenditure has been made or indebtedness incurred in excess of the appropriation made for any specific purpose; and it is with more than ordinary satisfaction that I am able to inform your Excellency that I have no deficiencies to report, and that every bill for work performed or materials furnished up to the date of this report has been promptly paid.

Under the act in relation to State contracts, the Commissioners of State Contracts were directed, and did, as hereinbefore stated, contract for and purchase a large amount of paper and stationery for the use of the State departments and the General Assembly for the next two years, ending November, 1876, but for the payment of which the General Assembly made no special appropriation; and therefore the cost of such stationery, as fast as received, has been paid from the appropriation made by the last General Assembly, but which was only designed to be sufficient to defray the cost of these articles until the first of July next. It will be seen, therefore, that in order that there may be no delay in the payment for the paper for the use of the General Assembly that will be required, further appropriations will be needed as soon as possible after the meeting of that body.

As hereinbefore reported, there is still \$1,098 54 in the appropriation for incidental expenses that can be used for the purposes provided for; but to defray the expenses of the 29th General Assembly, that body will be required to make further appropriations, as the amount stated will not be sufficient to cover the estimated expenses thereof, and I will not feel authorized to incur any indebtedness therefor.

SUPREME COURT REPORTS.

Prior to July 1st, 1874, the law of the State authorized and instructed the Secretary of State to purchase from the official reporter of that judicial tribunal such number of the reports of the Supreme Court as were requisite to supply the various courts and State's Attorneys of the State. These reports were purchased and sent to the various courts

and officers as provided by law ; but this, with other laws, was repealed, and since July 1st, 1874, no Supreme Court reports have been purchased by the Secretary of State, and none distributed. This repeal of the act aforesaid does not seem to be generally known by the county officials and State's Attorneys throughout the State, and I am frequently in receipt of letters asking for information as to the cause of delay in the delivery of these reports as heretofore, and desiring to know in what manner and by whom the reports are to be distributed. Section 60 of the act to revise the law in relation to State contracts, page 1,004 Revised Statutes, reads as follows :

"§ 60. The reports of the decisions of the supreme court, shall be distributed as follows, viz: Five copies to the library of Congress, one copy to the President of the United States, one copy to each State and Territorial library, one copy to each judge of the superior court of Cook county, one copy to each clerk of a circuit court, one copy to each law institute in this State, one copy to each State officer required by law to reside at the seat of government, five copies shall be deposited in the State library, and five copies in each supreme court library."

It seems that the law thus provides for the distribution of a class of books not published by the State, and over which the Secretary has no control. If it is the desire of the General Assembly to provide for the distribution of the reports as the section of the act recited directs, some law must be enacted giving him the power to perform this part of his official duty, no law being in force to that effect. I have distributed as required by the former law between Jan. 13, 1873, and July 1, 1874, three thousand two hundred and twenty-two volumes of supreme court reports, and paid therefor the price fixed by law—\$6 per volume—which amounts to the sum of \$19,332.

This is a subject of considerable importance to the various courts and officers to be thus supplied by the State with these important reports, and I feel it to be my duty to call the attention of your excellency to the matter, in order that such suggestions may be made to the General Assembly, as in your judgment the subject demands.

SENATE AND REPRESENTATIVE HALLS.

As custodian of the State House, it is my duty to prepare the Senate and Representative halls for the use of the members of the General Assembly. It was supposed until late in the fall that temporary rooms could be used by the General Assembly in the new State House, but this idea was abandoned as before stated, and I at once commenced the renovation and repairs of the old halls for this purpose. I found the carpets, upholstery, furniture, etc., in a worn and dilapidated condition, so much so as to seemingly necessitate the purchase of at least new carpets; but this expense would have been so heavy I concluded not to incur it, but to do the best I could under the circumstances, and I have now a number of extra laborers at work washing and cleaning the rooms and carpets with a view to putting them in a clean and comfortable condition, and hope to have everything in readiness by the time the session convenes.

CONCLUSION.

In closing this my biennial report to your excellency, I desire to say that I have endeavored to fully comply with the requirements of the law directing the report to be made. I have made it as brief as possible

consistent with the varied subjects and information thereon directed by law to be given. The official duties of the commissioners of printing under the former law, and the board of commissioners of State contracts under the present law of the State, are so closely interwoven with the duties of the Secretary of State, and have such close connection with the matters upon which he is directed to report, that I found it would be very difficult to give a satisfactory statement of the letting of contracts and settlements of same without referring somewhat at length to the action of these boards. In all matters which have been before the board of commissioners of State contracts, there has been perfect harmony and a desire on the part of all the members to faithfully and impartially perform the extra and special duties imposed upon them by the act making them members of the board, and I but reflect their views when I say that so far as the operation of the new law in relation to State contracts can be ascertained, it is very satisfactory, and in all its details seems to fully carry out the intention of the General Assembly enacting the law.

I now submit this report, fearing that in some respects it may be imperfect; omissions may have occurred and the varied subjects treated may not have been as clearly set forth as desired; but I have given its preparation all the time I could possibly spare and at the same time attended to the necessary current work that I am compelled to perform in the discharge of my duties, and have endeavored to faithfully report all of the official transactions of this office in detail as fully as is contemplated by the law requiring the report to be made.

I have, to the best of my ability, systemized the work of the office and the various duties and matters over which I have control. Each one of my assistants and every clerk and employe has his or her special duty to perform, and in all of them I have found the most sincere and earnest desire not only to perform their several duties, but also willing at any and all times to do such extra work as might be required in the prompt discharge of the business of this office. The labor of thoroughly systematizing the work of this department of State will still be continued, and I hope and confidently expect to report most excellent progress in the future.

Very respectfully submitted,
GEO. H. HARLOW,
Secretary of State.

APPENDIX.

*Alphabetical List of Cities, Towns and Villages in the State of Illinois,
transcribed from the official records in the office of the Secretary of
State.*

REPORT
OF THE
ATTORNEY-GENERAL.

DECEMBER, 1874.

REPORT OF THE ATTORNEY GENERAL.

STATE OF ILLINOIS,
ATTORNEY GENERAL'S OFFICE,
SPRINGFIELD, Dec. 31, 1874.

TO HON. JOHN L. BEVERIDGE, *Governor* :

SIR : In pursuance of § 21, Article V, of the Constitution, I have the honor to submit the following report of the official business transacted by the Attorney General since January 13, 1873, the commencement of the official term of the present incumbent of that office.

The schedule hereto annexed, marked "A," contains a list of the causes (65 in number) in which the People of the State were interested, and which were submitted to the Supreme Court of the State upon briefs and arguments, either oral or printed. This schedule shows the nature of each case, the term of the court when submitted, and the decision of the court, so far as decided.

At the October term, 1873, of the Supreme Court of the United States, an appeal was prosecuted from the decree of the Circuit Court of the United States for the Northern District of Illinois in the case of *The Merchants' National Bank v. Jno. W. Tappan*, collector of taxes in and for the town of South Chicago, in the county of Cook. In that decree the U. S. Circuit Court had perpetually enjoined the collection of State, county and other taxes levied upon the shares of stock in the Merchants' National Bank of Chicago, upon the alleged ground that the statute of the State authorizing the taxation of the shares of stock in National Banks, was unconstitutional. The amount of taxes enjoined in that particular case was \$4,005 64. There were seventy-eight other cases pending in the same court, in most of which injunctions had been granted, restraining the collection of similar taxes upon such shares of stock for the years 1871 and 1872.

A motion to dissolve these injunctions was argued in the United States Circuit Court, but that court declined to change its ruling until the question had been passed upon by the Supreme Court of the United States.

The decision of the case in which the appeal was prosecuted would not only determine that case, but all others of a similar character pending in the Circuit Court, as well as the general question as to the validity of our statute authorizing the taxation of the shares of stock in National Banks. The cause was argued in the Supreme Court of the United States in March, 1874, and on the 9th day of April following the court rendered its decision reversing the decree of the Circuit Court, and sustaining the validity of that portion of our revenue law pertaining to the taxation of National Banks.

In the fall of 1873 and the winter following, numerous bills for injunctions were filed in the Circuit Courts of the State, to restrain the collection of the taxes assessed by the State Board of Equalization against the capital stock of corporations, and upon other property. So far as practicable I appeared and resisted such injunctions in behalf of the State; but, it became apparent that no decision of those courts could settle the questions of law involved, and such action was taken as to procure final decrees in several of the cases to be entered in the Circuit Courts in time to submit the same to the Supreme Court of the State on appeal at its last January term.

This was done, and in June following that Court decided one of the cases involving the principal questions, *Cook v. R. R. I. and St. L. R. R. Co.*, sustaining the validity of the action of the State Board of Equalization in respect to the assessment of the capital stock of corporations. This decision settled the legal questions involved, and substantially determined all of the cases pending in the State courts; and it was but a formal matter to procure a dissolution of such injunctions in those courts.

The non-resident stock holders in many of the railroads of the State filed bills in the United States Circuit Courts for the Northern and Southern Districts of this State, and obtained injunctions restraining the collection of the taxes assessed by the State Board of Equalization upon the capital stock of such railroads. Motions to dissolve such injunctions were fully argued in the Federal courts in June, 1874, which were taken under advisement by the court, with the understanding that decisions would be rendered at an early day. As yet, no final decision has been made by the Circuit Courts of the United States in any of these cases. Should the decision of that court be adverse to the interests of the State, it will be necessary to prosecute one or more appeals of the cases to the Supreme Court of the United States. A list of this class of cases is hereto appended, marked "Schedule B," in which it was necessary for the Attorney General to appear to protect the interests of the State.

At the September term, 1872, of the Supreme Court of the State, the case of *Munn and Scott v. The People*, was submitted to that court in the Northern Grand Division, and the case taken under advisement. During the following vacation, the court ordered a re-argument of the case, and the same was placed upon the docket for that purpose at the September term, 1873.

This case possessed unusual importance, inasmuch as it involved the question of the power of the General Assembly to establish by law maximum rates for the storage and handling of grain in public warehouses.

On the 30th of January, 1874, the court filed an opinion sustaining the validity of the act of April 25, 1871, requiring public warehousemen to take out licenses, and fixing the maximum rates of storage, and affirmed the judgment of the court below.

The appellants filed a petition for re-hearing in the case, which was denied at the September term, 1874.

The cause has since been taken to the Supreme Court of the United States on writ of error, sued out by Messrs. Munn and Scott, where it is now pending and undetermined.

There is also pending in the same court the case of the *O. & A. R. R. Company vs. The People*, on appeal from the decision of the Circuit

Court of the United States for the Southern District of Illinois, in which that court refused to take jurisdiction, on *certiorari* to the Circuit Court of Sangamon county, of the suit instituted against that company under the act of May 2, 1873, "to prevent extortion and unjust discrimination in the rates charged for the transportation of passengers and freights on railroads," etc.

I am engaged in the preparation of arguments in these cases, to be submitted to the United States Supreme Court at its present session.

There have been commenced in the Circuit Courts of the State nine suits under the same act, as appears from schedule "C" hereto annexed. In three of these final judgments have been recovered in the Circuit Courts, all of which have been appealed to the Supreme Court of the State. It is expected that a sufficient number of these cases will be submitted to the Supreme Court at its next January term, to obtain from that court a decision upon most of the important questions which are raised as to the validity and constitutionality of that law.

No inconsiderable portion of the labor required of the incumbent of this office is found to arise from the provisions of the Statute making it the duty of the Attorney-General "to consult with and advise State's Attorneys in the matters relating to the duties of their office." * *

"To consult with and advise the Governor and other State officers, and give, when requested, written opinions upon all legal or constitutional questions relating to the duties of such officers respectively." *

"To give written opinions, when requested by either branch of the General Assembly, or any committee thereof, upon constitutional or legal questions." Rev. Stat. of 1874, p. 173, § 4.

At the request of the various State officers and State's attorneys of the different counties, 233 written opinions have been prepared and furnished upon constitutional and legal questions touching their respective official duties.

A record of these opinions has been kept as required by the Statute, and the recorded opinions occupy 350 pages of a large sized record book.

The appropriations necessary to carry on and discharge the duties of this office is estimated at \$2,500 per annum for clerk hire, and \$2,000 per annum for necessary contingent expenses.

I have the honor to be, very respectfully,

JAMES K. EDSALL,
Attorney-General.

Schedule "A."

CASES IN SUPREME COURT, JANUARY TERM, A. D. 1873.

The People of the State of Illinois v. Wm. H. Coons, et al. Original suit. Debt on Collector's bond. Issue of fact to be tried in Clark county.

The People, etc., v. W. W. Hastings, et al. Debt on Collector's bond. Submitted on agreed state of facts and brief; judgment for plaintiff, \$1,205 15.

The People, etc., v. Samuel A. Beard, et al. Original suit. Debt on Collector's bond; dismissed by plaintiffs.

The People, etc., v. Thos. Kelly, et al. Original suit. Debt on Collector's bond; submitted on stipulation and brief, Feb. 14, 1873; judgment for plaintiff, \$8,682 43.

The People, etc., v. J. H. McElhaney, et al. Original suit. Debt on Collector's bond; judgment for plaintiff for \$6,046 65.

The People, etc., v. Joel Cook, et al. Original suit. Debt on Collector's bond; dismissed.

David Rich v. The People, etc. Error to Tazewell. Bastardy; judgment affirmed May 21, 1873.

George Gropp v. The People, etc. Murder. Error to Madison; judgment affirmed.

Thos. J. Weatherford, et al., v. The People, etc. Riot. Error to Morgan Circuit Court; judgment affirmed.

Chas. Waterman v. The People, etc. Forgery. Error to Cook; reversed.

John Durham v. The People, etc. Delinquent taxes. Appeal from Mason; judgment affirmed.

The People, ex rel. W. P. Murphy v. C. E. Lippincott, Auditor. Original suit. Petition for mandamus to compel the Auditor to draw warrant for salary of Judge of the Court of Common Pleas of Sparta, Ill. The defense was interposed by the Attorney-General in behalf of the Auditor. Mandamus refused.

Henry McNulta v. The People, etc. Error to Peoria. Murder; dismissed Jan. 28, 1873.

Baltice Myers v. The People. Error to Bureau. Sale of intoxicating liquors without license; judgment affirmed.

Wm. Roestel v. The People, etc. Error to Bureau. Sale of intoxicating liquors without license; judgment affirmed.

John Hill v. The People, etc. Error to Bureau. Same as above.

Michael Higgins v. The People, etc. Error to Bureau. Same as above.

John Green v. The People, etc. Error to Bureau. Same as above.

Lewis Bries v. The People, etc. Error to Bureau. Same as above.

CASES IN THE SUPREME COURT, JUNE TERM, A. D. 1873,
HELD AT MOUNT VERNON.

Michael Lyons and Steven Shevelin v. The People, etc. Error to LaSalle. Larceny from a railroad car; judgment below affirmed.

A. L. Stevens v. The People, etc. Error to Criminal Court of Cook. Keeping a gaming house; judgment below affirmed.

CASES IN THE SUPREME COURT, SEPTEMBER TERM, A. D.
1873, HELD AT OTTAWA.

The People, etc. v. U. D. Meacham. Error to Stephenson. Suit on forfeited recognizance; continued for want of service.

Wm. Hennes, et al. v. The People, etc. Error to Livingston. Assault and battery; judgment below affirmed.

Edward Burns v. The People, etc. Error to Recorder's Court of Cook; continued.

John C. Mitchell v. The People, etc. Error to Cook.

Michael Lavin v. The People, etc. Error to Cook. Sale of intoxicating liquors without license; reversed.

Andrew Helm v. The People, etc. Error to Criminal Court of Cook. Sale of intoxicating liquors without license; judgment reversed.

Andrew J. Pertee v. The People, etc. Error to Will Circuit. Murder; judgment affirmed.

Christopher Rafferty v. The People, etc. Error to Criminal Court of Cook; reversed and remanded.

R. B. Pollard v. The People, etc. Error to Kane Circuit Court. Perjury; reversed.

Thos. White v. The People, etc. Error to Criminal Court of Cook; reversed.

John R. Sherwin v. The People, etc. Error to Criminal Court of Cook; reversed.

Michael Higgins v. The People, etc. Error to Bureau. Sale of intoxicating liquors without a license; affirmed.

Douglass Streater v. The People, etc. Error to LaSalle. Sale of intoxicating liquors without license; affirmed.

Ira Y. Munn and Geo. L. Scott v. The People, etc. Error to Criminal Court of Cook. Indictment for violation of warehouse laws fixing the maximum price for storing grain, and contesting the validity of section 15 of the warehouse act. Judgment affirmed, sustaining the law. Motion for rehearing denied. Taken on writ of error to the U. S. Supreme Court.

Fredrick Mapes v. The People, etc. Error to Winnebago. Sale of intoxicating liquors; judgment of court below affirmed.

Geo. McKutcheon v. The People, etc. Error to Knox. Sale of intoxicating liquors without license; judgment affirmed.

Wray & Munson v. The People, etc. Error to Criminal Court of Cook. *Scire facias* on forfeited recognizance; reversed.

Hugh Garrity v. The People, etc. Error to Criminal Court of Cook.

CASES IN THE SUPREME COURT, JANUARY TERM A. D. 1874.

James M. Adsit v. Herman Lieb, County Clerk. Appeal from Cook; Tax Injunction; judgment affirmed.

The People *ex rel.* Morgan v. H. Lieb, County Clerk. Appeal from Cook; Tax Injunction; affirmed.

Wm. Brose v. Herman Lieb, County Clerk. Appeal from Cook; Tax Injunction; reversed in part and remanded.

H. H. Walrath v. P. M. Cleary, Collector. Appeal from Cook; Tax Injunction; reversed in part and remanded.

Christopher Rafferty v. The People, etc. Error to Criminal Court of Cook and superseded. Murder; judgment below affirmed.

Hamilton & Murphy v. The People, etc. Error to Henry. Murder; judgment below affirmed.

The People, etc., v. Morris Ketohum, S. D. Lockwood and J. M. Palmer, Trustees of Illinois Central Railroad lands. Original suit *mandamus* to compel trustees to sell land granted to said road in accordance with provisions of section 17 of charter; transferred by agreement to S. Grand Division, June term; *mandamus* denied.

Porter et al. v. Rockford, Rock Island and St. Louis Railroad Company. Appeal from Rock Island; Tax Injunction; reversed and remanded.

CAUSES AT JUNE TERM, 1874, OF THE SUPREME COURT AT
MT. VERNON.

Thos. Coates v. The People, etc. Error to Criminal Court of Cook; murder; found guilty of manslaughter; judgment below affirmed.

Louis Wilhelm v. The People, etc. Error to St. Clair Circuit Court; murder; under advisement.

John Shepard v. The People, etc. Error to Franklin; murder; under advisement.

The People *ex rel.* P. W. Harts v. C. E. Lippincott. Original suit by petition for *mandamus* to compel Auditor to draw his warrant for amount of claim of petitioner; under advisement.

CAUSES AT SEPTEMBER TERM, 1874, SUPREME COURT.

The People, etc., v. U. D. Meacham. Error to Stephenson; suit on forfeited recognizance, under advisement.

William Bolm v. The People, etc. Error to Iroquois; sale of intoxicating liquors without license, under advisement.

A. C. Warriner v. The People, etc. Error to Criminal Court of Cook.

John Lawler v. The People, etc. Error to Criminal Court; assault with intent to kill.

Michael Jones v. The People, etc. Error to Criminal Court of Cook.

Benjamin Bedee v. The People, etc. Error to Winnebago; Murder.

Charles Earle v. The People, etc. Error to Criminal Court of Cook County; abortion.

Neal Ruggles v. The People, etc. Appeal from Bureau; assault and battery; the defense involved the validity of the act of April 15, 1871, fixing a reasonable maximum rate for charges for the transportation of passengers on the railroads in this State.

William H. Ferguson v. The People, etc. Appeal from Mercer.

Wm. H. Stuart v. The People, etc. Error to Lee; larceny.

James Barron v. The People, etc. Error to Criminal Court of Cook; larceny.

John W. Smith v. The People, etc. Error to Cook.

J. D. Housh v. The People, etc. Error to Knox; inditement for escape.

John Plummer v. The People, etc. Error to Stephenson; keeping a gaming house.

Aaron Bowers v. The People, etc. Error to Warren; sale of intoxicating liquors.

Schedule "B."

The Pennsylvania Co. v. Joseph Pollock.

SUITS INSTITUTED AGAINST RAILROAD COMPANIES FOR EXTORTION AND UNJUST DISCRIMINATION.

The People, etc., v. The Chicago and Northwestern R. R. Co. Stephenson Circuit; December term, continued to March term.

The People, etc., v. C., B. and Q. R. R. Co. McDonough Circuit Court; September term; Judgment \$1,000.

The People, etc., v. Toledo, Wabash and Western R. R. Co. Morgan Circuit; May term. Dedimus to take deposition of experts issued. Pending.

The People, etc., v. Illinois Central R. R. Co. Alexander Circuit; May term. Pleas filed and issues joined to be tried January term.

The People, etc., v. C. and A. R. R. Co. Madison Circuit Court; October term, 1874. Pending.

The People, etc., v. C. and A. R. R. Co. Sangamon Circuit; February term, 1874. May 23, trial and judgment for \$3,000. May 13, *certiorari* from U. S. Circuit Court filed.

The People, etc., v. Illinois Central R. R. Co. Douglas Circuit Court; October term, 1874. Agreed case made and cause pending.

The People, etc., v. C., B. and Q. R. R. Co. Bureau Circuit Court; April term, 1874. Judgment \$1,000. Appealed to Supreme Court.

The People, etc., v. T., W. and W. R. R. Co. Macon Circuit Court; December term, 1874. Pending.

MESSAGE

OF

HIS EXCELLENCY

JOHN L. BEVERIDGE,

GOVERNOR OF ILLINOIS.

TO THE

TWENTY NINTH GENERAL ASSEMBLY.

GOVERNOR'S MESSAGE.

To the Senate and House of Representatives :

The constitution requires that the Governor, at the commencement of each session, shall give to the General Assembly information by message of the condition of the State, and recommend such measures as he shall deem expedient; also present estimates of the amount of money required to be raised by taxation for all purposes.

It is very gratifying to say that during the year neither want, pestilence nor scourge has visited the State; that plenty, prosperity and health have prevailed. The people have been law-abiding, and present the grand spectacle of self-government through the forms of law, administered by officers of their own choosing, without the aid or intervention of military authority.

The judicial and executive officers have been faithful and diligent in the administration of justice. Order has been maintained. There has been no general outbreak or disturbance of the public peace. In some districts more or less uneasiness has been felt, but, by prudence and firmness, any great damage or outrage has been avoided. I entertain the hope that among all classes wise counsels will prevail, and that the people, for their own good and honor, will preserve order, enforce law, and protect all in the enjoyment of their rights.

REPORTS.

The reports required by the constitution and laws will give full and detailed information of the operation, condition and wants of the several Executive offices, commissions and public institutions of the State. These reports will be submitted to the General Assembly as soon as printed.

EXECUTIVE DEPARTMENT.

The officers of the Executive department have been harmonious in their action. The reports of the Secretary, Auditor, Treasurer, Attorney General, and Superintendent of Public Instruction, evidence the severe labors and vast responsibilities devolving upon these officers. In my opinion they have faithfully and honestly performed their respective duties, and I congratulate the people of the State in having such faithful and honest public servants.

It has been the effort of the Executive officers to keep the expenses of the State government within the appropriations. Some expenses incurred in pursuance of law, or under contract authorized by law, are beyond their control.

The appropriations have nearly sufficed to meet all claims up to the close of the fiscal year. To meet claims unpaid, and to defray the

ordinary expenses of the State government to July 1, 1875, I recommend the following appropriations :

For expenses of State Board of Equalization	\$3,553 00
“ apprehension and return of fugitives from justice.....	3,000 00
“ printing paper.....	12,000 00
“ stationery	2,000 00
“ public printing.....	25,000 00
“ public binding.....	5,000 00
“ incidental expenses of the 29th General Assembly.....	12,000 00
Total.....	\$68,553 00

The necessity for making these appropriations, and at an early day, is apparent. They are asked for payment of services of a State board, of expenses accruing in promoting public justice, of material furnished and labor done for the benefit of the State, and of the expenses of this General Assembly necessarily incurred in the performance of its legislative duties.

INCORPORATIONS.

It appears from the Secretary's report that, under an act concerning corporations, in force July 1, 1872, up to November 30, 1874, there had been issued 950 certificates of organization, and under an act to provide for incorporating railroad companies, in force July 1, 1872, up to the same date, 70 certificates had been issued.

These facts show how readily persons and capital combine for corporate purposes; how well adapted the general incorporation laws are to the wants of society; and how much special legislation is avoided. By the combination and increase of capital and the number of stockholders, any one of said corporations may become a powerful institution; yet it is subject to legislative control, and has no exclusive privileges except in its corporate name.

FEEES.

Under the constitution of 1848, the compensation of the Secretary of State was \$800 per annum and fees of office, and of the Auditor, \$1,000 and fees; and this compensation continued until the 13th of January, 1873, the commencement of the present administration, all expenses of both offices, then as now, being paid by the State. Under the constitution of 1870, since January 13, 1873, the salary of the Secretary of State and Auditor, fixed by law, each is \$3,500 per annum, and all fees and emoluments of their respective offices are paid into the State treasury.

From January 13, 1873, up to October 1, 1874, the day fixed by law for the semi-annual payment of fees, the Secretary of State had received and paid into the State treasury fees to the amount of \$12,658 70, and the Auditor had received and paid in fees to the amount of \$33,990 20. Total, \$46,648 90.

A part of the emoluments of the Secretary's office, under the constitution of 1848, were fees paid by the State for copying the laws and journals. The former Secretary of State received, in fees, for copying the laws and journals of the 27th General Assembly, the sum of \$17,280 64. The laws and journals of the 28th General Assembly were copied under contract, at a cost to the State of \$2,117 51.

To the other executive offices no fees or emoluments are attached. It would seem that, so far as the State executive offices are concerned, the new constitution has worked the reform contemplated by its framers.

I call the attention of the Legislature to the suggestions and recommendations of the Secretary in his report concerning the indexing and arranging the laws and records of his office; supplying copies of original laws lost, and of all territorial laws affecting the State, from the organization of the Northwestern Territory; the condition and wants of the State library; the census returns; weights and measures; geological specimens; and the distribution of the supreme court reports. These matters are of such public importance as to demand the serious and candid consideration of the General Assembly.

FINANCIAL.

The comprehensive reports of the Auditor and Treasurer give detailed statements of the receipts and expenditures for the last two years of the different funds in the State treasury; to which reports, for valuable information of the State finances, especial attention is called.

The financial condition of the State is a source of pride to every Illinoisan. Other States, with far less resources, are burdened with debt. Illinois, with almost unlimited resources, and a rapidly increasing population, has comparatively no indebtedness.

The following statement exhibits the several funds in the State treasury, and balances on hand December 1, 1872, and December 1, 1874, and the total receipts and expenditures for the two years.

STATEMENT.

NAME OF FUNDS.	Balances in the Treasury Dec. 1, 1872.	Amounts received from Dec. 1, 1872, to Nov. 30, 1874.	Total.

			<u>1,708,750 39</u>

Total indebtedness..... \$1,730,972 15

The 250 "Revenue Deficit" bonds, issued for the benefit of the city of Chicago to relieve the lien of said city upon the Illinois and Michigan Canal, by virtue of an act passed immediately after the fire in 1871, in force October 2, 1871, became payable after the first day of the present month.

In pursuance of an act entitled "An act in relation to the payment of the principal and interest of the State debt," approved February 22, 1859, I did, on the 13th day of November, 1874, issue my proclamation, calling in said "Revenue Deficit" bonds for payment, on the 4th day of January, 1875, at the American Exchange National Bank, in the city of New York. All of said bonds not presented for payment will cease drawing interest from that date.

It is estimated that the semi-annual receipts from the Illinois Central Railroad Company, which are set apart by law for the payment of the public indebtedness, will be sufficient to meet the interest on the school, college and seminary funds, the interest on the State indebtedness, and to pay the said indebtedness as fast as it becomes payable, and that on the first of the year 1880, when all of the outstanding obligations of the State shall have become payable and be paid, there will be a surplus of the Illinois Central Railroad fund of over half a million dollars.

It is believed that the bonded indebtedness of the counties, townships, cities and towns, consisting of railroad bonds, war bonds, court house bonds and bonds issued for other corporate purposes, aggregate the enormous sum of \$35,000,000, compared to which the indebtedness of the State is a mere trifle.

Taxes are levied by the State for supporting the public schools, for constructing public buildings and other improvements, for maintaining the public institutions, and for defraying the ordinary expenses of the State government. For school purposes there was levied, in 1874, \$1,000,000, and for other purposes \$1,500,000. The amount is small for the whole State, compared with the levy in one city in 1874, for municipal purposes, of over \$4,500,000.

If any tax payer will look at his tax receipt, he will find that his district school tax, voted by his own district, constitutes a very large part

of the annual burden of taxation. There is no tax so freely paid as the district school tax, for it is used for the benefit of the school children in the district, and perhaps there is no tax so wisely and judiciously expended. While it is well for the people to watch closely and guard sacredly the finances of the State, to exact of State officials the strictest honesty and the most rigid economy, to insist on the lowest amount of taxation necessary to meet the public obligations and perform the functions of State government, and to demand that all expenditures of the public funds shall be for their benefit, and not for the benefit of the officer or agent expending them, it may be well for the people to watch closely, and even jealously, county, town, city and school district organizations, which raise and expend annually over fifteen millions of dollars, and whose aggregate indebtedness is twenty times that of the State, the annual interest on which is one million dollars more than the principal of the State debt, with no source of payment of interest or principal but direct taxation.

LAW DEPARTMENT.

The Attorney General, in the discharge of his duties, has given an unprecedented number (233) of written opinions, and the number of suits demanding his services has been unusually large. Under his administration several important and vexed questions have been determined.

In the Supreme Court of the United States he has pushed to final adjudication and established the right of the State to tax the shares of stock of National Banks, and, in the Supreme Court of the State, has obtained decisions sustaining the action of the State Board of Equalization in the assessment of the capital stock of corporations, and the power of the Legislature to fix maximum rates for the storage and handling of grain in public warehouses.

PUBLIC SCHOOLS.

I submit a few facts, collated from the report of the Superintendent of Public Instruction, to show the magnitude, importance and cost of our system of free schools for the two years ending September 30, 1874:

	1873	1874
No. children under 21 years	1,399,634	1,444,141
" children between 6 and 21 years	909,994	936,876

Seventy-two per cent. of our population of school age were instructed in the public schools. A large majority of these had no other advantage of education. Eleven thousand six hundred and forty-seven schools were kept open at an average of $6\frac{7}{10}$ months per year. These schools were maintained in 1873 at a cost of \$7,655,268 32, and in 1874 of \$7,865,622 12, total \$15,320,950 50. Of this amount \$2,000,000 00 were raised by State tax, and \$11,322,768 00 by district school tax, making \$13,322,768 00—over three times the amount raised in the same time by taxation for State purposes.

The aggregate cost of the public schools is large; yet the cost per pupil for $6\frac{7}{10}$ months schooling each year averages only \$14.14 or \$2.11 per month, showing that the system is comparatively cheap. It is the only system co-extensive with the State. It opens the school house door to every child of proper age for public instruction, regardless of race or religion; and affords him the opportunity of qualifying himself for the responsibilities and duties of the citizen.

It is a wise provision in the constitution that requires the General Assembly to provide a thorough system of free schools, whereby all the children of the State may receive a good and efficient common school education. The common school is the friend of liberty and the hope of the State, and I recommend the most liberal policy toward this system of public instruction.

MILITARY.

The organized militia of the State consists of one battalion and fifteen detached companies, aggregating 1,112 officers and enlisted men, 974 of whom are uniformed.

This is the only organized force that can be called upon by the Executive, to enforce the laws in case of an emergency. I am aware that our people are jealous of military power, but under our government the military is subservient to civil authority and can only be used in support of that authority. In my opinion a few regiments composed of companies representing all parts of the State, well organized and disciplined, would not endanger the liberties of the people, but would tend to preserve order and to give to our citizens a greater feeling of security. Military organizations can not be maintained without an expense which most of the members are unable to bear. I call the attention of the Legislature to this subject and recommend legislation in aid and encouragement of such organizations.

The Adjutant-General's report records the names of the brave men of Illinois buried at Andersonville, Georgia, in 1864 and 1865, and of the gallant officers in the last war with Great Britain, and of the war with the republic of Mexico. The value of the records of the Adjutant-General's office to Illinois soldiers, their widows and heirs, is apparent from this report. Constant applications are made to said office for information to aid in securing back pay, unpaid bounty, pensions and homesteads under the act of Congress. The perfecting the military records and preserving the flags and mementoes of war, is worthy of the serious consideration of a patriotic Legislature.

RAILROAD AND WAREHOUSE COMMISSION.

The inspection and registration departments of the Railroad and Warehouse Commission have given general satisfaction and renewed confidence.

Warehouse receipts are accepted by bankers and capitalists, as collaterals, with a feeling of security that said receipts are *genuine*, and that the grain represented by them, in *quantity* and *quality*, is in store. The system of State inspection is growing in favor with the trade and with the people, and is fast acquiring a national reputation. To give uniformity, it has been advised to extend the system to other cities and grain centres of the State, and I submit this proposition to the careful consideration of the Legislature.

The law to prevent extortion and unjust discrimination in the rates charged for the transportation of passengers and freights on the railroads in this State, has been in force about eighteen months, and the schedules prepared by the Railroad and Warehouse Commissioners, in pursuance of said law, have been in force little less than one year.

The policy of a State interfering with private enterprise, or undertaking to manage the affairs of its citizens, is controverted. This law makes no such interference, and undertakes no such management. It only seeks to correct abuses by preventing extortion and unjust discrimination. Framed in accordance with the decision of the Supreme Court, it follows the principles of the common law. It does not declare any particular act to be an unjust discrimination, but it declares certain acts to be *prima facie* evidence of unjust discrimination. It does not prescribe any rate to be charged, or declare any rate unreasonable or extortionate, but makes the schedules prepared by the Commissioners *prima facie* evidence of what is a reasonable maximum rate of charges. It does not controvert a single principle of the common law, except to change the rule of evidence, and to throw the burden of proof upon the defendant, and the question whether such an act is an unjust discrimination, or such a charge is extortionate, is to be determined by a court and jury, upon the facts proven under the law.

Repeal this act, and every principle of the law remains, save that the burden of proof would be upon the plaintiff, and there would be no statutory penalties affixed to a verdict of guilty of extortion or unjust discrimination.

In deference to the law and public opinion, the railroad corporations of the State have, in the main, ceased their unjust discriminations; at least but few complaints have been heard, and few have been made to the Commissioners; and on some lines the rates of charges conform nearly to the schedules prepared and published by the Commissioners, and on other lines the rates have been materially lessened. Greater

courtesy and a better spirit of accommodation, on the part of railroad officials and employees, have tended to create a kindlier feeling between the producing classes and the transportation lines.

Railroads have developed the resources of the State, have increased our population, have added to our wealth, have brought sections of country distant from markets into close proximity with the markets of the world, and they are indispensable to the welfare of our commercial, manufacturing and farming interests.

No legislation should be had to embarrass railroad companies in operating their roads, to impose upon them unnecessary burdens, to cripple their energies, to prevent them from charging and collecting reasonable rates, and receiving full remuneration for proper repairs and cost of economical operation, and a reasonable compensation upon a fair valuation of their property and for the risk run.

On the other hand, they should be subject to legislative control, so far as to submit to proper police regulations, to pay their proportion of taxes, to afford safe and reasonable facilities in the transportation of persons and property, to secure economy in administration, to prohibit wasteful expenditures and corrupt management and to prevent unjust discriminations and unreasonable or extortionate rates of charges.

Entertaining these views, I approve of the railroad legislation of the State, and of the continuance of the Board of Railroad and Warehouse Commissioners, representing the State, and standing between the people and these mammoth corporations.

The duties imposed upon the Commission cannot well be performed by any executive or other officer of the State, nor can the citizen afford to carry on a contest with any one of these corporations. The questions involved are of the highest importance to all classes and interests, and must eventually be determined by the courts, and no one can so well and so properly bring them to a final adjudication as the State, represented by the Railroad and Warehouse Commissioners.

Under their supervision various suits have been commenced. Every legal obstacle has been thrown in the way of their prosecution. Several decisions have been obtained, and all in favor of the people, and sustaining the present legislation. Cases are now pending in the Supreme Court of the State—one is pending in the Supreme Court of the United States—to determine the question whether, under an act of Congress passed to protect freedmen, known as the "Ku-klux law," a railroad corporation can transfer a case from the jurisdiction of a State Court into the United States Court.

The suits instituted should be pushed to an early termination, and other suits should be instituted, to raise every possible question under the law, and have the same settled by the highest judicial authority in the land.

The contest is not one of legal interference—not one of oppression—not one of direct antagonism: it is one for the ascertainment of mutual rights, in which all classes are interested.

The abolition of the Board would be an abandonment of all that has been accomplished, at a time when these matters are being pressed to a final adjudication; and would leave these rights undetermined; these questions unsettled; and be a tacit admission that corporations, creatures of the State, cannot be controlled by appropriate legislation and judicial decisions.

Other railroad officials, licensed by this admission, unrestrained by law, pursuing an unwise policy, and prompted by gain, would practice

extortions and unjust discriminations. When the evils became unendurable there would be another outburst of public indignation, depreciating railroad bonds, deteriorating railroad property, and damaging all the industries of the country. In my opinion, the sooner the rights of corporations and of the people are determined by legislative and judicial authority, and these conflicting questions forever settled, the better for all concerned.

CANAL.

The report of the Canal Commissioners gives a very full statement of the operations, receipts and expenditures of the Illinois and Michigan canal, and lock at Henry, of the repairs and expenditures of the Little Wabash improvement and of the construction of the lock and dam near Copperas Creek.

The total receipts from all sources for the year ending November 30, 1874, were \$170,386 85. The ordinary expenses of the canal, and lock at Henry, for the year, were \$49,139 00, and the extraordinary expenses, \$24,659 00.

On the 26th day of December, 1873, the Auditor of Public Accounts made final settlement with the city of Chicago, and drew his warrant on the Treasurer in payment for the full amount due the said city, under an act entitled "An act to relieve the lien of the city of Chicago upon the Illinois and Michigan canal, and revenues, etc.," approved and in force October 2d, 1871; and thereupon the said city of Chicago executed and delivered to the State of Illinois a proper release of said lien, which release, being approved by me, was filed in the office of the Secretary of State.

Early in the season the Calumet dam, near Blue Island, in Cook county, was removed by the Commissioners, in pursuance of an act of the last General Assembly, approved and in force March 27th, 1874. The removal of this dam has drained a large amount of wet lands, and has given great satisfaction to the citizens of Indiana.

The repairs authorized on the Little Wabash improvement have been made, at a cost of \$362 73 in excess of the amount appropriated for that purpose, which excess will be paid out of future water rents and tolls. I call the attention of the General Assembly to the legislation recommended by the Commissioners relative to this improvement.

By the act, approved April 17th, 1873, and in force July 1st, 1873, authorizing the construction of a lock and dam at or near Copperas Creek, the cost of the work was limited to \$430,000 00. The engineer's estimate of the cost was \$427,493 00. Out of an appropriation made by Congress for the improvement of the Illinois river, the United States government expended, in putting in the foundation of said lock, \$62,358 90, exclusive of engineering and incidental expenses. The foundation, by contract, was to have been completed June 1st, 1874. High water prevented, and after the expenditure of the above amount, about September 21st, 1874, the United States authorities turned over the same, incomplete, to the Commissioners, since which time the work on the lock and foundation has been pushed with remarkable energy. The Commissioners paid the additional sum of \$11,367 33 to complete the foundation. The estimated cost of construction of lock above foundation, and dam, was \$315,810 00, and the work was contracted for \$267,219 00, being \$48,591 00 below the estimate.

The estimated cost to the State of the entire work, lock, dam, embankments, and all incidental expenses, is \$333,453 84, being \$96,546 16 less than the limit fixed by the act of the legislature.

To meet this expenditure there has been paid \$72,505 09; cash in hands of State Treasurer, against which no orders are drawn, \$17,896 75; United States bonds in hands of State Treasurer, \$90,000 00; estimated accumulated interest and premiums, \$11,500 00; estimated amount to be spared from Canal funds on hand, \$10,000 00; estimated net tolls for 1875, a part of which only has been appropriated, \$60,000 00; leaving a balance of \$71,552 00 to be appropriated out of the Revenue Fund.

If the funds are provided, the entire work can be completed as per contract, January 1st, 1876. For this purpose I join the Commissioners in recommending the appropriation of the net proceeds of the revenue derived from the canal and lock at Henry, for the year 1875, and of the additional sum of \$71,522 00.

The importance of this improvement, in my opinion, warrants the appropriation. I hope the day is not distant when the Illinois river improvement, by State and National aid, will be completed; when the demands of commerce will widen and deepen the Illinois and Michigan canal, and extend the canal from the Illinois river westward to the Mississippi; and when the navigation of the Mississippi will be improved by the removal of every obstruction. This will be done when the west and western members of Congress demand for the improvement of western rivers and harbors the same expenditures as are made for the advancement of navigation upon eastern rivers and on the Atlantic sea-board. And when done, Illinois and the northwest will have two grand water routes to the ocean, cheapening transportation, increasing our commerce, diminishing the cost of our imports and adding value to our productions.

STATE HOUSE.

APPROPRIATIONS AND EXPENDITURES ON ACCOUNT OF THE NEW STATE HOUSE.

Appropriations:

February 25, 1867.....	\$450,000 00
March 11, 1869.....	650 000 00
June 14, 1871.....	600,000 00
March 19, 1873.....	1,000 000 00
Total.....	\$2,700,000 00

Expenditures:

To November 30, 1872.....	\$1,597,456 81
From late date to November 30, 1874.....	1,070,328 68
Balance unexpended November 30, 1874.....	52,214 51
Total.....	\$2,700,000 00

The Commissioners confidently expect to construct, complete and finish the new State House and improve the capitol grounds with the amount (\$3,500,000) limited by the constitution, and to have the various offices ready for occupancy next June, and the entire building on or before the meeting of the next legislature.

For this purpose they ask an appropriation of \$800,000; \$500,000 payable out of the levy of 1874, and \$300,000 out of the levy of 1875.

It was intended to have rooms in readiness for the State officers and, for the session of this General Assembly; but considering the dampness of the walls, the inside work in progress during the winter months and the unfinished state of the building and grounds, the commissioners and executive officers deemed the old State house more comfortable for the present. It is, however, important that the new State house

should be completed at an early day. The present accommodations for State officers, legislative, judicial and executive, are inconvenient and inadequate. The legislature should consider that the expense of heating and lighting the new State house will be much greater than heating and lighting the old State House, and make suitable provision therefor.

STATE INSTITUTIONS.

The management of the public institutions of the State has been very satisfactory. I recommend a liberal policy toward all needing pecuniary aid. Make generous appropriations, and exact the most rigid economy in expenditures.

PENITENTIARY.

The Penitentiary is self-sustaining and requires no appropriations. The report of the commissioners makes an excellent financial exhibit:

Cash on hand November 30, 1874.....	\$12,520 83	
Supplies in store.....	42,420 97	
Due by contractors—good.....	23,299 27	
Bills receivable—good.....	16,002 13	
		\$94,243 20
Total liabilities.....		\$7,681 08
Total cash receipts from December 1, 1872, to December 1, 1874.....	\$507,341 00	
Total cash expenditures from December 1, 1872, to December 1, 1874.....	499,599 22	
Net profits since May 10, 1873.....		32,099 09

Under the present system and proper management, the Penitentiary need never be a burden upon the State; yet the "dollar" should not be the only or chief consideration. The institution should be reformatory, and to the reformatory measures adopted, mild yet firm discipline, strict attention to health, cleanliness of person and cells, an abundance of wholesome food, comfortable clothing, religious services on the sabbath, evening schools, books and papers, is largely attributable the financial success of the institution. In its management and appointments, it is a model of neatness, thrift and economy.

Since the opening of the fall terms of the courts, the number of convicts has rapidly increased. Should the present hard times—always productive of crime—continue, it will soon be a question to be considered by the legislature what other accommodations shall be provided for the punishment and reformation of criminals.

REFORM SCHOOL.

Boys between ten and sixteen years of age, convicted of crime, are sent to the Reform School. It is better for them and for society that they be subject to its restraints, than be confined in jails or in the penitentiary.

The Reform School was not established for punishment, but for the confinement, discipline, education, employment and reformation of juvenile offenders.

I recommend a liberal policy, to enable the trustees to carry out the objects of the institution; not only to confine, but to discipline, educate, employ and reform its inmates. The trustees have expended the appropriation made by the last General Assembly for the erection of a workshop, which gives enlarged accommodations in the main building.

Other improvements upon the farm and grounds, and in out-buildings, are needed to make the institution more of a reform school and less a penitentiary, more of a home and less a prison.

PUBLIC CHARITIES.

The work of the Board of State Commissioners of Public Charities the last two years, has not been as extensive as in former years could it hardly be expected, as they receive no compensation. Commissioners have visited personally the State institutions under supervision, and their very efficient secretary has visited many of jails and alms-houses. The visitation and judicious action of the Board since its organization, have proved beneficial to the State and to institutions. Useless expenditures have been cut off; greater economy has been practiced; the management has been improved; records and accounts are better kept, and the funds more judiciously expended. The work of the commission has been valuable to the State, to the institutions, and to the recipients of their benefits. Money has been saved, public charities have been more faithfully administered, and the improved management of the State institutions has given them increased confidence among the people.

In my opinion the Commissioners should have some compensation for their time and services, and have authority to visit all alms houses, poor houses, houses of correction, jails, any places where the insane and other unfortunates are confined, and all the public institutions of the State.

The report of the Commissioners gives information of the institutions under their visitorial care, and their recommendations, to which the attention of the Legislature is especially invited. In revising the laws the revision of the laws relating to the educational and charitable institutions was omitted. These laws are numerous, and scattered through the session laws from 1839 to 1873. I recommend a revision in one general act, specifying particularly the objects and purposes of each institution, and what persons shall receive its benefits, and on what terms and conditions; fixing the number of trustees, in each educational institution, not exceeding nine, and in each charitable institution not exceeding three; providing a uniform term of office and time and manner of appointment; defining their powers and duties; prohibiting any trustee from acting as treasurer; directing trustees of educational institutions to meet quarterly or semi-annually, and of charitable institutions monthly or quarterly; requiring all bills to be audited before payment and duplicate vouchers to be taken; one set of vouchers to be retained by the institution, and one set, with a statement of receipts and disbursements since last auditing, to be forwarded to the Board of State Commissioners of Public Charities for examination and approval; prescribing one method for drawing funds from the State Treasury, allowing no money to be drawn except upon the order of the Board of Trustees, approved by the Governor, and not until the vouchers and statement for the preceding month or quarter have been filed and duly approved; and establishing a uniform rule as to manner and time of making the reports required by sections 20 and 21, article 5 of the constitution.

EDUCATIONAL.

The Industrial University asks appropriations for taxes, farm experiments, improvements, furniture, library, laboratory, and museum, less than heretofore granted.

The State Normal, for all expenses, asks less than two years ago.

The Southern Normal, being a new institution, necessarily asks for more, but not for a large amount. The Southern Normal University building was completed and turned over by the commissioners to the trustees on the 30th of June last, and on July 1st the University was formally opened. Departments and classes have been organized, and the institution is in successful operation.

These institutions are meeting the expectations of the friends of industrial and normal education. Their halls are filled with earnest, industrious students, coming from the rural districts and the laboring masses.

In the Industrial University they are taught the sciences as applicable to the industrial pursuits of life. In the Normal Universities they are trained in the art of teaching, and are qualified to take charge of our common schools. The entire cost of maintaining the three institutions the next two years will be about \$50,000 per annum. Their success, their character and their influence, in my opinion, warrant this expenditure. They merit the support and fostering care of the State. A failure to maintain and operate these institutions would be regarded by the lovers of education and the friends of industrial and normal instruction, as a step backward in our civilization, toward barbarism.

SOLDIERS' ORPHANS' HOME.

The Soldiers' Orphans' Home is the outgrowth of patriotism; founded to reward those who fell in defense of their country, or died of wounds received or disease contracted in service, by providing a home for their children. It is a home remarkable for its neatness, order, comfort and good influences. It is not only a home, it is a school. Its inmates are instructed in branches suitable to their age. One of its former inmates was in the Naval Academy at Annapolis, and several are in advanced classes in the Normal University. I commend the Soldiers' Orphans' Home, not to the charity, but to the patriotism and gratitude of a generous people.

DEAF AND DUMB.

The Twenty-eighth General Assembly, at its first session, made an appropriation for the erection of a chapel, dining room and school buildings for the Institution for the Education of the Deaf and Dumb. From the action taken in reference to the same by the said General Assembly, at its adjourned session, the new board of directors of said institution appointed in April last, were placed in a very delicate and peculiar position. For a statement of their action in the premises I respectfully refer the Legislature to their report. Under the circumstances, I am of the opinion they acted as prudent men would act for themselves, and for the best interests of the State.

To complete, heat and furnish the chapel and school buildings, I recommend the appropriation of certain balances in the hands of the treasurer of the institution, and an additional sum payable out of the State treasury.

As to the other appropriations asked by the directors, I respectfully submit them to the consideration of the General Assembly.

BLIND.

The term of office of the trustees of the Institution for the Education of the Blind having expired, in May last a new board was appointed.

The 28th General Assembly appropriated \$75,000 to erect, and \$5,000 to heat a main building for the education of the blind. These improvements were contracted and made chiefly under the administration of the old board.

It appears from the report of the present board that the cost of the building exceeded the appropriation \$1,886 65, and of heating \$445 69, which amounts remain unpaid.

This excess of expenditures over appropriations is not large, and the experience of builders is that the cost of building generally exceeds the estimates. For this excess the present board disclaim all responsibility, yet believe the same should be paid, and ask the Legislature to make an appropriation for the payment thereof.

For the safety of the institution and the comfort of the inmates, I commend the extension of steam heating to the old wing, and the erection of an engine and boiler house.

The new building and the increased number of students add to the ordinary expenses, and an additional appropriation will be required to defray expenses until July 1st, 1875. The appropriation for current expenses for two years following must necessarily be correspondingly increased.

FEEBLE MINDED.

The Institution for the Education of Feeble-Minded Children is growing in public favor. It is an established charity of the State, and claims the kind consideration and liberal support of this General Assembly.

The misfortune of its inmates appeals strongly to human sympathy, and the effort to elevate and improve the condition of this class of our citizens speaks well for a christian civilization.

The present site of the institution is unsuitable, and its buildings are in commodions, insecure and dangerous to life, in case of fire. The site and buildings are not the property of the State. This charity can be advanced and the public interests subserved by giving the institution a permanent location and a proper establishment.

For this purpose I join the trustees of the institution in recommending an appropriation of \$25,000 to purchase a farm in a convenient and healthy locality, and \$175,000 for erecting and furnishing suitable buildings, and I recommend that the \$25,000 and \$40,000 of the last named amount be made payable out of the levy of 1874, and the balance (\$135,000) out of the levy of 1875.

EYE AND EAR INFIRMARY.

The trustees of the Illinois Charitable Eye and Ear Infirmary have erected a neat, substantial and commodious building, at a cost of \$42,843 59, being \$2,156 41 less than the cost limited by the act of the last Legislature. The amount asked for current expenses is less than was allowed two years ago. Additional furniture, surgical instruments and some outside improvements are required.

The Infirmary is wisely and judiciously managed, and with its new building enters upon an enlarged field of usefulness.

INSANE ASYLUMS.

The Hospital for the Insane at Jacksonville was established in 1847. By long occupancy many of its building have become impaired. Under the present excellent management the buildings have been undergoing

needed repairs, and many valuable improvements have been made. Appropriations for current expenses, improvements and repairs are required.

The south wing of the Northern Insane Asylum, at Elgin, has been completed, and can be occupied as soon as the Legislature makes provision for supporting the additional inmates. This wing will accommodate 225 patients, and I recommend that the Legislature, at an early day, make an appropriation for the support of this number of patients until July 1st, 1875, and the required appropriations for current expenses, improvements and repairs from that date.

The north wing of the Southern Insane Asylum, at Anna, was opened December 15th, 1873, and is accommodating about 140 patients. Considering the unfavorable circumstances attending the opening of a new asylum, this has been managed with commendable wisdom and economy.

When the central building is ready for occupancy, which will be in early summer, an additional number of patients, in all from 200 to 225, can be accommodated.

The trustees in their report set forth the wants of the asylum as to current expenses, out buildings, farm, ground, stock, furniture, etc., and I ask the General Assembly to give them a candid consideration.

The appropriation made by the last General Assembly to complete, heat and furnish the north wing, owing to changes made in the construction and to the necessity of building reservoirs to supply water for the Asylum, proved insufficient. To complete this wing and furnish the same, about \$16,000 were taken from the central building fund. The pressing wants of the insane seemed to warrant this use of said funds. The reservoirs are still insecure, and demand a further outlay to provide a permanent supply of water.

To complete and heat the central building, and to improve the reservoirs, I recommend an appropriation of \$22,500, as per estimates of the Commissioners, approved by the Board of Charities.

The Commissioners estimate the cost of constructing, heating and furnishing the south wing at \$160,000. In view of the fact that there is a large number of insane in the State unprovided for, and that this class of unfortunates is rapidly increasing, I favor the building of the south wing as soon as practicable, and for this purpose I recommend an appropriation of \$60,000, payable out of the levy of 1874, and of \$100,000, payable out of the levy of 1875.

FISCAL YEAR.

Each General Assembly provides for all the appropriations necessary for the ordinary and contingent expenses of the State government until the expiration of the first fiscal quarter after the adjournment of the next regular session, and the laws making such appropriations are in force the first day of the July following.

I recommend, therefore, that the fiscal year, now beginning December 1st and ending November 30th, be changed as begin July 1st and end June 30th, in order that it may correspond with the appropriations; and that all reports required by law and the constitution close at the end of the fiscal year preceding each regular session of the General Assembly, and be made and delivered to the Governor on or before October 1st of that year. This will give ample time to prepare and print the reports, and have them ready to transmit to the General Assembly at the opening of the session.

REVISED STATUTES.

The Revised Statutes of 1845 were published under the authority of the 14th General Assembly.

This revision challenged the admiration of jurists; yet, after the lapse of a quarter of a century, from the many modifications of the statutory laws of the State, it became apparent that a new revision was demanded.

The 26th General Assembly, in 1869, provided for the appointment of a commission to make such revision.

The 27th General Assembly continued the work, the necessity for which became more apparent upon the adoption of the constitution of 1870, which changed in many respects the organic law of the State. The 28th General Assembly completed the revision and directed its publication. The publication was delayed beyond the period fixed by law—and almost necessarily so—because of the brief time given by the Legislature.

The Revised Statutes of 1874 have been completed and published, and I congratulate the people of the State, and especially the bench and bar, that the general laws of the State now in force can be found in one volume, and that search, therefore, need not be made through the session laws of fourteen General Assemblies.

It is hoped that the revision of 1874 is equal to that of 1845. There may be defects in the revision and in the publication. Perhaps some are of such a grave character as to require an immediate remedy.

Beyond this I would suggest to give the revision the test of experience, and leave the work of amendment to future legislators.

BANKS.

All general banking laws have been repealed. There are banking associations of deposit and discount, organized under special charters, or the general laws before the repeal thereof, doing business in this State.

The constitution requires that every banking association organized under the laws of this State shall make and publish a full and accurate quarterly statement of its affairs (which shall be certified to under oath by one or more of its officers,) as may be provided by law.

I recommend such legislation as may be deemed necessary to carry out this wise provision of the constitution; fixing proper penalties for failure to report and for making a false statement; directing to what officer of the State government this quarterly statement shall be made, and authorizing him, when essential to the safety of depositors, to examine persons—under oath if necessary—books, papers, securities and funds of any such banking association.

No more banking associations can be organized in this State until provided by a general law, to be approved by a vote of the people.

This constitutional restriction gives the few existing banking associations exclusive privileges and a vast field for business. They are not only doing a general business of discount and deposit, but they are trustees of funds, constantly increasing, belonging to heirs, minors, widows and aged persons, and it is the duty of the State to see that these funds are safely guarded and sacredly administered.

FISH CULTURE.

A number of our citizens are interested in fish culture, and in stocking our lakes and streams with the growth of other waters. This can

be done at a very little expense, and furnish an abundance of cheap and healthful food.

The United States has established a fish commission to advance fish culture, and this commission will supply eggs and fry of valuable fish, taken from the waters of other States, to be deposited in our rivers and lakes. Some of the States have organized commissions to aid in this work.

I deem this matter of so much importance as to authorize some legislation for receiving, distributing and depositing our quota of eggs and fry from the United States commission, and for the culture and protection of fish in our waters.

CENSUS.

It is important for the Legislature to provide for enumerating in 1875 the inhabitants of the State, and in connection therewith to gather statistics of interest and value, showing the commerce, manufactories, farm products, wealth, resources and advancement in civilization.

The law of 1845, if in force, is inadequate for this purpose. I recommend appropriate legislation, and a sufficient appropriation to defray the expenses of this work.

CENTENNIAL EXPOSITION.

The Twenty-eighth General Assembly, by resolution, authorized the appointment of a State Board of Managers to represent Illinois in the International Exhibition, to be held in Philadelphia, in 1876, under the auspices of the United States Centennial Commission, with instructions to report to this Legislature.

The board was appointed, and their report will be transmitted to the General Assembly when received.

I wish to impress upon the Legislature, and upon the people of the State, the importance and magnitude of this International Exhibition.

It will open on the 19th day of April, in commemoration of the battle of Lexington, the beginning of the revolutionary struggle; it will close on the 19th day of October, in commemoration of the surrender of Lord Cornwallis at Yorktown, the triumph of American arms.

It is inaugurated in honor of the 100th anniversary of our independence, and of the centennial year of our national existence; and to exhibit to the world our wonderful growth, development, wealth and resources, our arts and industries, our civilization and national greatness, and the glory and magnificence of American institutions.

Up to the 18th of last December twenty-two foreign governments had signified their intention to participate in the Exhibition, and unofficial advices had been received of extensive preparations being made in four others for a large display of their industries.

These governments represent both continents, and are among the oldest, most powerful and most enlightened nations of the earth.

Illinois should share in the honor and advantages of this Exhibition, and I recommend such action on the part of the General Assembly as will secure to the State a notable representation of its history, industry, art, mechanism, minerals, manufactories and agriculture.

REVENUE LAW.

The principle of taxation prescribed by the constitution is, that every person shall pay a tax in proportion to the value of his property.

To perfect this principle in practice two things are requisite—

First—All the taxable property in the State should be assessed at its value.

Second—All taxes levied on this valuation should be collected.

There should be no possible way for any person to evade the payment of his proportion of the revenue.

It is apparent that a large portion of the personal property, especially moneys and credits, are not assessed; that all property, real and personal, is assessed below its actual value; and that a considerable per centage of the taxes are never collected.

I do not favor a general revision of the revenue law, but I think some legislation should be devised to remedy these evils and to compel every person to bear his proportion of the public burden. In some respects the law relating to the assessment and collection of taxes could be simplified, making it more efficient and less expensive.

7-36 TAX.

To raise the amount of revenue authorized to be levied for State and school purposes in 1873, and to meet the requirements of an act entitled "An act to fund and provide for paying railroad debts of counties, townships, cities and towns," in force April 16, 1869, it was necessary to increase the rate per cent. seven cents, or from 29 to 36 cents on each \$100 of the assessed valuation.

By the terms of said act all the State taxes, except the school tax, levied on the increased valuation over the assessment of 1868, in counties, townships, cities and towns having bonded railroad indebtedness, were to be applied in the payment of such indebtedness.

This increased valuation in each of the years preceding 1873 was so small that there was no appreciable increase of the State taxes.

In 1873 an effort was made to assess the taxable property of the State, as required by the constitution and the assessment law in force July 1, 1872, at a fair cash value.

The result was an assessed valuation of \$1,341,361,842 00, an increase over the assessment of 1868 of \$869,810,876 00, and an increase over that valuation in counties, townships, cities and towns having bonded railroad indebtedness of \$320,000,000 00.

The entire State tax, exclusive of the school tax, on this sum, amounting to \$950,565 90, was to be diverted from general revenue purposes to the payment of said indebtedness.

The following table exhibits the operation of said act :

YEAR.	Assessed valuation in State.	Increased valuation over 1868, in State.	Increased valuation over 1868, in counties, townships, cities and towns having bonded railroad indebtedness.	Net amount of State tax on increased valuation, in aid of railroads.	Amount of railroad bonds.
1868.....	\$471, 550, 966 00				
1869.....	469, 098, 133 00	\$17, 547, 167 00	\$1, 845, 930 00	\$11, 891 44	\$1, 813, 900 00
1870.....	480, 664, 058 00	9, 113, 092 00	11, 400, 000 00	21, 217 07	6, 453, 615 00
1871.....	493, 917, 619 00	23, 366, 653 00	19, 051, 560 00	66, 169 02	10, 477, 401 00
1872.....	510, 886, 663 00	39, 335, 717 00	24, 388, 514 00	61, 127 88	13, 393, 938 00
1873.....	1, 341, 361, 842 00	868, 810, 876 00	320, 000, 000 00	*774, 687 19	115, 333, 635 00

*Estimated.

Virtually the said increased valuation of \$320,000,000 paid no part of the State tax for general revenue purposes.

The tax payer in one locality paid 36 cents, and in another 29 cents, on each \$100 valuation for State and school purposes. This disparity in the public burdens produced great dissatisfaction. Suits were in-

stituted enjoining the collection of the tax. A case was submitted to the supreme court, and on the 19th of June last, that court filed its opinion, holding in effect that 7-36 of the tax was not collectable. The decision of the supreme court furnished a rule for subsequent levies, but it complicated the levy of 1873. At that time the larger portion of said tax had been collected.

The following statement will show its condition :

Total amount of 7-36 tax.....		\$950,585 90
Amount of abatements and commissions.....	\$153,907 68	
.. enjoined from collection	98,959 24	
.. " in collectors' hands.....	267,232 67	
.. paid into State Treasury	430,466 11	
		\$950,585 90

Taking no account of abatements and commissions, the sum of \$98,959 24, enjoined from collection, cannot be collected, and need give no further trouble. Of the amount collected, \$267,232 67 is in the hands of collectors enjoined from paying the same over to the State, and \$430,466 11, less \$20,338 33 paid to McLean county before the filing of said opinion, in the State Treasury.

These funds do not belong to the State, nor to the counties, but to the tax payer; and some provision should be made to return the same to the tax payer, or to enable him to receive the benefit thereof. I must confess the subject is attended with difficulties, but the wisdom of the Legislature will devise some method to do substantial justice to all parties concerned.

ESTIMATES.

I subjoin estimates for appropriations for the years 1875, 1876 and 1877, the amount of which for each of the years 1876 and 1877, may be taken as the probable amount of money required to be raised by taxation for all purposes for said two years, by the levies of 1875 and 1876. The appropriations for 1875 and 1876 will be made by this General Assembly; those for 1875 will be paid out of the levy of 1874, and those for 1876 out of the levy of 1875. The appropriations for 1877 will be made by the next General Assembly to be paid out of the levy of 1876, made during the existence of this General Assembly.

It is the duty of this General Assembly to fix the gross amount of revenue to be raised by taxation in each of the years 1875 and 1876, and provide for the levy thereof. It is a difficult and delicate matter to make this estimate, especially for the levy of 1876, to cover appropriations to be made by the next General Assembly. One cannot foresee the wants of the State in 1877, nor anticipate the temper and wishes of the Thirtieth General Assembly.

In making these estimates, beyond the amounts fixed by law, I have been guided by the expenses of the last two years; the estimates of other officers, by the reports submitted through me to the General Assembly, and by the probable wants of the future.

LEGISLATIVE DEPARTMENT.	1875.	1876.	1877.
Thirtieth General Assembly:			
Per diem of members, 100 days		\$102,000 00	
Mileage, one session.....		5,000 00	
Amount in lieu of postage, etc.....		10,200 00	
Clerks and employees.....		33,000 00	
Incidental expenses.....		12,000 00	

ESTIMATES—CONTINUED.

	1875.	1876.	1877.
EXECUTIVE DEPARTMENT.			
Salaries and per diem:			
Governor, per annum	\$6,000 00	\$6,000 00	\$6,000 00
Lieutenant-Governor			1,000 00
Secretary of State, per annum	3,500 00	3,500 00	3,500 00
Auditor of Public Accounts, per annum	3,500 00	3,500 00	3,500 00
Treasurer, per annum	3,500 00	3,500 00	3,500 00
Superintendent of Public Instruction, per annum	3,500 00	3,500 00	3,500 00

Total.....	\$2,920,500 00	\$2,725,400 00	\$2,129,700 00

The estimates for 1875 and 1876 are \$600,000 00 less than the appropriations made by the last General Assembly. The Legislature in its wisdom may deem it best to modify them.

In my opinion, a levy of \$2,000,000 00 in 1875, and \$1,500,000 00 in 1876, for revenue, and \$1,000,000 00 per annum for schools, will answer the purposes of the State government.

Hoping that your stay at the Capital may be pleasant; that your health may be preserved; that your deliberations may be harmonious and marked with wisdom; and that your legislation may advance the interests of the people and the prosperity of the State, I have the honor to submit this Message to the 29th General Assembly.

JOHN L. BEVERIDGE.

EXECUTIVE CHAMBER, }
January 6, 1875. }

REPORT
OF THE
CANAL COMMISSIONERS.

DECEMBER 1, 1874.

REPORT OF THE COMMISSIONERS.

OFFICE OF THE CANAL COMMISSIONERS,
LOCKPORT, ILL., Dec. 1, 1874.

To His Excellency, JOHN L. BEVERIDGE, Governor :

In accordance with the provisions of section 13 of "An act to revise the law in relation to the Illinois and Michigan canal, and for the improvement of the Illinois and Little Wabash rivers," approved March 27, 1874, in force July 1, 1874, the Canal Commissioners beg leave to submit their annual report.

The organization of the Board of Canal Commissioners continues the same as at the date of their last report (Dec. 1, 1873), viz: Joseph Utley, President, having special charge of the maintenance and repairs of the Illinois and Michigan canal, and the lock and dam in the Illinois river at Henry. H. G. Anderson, Treasurer, having charge of all moneys received from tolls, the receipts from the sale of lots and lands, and rents of water-power and leased lots, and W. N. Brainard, Secretary, having charge of the general office at Lockport, including the books, maps and papers, and all lots and lands belonging to the State and under the control of the Canal Commissioners.

There has been uninterrupted navigation maintained on the canal from the opening, on the 30th day of March, until the closing on the 20th day of November—except two days caused by a break on the Dresden level.

The banks and prism of the canal have been kept in excellent repair, and the towing-path is now in good condition, a large portion of which has been thoroughly graveled during the past season of navigation. The repairs have been managed with prudence and economy, under the immediate supervision of Wm. Thomas, General Superintendent. There has been a further reduction in the ordinary repairs of the canal during the past year, as will be seen by reference to the table marked "O." The extraordinary repairs have been somewhat larger than was anticipated by the Commissioners at the date of their last report. Hopes were entertained that the bridges at Channahon and Lockport would last one or two years longer, with not very extensive repairs; but a careful examination of the superstructures in the month of September last, revealed the fact that the timbers were badly decayed, and the bridges in an unsafe and dangerous condition. Measures were immediately taken to procure plans and material for rebuilding the five spans of 78 feet each, with lower chords of round iron, instead of wood—having a large quantity of iron suitable for that purpose, saved from the hydraulic works at Bridgeport.

The bridges have been completed at a cost of \$3,244 58, or, \$648 97 for each span of 78 feet. Wooden truss bridges have also been built across the canal at Utica at a cost of \$726 55, and one across the Fox river feeder at a cost of \$706 50.

In our last report we stated that that part of the summit level of the canal known as the "deep cut," extending from Bridgeport to the Sag was a constant source of anxiety and expense. Slides continue to occur on that part of the canal, and large quantities of piles have been driven in the worst places to prevent them, and the plan appears to be effective and economical. The steam dredge and pile driver have been kept in constant operation the past summer on this portion of the canal at a cost of \$8,037 40, which is properly chargeable to extraordinary repairs. For a more detailed statement of repairs and present condition of the old structures, we would refer your Excellency to the accompanying report of Mr. Thomas, the General Superintendent.

On account of the general depression of business, and short crops in the vicinity of the line of the canal and the upper valley of the Illinois river, there has been quite a falling off of tolls and tonnage on the canal, but a considerable increase of tolls collected at the lock in the Illinois river at Henry. The tolls and lockage at Henry collected in the fiscal year ending November 30, 1873, were \$173,520 15, and for the year ending November 30, 1874, \$153,341 61, showing a falling off of \$20,178 54.

CALUMET DAM.

Pursuant to the provisions of "An act entitled 'an act to authorize the removal of the Feeder dam across the Calumet river, near Blue Island, in Cook county, in the State of Illinois, and to provide compensation to Christian Pfeiffer and John Roll, for any loss they may sustain by its removal,' approved March 27, 1874," the Canal Commissioners upon receiving a certified copy of said bill, with instructions from your Excellency, proceeded immediately to hold a conference with Christian Pfeiffer and John Roll, and negotiated with them for their release to the State of Illinois, by quit-claim deed, all right they claimed to have to said dam and the water-power thereby created, in accordance with the tenor and meaning of the said bill, for the sum of six thousand dollars which was paid to them by warrant drawn upon the State Treasurer for that amount, after they had executed and delivered the following instrument in duplicate, which is recorded in the Recorder's office in the county of Cook, and a copy of the same is now on file in the canal office at Lockport:

RELEASE DEED.

WHEREAS, by an act of the Legislature of the State of Illinois, entitled "An act to authorize the removal of the Feeder dam across the Calumet river, near Blue Island, in Cook county, in the State of Illinois, and to provide compensation to Christian Pfeiffer and John Roll, for any loss they may sustain by its removal," approved March 27, 1874, it was provided that as soon as Christian Pfeiffer and John Roll shall release to the State of Illinois, by quit-claim deed, all right they now claim to have to the said dam and the water-power thereby created, that then, and in that case, on the order of the Governor, the Auditor of Public Accounts be and he is hereby authorized to draw his warrant on the State Treasurer in favor of said Christian Pfeiffer and John Roll, for the sum of not exceeding six thousand dollars (\$6,000), to be paid out of any money at any time in the treasury not otherwise appropriated. Now, therefore, the grantors, the said Christian Pfeiffer and John Roll, of the county of Cook, in the State of Illinois, for the consideration of the sum of six thousand dollars, release, convey, and quit-claim, to the State of Illinois, all right they, the said grantors, now claim to have to the said dam and the water-power created thereby; and the Canal Commissioners are hereby authorized to pass and re-pass over such portions of our land as may be necessary in taking down said dam, and to deposit the materials of said dam on our land for a reasonable time, until such materials can be removed. The dam to be taken down with all reasonable dispatch.

Dated this eighth day of April, A. D. 1874.

(Executed and delivered in duplicate.)

[Signed]

CHRISTIAN PFEIFFER, [Seal;
JOHN ROLL. [Seal]

STATE OF ILLINOIS, }
COUNTY OF COOK. } ss.

I, Frederick W. Packard, a Notary Public in and for said county, in the State aforesaid, and residing in the city of Chicago, in said county, do hereby certify that Christian Pfeiffer and John Roll, personally known to me to be the same persons whose names are subscribed to the foregoing instrument, appeared before me this day, in person, and acknowledged that they signed, sealed and delivered the said instrument as their full and voluntary act, for the uses and purposes therein set forth.

Given under my hand and notarial seal this eighth day of April, A. D. 1874.

[Seal]

[Signed]

FRED. W. PACKARD,

Notary Public.

The Commissioners, upon taking possession of the dam, advertised for ten days for proposals for the removal of the same, receiving but one bid of \$1,250 and the old material, for doing the work, which they considered an exorbitant price, and therefore rejected the bid, and at once ordered the General Superintendent to remove a sufficient portion of the dam to allow the water above to escape; which was done at a cost of about \$250, and arranged with Messrs. Pfeiffer and Roll to take out the balance—they receiving the old material in full compensation for the labor. The immediate result of the removal of the dam, May 1st, was to lower the water in the Calumet river, at Blue Island, about five feet, and at the same time lowered the water at Liverpool crossing and in Deep river, a branch of the Calumet, at Hobart, in the State of Indiana—a distance of about thirty-five miles by way of the river—eighteen inches, not quite as much as was confidently expected, owing to sand-bars in the bed of the river at a number of points that obstruct the flow of the water. Upon their removal, which is being contemplated, there is no doubt but that large quantities of land will be very greatly benefited in our own State, as well as in the State of Indiana.

OGDEN-WENTWORTH CANAL.

Mud Lake, previous to the deepening of the Illinois and Michigan Canal by the city of Chicago, for the purpose of purifying Chicago river, comprised several hundred acres of marshy land, lying between the line of the canal and the Des Plaines river, and extending from Summit, eastward, about three miles, nearly to the west branch of Chicago river, being a little below the water level of the old canal. It was constantly being supplied with water from the leakage of the canal banks. The fact that the lowest point in this ground was several feet higher than the canal of Chicago river, apparently rendering it feasible to drain and reclaim it for use and tillage, induced the owners, years ago, to attempt its improvement, and ditches were dug, mainly from the west branch of Chicago river, leading into Mud Lake, but it was not until the completion of the "deep cut" in the canal, thereby cutting off the water from that source, that the enterprise was entirely successful.

During the year 1871 the owners of the land along and adjoining the line of the west branch of Chicago river and westward to the Des Plaines, made an effort to carry out a previously conceived design to widen and deepen its channel for navigation and dock purposes, and to dig a canal connecting the Des Plaines river with it, thereby diverting its waters from their natural course, south, into this artificial channel, known as the "Ogden-Wentworth Canal," in order to utilize the waters of the Des Plaines, especially in time of freshets, in deepening it and the west branch, thereby avoiding the expense of dredging, their theory being that in time of high water the loosened soil would be swept out into Lake Michigan, to the damage of no one, and to their great benefit. In the furtherance of this project they built a dredge on the banks of the Des Plaines, launched it, and commenced dredging about one mile north-

east of Summit, and excavated a canal about twenty feet wide at the top and below the bed of the Des Plaines river, and completed the connection with the west branch of the Chicago river in 1872. The attention of the Board of Canal Commissioners was called to this matter during the winter and spring of 1872 and 1873, by the municipal authorities of Chicago, in consequence of the apparent failure of the Illinois and Michigan canal to cleanse the Chicago river, which it had not failed to do since the completion of the deep cut, in July, 1871. Upon an examination of the matter at that time, it was developed that the water in Lake Michigan was very low, and that the ice in the canal was 22 inches thick, thus reducing the flow of water very materially, and that the "Ogden-Wentworth canal" was conducting the waters of the Des Plaines river down the west branch and into Chicago river, immediately north of and adjoining the mouth of the canal, and furnishing all, and, at times, more water than the canal could take away, effectually preventing any water from flowing down it from Lake Michigan through Chicago river, and continued to do so until the latter part of June of that year. During this examination the Canal Commissioners failed to discover any damage being done to the interests of the canal. Since that time, however, the Canal Commissioners, and also the municipal authorities of Chicago, have given this matter close and careful attention. The winter of 1873-74 was a very wet and open one. For the first time in the history of the canal, boats could navigate it from Chicago to Lockport during every winter month, and the flow of water through the canal was very large. The numerous and extensive ditches from Mud Lake and the towns of Cicero and Riverside, that drain a large extent of country in the aggregate, into the west branch and into the "Ogden-Wentworth Canal," washed large quantities of soil into them and the large volume of water flowing from the Des Plaines directly through that channel, varying from 15,000 to 25,000 cubic feet per minute, with a fall at medium high-water in the Des Plaines of about 9 feet from the Des Plaines to the level of Chicago river, in the west branch, a distance of about five miles, swept this soft alluvial soil, possibly, some of it as far as the margin of Lake Michigan, but the great bulk of it appears to have been deposited in Chicago river, and being disturbed during the season of navigation, by tug boats and propellers, a large quantity of it has been carried down the canal and deposited in it at Lockport and Joliet. The commissioners closed the canal, November 20, and ordered the water drawn off, from Summit to Joliet, for repairs, and to their great surprise, discovered that large quantities of soil, evidently from Cicero, Riverside and Mud Lake, had been deposited during the past year in the canal, commencing about one mile east of the lock at Lockport, where the canal widens from 60 to 120 feet, and at various points in the basin at Lockport, and above dam No. 1 at Joliet. A deposit of as much more would seriously interfere with navigation and with the flow of water from Lake Michigan, unless removed at great expense.

The Hon. Wm. B. Ogden, who is owner of the land at the Des Plaines river, above the mouth or western end of the "Ogden-Wentworth Canal," has recently agreed with the municipal authorities of Chicago that an embankment with head gates, may be thrown across the bayou that conducts the water from the Des Plaines into said canal, to the height necessary to prevent its further overflow, and placing it exclusively under their control, which, when completed, will undoubtedly prevent any more serious damage being done from that quarter, and will also be of service to the city in cleansing the west branch when desired.

ILLINOIS RIVER IMPROVEMENT—COPPERAS CREEK, LOCK AND DAM.

By referring to our report in relation to this work last year, of date Dec. 1, 1873, which is as follows: "By the provisions of an act of the Legislature, approved April 17, 1873, the net revenues of the Illinois and Michigan Canal, and the lock in the Illinois river at Henry, until the expiration of the first fiscal quarter after the adjournment of the next regular session of the General Assembly, were appropriated for the further improvement of the Illinois river by the construction of a lock and dam, at, or near the mouth of Copperas Creek, and the necessary works connected therewith, said lock to be not less than 350 feet long and 75 feet wide. Section 3 of said act makes it the duty of the Canal Commissioners, as soon as there shall be in the hands of the State Treasurer the sum of \$100,000 of the Illinois River Improvement Fund, to take efficient and proper measures for the commencement of the improvement mentioned in said act. By section 5, of said act, the commissioners are strictly forbidden to commence the construction of said lock and dam unless they shall first ascertain, from the estimate of a competent engineer, that the same, including all incidental expenses, can be completed for a less sum than \$430,000, which estimate shall be approved by the Governor, and filed with the Auditor, before any of the appropriation can be used.

The deposit with the State Treasurer of the \$100,000 mentioned above, was completed on the 30th day of October last, and since that time the further sum of \$3,000 has been deposited for the same purpose. The commissioners having full confidence in the ability of Daniel C. Jenne, civil engineer, employed him to make the estimates, as required by the said act. The estimates, with the proper certificates attached, and with the approval of the Governor, have been filed in the office of the Auditor of Public Accounts.

The whole cost of the improvement, when completed, including plans, surveys and all incidental expenses, was estimated by Mr. Jenne at \$427,493. The estimates of the cost of the whole work being less than the sum stated in section 5 of said act, (viz: \$430,000,) the commissioners took immediate and efficient measures for the commencement of the improvement, as required by section 3 of said act, by causing plans and specifications to be made, and advertising for proposals, to be received on the 9th day of December, for doing the whole work after the foundation of the lock is completed. (For copies of plans and specifications see accompanying report of Engineer D. C. Jenne.)

The last Congress of the United States having made an appropriation of \$100,000 for the improvement of the Illinois River, and your Excellency believing that the interest of the whole people would be promoted by expending at least a portion of that sum in putting in the foundation of the proposed lock at Copperas Creek, directed the commissioners to make an application to Col. Macomb, United States Engineer in charge, for that purpose. The result of the application, and your personal efforts at the department at Washington, were successful, and the U. S. Engineer Department, Col. J. N. Macomb, in charge of Illinois River Improvement decided to use so much of the appropriation of the \$100,000 made by Congress for the improvement of the Illinois River as should be necessary to build the foundation for the locks at Copperas Creek. Col. Macomb kindly associated Mr. Jenne and the Canal Commissioners with himself in determining the precise location of the lock, and in adopting plans and specifications for the work. The contract for

putting in the foundation was let on the 12th day of August, 1873, the work to be completed by the 1st day of June, 1874.

Owing to a rise in the Illinois river early last fall, and the continued high water during the winter and spring, the work of putting in the foundation of the lock by the U. S. authorities was very greatly but unavoidably delayed, and the work was turned over to the Canal Commissioners about the 21st day of September last. The foundation of the lock was not entirely finished by the United States authorities, for the reason that the long delay of the work, caused by high water as before stated, necessarily increased the cost of the work, and the Canal Commissioners have expended \$11,367 33 to complete the foundation of the lock.

We take very great pleasure in saying that the work has been performed by the U. S. authorities in the most substantial manner.

On December 9th, 1873, the Board of Canal Commissioners met at the Canal Office, at Lockport, to receive proposals for furnishing all materials, and for constructing a lock and dam at Copperas Creek, after the foundation of the lock was completed, in accordance with the following advertisement :

NOTICE TO CONTRACTORS.

CANAL OFFICE,
LOCKPORT, ILL., November 10, 1873.

[Proposals for the construction of a lock and dam for the improvement of the Illinois river.]

Sealed proposals will be received at the Canal Office, Lockport, Illinois, until 1 o'clock p. m. of Tuesday, the 9th day of December, for constructing a lock and dam (except foundation of lock,) and the necessary canal entrances above and below the lock, and all necessary guard banks on both sides of the river, for the improvement of the Illinois river.

Said lock and dam are located about one mile below the mouth of Copperas Creek, and twenty-eight miles below Peoria.

The lock will be 350 feet long between the gates, and 75 feet wide. There will be about 15,000 cubic yards of masonry in the lock walls, vertical walls and abutments to same, and about 200,000 feet board measure of timber and plank in the second floor to lock, foundations of vertical walls and in lock gates, and from 5,000 to 10,000 lineal feet of piles in the foundations of vertical walls and abutments to dam.

The dam will be 600 feet long and 10 to 12 feet high, and will require 5,000 cubic yards of loose stone and 600,000 feet, board measure, of timber and plank in cribs to dam, and some 10,000 lineal feet of square piles driven across the river at foot of dam. The work to be completed by the first day of January, 1876. (Providing the net revenues of the Illinois and Michigan Canal, including \$100,000 now on hand, and any appropriation that may be made by the Legislature, are sufficient to pay the cost of the work by that time.) An average amount of the work will be required to be performed in each and every month to insure its completion in the time specified.

Contractors whose proposals are accepted, will be required to enter into contract within ten days after the award, and to commence the work by the first day of April, 1874.

Blank forms of proposals will be furnished, which must be filled up in plain, legible figures, giving a specific price for each item of work, so as not to be misunderstood, and the prices well balanced, the names of each person interested signed in full, with their place of residence, and addressed to the Board of Canal Commissioners, Canal Office, Lockport, Illinois, indorsed, "Proposals for Lock and Dam for Improvement of the Illinois River."

Every proposal must be accompanied by a bond in the penal sum of \$10,000, signed by two responsible men, guaranteeing that the parties thus proposing will enter into contract at the time required, and furnish the necessary sureties for the performance of the contract.

The Board reserve the right to reject any bid not in accordance with the conditions of this advertisement, or to reject all bids; and no proposal will be accepted unless the parties offering it shall give satisfactory evidence to the Board that he or they have the necessary skill, experience, energy and ability to perform the work, are trustworthy, and have sufficient pecuniary resources.

No proposal will be received from companies unless the full name of each party, or the officers of said company, are written out in full in the proposition.

The Board will require such security by bond as in their judgment will secure the performance of the work according to the contract.

Fifteen per cent. of each monthly estimate will be retained until the final completion and settlement of the contract.

The maps, plans, specifications, quantities of work, blank forms and proposals will be ready for examination at the Canal Office at Lockport, Ill., for ten days prior to date of letting, where all necessary information can be obtained.

Contractors will be allowed to take all the rubble stone, free of charge, needed for filling cribs of the dam, from the banks of the Illinois and Michigan Canal, at such points as shall be designated by the General Superintendent.

A copy of this advertisement must accompany each proposal.

JOSEPH UTLEY,
H. G. ANDERSON,
W. N. BRAINARD,
Canal Commissioners.

There were twenty-two bids, from the following named contractors, the amount set opposite each name being for the estimated quantities of the various kinds of materials, and work to be done, as follows :

1. Leighton, Aiken & Salter.....	\$346,160 50
2. Alexander Bruce.....	313,765 00
3. Clark & Lewis.....	311,677 25
4. Fitz Simmons & Connell.....	308,048 75
5. Reynolds, Sanpaugh & Co.....	344,159 50
6. American Bridge Co.....	294,916 00
7. Willard Johnson.....	267,219 00
8. D. Judson Jenne.....	352,260 00
9. Harris & Gutches.....	352,036 75
10. Thomas H. Perry.....	341,070 00
11. Chester Ray.....	322,160 00
12. J. A. Boyer & Co.....	290,267 05
13. Archibald McArthur.....	290,573 25
14. Hacket & Case.....	290,973 75
15. Michael Haley.....	329,511 50
16. Hamilton Judge & Co.....	312,335 00
17. F. D. Van Waggener.....	322,275 00
18. James P. Buck.....	304,745 00
19. George Williams.....	320,130 00
20. Hornish & McDowell.....	415,360 00
21. J. L. Frindle.....	495,095 00
22. Fox, Howard & Lips.....	309,318 00

After a careful canvass of the foregoing proposals, it was found that Willard Johnson, Esq., of Fulton, N. Y., was the lowest bidder, and the contract was awarded to him.

Work at the quarries, and stone-cutting for the lock walls, was commenced early last spring, and large quantities of stone were delivered before the foundation of the lock was completed. Since the work was turned over to the commissioners by the U. S. engineers, the foundation has been completed, and three courses of the lock walls have been laid to the height of $6\frac{1}{2}$ feet. For particulars and present condition of the work, we refer you to the accompanying report of D. C. Jenne, Esq., the engineer in charge.

Having obtained early last spring, from the Clerk of the Circuit Court of Fulton county, an abstract of titles to the lands required for this improvement, and the abstract leaving the matter in doubt as to whom the titles were in, we made application to the Circuit Court of Fulton county for the condemnation of said lands lying in Fulton county. At the April term of said court the tracts numbered respectively 1, 2 and 4, in the following descriptions, were condemned; the aggregate of the awards, including costs of proceedings, was \$66 75. For want of proper notice to non-resident owners the case as to tract numbered 3 was continued, and is still pending in said court:

No. 1. That portion of the south-east quarter of the north-west quarter of section 25, in town six north of the base line, range five east, of 4th p. m., as follows: Commencing at a point 1,995 feet east of the west quarter post of said section 25, where the central line of the section running east and west intersects with the Illinois river, at a stage of water five feet above low water mark; thence north $5^{\circ} 6'$ east on a line 300 feet west of and parallel with the centre line of lock 1,395 to the south line of the north-east quarter of the north west quarter of said section 25; thence east on said line 360 feet to the said west bank of the Illinois river at 5 feet stage; thence southwesterly along the west bank of said river 1,580 feet to the place of beginning, and containing $9\frac{9}{100}$ acres.

No. 2. That portion of the north-east quarter of the said north-west quarter of the said sec. 25, as follows: Commencing at a point 1320 feet north, and 2,280 feet east of the west quarter post of said section 25; thence north $5^{\circ} 6'$ east 540 feet; thence north $14^{\circ} 56'$ west 800 feet to the north line of said section 25; thence east on said section line 150

feet to the west bank of said river at five feet stage of water; thence southerly along the west bank of said river, 1,330 feet to the north line of the south-east quarter of the north-west quarter of section 25; thence west on said line 360 feet to the place of beginning, containing $5 \frac{7}{100}$ acres.

No 4. That portion of the northeast quarter of the said southwest quarter of said section 24, bounded as follows, to-wit: Commencing at a point 1320 feet north and 2395 feet east of the southwest corner of said section 24, thence north $7^{\circ} 1'$ east 1160 feet to the old dike; thence east on said dike 150 feet to the west bank of river; thence southwesterly along the bank of said river 1160 feet to the north line of the southeast quarter of the southwest quarter of said section 24; thence west on said line 150 feet to the place of beginning, containing $3 \frac{2}{100}$ acres more or less.

No. 3. That portion of the southeast quarter of the southwest quarter of section 24, town 6 north, and range 5 east, to-wit: Commencing at a point on the north line of section 25 2265 feet east of the northwest corner; thence north $14^{\circ} 56'$ west 255 feet; thence north $1^{\circ} 37'$ west 615 feet; thence $7^{\circ} 1'$ east 480 feet to the south line of the northeast quarter of the southwest quarter of said section 24; thence east on said line 150 feet to the west bank of the Illinois river at 5 feet stage of water; thence southerly along the west bank of said river $13 \frac{5}{100}$ feet to the south line of said section 24; thence west on said section line 150 feet to the place of beginning, containing $4 \frac{6}{100}$ acres.

The cost to the State of Illinois for this work, as now estimated by Engineer D. C. Jenne, is \$333,453 84; the amount of work now done in construction, including engineering and incidental expenses, is \$81,724 84, less 15 per cent. retained from Willard Johnson; leaving the total amount paid on work to date, \$72,505 09. The available funds in the State Treasury to the credit of the Illinois River Improvement fund is as follows:

Cash on hand with State Treasurer.....	\$17, 896 75
United States bonds.....	90, 000 00
Estimated interest and premiums.....	11, 500 00
Total.....	\$119, 396 75
Estimated net tolls of the Canal and Lock at Henry, for 1875.....	60, 000 00
If no unusual damage occurs to the Canal, during high water the coming winter and spring, it is possible that there can be spared for this work from the Canal funds now on hand....	10, 000 00
Total.....	\$189, 396 75
The estimated amount wanted to complete the work is.....	\$360, 943 75
From which deduct the amount of funds in State Treasury, estimated tolls for next year, and Canal funds, as stated above.....	189, 396 75
Leaving a balance to be provided for of.....	\$171, 552 00

The State Treasurer's report shows \$16,550 28 more to the credit of this fund. The difference is owing to the fact that the November estimate for that amount had not been presented at the Treasurer's office at the date of his report.

In order that the lock and dam may be completed by the first day of January, 1876, as specified with Willard Johnson, the contractor, it will be necessary for the Legislature at this coming session to appropriate the net revenues of the Illinois and Michigan Canal and the lock at Henry, for the year 1875, and the appropriation of the further sum of \$71,552.

We would most respectfully urge the great importance of the above named appropriation at this time, so that the sixty miles of additional river navigation, which it completes, may be made available for use during the season of navigation of 1876.

The Commissioners, together with Engineer Jenne, in the latter part of October last, made an examination of the Illinois River from Copperas Creek to LaGrange about ten miles below Beardstown, for the purpose of determining the best location for the next lock and dam to be built. Without fully deciding upon the precise point, they are of the opinion that some point near Beardstown, about 48 miles below Copperas Creek, is the best locality. Chief Engineer D. C. Jenne has accordingly made estimates for the construction of a lock and dam in that vicinity at a cost of \$410 000. For specifications and details of the same we refer you to his accompanying report.

The success of steam navigation on canals has been fully demonstrated, and particularly the "Baxter" steam canal boat bids fair to revolutionize, to a great extent, the present system of canal and river transportation. The official reports of the New York canal commissioners show the results obtained from using steam on canals to be double speed and forty per cent. reduction in expense. While canal boats towed by animals have barely paid expenses this season, the "Baxter" boats have been remunerative. We are informed that one hundred more of them are to be built the coming winter for use on the New York canals. Upon the completion of the Illinois river improvement, their introduction upon our canal and rivers will be a necessity. They can be employed during the summer on our canals and rivers, and during the winter months on the rivers in the south.

When it is taken into consideration that upon the completion of the contemplated improvement of the Illinois river that freight of all kinds can be shipped from Chicago to St. Louis, or in the contrary direction, and between all intermediate points, at a cost of three-fifths of the cost by railroads, there seems to be no argument needed to convince any one of the great importance to the people of Illinois, as well as to every one desirous of cheapening transportation, of the early completion of the three more locks necessary to render the Illinois river navigable throughout the season for the largest steamers. The estimated cost of the three locks and dams is \$1,350,000. Notwithstanding the fact that this improvement largely partakes of a national character, and that the benefits of the work will be distributed over a large extent of country, and although, in the opinion of the commissioners, congress at once ought to appropriate funds to complete the work, still they are of the opinion that the great State of Illinois—the empire State of the west, lying in the track of commerce—cannot afford to stop the progress of such an important improvement, even though congress fails to do the work.

LITTLE WABASH IMPROVEMENT.

In our last annual report we recommended that an appropriation of the sum of sixteen hundred dollars be made by the legislature out of the State Treasury, to be used by the Commissioners in repairing the lock at New Haven. This sum, together with what there then was in the hands of the treasurer of the board, and coming due for rent of water power, was deemed sufficient to replace the gates and make necessary repairs to the lock. But soon after our report was made, the timber bulk-head which had been put in across the head of of the lock, gave way, making it necessary, in order to secure the water power there—from which some revenue is derived—to put in a new bulk-head

of heavy timbers and bank up above it with gravel, which was done under the supervision of Mr. James Ford, collector and superintendent of that improvement, at a cost of \$158 86.

The rush of water caused by the giving way of the bulk-head carried down and deposited in the chamber of the lock, and in the channel immediately below, a large amount of stone, gravel and earth, completely obstructing the entrance to the lock. This obstruction was also removed under the supervision of Mr. Ford at a cost of \$285 52, making a total of unexpected outlay of \$444 38.

On the 12th of October last, we commenced the repairs to the lock, and to re-build the gates, with a force of men employed by the day, under the supervision of Mr. Henry G. Eddy, an experienced mechanic familiar with that kind of work. It was deemed advisable to make the new gates heavier and stronger than the old ones were, consequently none of the old timbers could be used in the construction of the new gates; hence, with the exception of the irons saved from the old gates, new material had to be procured. The work of replacing the gates and repairing the lock was completed on the 25th day of November, at a cost of \$2,234 15, exceeding the amount in hands of the treasurer belonging to that fund \$362 73, which has been advanced by him, to be refunded from moneys to be received from rent of water power and tolls. Although the lock is now in complete repair, there is yet something necessary to be done for the protection of the work. An extension of crib protection below the dam, to connect with lock walls to prevent water falling over the dam from depositing stone, gravel, etc., in the channel or entrance to the lock, is very necessary. It is estimated that an appropriation of two hundred dollars will be sufficient for this purpose.

Under the present law, it is doubtful if the Commissioners have the right to collect tolls upon the pool above the dam. As there is considerable traffic on this pool, between New Haven and Carini—a distance of about thirty miles by river—and as the improvement makes this traffic possible, the Commissioners have heretofore collected tolls upon the traffic above the dam the same as if the articles passed through the lock. And as this improvement has not proved remunerative—not producing more revenue than is necessary to keep it in repair—the Commissioners would respectfully recommend that a law be passed authorizing them to collect such tolls upon the pool above the dam as they may deem expedient.

For details as to receipts and disbursements, see accompanying statement marked "L."

All of which is respectfully submitted.

JOSEPH UTLEY,
H. G. ANDERSON,
W. N. BRAINARD,
Canal Commissioners.

Receipts and Disbursements of Illinois and Michigan Canal, and Lock at Henry, from December 1, 1873, to November 30, 1874, inclusive.

APPENDIX.

REPORT OF GENERAL SUPERINTENDENT.

ILLINOIS AND MICHIGAN CANAL,
SUPERINTENDENT'S OFFICE, LOCKPORT, ILL.,
December 1st, 1874.

To the Hon. Board of Canal Commissioners :

GENTLEMEN:—In compliance with the directions of your Board, I herewith submit the following report, relative to the maintenance and repairs of the Illinois and Michigan canal during the year ending November 30, 1874.

REPORT.

Early in January last, owing to a heavy rain the protection bank on the east side of the Fox river, above the dam at Dayton, was broken, and about one hundred feet of it washed away, which cost a severe struggle to replace, owing to the high stage of water in the river.

The winter being an open one, the rains washed into the canal large amounts of sand and earth at different points, making the expense unusually heavy in opening navigation for the season, which affords convincing proof that the better way is to keep the water in the canal during the winter season. During the winter of 1872-73 the water remained in the canal, and not a dollar was required for removing bars in the spring at the opening of navigation, and we had, so far as the canal bottom was concerned, the best stage of water during the season of 1873 we have ever had. Navigation this year was opened on March 30, and boats allowed to draw four feet and eight inches during the whole season of two hundred and thirty-six days, less two days on the Dresden level, caused by a break, which was repaired in two days, and closed November 20th by order of your Board.

My operations during the year have been conducted in the usual manner, and with the usual number of men, and with very satisfactory results so far as the repairs and improvements are concerned. After two years operations with the dredge and crane, on the Summit level, with not very satisfactory results, I determined to try the experiment of piling the banks, capping the piles and dredging out the material that had slid in from the altogether too steep banks, as constructed by the city of Chicago in completing the "deep cut," and am pleased to report that our expectations have been more than realized. Our operations on the Summit level have been conducted with the following means and forces, viz: the steam dredge, pile driver, and one repair boat, manned with the necessary number of men to operate them; have driven

eighteen hundred and twenty-four piles along the line of the canal, and dredged out in front of them; there has also been a large amount of dredging done where no piles could be driven.

The bank of the canal between Lockport and LaSalle have been faced and repaired during the season with very satisfactory showing, by the other three repair boats—No. 4 having been required for about six weeks at the Henry dam, unloading and putting stone in the bottom of the Illinois river below the apron of said dam, for protection. No. 3 has been required about two months in the Fox river feeder, in facing its banks, and No. 2, with the carpenters from the Lockport shops, were required at Blue Island in removing the Calumet dam, about ten days.

In accordance with the order of your Board, I have repaired the Little Wabash lock, and am happy to report that improvement all in working order.

There has been built during the year and put in place, twelve new lock gates, and seven new canal bridges have been built.

COST OF MAINTENANCE FOR 1874.

Extraordinary repairs, renewals, etc., consist of the following items :	
Twelve new lock gates.....	\$3, 150 00
Seven new bridges.....	4, 677 63
Protection bank at Dayton.....	3, 000 00
Break on Dresden level.....	450 50
Summit level, dredge, piles, etc.....	13, 106 16
Pile driving machine.....	275 00
	<hr/>
	\$24, 659 29
The ordinary repairs of the canal proper have cost.....	33, 740 63

REPAIRS AND MAINTENANCE, FOR THE YEAR ENDING NOVEMBER 30, 1875.

The ordinary repairs for the incoming year may reasonably be expected to amount to about the same as the year just closed, but I would respectfully recommend that there be another pile-driver put upon the Summit level, which, if done, will add two hundred and fifty dollars a month to the running expenses, and double the amount of work accomplished.

The bridges along the canal are, as a whole, in very good condition. The Morris bridge will require some considerable repairs during the next season. The Kankakee aqueduct is getting old and will soon require to be rebuilt. The present structure was built in 1865, at a cost of twenty thousand dollars, and as such structures do not last to exceed ten years, its time must soon expire. The Vermilion, Fox river and Aux Sable aqueducts were all built in 1866, at a cost of fifty-eight thousand dollars, and can hardly be expected to stand more than two years more.

The stone work in the abutments and piers is growing old and decaying, and must soon require large expenditures; the walls of the locks are very much decayed and broken to pieces by frost, and are requiring much attention. The seven large culverts on the west part of the canal have all broken in during the last nine years on account of their being first constructed of an inferior quality of stone, which has been affected by the frost; they have all been lined with timber the first in 1865, the last in 1869, and must soon be rebuilt. The Kankakee dam is believed to be in good condition. The Fox river dam, at Dayton, is new, tight and strong.

The DuPage dam, at Channahon, is old and much decayed, and will soon require to be repaired. There is a large amount of material in the Ottawa level of the canal, and in the side-cut, and in the mouth of the Fox river feeder, that ought to be removed the coming season. Last, though not least, there will need to be a steam dredge and crane provided for the Lockport end of the Summit level, to remove, at the lowest estimate, fifty thousand yards of material, mud and other substances, washed into the canal from the Mud Lake Slough, caused by the cutting of the Ogden and Wentworth ditch, and turning the entire flow of water of the Des Plaines river from its natural course, north of the Summit Station, and running it through Mud Lake and the west branch of the south branch of the Chicago river into the Illinois and Michigan Canal.

All of which is respectfully submitted.

WM. THOMAS,
Gen'l Supt.

THE LEASES OF WATER POWER

Stand as they did at the last report. The following is the schedule.

Name of Lessee.	Description of lease.	Time.	Date given or renewed.	Yearly rent.	Payable.	Remarks.
Norton & Co.	Lot 1, block 122, Lockport.	20 years.	March 4, 1873.	\$300 00	Semi-annually.	Rent of lot 1 not included.

NOTE.—The figures in the above table, from 1848 to May 1, 1871, are as given by the Trustees of the Illinois and Michigan Canal.

* In this amount is \$15,400 paid collectors, locktenders, and incidentals, which would leave the amount properly chargeable to ordinary repairs \$38,125.

† In this amount is \$15,399 paid collectors, locktenders, and incidentals, which would leave the amount properly chargeable to maintenance and repairs \$33,740.

CHIEF ENGINEER'S REPORT.

CHIEF ENGINEER'S OFFICE, IMPROVEMENT ILLINOIS RIVER
COPPERAS CREEK, December 1, 1874.

To the Honorable Board of Canal Commissioners:

GENTLEMEN—By an act of the Legislature of the State of Illinois, approved April 17, 1873, the Canal Commissioners were authorized to construct a lock and dam across the Illinois river, at or near Copperas creek, and necessary work in connection therewith, said lock to be not less than 350 feet in length and 75 feet in width. The net proceeds of the revenue derived from the Illinois and Michigan canal and the lock at Henry, on the Illinois river, were appropriated for said work until the expiration of the first fiscal quarter after the adjournment of the next regular session of the General Assembly. Said act required that all the revenue should be held by the State Treasurer until an accumulation of \$100,000 had accrued, before the Commissioners should commence the work. Said act also provided that the cost of said lock and dam when fully completed should not exceed \$430,000; and further that before any work was done in the construction of said lock and dam, the Commissioners were required to ascertain from the estimate of a competent engineer that the same could be completed, including all incidental expenses, for a less sum than \$430,000, said estimate to be approved by the Governor and filed in the office of the Auditor before the appropriation can be drawn.

In the early part of the year 1873, an appropriation of \$100,000 was made by Congress for the improvement of the Illinois river, to be expended under the direction of the War Department. By an effort of the Governor in connection with your Board, the War Department, by their Engineer, decided to spend \$80,000 of this appropriation in the construction of the foundation of the lock near Copperas creek, and the work was placed in the hands of Col. J. N. Macomb of the Engineer corps, who very kindly consented to have the work done in a similar manner to the foundation of the lock at Henry.

On the 28th of May, 1873, Hon. Joseph Utley, President of your Board, requested me to make an estimate of the cost of constructing the foundation for a lock near Copperas creek, for the improvement of the Illinois river. I had no data from which to make an estimate, and my calculations for an estimate of the cost of constructing a lock and dam at the same place as reported to your honorable Board, Dec. 1870, (see printed report, pages 35 and 51, of Canal Commissioners, the Governor, Dec. 1, 1870.) I had to rely entirely on the data obtained as specified in that report, on page 35—which could only be an approximation.

On the 2d of June, 1873, I forwarded Mr. Utley an estimate made from said data—which I was confident would cover the expense of building the foundation of said lock. The estimate was as follows:

41,000 cubic yards.....	Bailing and draining.....		\$3,500
1,900 cubic yards.....	Excavation.....	40	16,400
516,080 feet, B. M.....	Concrete.....	\$6 00	11,400
142,000 feet, B. M.....	Timber.....	35 00	18,000
60,000 lineal feet.....	Plank.....	30 00	4,260
25,000 pounds.....	Bearing piles.....	25	15,000
12,000 pounds.....	Wrought iron.....	12	3,000
	Spikes and nails.....	10	1,200
Amount.....			\$72,820
Add for engineering and contingencies.....			7,180
Total.....			\$80,000

On the 15th of June, 1873, by request of your Board, I visited Rock Island, taking with me the plans and specifications of the lock at Henry, and held a consultation with Col. Macomb and his assistant, Mr. Brown, in regard to the manner of building the foundation of the said lock at Copperas creek. It was agreed to adopt my plans and specifications, and they were left with Mr. Brown to make copies of the same for the said lock.

On the 18th of June, 1873, I visited Copperas creek, accompanied by all your Board, His Excellency Governor Beveridge, Secretary Harlow, Auditor Lippincott, Col. Macomb, and E. A. Brown, Esq., for the purpose of making a location of the lock, which was done to enable Col. Macomb, on the part of the U. S. Government, to make preparations for placing the construction of the foundation of the lock under contract. The location made was across a short bend on the west side of the river, about one mile below Copperas creek, in the township of Banner, (sec. 25, town. 6, range 5 east,) county of Fulton, and is sixty miles from Henry, twenty-eight miles below Peoria, and eighteen miles above Havana. As the land was covered with timber, the exact point could not be settled until a survey was made, giving the course of the river above and below, so as to make a good entrance from both directions.

On the ninth of September I again visited the ground, accompanied by Mr. Utley, and made a final location of the lock, Mr. Brown having made the surveys necessary to give the right course of the lock.

On the 30th of August, 1873, the U. S. Government contracted with Willard Johnson, of Fulton, New York, for the construction of the foundation of said lock, to be completed June first, 1874. The work was immediately commenced and fair progress made until about the middle of December, when high water in the river flooded the lock-pit, and they were unable to do any more work until April or May.

On the 22d of October, 1873, I was directed by Mr. Utley to prepare the plans, papers and estimates for the construction of the lock and dam at Copperas creek, (except foundation,) and make everything ready for placing the work under contract.

On the 7th of November the Canal Commissioners advertised for proposals for constructing the lock and dam, to be received at their office at Lockport until the 9th day of December. On that day there was a spirited competition; 22 bids were received, ranging from \$495,095 to \$267,219.

My estimate for the same work was \$315,810; the lowest bid was \$267,219, or \$48,591 below my estimate. The contract was awarded to Willard Johnson, of Fulton, New York, he being the lowest bidder. The contract was made and executed the same day—the work to be commenced before the first of April, 1874, and to be completed by the first of January, 1876.

The work of cutting face stone for the lock was commenced in March last, at Steele's quarry, near Joliet, and has continued until the present time. About two-thirds of the face stone has been cut for the lock, a portion of the balance quarried and will be cut this winter.

The work on the foundation made slow progress during the summer season, and the contractor was not enabled to commence laying masonry in the lock walls until the 23th of September. On the 21st of September the U. S. Engineers suspended the work on the part of the Government, having done work to the amount of \$62,358 90, exclusive of engineering and incidental expenses. By the direction of your board I arranged with the Government contractor to complete the foundation at his contract prices. It was finished on the 30th of October, at a cost of \$11,367 33, making the total cost \$73,726 23, not including engineering and incidental expenses. This amount was \$906 23 above my estimate, caused by the excavation being more than I had estimated, the lock-pit being deeper than was originally represented.

The masonry in lock walls has progressed finely since the first of October, although the water has been very low in the river and navigation bad, yet the contractor has, by great exertions, delivered some 3,500 cubic yards of stone, and over 3000 yards are laid in the walls. The walls at head of lock are 6 $\frac{3}{4}$ feet high; in chamber 8 feet 7 inches high, and at lower gates and wing walls are 6 feet 5 inches high. The vertical wall above head of lock is started on both sides and up the same height as lock walls.

The progress made in the work is sufficient to warrant its completion by the time specified in the contract, January 1, 1876, provided the water in the river should be low enough to permit the construction of the dam during the season of 1875. This part of the work necessarily requires very low water to perform it in good order.

DESCRIPTION.

The lock is built entirely out of the river, and is connected at each end by a short canal, with vertical and slope wall protections. It is built similar to the lock at Henry in form and dimensions, with the exception that the lock will be filled and discharged through valves inserted in the lock gates, instead of culverts in the walls as at Henry. There will be seven valves in each gate, or twenty-eight in all, four by two and one-half feet, inserted vertically and operated by levers on top of the gate.

The walls of the lock are to be twenty-six feet high from the head to a point one hundred feet below the upper gates, where the dam connects with the wall, and twenty-one feet high thence to the foot.

The gates are to be twenty-one feet high and forty-three feet wide, to be in similar form to those at Henry, and being on the suspension plan.

The dam will be 650 feet long, 11 feet high and 45 feet wide at base, raising the water 6 feet, and will set back 2 feet on the dam at Henry, a distance of 60 miles. It is to be built of timber cribs filled with loose stone, with only one drop, and have an apron of timber of 25 feet and

one of brush and stone of 20 to 30 feet. The lower end is also protected by square piles driven close together, the entire length, at least 10 feet into the bed below the bottom of cribs.

GUARD BANKS.

On the west side of the river it is necessary to build a guard bank along the river, above high water, from the head of the lock, for 4,000 feet to an old dyke and roadway built from the high lands to the river some years ago, about two miles in length, and raise this dyke from three to six feet the entire length, in order to prevent Copperas creek and the river (which will set up the creek when the dam is built) from running around the lock and making a new channel.

On the east side of the river it is necessary to build a guard bank back to the high lands a distance of 7,000 feet, crossing a part of Spring lake. This bank will be twelve feet above low water, protected by loose stone, and will allow high water to pass over it, after the water by drawing over the dam has filled the pool below and regulated itself to one level, as it does at Henry.

ENGINEERING.

My services as Chief Engineer commenced in June, 1873, but up to the 11th of September, 1874, I was only paid for the time engaged. Since the last date my time has all been devoted to the work. I employed a draughtsman about one month, in November, 1873, to prepare the plans for letting. About the first of April last a party commenced running a test level from Henry to Copperas creek to ascertain the exact fall in the river. This work lasted until the first of July. In May last I employed an Inspector at Steele's quarry, Joliet, to look after the cutting and measuring of the face stone for the lock. On the seventh of July I employed an Assistant Engineer, who was engaged in preparing the working plans for the contractor and other necessary work until the commencement of the lock foundation and walls in September. A Rod man was employed from the first of September, and an Inspector of Masoury, at the lock, from September 26th.

Expenses for engineering to date have been as follows :

For services of engineers	\$6,130 82
For office furniture	87 66
For stationery	60 05
For incidental expenses	148 77
Total to November 30th.	\$6,426 80

The Commissioners have built a house at the lock for the accommodation of the engineer corps, sufficient for a family to board them and for a good office. This was an absolute necessity to provide a place for those engaged in the superintendence of the construction of the work ; when the lock and dam is brought into use this building will be required for a Collector's office and for lock-tenders.

COST OF LOCK AND DAM COMPLETE.

I have revised the estimates of the cost of the entire work, and present a detailed statement of the same, amounting to \$298,549, for the lock, dam, guard banks and necessary connections (except foundation of lock). Add the cost of foundation and the result will be as follows :

Amount expended by U. S. Government, on foundation.....		\$42,359 89
" " State.....		11,367 23
" " estimated to complete lock and dam		236,549 98
Amount		\$372,276 13
Contingent expenses to date.....	\$2,398 67	
Engineering to date.....	6,438 89	
" to complete.....	15,700 00	
Contingent expenses to complete.....	3,000 00	
Total cost.....	\$395,813 14	
Deduct expended by U. S. Government.....	62,359 89	
Balance for State.....		\$333,453 25
Amount of work done by State to date:		
On foundation.....	\$11,367 33	
On contract for lock and dam.....	61,589 00	
For engineering and incidentals.....	6,438 89	
Contingent expenses.....	2,398 67	
Total done by State.....		\$81,794 89
Remaining to be done.....		\$251,739 69

The limited time that I had to make examination of special parts of the work connected with the lock and dam, before my permanent connection with the same, especially the broad valley on each side of the lock, did not afford me sufficient data for maturing all the plans necessary for this part of the work, and I find, after a more careful examination, that several items will be materially increased in order to make the work permanent, more particularly the guard banks, lining and loose stone or rip-rap. This will account for the increased cost as now estimated at contract prices over what was indicated at the time the contract was awarded and made. The entire work, however, will be over \$30,000 less than the original estimate, and over that amount less than the stipulated sum mentioned in the act of the Legislature authorizing its construction.

With this lock and dam finished there will be good navigation from LaSalle to this place, a distance of about ninety miles, for the largest class steamers navigating the western rivers, and said vessels can draw six feet of water. As is generally known, the Illinois and Michigan canal enters the Illinois river at LaSalle, where canal boats can be transferred from canal to river and towed to or from any point down to this dam, in low water, without any lighting of cargo, as is now necessary to do below Henry, and as the contractor for this work has had to do thus far with all the stone he has delivered.

It is of very great importance to the people of this State and other States west and south that the entire river below this place should be improved in the same way at the earliest practical moment, and that the other three locks and dams required to complete the improvement of this river should all be commenced during the next year and be completed by the first of September, 1877, which can be done if funds can be provided for that purpose. It will require about \$1,350,000 to perform the work after this lock and dam now being built is completed. If \$350,000 could be provided for the next year, 1875, and \$500,000 in each year for 1876 and 1877, the whole improvement could be completed and brought into use during the latter part of the year 1877. This would make a continuous navigation for the largest class steamers from LaSalle to the mouth of the river, a distance of 225 miles, thence to St. Louis or any point on the Mississippi river or its tributaries,

In my opinion, there can be no route selected in this State where the same amount of money could be expended, which will produce such gen-

eral beneficial results, and especially to the agricultural interests, as the completion of the improvement of the Illinois river. It will then become the great regulator of rates of freight in the vicinity of its borders, and have a general influence throughout the whole State. To demonstrate this, it is only necessary to refer to rates established by two of the great railroads of the State, from Peoria to Chicago, during the last four months. Their rates on grain between these places—a distance of 160 miles—has formerly been 20 cents per 100 pounds; but in August or September it was reduced to 10 cents per 100 pounds, or $5\frac{1}{2}$ cents per bushel on corn. This is less than half the price that other railroads charge for the same distance where there is no water competition.

I am informed that grain is received at Henry by teams, hauled 20 miles or more from beyond two of the great lines of railroad, and sold for a price more than to remunerate the producer for his labor for hauling, above the price which he could obtain at the railroad station he passes.

The question arises, what has produced this reduction in rates of freight from this point? The only answer is the construction and bringing into use the lock and dam at Henry. The same results will occur all along the river when improved as proposed, and will apply to the Mississippi river for a long distance above and below the mouth of the Illinois river, as well as the Ohio and Missouri rivers.

PREPARATION FOR EXTENSION.

On the 27th of October, 1874, Messrs. Utley, Anderson and myself started from Copperas creek on a boat for the purpose of making examinations of the Illinois river down to a point where the next lock and dam should be located, with a view of defining the proper site for the same. We spent a part of three days on the river, examining the same very carefully to Lagrange, a point about 10 miles below Beardstown and 58 miles below Copperas creek.

The object of going below Beardstown was, if possible, to make the location below the shoal water between that place and Lagrange. The fall in the river from Copperas creek to Beardstown, in low water, is $6\frac{1}{2}$ feet, and to Lagrange about 8 feet, as made by the United States engineers. If the lock and dam is located at Lagrange, the dam will have to be 9 feet high to set the water back 2 feet on the dam at Copperas creek, and make 7 feet depth of water the whole distance in low water. If the lock is built at Beardstown, the dam will be only about 7 feet high and accomplish the same object above, but will not cover the bars below, which is very desirable, to avoid building the next dam below so high as to make the water cover these bars for a sufficient depth.

There is a favorable point for the location of the lock and dam at Beardstown, with suitable banks on both sides of the river, although the lock will have to be built in the river similar to Henry. At Lagrange there is only one side that is favorable, with high banks on the west side. On the east side it is supposed to be a vast extent of low land, which it will be difficult to protect from flooding with so high a dam. We had no time to make sufficient examinations of this question, and it was concluded best to make a survey for its location at Beardstown, estimate the cost of constructing a lock and dam at that point, and leave the question open for a final location after further careful examinations shall be made.

On the 18th of November, Mr. Levings, my assistant, and myself, made the necessary measurements at Beardstown to make an estimate of the cost of constructing a lock and dam at that place. The river is about 900 feet wide, and the low water averages from 3 to 4 feet deep, but is 6 feet, for a short distance, on the west side of center of river. It will be necessary to build the lock entirely in the river on the east side, and make the dam 750 feet long and 12 feet high, raising the water 7 feet at low water. The high water mark is 21.55 feet above low water. Raising the water 7 feet, and sinking the lower mitre sill 5 feet below low water, makes the lock walls 28 feet high at the head, and 31 feet at the foot. It is proposed to build a river protection wall outside the lock similar to Henry. The channel below the lock will have to be dredged for at least 1000 feet, and from 2 to 3 feet in depth. The bank on west side of river appear to be of sufficient height above low water so as not to require much of a guard bank. From what measurements we made they were 13 feet above low water, which will make them six feet above the water when the dam is raised. This is sufficient for all practical purposes, as demonstrated at Henry. The guard banks there were only raised 6 feet above the top of the dam. The draft of water over the dam fills up the pool below, and when it is 6 feet on top of the dam it will raise enough higher below to make the water uniformly level on both sides of the dam—consequently no washing away of the guard banks if they are properly protected by rip rap or loose stone.

On the Beardstown or east side of the river, the banks are above high water. A detailed estimate of the cost of constructing this lock and dam is hereto annexed, amounting to \$410,000.

There will be required two more locks and dams below this last one to complete the improvement of the Illinois river—the first in the vicinity of Bedford, forty miles below Beardstown, and the other near Six Mile Island, about six miles from the Mississippi river and forty miles below Bedford. These two locks and dams are estimated to cost about \$940,000, by General Wilson and Mr. Wm. Gooding. As I have never made an examination for their location, I have no personal means of knowing what they will cost, but assume that the estimate will cover the cost, thus making \$1,350,000 as the amount of money that will be required to complete the improvement.

I have prepared the following plans, to accompany this report:

Plan of lock now being built at Copperas Creek.

Plan of lock gates for the same.

Plan of dam to be built.

Map showing the location of the lock and dam.

The following statements and specifications are also presented:

Statement of the cost of the lock and dam, in detail.

Statement of the different kinds of work done to date.

Statement of the estimates and payments to date.

Estimate of the cost of construction of lock and dam at Beardstown.

Specifications for the lock at Copperas Creek.

Specifications for the dam at Copperas Creek.

All of which is respectfully submitted.

DANIEL C. JENNE,
Chief Engineer.

Statement showing total work done on Lock and Dam at Copperas Creek in each month—15 per cent. deducted and payments.

Month.	Total estimate.	Work done dur. month.	Monthly 15 per cent.	Total 15 per cent.	Payment.	Total payments.
1874. March	\$900 00	\$900 00	\$135 00	\$135 00	\$765 00	\$765 00
April and May	3,780 00	2,880 00	432 00	567 00	2,448 00	3,213 00
June	8,280 00	4,500 00	675 00	1,242 00	3,525 00	7,038 00

SPECIFICATION

Of the manner of constructing a Lock at Copperas Creek for the improvement of the Illinois river.

GENERAL DESCRIPTION.

Locks to be composed of hydraulic stone masonry, placed on a foundation of bearing piles, timber and plank.

The chamber to be 75 feet wide at top of walls, and 350 feet long between the upper and lower gate quoins.

The side walls to extend 65 feet above the upper gate quoins, and 20 feet below the lower ones, at the head to terminate with rectangular wing buttresses, at the foot with straight wings, 40 feet in length, slightly curved at their connection with the main walls, and flaring each side ten feet wider than the bottom line of chamber.

FIRST SPECIFICATION.

Grubbing and Cleaning.—From the space required for the lock and its banks, and for the canal connected therewith, and all necessary guard banks, all trees, saplings, bushes and roots shall be cut and grubbed up, and, together with logs brush and wood of every description, shall be burned up or removed from the ground so as to do no unnecessary injury to the adjoining lands, as may be directed by the Chief Engineer or his assistant in charge of the work.

SECOND SPECIFICATION.

Bailing and Draining.—Under this head is to be embraced all the expenses necessary for the construction of coffer dams, including the materials, and their removal from the work, the cost of providing and operating machinery, and pumps for bailing the water from that part of the work embraced in this contract, together with the removal of all ice and snow that may accumulate during the progress of the work.

THIRD SPECIFICATION.

Excavation of lock-pit.—The excavation to be made of such length, width, depth and slopes as the said engineer shall require, and the bottom made smooth and level to receive the foundation timbers. The material excavated to be deposited so as to form the embankment of the lock and the canal connected therewith, as far as it can be done, and the surplus, if any, to be deposited at such points as said engineer shall require.

Excavation of canal.—To be of such form, width, depth and slopes as may be required, and the material excavated to be deposited in the banks of either the lock or canal, or, if there is a surplus, to be placed

in spoil bank as said engineer shall direct. If any portion is removed by dredging, the material is to be taken in boats to deep water in river, as may be directed.

FOURTH SPECIFICATION.

Foundation.—Bearing piles from 12 to 25 feet long, and not less than 9 inches in diameter at the small end, and 12 inches at the large end, are to be driven with a hammer weighing at least 1,600 pounds, and raised as high as leaders 35 feet long will permit. There shall be five rows of piles under each wall, and at least seven rows in the chamber of the lock, and driven in alternate rows cross-wise, three feet apart from center to center, in such form that about one-half of piles will come under the cross timbers. At the head, under the mitre sills and wing walls, the piles to be placed so as to conform to the shape of the walls.

The piles, after being driven, are to be cut off true and even to receive the foundation timbers.

The piles to be paid for as delivered for the amount contained in the bill furnished, and as driven for the length they measure in the work, after being prepared to receive the foundation timbers.

Longitudinal timbers, 12x12 inches square, are to be placed on top of eleven rows of the piles, seven rows through chamber and two rows under each wall. On these longitudinal timbers, and the other six rows of piles, the main cross-timbers of the foundation are to be placed, six inches apart, over the piles, and extend the whole width of the foundation. All the timbers are to be 12 inches square, and of such lengths as may be required, in order to have the lap of splice come over the piles and on the longitudinal timbers. All the spaces, and for three inches under the longitudinal timbers, are to be filled with concrete. The timbers to be well bolted or strapped to the piles and longitudinal timber with iron bolts or straps, of such size and form as may be required. Under the lower mitre sill the cross-timbers will be laid solid together. A course of 2½ inch oak and pine plank, of uniform thickness, to be laid on the cross-timbers, well jointed together, and secured by six inch pressed spike, and to cover the whole area of foundation.

A second course of 2 inch oak or pine plank to be laid over the first, between the lock walls, secured by 8 inch pressed spike, and both courses of plank laid in the most approved manner for breaking joints with the timbers and each other.

Five courses of sheet piling will be required across the lock foundation, from four to six feet long, made of two inch plank, lined with inch boards, and well filled in with concrete on both sides.

After the second floor is laid, binding timbers, 6 by 8 inches, are to be put on crosswise at every ten feet, and bolted to the foundation timbers with suitable ragged bolts, 20 inches long, to secure the planking from being raised by the action of the water.

FIFTH SPECIFICATION.

Mitre sills.—The mitre sills are to be composed of the best quality of white oak timber, 20 inches square for lower gates, and 12 by 20 for upper gates, laid on an angle of 21½ degrees, with a line at right angles with the side walls.

The timbers are to be well bolted to the foundation for lower mitre sill, and to the wall in upper mitre sill. An arch of stone is to be laid on the foundation below lower mitre sill, from 16 to 18 inches thick in

one course, curved to a radius of 80.83 feet on the lower side, and forming an angle on the upper side conforming to the mitre against which the timber is to rest.

The upper mitre sill will be raised by a wall of masonry 7 to 8 feet high, similar in external form to the lower mitre sill. The character of the masonry will be similar to other parts of the lock, and the top coped with stone not less than one foot thick, well clamped and dowed.

SIXTH SPECIFICATION.

Masonry.—The walls are to be from 21 to 30 feet high, and to have a batter on the face of a half inch to the foot. The faces of the recesses to be vertical. The main walls are to be five feet thick on top, and to have such batter and offsets in the rear as shall be required by the plans and directions of said engineer.

Buttresses 8 feet long, 3 feet thick and $15\frac{1}{2}$ feet apart, to be placed at the rear of the main walls and come up within $2\frac{1}{2}$ feet of the top, and to have such offsets as may be required.

At the quoins and recesses the walls will increase in thickness to conform to the plan of masonry. Across the head of the lock will extend a breast wall 7 to 8 feet high, and 6 to 8 feet thick at the bottom, carried up plumb, at both sides, with a coping 12 inches thick covering the whole width of the wall. Mitre sill walls are to be built as described under the head of mitre sills.

The main walls are to extend 12 feet above the breast walls, and to be of such form as may be required, and built so as to connect with the protection walls above. The wings at the foot will extend 40 feet on each side of main walls; to be slightly curved at their connection with them, and stand 10 feet at the ends from the line of chamber. The lower end of wings will drop from 6 to 8 feet, and be built in a manner to make good connections with the protection walls below, of such forms and dimensions as the said engineer may require.

Recesses.—At each set of gates are to be recesses in the lock walls, to extend from the hollow quoins, and to be of sufficient length and depth, and of such form to receive the gates when open. The rear of the recess to be curved, and to have in its full length a versed sine of about 18 inches.

Sub-recesses shall be made in each recess of such dimensions as may be required. The end of recess opposite of quoins to be finished with a mitre.

Quoins.—The stone to be very nicely cut to a hollow of 14 inch radius, and the nose which connects the hollow with the main wall to be cut on a radius of $6\frac{5}{10}$ inches at top of coping, and the curve to increase with batter of face to bottom of wall. The heel of quoins to be beveled to rear of recess. The stone are to be alternately header and stretcher, with no less than 5 feet length of face, and such width of bed as shall make, in all cases, a bond of one foot on the quoin at face and backing stone in the course below.

In case uncut masonry should be used for the lock walls, the hollow quoins will be of cast iron, of such form as the said engineer may require, well turned or bored out in the hollow, and well and properly secured to the lock walls in such manner as may be required.

Character of Masonry.—The face of the wall to be composed of stone of a sound and durable quality, such as shall be approved by said engineer. The stone are to be laid in regular courses, and cut true and even, both on face and beds. The upper and lower beds to be parallel.

The cutting to be done and the work to be laid with a mortar joint on the face, which shall not in any case exceed one-fourth of an inch, and to have an average joint for the whole bed of the stone which shall not exceed three-eighths of an inch. The vertical joints to be the same for 12 inches back from the face, and the balance averaging not over two inches.

The first course of stone laid on the foundation to have a top bed of 24 inches, and the second course 36 inches, alternating 24 and 36 inch beds to the coping, the 36 inch course making 12 inch bonds on the backing of the course below. Each stone to have a bond on the other of not less than 12 inches; every course except the first must have headers from $4\frac{1}{2}$ to 6 feet in length, according to the thickness of the wall, and not less than $2\frac{1}{2}$ feet in width on the face laid in every 10 feet in length of face, and the headers in each succeeding course must be placed intermediate to those beneath. The stretchers must have not less than $3\frac{1}{2}$ feet length of face, and all the face stone to be not less than 10 inches nor more than 30 inches in thickness, and when more than 24 inches the beds must equal the thickness. In all cases the heaviest courses must be laid in the lower portions of the structure.

The backing to be composed of a good sound quality of stone, such as may be approved and required; to be laid generally in courses corresponding with the face; but two courses may fill up one of face, provided neither are reduced below 6 inches in thickness. Headers are to be placed in like manner, and intermediate those in front. In no case must the backing rise higher than the face stone, and no dressing will be permitted after being laid in the work. The bed joints of the backing shall not be more than one inch, and the vertical joints three inches. The stone must all come in contact with beds and vertical joints, and especially with the rear of the face stone, and in all cases must break joints at least 8 inches. No stone shall be less than 6 inches thick and 4 square feet of surface, and in all spaces which are more than $1\frac{1}{2}$ foot square must have stone properly fitted to it. No stone will be allowed to be quarried in the winter season or when they will be affected by frost.

Coping.—The walls to be coped with cut stone not less than 15 inches in thickness, and generally of full width of wall, and cut to conform to the batter of lock, both front and rear. The coping generally to be 5 feet wide on top bed, and $3\frac{1}{2}$ length of face, and more if required. For hollow quoins and recess corners, the width will vary according to the thickness of walls, and in some cases two or three stone will be allowed to fill up the width. At the head and foot of lock, and at the recesses for gates, the coping is to be secured by dowel bolts $1\frac{1}{2}$ inches in diameter, entering the second course below at least 6 inches, and if required at the hollow quoins, $1\frac{1}{2}$ to 2-inch dowels entering the masonry from 8 to 12 feet. At every joint there must be two iron clamps 18 inches long, 2 inches wide and $\frac{1}{2}$ an inch thick, entering the wall 3 inches at the ends, and let in flush with coping. The bolts and clamps to be secured by a cement of sulphur and sand mixed in such proportions as may be required, or a cement of lead and antimony in proportion of 85 to 15. The inside angle of coping in chamber of lock to be rounded to a curve of 3-inch radius. The coping to mitre sills to be similar in character to that above described, and so cut as to conform to the shape of wall, and the whole to be clamped, doweled and cemented. The dowels to be from 3 to 4 feet long, and $1\frac{1}{2}$ inches in diameter.

The expense of drilling and cutting for the insertion of all iron work must be included in the price of masonry and iron, and the price of sulphur and sand cement, a separate price for the whole work in contract, and lead and antimony cement by the pound.

Cement, Sand and Mortar.—The mortar used in the lock to be made from the best quality of hydraulic cement, and clean sharp sand, free from all earthly impurities, mixed in the proportion of not more than two parts sand to one of hydraulic cement, and such as said engineer shall direct. No cement shall be used without being tested, and approved by said engineer or his assistants, and if by either of them pronounced unfit for the work, it shall be removed entirely therefrom. The sand used must be clean, sharp, pure, silicious sand, free from all impurities, and if required must be washed and screened. The mortar to be mixed only when necessary for immediate use, and in no case must it be allowed to stand over night. Grout must be mixed in boxes prepared for that purpose, standing on the wall, generally in proportions of two parts of sand to one of hydraulic cement. The cement to be placed in the box first, and the water put in and stirred up, then the sand added, and all well mixed together with hoes. The stirring must continue all the time while the box is being emptied, and the quantity of cement must be sufficient to hold up the sand.

Method of carrying up the masonry.—Suitable cranes or derricks must be provided for handling and laying the stone. The work is to be carried up in regular courses, and in no case shall there be more than two remaining unfinished. Each stone must be prepared to fit in its proper place before being brought on to the wall, and no cutting will be allowed on the work that will in any way disturb the masonry previously laid; and all face stone, if required, are to have a hole drilled near the centre, in the top bed, for the purpose of receiving the "Lewis" connected with the machinery by which the stone are to be laid, or if handled by other means especial care shall be taken to prevent injury to the stone or surrounding masonry. Every stone, both face and backing, must have a full bed of mortar to rest upon, so that all spaces between the two may be completely filled in each course, all the vertical joints to be filled with grout before the next shall be laid, and no space more than ten feet square shall be left to be grouted, without mortar being placed in the joints to prevent the grout from running any farther. Before placing the mortar upon it, the wall must be kept wet and free from dirt. All the stone, both face and backing, must be handled and laid by machinery, and in no case will stone be allowed to be moved about on the wall.

Concrete.—Must be made of clean coarse gravel, or fine broken stone of a size not larger than will pass through a ring $1\frac{1}{2}$ inches in diameter. The cement and sand to be mixed together in the same manner and proportions as grout. The gravel or broken stone will then be mixed in until it shall form a compact mass, which will then be placed in position by shovels, and, if required, well rammed down with heavy mauls.

Uncut masonry for Lock walls.—In case it may be required by said engineer, the masonry of the whole lock, or a part of it, shall be laid up without cutting, but the dimensions and form of the stone shall be the same as required for cut stone work, and the general plan shall be carried out in the same manner. If the uncut work should be adopted, the hollow quoins will be made of cast iron, properly secured to the wall, as specified under the head of quoins. The face of the stone will be pitched

off to true lines, and the face joints be made not to exceed one half inch. If required, bolts shall be laid in the wall at such points as may be necessary to secure fender timber to the face of wall.

All high projecting points on the bed of stone to be picked off so that the stone will have a good bearing on each other in their beds, and be of uniform thickness in each course.

The masonry is all to be laid between the 15th day of March and the 15th day of November, unless otherwise ordered by said engineer.

SEVENTH SPECIFICATION.

Gates.—To be made of the best quality white oak timber, entirely free from wane checks, shakes or decayed knots. The quoin and mitre posts are to be 28 inches square, and may be in 4 pieces, if timber of the right size cannot be obtained. The two lower and top ribs are to be solid, composed of four pieces of timber of such form as to make it 28 inches wide at the ends, and 46 inches in the center, forming a curve on the upper side of 14 inches versed sine, straight on the lower side, and 12 inches thick. The other ribs are to be similar in form with one less timber, leaving an open space in the center with 3 vertical posts between, to hold the upper side in form of curve; each rib is to be strengthened on the lower side by double hog chains, each quoin post is to have wrought bands on top and bottom, with a heavy cast iron socket in the lower end for the gates to stand on. The sockets in quoin post to rest on a heavy cast iron step, well fitted to the foundation. Wrought iron straps are to be put on the quoin and mitre posts at each rib, and of such length as to admit of two bolts through the ribs in each strap. The gates are to be suspended, and swing on "McCarthy's plan" for opening and closing gates. This is done by suspension bars of wrought iron on each side of the gate, extending from top of quoin post to bottom of mitre post, and passing over cast iron tower posts placed on top of lock walls and connecting by two heavy plates of wrought iron and steel pins, with six other bars of iron anchored in the walls of the lock.

Suitable turn-buckles or swivels are to be put into each suspension and anchor rod on either side of the tower to regulate and adjust the gates. The gates are to be planked on the upper side with two-inch white pine plank, secured with 5½ inch pressed spike. Suitable fender plank are to be put on the lower side of the gates. The wrought iron used to be of first quality American iron.

Capstans are to be constructed at each gate, with proper fixtures of levers, spars and wire ropes for the purpose of operating the gates, or they may be worked with a gearing, mashing on a cogged bar of iron, and turned with cranks, as the said engineer shall require or direct.

EIGHTH SPECIFICATION.

Valve Gates—Of cast iron, or composed of wood and iron, of such form as may be required, are to be inserted in the gates, which are to be operated by levers from the top of the gate.

NINTH SPECIFICATION.

Embankment.—The banks to be of such form and width as the said engineer shall direct, and to connect with the protection work both at the head and foot of lock.

The top to be finished level and uniform ; and if required, to be nicely paved with quarried stone, set up edgewise, from 12 to 18 inches in depth, and laid in a bed of gravel at least 6 inches deep, or faced with loose stone, and all guard banks to be faced with loose stone, if required. Such proportions of banks in the rear of lock walls as may be required, shall be composed of loose stone. At the head of lock and at other places where the bank may have to be made impervious to water, the materials shall be carefully assorted and well puddled.

In the progress of the work the bank shall be kept one foot below the unfinished walls at all times.

TENTH SPECIFICATION.

Lining.—Under this head is to be included all the materials which are required to make the bank impervious to water. All gravel required to be placed in rear of slope or vertical walls ; also, on top of embankment and outside slopes, to prevent washing. In all cases where lining shall be obtained from places where other portions of the same bank have been, no allowance will be made for it, but the material must be carefully assorted and paid for as embankment.

ELEVENTH SPECIFICATION.

Puddling.—The materials for puddling shall be composed of clay, or clay loam, intermixed with a suitable proportion of fine gravel, the whole to be well incorporated and laid in courses nine inches thick.

It shall be wetted, so as to work into a solid, impervious state, by cutting through it vertically both ways with a shovel, in courses not exceeding $\frac{3}{4}$ of an inch in width, until the whole shall be rendered compact and water tight.

The compensation for puddling will be for the work after the materials have been delivered, and the measurements will be taken after the whole shall have been completed. The materials will be paid for either as lining or embankment, as the case may be, with an allowance of 25 per cent. for shrinkage in puddling.

TWELFTH SPECIFICATION.

Slope and Pavement Wall.—Where slope wall may be required, a suitable space shall be formed in the excavation or left in the embankment, so as to leave room for the thickness of gravel, lining and wall.

The wall shall be of such dimensions as said engineer shall direct, and laid at right angles to the face, in a compact, smooth and suitable manner, proper bond being given to the joints. If necessary, a gravel lining to be placed in rear of wall, from 6 to 12 inches thick, for the stone to rest upon. Stone to be of suitable size to make good bonds, to be generally headers reaching through the wall. If necessary, a foundation of timber shall be placed under the wall.

At the foot of the lock, an apron is extended down from 50 to 100 feet, made by a pavement of stone laid across the whole width of bottom between side or protection walls, and formed of good square stone, 18 inches wide, set edgewise, well bedded in gravel, and, if required, the joints filled with mortar or grout, in which case it shall be classed as vertical wall laid in hydraulic cement, or the apron may be made of concrete if directed. If directed, a similar wall to be laid on the top of bank by the side of lock and protection wall.

THIRTEENTH SPECIFICATION.

Vertical or Battered Rubble Walls.—Laid in hydraulic cement or dry, shall be constructed at such points and of such form and dimensions as the said engineer may direct. At the upper and lower ends of the lock, protection walls will be laid on the inside, commencing on a foundation of timber and plank, with bearing piles, if required, and raised to top of river bank. On the outside a wall will be built the entire length of lock, and the protection walls at head and foot, and, if necessary, connected with the abutment wall of dam, or if directed, a part of the protection may be by a slope wall or by loose stone. The inside and outside at the upper and lower ends to be connected by a circular end wall.

The wall to be composed of sound, well shaped and durable stone, not less than 6 inches thick, and 4 feet area of bed. The smoothest and broadest bed shall in all cases be laid down, and if the setting bed is uneven, the projecting points shall be hammered off, and all high points shall be removed from the top bed in order to give each stone a firm bearing.

The face stone must have good beds and joints, and form a good face line. One-fourth of the wall shall be composed of headers extending through it for a wall three feet thick, and from 3½ to 5 feet back for thicker walls. The walls to be coped with stone at least 10 inches thick, extending across the whole width of wall, with joints not more than half-inch. When required, the wall to be laid in hydraulic cement mortar, in proper proportions of cement and sand, as may be directed; and, if required, the beds laid in mortar, and the vertical joints grouted.

FOURTEENTH SPECIFICATION.

Snubbing Posts.—At least 20 good snubbing posts will be required, to be of white oak timber, 8 feet long, and 12 inches in diameter, set in the ground 5½ feet, and well filled around with loose stone and gravel. Similar snubbing posts to be set along the guard bank if required,

FIFTEENTH SPECIFICATION.

Stop Gates.—Suitable stop gates shall be made both at the head and foot of lock for shutting off the water so that the lock can be pumped out at any time when necessary. The stop gate to be made according to the plan of said engineer, and if required checks shall be cut in the walls, to receive the same, and timber secured to the foundation, in proper form to receive and hold the lower end of plank to be used in framing the gate.

SIXTEENTH SPECIFICATION.

Guard Banks.—At such points as may be required suitable guard banks will be built, of such form and dimensions as may be directed, and the top and sides faced with gravel lining and loose stone. If the bank is made from surplus excavation no allowance will be made for same, unless hauled over 1000 feet in a direct line from the pit in which it is taken. If the earth to form the banks is barrowed, or if hauled more than 1000 feet from surplus excavation it will be paid for as embankment for guard banks, measured in the bank when complete.

All materials from excavation, deposited in embankment, will be paid for only as excavation, unless hauled over 1000 feet.

SEVENTEENTH SPECIFICATION.

For a more full and perfect explanation of the form and dimensions of materials and parts, and manner of constructing them in all their details, plans, with bills of timber and iron, will be furnished by the said engineer or his assistants, who will also give such directions from time to time during the progress of the work as will in every respect render it perfect and complete on the plan contemplated in the above specifications, and said plans, specifications and directions must in all respects be complied with.

 SPECIFICATION

Of the manner of Constructing a Dam at Copperas Creek for the Improvement of the Illinois River.

GENERAL DESCRIPTION.

The dam is to be built of timber cribs, filled with loose stone, to be properly filled in with brush, stone and gravel, both above and below, to have stone abutments at each end of the dam, and to have a row of square piles driven close together on the lower side of apron.

FIRST SPECIFICATION.

Bailing and Draining.—Suitable coffer-dams shall be built at each abutment, and machinery and pumps used to remove all the water from the pit, in order to excavate the same, to put in the foundation and construct the abutments. All materials and labor, machinery and pumps to be put in and removed, and the bailing done, for a specific price for bailing and draining.

SECOND SPECIFICATION.

Excavation.—The excavation of the abutment pits for the dam, and for the protection walls above and below, shall be of such form, width, depth and slope as may be required, and the materials deposited where the chief engineer shall direct. The bottom to be made smooth and even for the reception of the work.

THIRD SPECIFICATION.

Foundation of Abutments.—Three rows of bearing piles, 3 feet apart, are to be driven under each abutment, from 15 to 20 feet long, 12 inches diameter at the large end, in such form as the shape of the abutments may require, to be cut off true and even on top, to receive the timbers. On these piles are to be placed three timbers 12x12 inches square, and to be secured to the piles by bolts three-fourths inch diameter, 22 inches long, one to each pile, or by iron straps. The space between the timbers

and around the piles to be well filled with concrete. If required, sheet piling shall be put in across the foundation, connected with sheet piling on the upper side of dam, and with one row in the lock. On this timber 2-inch plank are to be well spiked with 6-inch spike. On this foundation the masonry of the abutments is to commence.

FOURTH SPECIFICATION.

Masonry.—The masonry in the abutment is to be composed of a good quality of sound and durable stone, laid in such form as may be required. The character of the work will be the same as the uncut masonry in the lock specification, to be coped with dressed stone 12 inches thick, of such width as will cover the top of the wall from $2\frac{1}{2}$ to 3 feet, and to be doweled to the wall below, and well clamped at the joints on top, the clamps to be let in, and all the iron secured with a cement of sulpher and sand.

FIFTH SPECIFICATION.

Dam.—The length of the dam will be from 600 to 700 feet between abutments, 45 feet wide on the bottom, including 25 feet of apron, and from 10 to 12 feet high, as may be required. If necessary, the foundation of the dam will be excavated by dredging, so as to make a uniform and even depth between the abutments, for a space of 45 feet in width; the excavation to be paid for at the same price as all other earth excavation, and the materials taken on boats to such points as may be required by said engineer. That part of the dam below low water mark, will be built in two tiers of cribs of square timber, one tier to be 20 by 30 feet square, the other tier for apron, to be 15 by 20 feet square, each tier to be divided up into compartments of not more than 10 feet square, as the plan of the engineer may indicate. The timbers in cribs to be 10 by 10 and 12 by 12 inches, framed and locked together as may be directed, secured with suitable bolts at each crossing, and each tier sunk side by side so as to fill the entire space between the abutments, the smaller cribs below the larger, and placed so as to break joints with each other, and each crib, as sunk, filled with loose stone. The top of cribs all to be sunk so as to make a uniform level across the river to receive the apron timbers and superstructure.

The top of smaller cribs, which form the lower or first apron, is to be covered with timber 12 inches thick and 17 feet long, the upper ends bolted to large cribs and the balance to the timbers in smaller cribs on which they rest. Below these cribs, or at foot of dam, a row of piles, 12 inches square, and 12 to 20 feet long, are to be driven close together the whole length of dam, between abutments, and the tops cut off true and even one foot below low water mark, to receive the apron timbers, which are to project over and be bolted to the piles, and each pile to have one bolt into the crib, the bolts to be $\frac{3}{4}$ inch diameter and 22 inches long. If required, a lining of plank is to be driven below and breaking joints with the piles.

On the top of larger cribs and first apron the superstructure of the dam is to commence, which will be 30 feet wide, for a rise of 3 feet, and 20 feet wide for the other 3 feet rise, except what is reduced by the upper slope of the dam. On the lower side of larger cribs, at three feet above the first apron, a second apron is to be laid close and tight together of square timber 12 inches thick and 11 feet long, and well bolted to the timbers below.

On this apron there is to be an offset of 10 feet, and the dam raised 3 feet in similar manner as the above. The top finish is made with coping plank, 8 inches thick at one end and four inches at the other end, laid on a slope up stream of $4\frac{1}{2}$ feet, and will be bolted to the timbers below.

The upper face of dam is to have a course of sheet piling the whole length between abutments, to be driven into bed of river $4\frac{1}{2}$ feet, making the entire length from top of dam 12 feet. A course of lining is to be put over the sheet piling, of the same length and breaking joints with the first course. On the top of dam is to be a longitudinal timber, 8 by 12 inches, bolted to the coping 7 feet back of lower side, to hold the brush and gravel.

SIXTH SPECIFICATION.

Brush and gravel is to be placed on the upper side of dam, sloping back from the top of longitudinal timber on coping to a point on bed of river about 50 feet above crib work, filling the entire space between the abutments.

Below the apron, brush and stone are to be filled in from top of lower apron, sloping down to bed of river at a distance of 20 to 30 feet, to be placed in alternate layers of brush and stone, as the engineer shall direct.

If vertical or battered bubble walls, laid in cement or dry, are required for protection, they are to be built of a character described in the lock specification. Also, the same in regard to slope or pavement walls.

SEVENTH SPECIFICATION.

For a more full and perfect explanation of the work required in this dam, plans of all the various details, together with bills of materials, will be furnished by said engineer or his assistants, who will from time to time give such directions as may be necessary to carry out the work in conformity with the plan, and the directions and plans must in all cases be complied with.

N. B.—The dam will be constructed with one drop of six feet and one timber apron of twenty-six feet, instead of two drops and two timber aprons, as above indicated.

R E P O R T
OF THE
STATE HOUSE COMMISSIONERS.

DECEMBER 17, 1875.

REPORT OF THE COMMISSIONERS.

STATE HOUSE COMMISSIONERS' OFFICE,
SPRINGFIELD, ILL., December 17, 1874.

To His Excellency, JOHN L. BEVERIDGE,
Governor of Illinois :

SIR—The State House Commissioners would respectfully submit their fourth biennial report :

The expenditures on the new State house at the close of the fiscal year ending November 30, 1872, amounted to \$1,597,456 81.

During the two years ending November 30, 1874, were expended \$1,050,338 68, making a total expenditure up to that date of \$2,647,795 49. Total amount of appropriations made, \$2,700,000. Unexpended balance in the treasury, \$52,204 51.

For expenditures for the two years ending November 30, 1874, see statement hereto attached marked "Exhibit A."

On the 15th of April, 1873, the Commissioners advertised for "proposals" for work and materials complete, as follows :

First—For the steam heating works.

Second—For metallic roofing, guttering and flashings for the entire roof, except the dome.

Third—For the plain plastering.

Fourth—For the wall and ceiling ornaments, plaster or carton pierre.

Fifth—For the marble work, mantles, tops of steam coils, wash-stands, facing of corridors, and for stairways.

Sixth—For the sky-lights.

By the terms of the advertisement, the proposals for the first and second classes of work were received and opened May 15, 1873; the other classes September 3, 1873.

The original "proposals" were filed in the office of the Secretary of State, as provided by law, (to which you are respectfully referred,) of which the following is an abstract :

STEAM HEATING.		
Baker, Smith & Co., Chicago, Ill.		\$105,960 00
John Davis & Co., Chicago, Ill.		105,975 00
Dane Bros. Manufacturing Co., Chicago, Ill.		93,556 00
Albert L. Ide, Springfield, Ill.		91,500 00
METALLIC ROOFING.		
E. A. Thayer, Chicago, Ill.		35,000 00
Harold & Gateau, Chicago, Ill.		
Zinc		33,985 00
Galvanized iron		35,995 00
Leeson Robinson, Springfield, Ill. :		
Zinc		50,532 20
Galvanized iron		54,864 00

A. Knisely & Co., Chicago, Ill. :	
Zinc	\$71,000 00
Galvanized iron	40,000 00
John E. Oxley & Co., St. Louis, Mo. :	
Zinc	32,000 00
Galvanized iron	34,000 00

PLAIN PLASTERING.

Smith & Eastman, Chicago, Ill. :		cont.
For 3 coat work on brick, per square yard	40	
For 3 coat work on lath, per square yard	30	
For 2 coat work, special, per square yard	20	
For 1 coat work, finish on plaster partitions, per square yard	10	
Porter White, St. Louis, Mo. :		
For 3 coat work on brick, per square yard	40	
For 3 coat work on lath, per square yard	30	
For 2 coat work, special, per square yard	20	
For 1 coat work, finish, per square yard	10	
Stucco work, per superficial foot	25	
John Mayger, et al., St. Louis, Mo. :		
For 3 coat work on brick, per square yard	40	
For 3 coat work on lath, per square yard	30	
For 2 coat work, special, per square yard	20	
For 1 coat work, finish, per square yard	10	
Stucco work, per superficial foot	25	
W. T. Heap, Chicago, Ill. :		
For 3 coat work on brick, per square yard	40	
For 3 coat work on lath, per square yard	30	
For 2 coat work, special, per square yard	20	
For 1 coat work, finish, per square yard	10	
Stucco work, per superficial foot	25	
A. Judson Pinkham, Chicago, Ill. :		
For 3 coat work on brick, per square yard	35	
For 3 coat work on lath, per square yard	25	
For 2 coat work, special, per square yard	15	
For 1 coat work, finish, per square yard	10	
Stucco work, per superficial foot	20	
Byrne & O'Brien, Chicago, Ill. :		
For 3 coat work on brick, per square yard	35	
For 3 coat work on lath, per square yard	25	
For 2 coat work, special, per square yard	15	
For 1 coat work, finish, per square yard	10	

ORNAMENTAL PLASTERING.

Smith & Eastman, Chicago, Ill. :		
Ornamental work, as per specifications	\$65,000	
Porter White, St. Louis, Mo. :		
As per specifications	167,000	
A. Desire, Goddard & Co., Chicago, Ill. :		
As per specifications	194,250	
W. T. Heap, Chicago, Ill. :		
As per specifications	100,000	
A. Judson Pinkham, Chicago, Ill. :		
As per specifications	145,000	
Paul Badeau, Springfield, Ill. :		
As per specifications	155,000	
Byrne & O'Brien, Chicago, Ill. :		
As per specifications	150,000	

MARBLE WORK.

Francis A. Drew, St. Louis, Mo. :		
Grand stairway	11,500	
Wainscoting	64,000	
Mantels	4,500	
Ph. W. Schneider, St. Louis, Mo. :		
Grand stairway	22,750	
Wainscoting	90,700	
Mantels	11,500	
Wash stand tops, etc., per square foot	2 00	
Burlington Manufacturing Co. Vt. :		
Grand stairway	23,000	
Wainscoting	80,750	
Mantels	10,000	
Wash stand tops, etc., per square foot	2 50	

SKY-LIGHTS.

Hayes Brothers, New York	4 00
---------------------------------------	-------------

Albert L. Ide, Esq., of Springfield, Ill., being the lowest bidder for the steam heating works, and Messrs. John E. Oxley & Co., of St. Louis, Mo., for the metallic roofing, the contracts were awarded to them, respectively, on their bids. The awards were accepted, contracts entered into, and they have since prosecuted their work in a very satisfactory manner.

The specifications for the metallic roofing invited bids for No. 16 sheet zinc and No. 20 galvanized iron. The proposals to do the work in zinc were the lowest in every instance.

Acting on the recommendations of the architects, and on their own judgment, after consulting the best authorities at hand, the Board decided on the use of zinc.

About one-half of the roof has passed through one entire season, has been subjected to the extremes of heat and cold, and so far has suffered nothing from contraction or expansion.

It is believed that a zinc roof, of proper weight or thickness, will prove highly satisfactory, being comparatively cheap, and will be found more durable than galvanized iron, requiring no paint or other protection like iron, having within itself the protective elements of paint.

Many men of practical experience contend that a properly constructed zinc roof is second only, if not equal, to one of copper, and can be furnished at from one-half to three-fifths the cost.

The contracts for the third and fourth classes of work—plain and ornamental plastering—were awarded to Messrs. Smith & Eastman; for the fifth class—marble work—to Francis A. Drew; and for the sixth class—sky-lights—to Messrs. Hayes Brothers.

Messrs. Smith & Eastman appeared before the Board and signified their acceptance of the awards made to them, and, on request, entered into contract to do the plain plastering, but declined to enter into one to do the ornamental work, claiming that having made an error in their estimate they could not do the work for the amount of their bid, \$65,000, without heavy loss.

Owing to the wide range of the bids on this class of work, (from \$65,000 to \$185,000) and the next lowest bid being \$124,275—almost double that made by Messrs. Smith & Eastman—the Commissioners declined to make another award.

After consultation with the architects, the Board, on mature deliberation, decided that under that provision of the law which empowers them to employ "such architects, mechanics and laborers as may be necessary for the early completion of said building," they would do a portion of the work by day labor, under the immediate direction of the acting architect, that they might form a more intelligent opinion of the value of such work, should they decide to again advertise for proposals, and to this end directed the acting architect, Mr. A. H. Piquenard, to employ mechanics and laborers, and proceed with the ornamental plastering of the Treasurer's office.

On the 9th of January, 1874, the architects were requested to submit to the Board their views as to the best and most economical manner of doing the ornamental plastering, gas-fitting, plumbing and carpenter work.

The architects submitted their report on the 9th of February, stating briefly the great difficulty of preparing such definite, complete drawings and specifications for the intricate and varied artistic and architectural work as would enable contractors to make a close and satisfactory esti-

mate, and recommended that all of that work be done by day labor, giving it as their judgment that the same could be done cheaper and better, and in a more satisfactory manner, than by contract.

After a careful examination of the whole subject, it was the unanimous opinion of the board that the several classes of work named, so ran into, and were so interwoven with each other, in their execution—each at times necessarily interfering with and retarding the other, rendering liable to contention if carried on by different parties with diverse interests—that they could not be carried on successfully but by joint action, under one control and one interest, without detriment to the work, and the material interests of the State.

Believing that they were authorized under the law, and acting upon their deliberately formed judgment, the Board decided at their meeting, February 9, 1874, to employ mechanics and laborers, and do the ornamental plastering, gas-fitting, plumbing and carpenter work by day labor, under the direction of the architects; and they were directed to carry out this determination under such rules and regulations as might be adopted by the Board.

In pursuance of this action, the work was divided into three general departments :

1st. The artistic work, including the execution of all strictly ornamental work in plaster and *carton pierre*.

2d. The plastering, including all run mouldings, plastering, and all mason work therewith, and with the gas-fitting, plumbing and steam heating.

3d. The carpenter work, including all work in wood, painting and glazing, and the plumbing and gas-fitting.

The first class was placed under the immediate direction of the acting architect, the others under competent foremen, subject to the control of the acting architect.

Rules were adopted governing the action of all employees, and the work again sub-divided into specialties, with sub-foremen in each, mechanics and laborers were employed, and the work prosecuted.

Messrs. Smith & Eastman notified the Board on the 12th of May, 1874, that they had abandoned their contract, and declined to do the plain plastering, stating that as they would not be able to do the work as one continuous job, as they had supposed, but only at intervals, running through several years, their doing so would result in great inconvenience and loss.

To re-advertise for the plain plastering would be expensive, and cause delay and damage in the other branches of the work, and believing that by combining the plain plastering with the ornamental stucco work it could be done cheaper, even, than the price agreed to be paid Messrs. Smith & Eastman, they have since been carrying on the same in connection with the other work, by mechanics and laborers employed by the day.

The Commissioners still adhere to the opinion that they have acted within the law in their manner of doing the work, and they have had no cause to regret their action. This course has increased very considerably the amount of their care and labor, as well as that of the architects. But, admitting that they properly construed the law, the wisdom of their action and their vindication must be sought in the results.

By reference to the accompanying report of Messrs. Cochrane & Piquenard, architects, it will be seen that the work done by day labor is

costing less than the original estimates or lowest responsible bidder, when it had been opened to competition, though more elaborate and richer, and of a better character, than could reasonably be expected under contract work.

The general comparison of the original estimates, and the estimates made by Messrs. Bauer, Carter & Deakman, under the direction of a committee of the 26th General Assembly, with the actual cost of the work done, in the aggregate, as well as the more special ones, make a very satisfactory showing—one almost without a precedent in the construction of public buildings.

For a more particular account of the amount of work that has been done during the last two years, the comparative cost, and the present status of the work, we would refer you to the architect's report.

For the further prosecution of the work we would ask for an additional appropriation of eight hundred thousand dollars (\$800,000)—five hundred thousand dollars (\$500,000) payable out of the levy of 1874, and three hundred thousand dollars (\$300,000) out of the levy of 1875, making a total of \$3,500,000, the limit fixed in the constitution for that purpose, without a submission to the people.

With this appropriation we expect to complete the entire structure by the first of January, 1877, provided that the appropriation be made at an early day, and with the emergency clause so as to make the funds immediately available, and there be no delay.

By section 2 of an act entitled "An act supplemental to 'an act to provide for the erection of a new State house,' approved February 25, 1867," approved February 27, 1867, the Commissioners are restrained from entering into any contract for labor and materials requiring an expenditure of more than five hundred dollars without advertising, and only as therein provided. This limit was extended to twenty-five hundred dollars, by the act of June 14, 1871. We would now recommend the removal of the entire restriction, by a repeal of that section.

No provision has yet been made for the glass and marble tiling, fresco painting, gas fixtures, carpets, furniture, etc. Neither of these can be contracted for within the present limit and they are so varied in style, finish, quality and *fitness*, that a strict compliance with the law in the mode of purchase might, in many cases, defeat the very object had in view: the protection of the interest of the State.

That the Legislature acted wisely in the original enactment, there is no question; but the necessity for such restriction has now almost ceased to exist. If this recommendation should meet the approval of the Legislature, and that section of the law be repealed, their wisdom will suggest proper and necessary checks and restraints.

We are greatly indebted to the architects, Messrs. Cochrane & Piquenard, for the ability and energy with which they have executed their trust, and their fidelity in protecting the interest of the State, and would here invite attention to their report, in all its details.

We cannot close this report without an expression of our appreciation of the cordial co-operation of the several contractors, and approval of the faithful and satisfactory manner in which they have executed their trusts.

JACOB BUNN,
JOHN T. STUART,
JAMES H. BEVERIDGE,
Commissioners.

ARCHITECT'S REPORT.

ARCHITECT'S OFFICE,
SPRINGFIELD, ILL., Dec. 1, 1874.

To the Board of New State House Commissioners :

GENTLEMEN: Your architects respectfully submit the following report of the work done on the new State House since their last biennial report of December 1, 1872, with such suggestions as may be advisable for the early completion of the building.

At the date of our last report, the outside walls were raised on an average level corresponding with the lower part of the cornice; the rotunda, or lower part of inside dome, 13 feet above the level of the first story above the ground floor; the brickwork was advanced in the same proportion, the iron beams for floors were all laid except those in the upper stories of the east and west wings—part only of the roof trusses were under way.

Since that time we have completed all the outside walls proper, and the basement of the north and east porticos; brought the inside dome above the main roof and set the base of the stylobate of the dome, finished all the inside brick work, set the balance of the iron joists and roof trusses, all the rafters and ceiling joists and sky-lights; covered the roof, plastered the main story, except three small rooms and the corridors; prepared the models for nearly all the wall, cornice and ceiling ornaments and the mouldings of the same, and made and put up one-half of them.

In reviewing the amount of work done, we find that during the last two years we have laid 225,976 cubic feet of stone, 25,200 cubic feet of granite, partially polished; 8,203 cubic feet of plain marble in the arches; laid 4,496,000 bricks, worked and set 1,328,373 pounds of iron of the most intricate character; plastered 8,500 yards of walls and ceilings, and run 70,000 superficial feet of cornice and other moulded work, one-half of the same being covered with Carton Pierre ornaments; made and laid 110,000 square feet of plaster fillings between iron beams, nearly completed the whole of the steam heating, and have on hand most of the materials, and have done more than one-half of the labor of the plumbing and gas fitting for the entire building, and have the whole of the marble work under way.

We think it may be appropriate at this time to compare the value of the work done to date with the estimates made for the same by the order of the 26th General Assembly.

The sum of money paid to date is two millions six hundred and forty-seven thousand seven hundred and ninety-five dollars and forty-nine cents (\$2,647,795 49,) and there is still due on retained percentage, etc., about forty thousand dollars (\$40,000,) making a total of expenditures and liabilities of about \$2,687,000.

If from this amount we deduct, say \$170,000—the value of materials and labor on hand and paid for, hereinafter particularly stated, but not yet in the building—we have the total cost of the new State House as it now stands a little less than \$2,520,000.

Table of Former Estimate and Actual Cost.

	Estimate.	Cost.
Foundations—Work done and paid for before estimate.....	\$465, 686 67	\$465, 686 67
Brick Work—Part replacing iron joist in basement, including boiler house and stacks, days work and cement, part replaced by stone.	318, 308 71	248, 577 59
Concrete—Part made by contractors; by general jobbing account, (including general expense and sewerage in cash account.....)	31, 519 40	20, 790 59
Cut Stone—Adding value of non-estimated stone, replacing brick and all iron anchors, and deducting all to be paid yet for stone, cutting and setting for old estimate.....	644, 759 30	1, 041, 567 74
Plastering—Part replaced by stone and marble, and part replacing wood work, (and frescoing \$5,000).....	84, 249 00	46, 554 34
Gas Fitting and Plumbing.....	11, 900 00	13, 384 39
Painting and Glazing—Deducting painting and sanding of iron work replaced by stone.....	15, 235 00	2, 881 19
Skylights.....	4, 246 00	3, 560 00
Wrought Iron—Adding advised framing of roof, fire-proof partitions replaced by heavier floors and composition blocks.....	390, 266 10	252, 700 90
Cast Iron—Mostly replaced by stone and granite.....	183, 119 12	18, 699 40
Carpenter's Work—Including centering and deducting all work not done, part replaced by Carton Pierre or marble.....	103, 983 68	70, 442 30
Roof—Deducting dome part and porticos not finished.....	37, 517 00	31, 474 50
Marble Work—Granite and Scagliola.....	133, 173 84	179, 730 38
Steam Heating—Part extra work on account of distance.....	92, 000 00	85, 294 44
Expense of estimating, house and lot, and attorney's fees.....	24, 000 00	25, 580 90
Employees, architects, commissioners, rent, furniture and other general expense.....		147, 038 33
Total.....	\$2, 689, 237 82	\$2, 647, 795 49

Some of these items, such as painting, frescoing, plumbing and gas fitting, are only an approximation, but as they are small, it is sufficiently near the exact amount to be satisfactory for the comparison.

As may be seen by the above, we have kept within the estimates made by ourselves with great care, and revised by three architects and builders appointed by the building committee of the 26th General Assembly, notwithstanding we have in some particulars, by a change in the materials, and in the style and character of the work, considerably increased the cash value of both the materials and labor of some of the parts. We have made the modifications advised by the resolution of the said building committee; thus, all the framing of the mansard roofs and of the west wing is of iron, we have dispensed with all wood partitions, increasing the strength of the floors to render them able to carry the fire-proof hollow blocks, replaced the iron columns and pedestals of the rotunda and grand staircase by polished granite with white marble caps. Besides these advised modifications, we have replaced plastered brick work by cut stone and granite inside of the rotunda, and for the vaults, and by plain polished marble in the large and small arches. The carpenters' and joiners' work is much increased by adding heavy wainscoting to each room of the main story, where none was originally

intended, and a higher and more elaborate class of finish around the windows and doors, and by adding a large amount of ornamentation and carving, and large quantity of joiner's work in corridors has been replaced by marble, and on the roof by metal. We have more than doubled the quantity of ornamental plastering, and made all new models for the same. Steam heating works have been erected outside of the grounds at an increased expense in buildings, new chimney stacks, tunnel, and extra length of pipes.

As before stated, there is on hand and paid for a large amount of cut stone and other materials ready to be placed in the building, as follows :

Upper dome stone	\$50,400 00
Cutting of part of same	10,547 50
South portico—stone and cutting	21,040 00
Stone steps for inside stairs	1,312 50
Caps of portico columns—stone and cutting	24,000 00
Marble work delivered	22,929 75
Terra Cotta for porticoes	3,000 00
Balustrade over same	4,618 00
Bricks—about	12,000 00
Lumber and other materials	15,000 00
Total	\$170,947 75

—Leaving only the stone for porticoes above the basement yet to be provided for.

With our advice your board decided to have part of the work done under the general direction of the acting architect, with proper foremen, by day labor, on account of the difficulty for any contractor to offer proposals for certain work intelligently, of which we had an example in the bids for the ornamental plastering; also by reason of the readiness with which we could either contract, change, modify or extend our work according to the means at our disposal, or as might be deemed advisable to add to the beauty, architectural effect, and to the practical use and convenience of the different parts; and also as we then thought by reason of the low cost it would be to the State, when at the same time the work would be done exactly as we wanted without conflict with the contrary interest of a contractor. We think the results show the wisdom of your resolution, both in relation to the cost and quality of the work.

We had received proposals for the plain and ornamental plastering. The lowest bid for plain plastering was 40 cents a yard, 50 cents for certain specified work, 18 cents for one-coat work; also 25 and 29 cents per superficial foot for cornice work. The plastering we have done to date would have cost, according to these bids, as follows :

4,824.6 yards plastering, at 40 cents	\$1,929 84
1,288.5 " " " 50 cents	644 25
2,779.0 " " " 18 cents	500 32
62,200.10 superficial feet cornice, at 29 cents	18,038 00
7,967.0 " " " moulding over doors and windows, at 25 cents	1,991 75
Total	\$33,104 19

The whole amount paid for labor and materials for doing the same has been \$17,875, to which should be added the labor of scaffolding and part of the material for same, say \$750, if not compensated by the value of the steam engine charged to that amount, making a difference of \$5,229 19, or more than 22 per cent. in our favor.

After Messrs. Smith and Eastman declined to do the ornamental plastering under their bid, we prepared by your order a statement of the cost of that work in the several departments on the basis of the pro-

posal made by Messrs. Goddard & Co., which we considered a reasonable one, and even lower than our original estimates.

In this division our estimate for the Auditor's office was for the modeling and carton pierre work \$2,250, and for the cornice work \$687 75, a total of \$2,935 75. For the supreme court room, modeling and carton pierre \$3,500, cornice \$1,210, total \$4,710. The actual cost of executing the work was—

Auditor's office:	
Modeling	\$1,262 61
Carton pierre.....	774 88
Cornice	997 00
Total.....	\$3,034 49
Supreme court room:	
Modeling	\$1,858 54
Carton pierre.....	1,480 85
Cornice	1,480 80
Total	\$4,820 20

This includes the ornamentation of the walls, door and window caps of these rooms which were not included in the proposals.

It will be seen from the above that the actual cost, including the additional work, was somewhat over the estimate. Most of the models used in these rooms, however, will hereafter be used in other rooms in different combinations, thus making entirely new ornaments without additional expense. All, except those that are special, have been and will again be used for other rooms, and on account of this repeated use the entire first cost of the models should not be charged up to these rooms. Not more than one-third or one-half of the Auditor's room and one-half or two-thirds of the Supreme Court room and the balance distributed throughout the building. The reduction will reduce the actual cost of the Auditor's room to \$2,200 or \$2,400, and the Supreme Court room to \$3,900 or \$4,200, a saving of from 12 to 20 per cent. We have selected these rooms for our comparison as the Auditor's office is a fair average, and the Supreme court the most expensive of the work done. If we take another room, such as the Superintendent of Public Instruction, a large room where such models have been used, we find the cost to be only \$904 80 instead of \$1,750, the value of the estimate, showing a saving of \$845 20 by the re-use of the old models. The carpenters' work of the first story rooms, though nearly double in quantity, is done at the value of the first estimate.

All other work, when done according to the designs on which the original estimates were made, is done at a less cost, and even in cases where the work has been of a richer style and more elaborate, the cost has seldom been in excess of these estimates.

We may, in the future, reduce somewhat the cost of our work by subdividing, when practicable, and giving it out in contracts to the workmen, or by piece work, as the case may be. The mechanics will become more interested in the work, will make better wages by increased diligence and closer attention, and then by competition and the stimulus of interest, the cost of construction will, we think, be reduced. Our experience with the stone cutting of the State Capitol of Iowa has been a great saving to the State, by changing from day labor to piece work, the men making better wages.

Instead of using old patterns and models and making plaster casts for the ornamentation of the rooms of the building, you have decided to use "Carton pierre," a kind of *Papier Mache*, generally used in Europe for

such purposes, which costs about the same as plaster casts, but is tougher and can compare with wood in hardness, is more durable than plaster, and less liable to injury. You have also thought with us that the value of the building was such as would require new ornaments and models made for the very place where intended to be used. Your Acting Architect has by your order employed artists for that purpose, of whose work you are now able to judge. He has also employed special artisans for making "carton pierre," as it is a composition hardly known yet in this country.

To use this material profitably it has to be nailed to the walls and ceilings like wood. We had then either to use pure plaster of Paris for plastering, which would have been very expensive, or find some composition equally good to replace it. This your Acting Architect has succeeded in doing without increasing the cost above ordinary plastering.

The foreman of the Carton Pierre Department has also made an improvement in that composition, which enables us to make mouldings in imitation of carved wood, at a trifling cost above common plaster mouldings.

Your Acting Architect has also employed skilled mechanics to make Seagliola or artificial marble, specimens of which may be seen in the Supreme Court room, the intention being to have all the corridors of the first and second stories of marble, real, for all such parts more exposed, artificial, for all walls, pannels and caps over the doors.

Our roof is covered with heavy sheet zinc, a metal not yet used in America for this purpose, although on the continent of Europe it has replaced most of the metal roofs, as it stands the weather as well as copper or lead, and costs considerably less. It was supposed that the greatest difference between the extremes of temperature in summer and winter in this climate would be a cause of failure in using it, but we knew by the experience of your Acting Architect that when properly put on, no difference of temperature would affect it, and so far our roof has established the correctness of our view. As to its durability when exposed to the influences of the weather, aside from the effect of heat and cold, no doubts were entertained, as it is used every where to protect iron from oxidation. It really paints itself, its oxide being a protection against further oxidation.

We had pushed the work on the building with the expectation of giving the first story for occupancy by the State officers and the 29th General Assembly this winter, but the general inconvenience as well as the dampness of the inside, which has delayed us a little, has satisfied the Governor and State officers that it would not be desirable for the public service and for the health of all concerned to use the same, so we have changed somewhat the course of the work to its advantage.

That there might be no delay in other work we were obliged to commence plastering some of the inner walls but lately protected before they were sufficiently dried out, and as a consequence a few places are discolored, which discoloration will be remedied by the painting. We took the precaution to leave an air vacuum under and in the rear of the wool work to prevent it from warping. Notwithstanding this, some of the ordinary floors are slightly affected, and will require dressing over in two of the rooms. We have since suspended laying floors until a more favorable time.

By all appearances it will require a few months of steam heating and good ventilation to render the building safe to occupy. All the openings of the building have been boarded up so as to prevent any more action of the rain, and give more effect to the heating and ventilation of the enclosed rooms and corridors.

To get the first story ready for this winter, we found that our carpenters could not with their other work do all the doors in proper time, so you gave Mr. C. E. Cook an order for twenty-two of them. We were so well satisfied with his work that we advised you to order the balance of the double doors of the first story, which he made to our full satisfaction. You gave him another order, and we have no doubt they will be as well made as the others, and that they will not cost us more, on an average, than they would had they been made here, we not having the same facilities for such fine work.

In following the same progression with our work we can easily complete the whole building inside of two working years, if a sufficient appropriation is made. To do this we will require this final appropriation, \$800,000, to be divided as follows: the first year should be \$500,000, and the second year \$300,000; as the heaviest and most expensive parts, the Legislative halls and corridors, rotunda and dome, will be the work of the first year.

The State officers being desirous to occupy their apartments towards the first of June, it would be advisable to ask the Legislature to make the appropriation early in the session, so as to permit us to provide for the tiling of corridors, for the necessary furniture of these rooms, the making of proper approaches to the building, and also to advance early the work on the Legislative halls, which require considerable time to finish.

We have already called your attention to the importance of having a larger limit fixed to the law authorizing you to contract directly with proper parties for different works without advertising. We beg leave to renew again the advice. We have much work which cannot be given to the lowest bidder, but to the parties best qualified to do the work required: for instance, the artistical work, sculpture, fresco painting, and the interior ornamentation, which must be done by skilled artists and mechanics selected for the different works, if the people of the State want the building to be a work of Art. A fair reasonable price may easily be agreed upon with such men. Again some things necessary to be used are covered by patents, such as glass tiling for the large circle in the rotunda on the main floor, and the inside shutters for the large upper windows, the latter being made by but one firm in the United States—then there are other items, gas fixtures, carpets, furniture, etc., which cannot be purchased advantageously, with proper selection of colors and patterns, to fit the rooms intended to receive them, under the present restriction of the law.

We believe unnecessary to report again that we have no doubt of the completion of the building within our old estimates. We have to this day worked inside of them, and will continue so to do to the best of our ability.

Thankful for the continuation of your confidence,

We remain, gentlemen,

Your most obedient,

COCHRANE & PIQUENARD,

Architects Illinois State House.

EXHIBIT "A."

Statement of the Expenditures on the new State House, for the two years ending November 30, 1874.

MISS FANNIE WOOD,
MISS ELIZA T. MARTIN.

Olerk,

MINER DAVID.

TRUSTEES' REPORT.

To His Excellency, Governor JOHN L. BEVERIDGE :

SIR—We respectfully submit this the tenth annual report of the Illinois Institution for the education of Feeble minded Children.

The Rev. W. J. Rutledge, whose term of service as trustee expired in July, 1873, was re-appointed from Pike county for a new term of five years.

The receipts and expenditures on ordinary expense account for the year ending November 30, 1874, have been as follows :

Total receipts.....	\$26, 0-2 18	
Total expenditures.....	25, 991 59	
	\$100 59	
 Insurance fund account:		
Total receipts.....	\$505 42	
Total disbursements.....	423 44	
	81 98	
Total amount on hand.....	\$189 57	

A detailed statement of the receipts and expenditures will be found in the financial statement of the superintendent accompanying this report.

Although the appropriation made by the general assembly for the support of the institution for the last two years was based upon an expected attendance of 80 pupils, the attendance for the school term for the past year, including the days' board furnished pupils during vacation, was equivalent to 107, at an average cost *per capita* to the State of about \$230 per annum, including insurance.

When it is considered that the inmates of this institution require, from their helpless condition, a greater amount of personal care than those of any other class of the State beneficiaries, the cost of tuition and maintenance of the pupils during the past year has been comparatively very moderate, and probably at as small a sum *per capita* as they could have been maintained properly elsewhere.

One-fourth of the pupils remained at the institution during the vacation, and hereafter a much larger proportion will probably remain, as the cost of transportation to the respective counties from which they come, some of them being from remote sections of the state, is such a serious bill of expense, and the want of proper discipline is so productive of unfavorable results while they are absent, that the best welfare of pauper pupils, at least, will be secured by their remaining at the institution.

The experience and the investigations of the board of trustees of this and similar institutions, as well as the State Board of Public Charities of this and other States, have established the following facts :

First—That idiots exist in civilized communities in the ratio of at least 1 to every 800 inhabitants.

Second—That there is no evidence of a tendency to a decrease of idiocy in its ratio to the population, but on the contrary statistics indicate its increase.

Third—That idiots without instruction must be maintained at the expense of others, for they are unable to provide for themselves.

Fourth—That their condition, whether in private families or in public almshouses or jails, is deplorable, and the dictates of humanity necessitate some decided change for the amelioration of that condition.

Fifth—That when maintained singly in private families or in small numbers in county poorhouses, provided they receive proper care, the cost *per capita* must be greater than when they are congregated in institutions and asylums.

Sixth—That a large percentage of the number of idiots in any state can be rendered capable of some degree of useful occupation, thus compensating in whole or in part for the cost of their maintenance, if trained and instructed at a proper age.

Seventh—That almost all can, by training, be made decent in their habits, and to assist in ministering to their own personal wants.

The results of the investigations in Illinois have shown that there are in the State 3000 idiots of all ages; that about one-third of them are of a school attending age, and that the friends and county authorities having control of one-fifth of them are anxious that the State shall afford them advantages for instruction and training; that their condition is just as deplorable as those of other States; that they can be educated to productive usefulness, and many of them instructed in the ordinary branches taught in common schools; that all can be made more obedient, decent in their habits, and to care for themselves partially in personal matters; that they can be made happy and useful, instead of being miserable burdens to their friends and society; that in the institution they can be supported and educated at a less cost *per capita* than when kept without education at their homes and at the county almshouses.

The institution has now 103 pupils present, and in order to accommodate them is very much crowded. Some of these pupils are *physically*, as well as mentally, very helpless, being unable to walk.

The buildings now in use for the purposes of the institution are cheap pine, frame structures, and, in case they should take fire, would burn so rapidly that it would be a matter of impossibility to save the lives of all the inmates should it break out in the night.

While using every effort to counteract this danger, it has been and continues to be a source of anxiety, and we can do no less than urge the legislature to provide buildings less liable to the danger of fire.

Applications for admission are so numerous, as will be seen by referring to the Superintendent's report, and so many children have been rejected each year, for the last three years, that we are satisfied that if we had accommodations for two hundred and fifty pupils they could be filled immediately by the applicants already on file in the institution of a school attending age.

The present location is not a desirable one, as it is too near the city and is upon a public thoroughfare. The only available land which can be used by the pupils for exercise and play, is a public park belonging to the city of Jacksonville, which is subject to the intrusion of people,

who annoy the pupils by staring at them and by pointing out their peculiarities and making remarks about them.

The present buildings are greatly out of repair and are so inconvenient in their arrangements and so illy adapted to the use of the large number of pupils crowded within them, that there can be no question as to a necessity for the provision, at once, of more ample accommodations designed especially for the purpose.

We have not enough land for pasture or for agricultural purposes. We have no land upon which to develop a capacity for agricultural labor in the large boys, and this should be one of the prominent aims of the establishment.

There should be a farm connected with and belonging to the institution for the purpose of instructing the boys in farm labor, and this would enable us to depend, in a considerable degree, upon the products of the farm for our supplies, thus materially lessening future appropriations for the support of the inmates of the institution. As we are at present situated, aside from the opportunity of instructing the pupils in household and domestic employments, the institution is only a school. The scanty grounds and crowded rooms have afforded no opportunity for the giving of a practical direction to the faculties awakened in the school-room.

For these reasons, we recommend that a farm within two or three miles of some central city be purchased by the State for the permanent location of the institution.

The farm should consist of not less than two hundred acres, containing pasture for thirty or forty cows, as a milk diet is both healthful and economical; woodland, to furnish shady groves for the out-door exercise of pupils; tillable soil, for the purpose of the development of a capacity for farm labor in the male pupils, and a suitable elevated site for the location of buildings.

We are of the opinion that this amount of land, in a desirable location cannot be purchased for less than one hundred and twenty-five dollars per acre, and we therefore request that the sum of twenty-five thousand dollars be appropriated for the purchase of not less than two hundred acres of land for the permanent location of the institution.

Plans and estimates for the erection of plain but suitable buildings for the accommodation of two hundred and fifty pupils have been furnished by A. H. Piquenard, Esq., the architect of the new State House, at Springfield, and upon these estimates we have based an application for an appropriation of one hundred and seventy-five thousand dollars for the construction of buildings. Compared with the cost of other State charitable institutions of Illinois, this is a very small sum *per capita* for buildings.

From the known cost of buildings which have been constructed in this country and in Europe, it is believed by us that the sum asked for will be amply sufficient to complete the designed buildings.

For the usual current expenses of the institution for the maintenance and support of one hundred pupils, we ask the sum of twenty-four thousand dollars per annum. For insurance and furniture, the further sum of five hundred dollars per annum.

We invite your attention to the statistical information contained in the accompanying report of the Superintendent, also to the testimonials received this year, concerning the progress of pupils, from parents and friends of the children, which will be found elsewhere in this report.

We desire to repeat the good opinions heretofore expressed of the skill in the management and of the devotion to its interests and their respective duties of the various officers of the institution.

We would also again urge the members of the General Assembly, individually, to visit the institution, to make themselves thoroughly familiar with its operations and necessities, in order that they may act wisely and intelligently in its behalf.

We also desire to express our thanks for the cordial sympathy and co-operation which you have given the enterprise and for your several visits to the institution.

Respectfully, yours,

GRAHAM LEE,
DAVID PRINCE,
WM. J. BUTLEDGE,
Trustees.

SUPERINTENDENT'S REPORT.

To the Trustees of the Illinois Institution for the Education of Feeble Minded Children:

GENTLEMEN:—In submitting this the tenth annual report, I will first present a summary of the statistics of the institution for the year just closed.

The whole number of pupils connected with the institution during that time have been 137.

At the close of the year ending November 30, 1873, there were present 100 pupils. Thirty-seven have since been admitted and thirty-four removed, leaving now present 103 pupils.

Of the pupils dismissed, fourteen were qualified to earn a living by their own labor—twelve of whom had learned to read and write, and were more or less familiar with geography and arithmetic. Two were transferred to the State Institution for the Education of the Deaf and Dumb; two were dismissed on account of epilepsy—one died of laryngitis—and two have been detained at home for reasons unknown to us, although their friends have signified by letter during the vacation that they desired places reserved for them for the present school year. Thirteen went home at the close of the school term in June, and were not permitted to return, because we had no room to accommodate them, as they were from sections of the State which had more than their full quota of pupils in the institution.

It has been the effort to accommodate 102 pupils, or two from each senatorial district of the State, although this number is very considerably larger than our present buildings will comfortably accommodate.

There have not been suitable applicants from four of the districts, but we have kept up the number by admitting pupils from sections of the State which have more than their quota of pupils in the institution. It is our intention, however, to adjust the number equitably to all parts of the State, by removals, when proper applications are received from unrepresented districts.

The annual number of new applications for admission of pupils to the institution since its organization, have been in the respective years ending November 30, as follows:

1865.....	69	1871.....	73
1866.....	61	1872.....	87
1867.....	60	1873.....	100
1868.....	31	1874.....	110
1869.....	47		
1870.....	38	Aggregate number.....	673

This comprises only those applications which have been made in a formal manner, fully complying with the requirements of the institution by describing the cases minutely upon a blank designed for the

purpose, which contains, also, the certificate of a physician giving a medical history of the cases, but does not include a large number which have been made by letter, no further effort being made when the fact was understood that the institution could not immediately accommodate them.

There have been admitted, from the applications filed in the respective years ending November 30, the following number of pupils:

1865	22	1871	31
1866	21	1872	35
1867	26	1873	40
1868	14	1874	37
1869	24		
1870	12	Total number	241

From the applications filed in the respective years mentioned, we have been compelled to decline admission to pupils for various reasons, but *principally for want of room to accommodate them*, as follows:

1865	47	1871	41
1866	40	1872	32
1867	34	1873	40
1868	17	1874	31
1869	23		
1870	26	Total number of applicants rejected	222

The applications received have been from the counties of Illinois and other States, as enumerated in the following table:

Adams	13	Logan	5
Alexander	3	Macon	12
Bond	4	Macoupin	11
Boone	6	Madison	3
Brown	2	Marion	4
Bureau	8	Marshall	2

Knox	17	Williamson	1
Lake	3	Winnebago	1
LaSalle	11	Woodford	1
Lawrence	6	Unknown	1
Lee	3		
Livingston	6	Total Illinois	413

<i>Other States.</i>			
Arkansas.....	1	Minnesota.....	2
Indiana.....	9	Missouri.....	9
Iowa.....	14	New York.....	1
Kentucky.....	1	Tennessee.....	11
Kansas.....	6	Wisconsin.....	11
Michigan.....	5	Total.....	675

The average age of the foregoing 675 applicants is twelve and two-third years.

The average age of the pupils admitted during the present year was twelve years.

The average age of the 103 pupils now present is fourteen years.

The ascribed causes of idiocy in the 675 applicants, were as follows:

Congenital.....	339
Convulsions in early childhood.....	106
Epilepsy.....	80
Accidental.....	20
Brain fever.....	20
Paralysis.....	13
Severe illness in infancy.....	10
Whooping cough.....	9
Convulsions from teething.....	9
Scarlet fever.....	9
Hydrocephalus.....	8
Measles.....	7
Influence of opiates.....	6
Intemperance of father.....	5
Fever.....	4
Spinal affections.....	3
Hereditary.....	3
Calomel.....	2
Consanguinity of parents.....	2
Fright.....	2
Typhoid fever.....	2
Quinine, deaf-mute, sunstroke, mumps, rat bite, bilious intermittent fever, insanity, masturbation, chorea, rickets, cerebro spinal meningitis—each 1.....	11
Unknown.....	5
Total.....	675

It is very evident that two-thirds of this number were congenital idiots. The ratio of epileptics to the entire number is so small, that I confess I have been surprised at the result shown by these statistics. In the cases ascribed to convulsions in early childhood and from teething, the history indicated that the convulsions were of short duration—varying from one single spasm to occasional spasms for several months. Where convulsions occurred for a period of years the cases were numbered among the epileptics. Epilepsy is often associated with congenital idiocy. The result of this investigation would seem to indicate that congenital idiots are far more numerous than any other class.

Congenital idiocy furnishes the most improvable subjects for the school room, and for training in useful occupations. The majority of them, in the degree of mental deficiency, stand upon the plane just below the lower grades of ordinary intelligence.

The history of the cases revealed the fact that the applicants were the

First children in.....	191 cases
Second " ".....	114 " "
Third " ".....	87 " "
Fourth " ".....	68 " "
Fifth " ".....	26 " "
Sixth " ".....	35 " "
Seventh " ".....	22 " "
Eighth " ".....	13 " "

Eleventh " ".....	5 " "
Twelfth " ".....	2 " "
Thirteenth " ".....	1 " "
Fourteenth " ".....	1 " "
Not stated.....	82 " "
Total.....	675 cases

This institution was founded to meet a public necessity. The extent of the want, and the obligation of the State to supply it, can only be fully understood by a recognition of the magnitude of the evil which it is proposed to alleviate, and by considering the variety of conditions that exist under the general name of idiocy, and the social circumstances to which it is related in various ways.

The magnitude of the evil has been fully shown, in previous reports, to be second to no other of this nature in the State.

"Generically, it may be said that the term *idiot* includes all those cases where, from defect or deformity in the nervous system, there is a want of natural and harmonious development of the mental and moral powers of a human being, under the customary laws and circumstances of human growth and culture. The inherent physical cause and the accompanying mental deficiency may be slight or extreme. It may affect every function, every faculty and every power; or it may only blunt the sensibilities, weaken the intellect and slightly impair the force of the will.

In its social aspects it presents an equal variety. It may occur in the homes of the affluent, in the families of the middle class or the indigent, and is almost always found in our pauper establishments. Everywhere it is a cause of discomfort, anxiety and a frequent source of mortification; in many instances a burden hard to be borne by rich as well as poor. And rarely can the proper means and appliances be supplied for its mitigation, except in institutions designed expressly for the purpose.

The State should exercise its providence over all of these classes, because counties and individuals are unable to do it properly; and as the wealthy and middle classes of society are compelled by taxation to stand the burden of expense, all expenditure of the public funds should be in such a manner as to include all the cases occurring in their families. At the present time the county poor house or jail is the only place of refuge for the great majority of the children of this class of this State. The people who supply the means to build the alms houses and jails, cannot patronize them in the care of their unfortunate children because these establishments afford them no suitable care or even custody. Of course the number of individuals of this class usually found in a county would not warrant the expenditure of means essential to the proper care and training of idiot children; only where large numbers are congregated can such children be properly classified and economically instructed. Not only should the social aspect of the matter be considered, but the difference in the *degree* of mental deficiency of this class separates them into classes, whose condition may briefly be referred to in this connection. There is a class of idiots so defective or diseased in physical organization, and mentally so deficient, as to be absolutely dependent on others for the supply of their most simple wants; infants in everything but age and physical stature. As they grow up they are not only non-producers themselves, but by the burden and trouble of their care taking, are diminishing the comfort and productive power of those who from affection or a sense of duty are constrained to minister or try to minister to their wants.

The degree of the burden and discomfort is measured, only, by the degree of incapacity or the viciousness of the particular case. In some cases the burden has been sufficient to pauperize a whole family. For such as these a place of custody, in which there is system in manage-

ment, and the proper appliances and conveniences for easily curing them, affords a relief from positive misery and suffering; a degree of comfort and, at the same time, some improvement in the habits, which is not alone of service to the individual and a great relief to the average family of the community, or even those in charge of the county asylum, but is a positive gain to the productive power of the State. Separation of any dependent class from the ordinary life or circumstances of the community, does not *increase* the cost of its maintenance, but should *reduce* it to its minimum.

Prompted by such considerations, and after some experience of its operation, the work of congregating and caring for idiots by themselves has been determined upon by the authorities in England and with the warm approval of the Commissioners of Lunacy of that country.

There is another class, constituting the mass of idiots, with physical constitutions superior to those already described. In these the physical defect and infirmity is less deeply seated, and less marked; the bodily functions are impaired in their action in a less degree; the capacity for improvement, mentally and morally, is latent, because the mental life is not spontaneous in its action. It does not seek, through the active exercise of the senses, the aliment that should minister to its growth and strength; it does not feel the motives and action that lie above the range of appetite or passion; it grovels, while it should rise in the scale of being, and while the spirit thus fails in a proper active outgoing, a crust of habits of inertia and indifference forms about it and it grows continually more impervious to external influences.

Socially speaking, it may be said, that while the existence of these is less a dead weight upon the energies of any community than those of a lower grade of idiocy, yet in themselves they are equally unproductive. Their wants in the way of shelter, food and clothing are to be supplied without their aid; and very often this state of unproductiveness is accompanied by disagreeable habits and troublesome dispositions.

Higher than these in the scale of intelligence are those to whom the term of feeble minded may be properly applied. In their physical aspect they are hardly distinguishable from ordinary persons; and yet through some subtle default in the functional action of the brain, or other nervous tissue, in their mental expression and moral traits, they are imperfect and exceptional.

These cases are just enough below the rank and file of human beings in intelligence, to be forced to the rear in the progress from infancy to manhood. And this enforced disposition of them, or rather this dropping out of line, leaves them, without the occupations and the impulses suited to their age, and by which, and through which, the growth and development of their fellows is secured. Want of occupation in early life, means want of occasion for thought, for the exercise of the will, for self-determination, and the individual is left to be taken possession of by habits that wall him in from future purpose or effort. Sometimes a vicious self-education goes on, guided by appetite, passion or a spirit of mischief; and the result is seen in low cunning, petty misdemeanors, or even serious crimes that endanger the peace and safety of the community.

Each of these conditions has its own mode or form of impairing the soundness of the state and depressing its social activities and industrial forces. Each may be such a source of trouble, cost and anxiety to family and friends as to leave it an open question in philanthropy which is the most deserving of sympathy and aid.

For these two last classes described, something more than custody is needed in the effort to ameliorate their condition. The bodily health can be confirmed; the muscular powers can be developed and brought under the control of the will. The noticeable want of co-ordination in their physical forces can be made to give place to a measure of prompt action and dexterity. The avenues of sensation may be opened; the perceptive faculties may be awakened to a natural life; the intelligence may be quickened and enlarged, and these may be combined into a capacity for useful occupation and habits of industry. They may be trained to be cheerful and obedient; they may be taught habits of self-control, and the more obvious distinctions of right and wrong, and to act upon them in their intercourse with those about them."

The scope and purpose of the Illinois institution has been limited to those degrees of idiocy which might prove to be teachable. It has also been the aim to take only those of a school-attending age. It was supposed at the outset that somewhere in the descending scale of idiocy the line between teachableness and unteachableness would be reached. Of some at a distance from this line, it could be affirmed at once that they were susceptible of instruction or they were not; and for these latter it was presumed that a custodial institution would sooner or later be provided for their necessities; with others nearer the line the fact in this respect could only be determined by a fair trial. The conditions of admission have, to a greater or less degree, been based upon these considerations.

There has been a constant demand for the admission of pupils far beyond the capacity of the institution for their reception.

For the last several years, the most of these applications have come from parties who have been induced to seek its advantages for their children from their knowledge of cases that had already received its benefits, and from the testimony of friends and parents of pupils who had been improved in habits, had been rendered more intelligent and manageable, and in whom had been developed a capability for employment under intelligent direction.

The institution has always been freely opened to visitors, who can testify to the general healthy and orderly appearance of the pupils; the obvious adaptation of the educational means and appliances to their mental needs, and to the practical ends of their instruction; and the general progress of the pupils in their school exercises, although we have been compelled to labor under great disadvantages, from the nature of our accommodations. In fact, so well adapted are the modes of instruction to the different degrees of mental endowment of the pupils; so interested and attentive are they in the various exercises of the school room; so well disciplined in the prescribed movements and changes of the several classes, from hour to hour; so orderly and well behaved are they in their departments, in their dining rooms, and so free from the repulsive habits that are supposed to be inseparably connected with idiocy, that it often needs considerable explanation to convince strangers that the pupils represent the average idiots of the State.

At the institution the condition of the idiot is more nearly that of any other child at school. They are constantly under the care of teachers or attendants. The attendants have classes assigned them, and have charge of them at all hours out of school hours—sleep in the same rooms or a room adjoining, opening into their dormitories, so that attention can be bestowed upon them at night, if necessary, an effort being

made, by proper attention at stated hours, to regulate them in their habits, and cultivate habits of decency and cleanliness. They are with them when they rise, when they dress, when they perform their morning ablutions, when they go to their meals and while they are at the table, to assist them and wait upon them, and to preserve order, and to patiently instruct them in habits of propriety and decorum. In the dining room the pupils are classified—both sexes of the best class of pupils being permitted to sit at the same table, where they are allowed to help each other, and are instructed to conform to the customs of ordinary society.

The diet is so arranged and provided as to induce healthy systems and afford a proper amount of nourishment, care being taken to prevent gluttony, which is a common failing with this class of children. After each meal, by proper attention, the effort is made to regulate the natural habits. Out of school hours, the girls are exercised in household duties, such as washing dishes, sweeping, making beds, ironing and other domestic employment. The large boys are employed in and out of doors—cutting wood, doing garden work, and all other kinds of work that the facilities of the institution afford—the chief aim being to develop, by every possible means, a capacity for useful occupation. Those who are too young for employment, are taken out to walk, in classes, or to out door amusements, unless prevented by inclement weather.

For the purpose of school room instruction, the pupils are divided into seven classes, the first being composed of those possessing the highest capabilities. In the first three classes, the pupils are so graded that exercises can be adapted to each class, but in all of the lower grades it is found necessary to adapt the instruction to each individual, after carefully studying his or her peculiarities.

The pupils of the first class read in the fourth reader, spell, write, are more or less proficient in notation, numeration, addition, subtraction, multiplication and division, and perform examples upon blackboards and slates readily and with accuracy. They are also thoroughly familiar with Camp's outline maps of the world, the United States, and of Europe, and with the details of the geography of the states and countries represented in those maps. They have also been exercised in vocal music, singing by rote, calisthenics, and the females in sewing and embroidery. The interest manifested by these pupils in their lessons, and the pleasure and profit derived by them, from the instruction they receive, lead all who witness their recitations to feel that they are as much entitled to opportunities for intellectual culture as their more favored brothers and sisters, who are permitted to enjoy the advantages of the public school, from which they, however, are debarred, by their peculiarities and backwardness.

The pupils of the second class read in the third reader, write, spell, are instructed in counting, notation, addition and subtraction, and are creditably familiar in geography with the outline map of the United States, its capitals and principal cities, rivers, lakes, gulfs and oceans. They are also instructed in singing, calisthenics, drawing, and the females in sewing and embroidery. These pupils also seem to manifest a commendable degree of interest in their respective studies.

The pupils of the third class are instructed in reading printed and written words by the word method, and some of them read in first and second readers. They are also instructed in writing and drawing upon the blackboard and slates, and in writing and drawing books, in geo-

graphy upon the map of the United States, in singing, calisthenics, and the females in plain sewing and working with worsted upon perforated card board.

The pupils of the fourth class are taught to read written and printed words, to draw simple figures, and write letters and words upon the blackboard and slate, are trained in singing, physical exercises, calisthenics, object lessons, keeping time to music by marching and clapping hands, in articulation, and the females are taught to sew.

The pupils of the fifth, sixth and seventh classes are taught to comprehend simple commands, to obey, by physical exercises to fix their attention, to sing, to keep time in marching, ideas of form, color, number, and other object lessons adapted to their limited comprehension, and are exercised in articulation.

The daily programme of school room exercises is as follows :

DAILY PROGRAMME OF SCHOOL ROOM EXERCISES.

9 to 9:30 A. M.—All the pupils are assembled in the Gymnasium for devotional exercises, after which the time is spent in singing. On Wednesdays and Saturdays, after the devotional exercises, the half hour is spent in marching in time to music and other general exercises.

TIME.	SCHOOL ROOM No. 1.	SCHOOL ROOM No. 2.	SCHOOL ROOM No. 3.	SCHOOL ROOM No. 4.	GYMNASIUM.
9:30 to 10.	ARTICULATION. Fifth Class.	ARTICULATION. Third Class.	ARTICULATION. First Class.	OBJECT LESSONS. Sixth Class.	CALISTHENICS. Third Class.

3:30 to 4.	NUMBERS. Second Class.	NUMBERS. Third Class.	OBJECT LESSONS. Sixth Class.	WRITING. First Class.	PHYSICAL EXERCISES. Fifth Class.

With the lower grades the first efforts of the teacher are to develop a comprehension of language that the pupils may learn to obey simple commands.

Physical exercises in the gymnasium are then employed, by ladders and other apparatus, to force out the power of fixing the attention—to set in motion the sluggish circulation and to bring the muscular system under the control of the will.

The object system of instruction is then employed to develop in a higher degree the power of fixing the attention; also ideas of form, color, size, position, number, etc., by the use of blocks, button moulds, rivets, beads, colored cups and balls, colored cards of different shades and shapes, colored blocks, dissected pictures, and a great variety of other objects.

Those defective in speech are exercised in articulation. Thirty-three out of one hundred and three pupils do not talk. Thirty-six articulate very imperfectly, and only thirty-four can be said to articulate so that in talking they can be readily understood. But three of the pupils are deaf.

With the more advanced pupils calisthenic exercises are employed to arrest and fix the attention—to arouse the perceptive faculties and to bring every voluntary muscle under the subjection of the will of the individual; to develop the power of keeping time to music, and thus to train the eye, the ear, and the whole voluntary muscular system in a manner alike agreeable and profitable to the pupil. The individual thus trained is able to observe others when they are employed in useful labor and to imitate them.

Teachers and pupils engage in devotional and general exercises each morning at the opening of school, when all are assembled in the gymnasium, by repeating the Lord's prayer and other prayers in concert, and in singing secular and religious songs. Two hours are devoted on the Sabbath to religious and bible class exercises, one in the forenoon and one in the afternoon, and to instruction in moral and religious matters adapted to the comprehension of the respective classes of pupils, and to singing the familiar songs of other sabbath schools.

Reading is taught at first by the word method. Printed single words are used with beginners, who are afterwards promoted to readers, and the first, second, third and fourth readers are used in our school rooms.

In geography outline maps of the world, United States and Europe have thus far only been used. It is the aim to thoroughly instruct the pupils in geography, and very commendable progress has been made in this study.

In numbers pupils are taught to count, are instructed in notation, addition, subtraction, multiplication and division, are thoroughly drilled in the elementary principles of arithmetic.

In drawing pupils are first taught upon the black board and slates to imitate straight lines and simple figures. Afterwards Krusi's synthetic series of drawing-books are employed, and many of these books can be exhibited which show that the pupils have acquired a good degree of accuracy in imitation.

In writing, pupils are exercised upon the blackboard in making lines, letters, words and sentences until the eye is trained in imitation and the hand is accustomed to the use of the chalk crayon, when they are given pencils with copies in writing-books graduated to their capabilities.

A very good degree of proficiency in penmanship has been acquired by many of the pupils, which can best be illustrated by *fac similes* of the handwriting of pupils. The first is of a letter written by a pupil to the Rev. E. P. Hammond, who was this year conducting a series of his peculiar revival meetings in the city of Jacksonville:

Illinois. Inst. F. M. C.

May 29th 1874.

Dear Mrs. Hammond.

Will you please
come up here and tell us
children about Jesus.

We cannot go down to the
church to hear you.

Emma Burnett,

This pupil could not have been instructed in a common school because her case required the gradual development afforded by our patient system of instruction. I may add that she has graduated this year, and I see no reason why she will not make a useful member of society. Her friends testify to her usefulness at home, and state that when not engaged in useful occupation she may generally be found reading.

The annexed letter was written by one of the pupils and signed by all the others whose names appear. It is introduced as specimens of the handwriting of the pupils, some of whom have been rescued from a very low grade of idiocy.

The female pupils are taught plain sewing and embroidery during school hours. Beautiful specimens of their handiwork are on exhibition at the institution, and many have been carried away by visitors.

A special class in vocal music, consisting of twenty-four pupils, is under instruction in order that they may aid the other pupils in learning new tunes.

Visitors often express surprise upon hearing the pupils sing, for they seem to enjoy it heartily, and some very low cases of idiocy learn tunes, and those who do not talk, in some instances, in singing, articulate words and syllables which they have learned in the effort to sing with the other pupils.

We give in an appendix the testimony of parents and friends of pupils as it has been given us this year. Similar testimony has been given in former reports, but it has invariably been given the year of its publication.

The replies have been very much alike, as, in many instances, they come from the same individuals, and are in answer to the same printed formula of questions which have been sent them in previous years.

The institution, ever since its organization, but more especially for the last two years, has been laboring under very great disadvantages. We have been crowded in every department; we have been compelled to provide for large numbers with the ordinary apparatus and appurtenances of a private family.

Our buildings have been constructed in the cheapest possible manner, with a view only to temporary occupation, and do not compare in their external appearance or in durability favorably even with the poorest county almshouse of the State. The buildings are the lightest of pine frame structures, connected by cheap covered ways, so extending the different departments that they cannot be economically managed, and are a constant source of uneasiness on account of the danger of fire. Great precautions are necessary, because if any one of the buildings should take fire, it would probably spread so rapidly that many lives would be lost on account of the extreme helplessness of many of the inmates.

Rooms serve the double purpose of school rooms during school hours and sitting rooms out of school hours, and considerable extra labor is required in moving desks and tables to and from the school rooms daily, in order that they may perform this double office.

These rooms are so crowded and constantly occupied, that it is found impossible to thoroughly air them as often as they should be, without rendering them in cold weather too cold for the health and comfort of the pupils.

These cuts are designed to show the size and crowded condition of our dormitories. In fact, however, 103 pupils are lodged where but 100 are represented as being lodged by these engravings.

Our dormitories are too crowded for the proper classification of pupils, and we should have rooms in which to isolate pupils who exercise bad influences over others, but we are now unable to do so.

The difficulties in the way of giving our pupils the care and attention which their best welfare demands—in inconvenient buildings and with only temporary arrangements for their custody and management—are

keenly felt in our daily experiences; and we sincerely hope and trust that the members of the next General Assembly will visit and thoroughly inspect our present accommodations, in order that they may fully appreciate our situation and the necessities of the institution.

60 FEET.

The number of actual school days in the year closing Nov. 30, 1874, was 275. The total number of days board furnished the pupils during the year, divided by the number of school days, gives us an average of

60 Feet

107 pupils during the school term. The cost per capita to the State for all expenses, including insurance, of the pupils, estimated in this manner, is not over \$230 per annum. This, considering the size of the establishment, must be regarded as an economical result.

With an increased number of pupils and suitable buildings, the inmates could be better classified and could be supported at a much less annual cost per capita than under the present circumstances. So long as the institution remains upon rented property, and is so contracted in its sphere of usefulness, just so long must it, for lack of opportunity, fail to reach and rescue hundreds of children from a condition of inutility and misery, who could be made useful beings.

We sincerely hope that the Legislature, at its coming session, will make appropriations for the purchase of a farm in some desirable location, and for the construction of buildings for the accommodation of not less than two hundred and fifty pupils.

In conclusion, I would state that the good results accomplished have been, in a great measure, due to the intelligence, industry and faithfulness of the teachers and other employees connected with the institution. Feeling grateful to you for your encouragement, interest, confidence and constant co-operation, this report is respectfully submitted.

C. T. WILBUR, M. D.,
Superintendent.

.. ..	Child's World, 60 copies of paper.

We are also indebted greatly for favors from officers of the following railroads :

Chicago, Alton and St. Louis Railroad.
 Toledo, Wabash and Western Railroad.
 Ohio and Mississippi Railroad.
 Indianapolis, Bloomington and Western Railroad.
 Jacksonville, Northwestern and Southeastern Railroad.
 Springfield and Illinois Southeastern Railroad.
 Michigan Central Railroad.
 Chicago and Northwestern Railroad.
 Paducah and Memphis Railroad.

Their kindness in furnishing transportation to indigent pupils has been of material benefit to them.

TESTIMONIALS

OF

PARENTS AND FRIENDS OF PUPILS,

CONCERNING

*Their Progress and Improvement at the Illinois Institution
for the education of Feeble-Minded Children.*

Vertical line of text on the right side of the page.

Small black mark or artifact at the bottom left corner.

TESTIMONY

Of Parents in relation to the Improvement of their Children.

Two-thirds of the pupils were sent home to spend a vacation of two months, July and August of the past year. After they had been home about four weeks, a printed formula of questions was sent to the parents and friends of pupils, designed to call their attention to the particulars of each child's improvement, and to induce a more careful scrutiny of their general behaviour and condition, in comparison with their condition before admission to the institution; with the request that they would carefully observe and examine their children, answer the questions, and return the formula, that their testimony might be recorded, showing whether the results of the efforts to teach and train their children were satisfactory to them and were fully answering their expectations, and in what respects they had been disappointed, if any, in the progress of their children.

The following answers of parents or friends, are copied from the replies in their own hand writing which are now on file in the institution.

How long has he or she been in the institution? (Term signifies school year of ten months.)

"Two terms" .. "Two terms" .. "Two years in November, 1874" .. "Five terms" .. "Ten months" .. "Two years" .. "Nine months" .. "Nine months" .. "Five months," or from January, 1874, last, until June 18" .. "From the 17th of September, 1873, to the 17th of June, 1874" .. "One term" .. "During the school term of 1874" .. "Nearly three years" .. "One term" .. "Nine months" .. "Five months" .. "About five months and a half" .. "Two terms" .. "Two months" .. "For two terms past" .. "Seven months" .. "Three terms" .. "From January, 1873, to June, 1873; and from September, 1873, to June, 1874" .. "One year" .. "About eighteen months in all" .. "Nine months" .. "Two terms" .. "About thirteen months" .. "Seven months" .. "Nine months" .. "During one term" .. "Six years" .. "One year at the feeble minded institution" .. "One term" .. "Since November 26, 1873" .. "Nine months" .. "Two years" .. "Three years" .. "Three terms" .. "Nine months" .. "Ever since August 28, 1865, except in vacation" .. "Two years" .. "Six months, from January 1st to July 1st, 1874" .. "Three years" .. "Went to the institution January 1, 1874, and stayed until July 1, 1874, six months" .. "Nearly three years" .. "Four terms" .. "Five years" .. "Two terms" .. "Eight years" .. "Two years" .. "Six years" .. "Five years" .. "Three years" .. "Nine months" .. "About five years" .. "Five terms" .. "Ten months" .. "About seven months" .. "Three years" .. "Three terms" .. "Eight years" .. "From November 29 to June 18, 1873-4"

..“Three years”.. Two years”..“One term”..“Two years”..“Two terms”
..“About ten months all told.”

Is there any improvement in his or her health ?

“His health is good”..“I think there is”..“Yes”..“A decided improvement, general health is much better now than when she first went”..
“There is quite an improvement in this direction, he is not subject to so many sick spells as formerly”..“No, his health was always good”..“Yes”
..“A very decided improvement”..“Yes”..“He has always been healthy and he is now”..“I think there is in some things”..“His general health is better; looks more fleshy than when he left home”..“Yes”..“Yes”..
“I do not think there is”..“I think there is a decided improvement”..
“There is”..“Yes; there is”..“Yes I think there is, he looks better and appears to be stronger”..“She came home quite well and rugged this year”..“She was healthy when she left us, and she is yet”..“Health much the same”..“Don’t see that there is”..“There is”..“His general health has always been good”..“Yes”..“I think her health was always good enough”..“About the same as usual”..“His health is better”..
“Yes remarkably well with the exception of weak eyes”..“He has always been healthy”—“Yes considerable”..“Yes”..“Do not notice any difference”..“I think not”..“She has improved very much in health”..
“Her health has always been good”..“A great improvement”..“He has always been very healthy, very seldom sick”..“Yes”..“His health is good, has always been good”..“I think there is, though her health was tolerably good when I placed her in the institution”..“Think there is”
“A decided improvement”..“Her health was good and is still better”..
“There is a decided improvement”..“His health was and is still good”..
“Yes, he appears much healthier than when he first entered the institution”
..“There is”..“Yes, I think there is”..“Her health is very much improved”..“His health is very good”..“Her health could not be better”
..“Yes”..“Yes, great”..“There is”..Yes, his health is much improved”
..“Yes, great”..“Yes, some”..“None, health is good”..“His health was and is always good”..“Her general health was always fair, and we do not think that it is better than when at home; it is always good”..“Not in any particular”..“His health seems good”..His health is good and is anything a little better”..“I do not know as there is”..“Yes; though his health was always moderately good”..“Yes”..“Health has always been good and is still good.”

Is there any improvement in his or her personal appearance, or does his or her countenance indicate any more intelligence ?

“A little, I think”..“I think it does”..“Yes”..“He appears personally much better; countenance indicates more intelligence”..“We find a marked improvement in his personal appearance; shows an advancement in intelligence which is very encouraging to us”..“About the same”..“Yes”..“Improved in general appearance, and more intelligent than formerly”..“There is a decided improvement in his appearance”..
“He has improved considerably”..“I think I can notice a little difference in his appearance”..“There is improvement in personal appearance; countenance looks more thoughtful”..“She does”..“Yes, I think there is a little”..“Yes, there is in both appearance and intelligence”..

he seems more intelligent" . . . "Yes" . . . "There is" . . . "We think so" . . . "Some more" . . . "There is improvement in his appearance, and I think his countenance does indicate more intelligence" . . . "Yes" . . . "I think his personal appearance is somewhat improved" . . . "Yes, in all respects" . . . "Yes" . . . "Somewhat, I can perceive" . . . "I think not" . . . "Yes, she has improved some" . . . "A great improvement" . . . "Probably a little" . . . "Yes" . . . "I think there is; yes, decidedly; the improvement in his personal appearance is also more than I expected in so short a time" . . . "There is a very great improvement in her appearance; she appears more intelligent" . . . "Yes" . . . "She is improved in both respects" . . . "Yes, there is; I think it does; I am positive there is improvement" . . . "He has improved in personal appearance, and seems to understand things better" . . . "It does" . . . "Yes, there is some improvement" . . . "Yes" . . . "He behaves himself very genteelly, and there is a more intelligent expression of the countenance" . . . "Decidedly; yes; her appearance is encouraging, and her countenance shows more intelligence" . . . "Yes" . . . "Yes" . . . "Yes" . . . "Some, we think" . . . "Yes" . . . "Yes" . . . "Yes" . . . "No particular changes" . . . "Can't see much, if any" . . . "I think there is" . . . "We think there is; she seems more thoughtful, and expresses more intelligence than before her entry into the institution" . . . "Yes" . . . "About the same" . . . "His personal appearance is better than it was at the close of the first term" . . . "I think there is" . . . "Rather more observant and tidy" . . . "There has been a marked improvement in both" . . . "Yes."

Is there any more control of the muscular system in his or her case?

"I think there is" . . . "Yes, somewhat" . . . "There is very much" . . . "Yes" . . . "Yes" . . . "There is" . . . "The same as ever" . . . "Yes" . . . "They are under good control" . . . "Yes" . . . "Yes" . . . "There is more control of his muscular system, and better action" . . . "She is stronger and weighs fifteen pounds heavier" . . . "There is" . . . "He has more control of his muscular system" . . . "I don't know as there is" . . . "There is" . . . "About the same" . . . "I think there is some" . . . "She is more quick in her actions" . . . "I think there is" . . . "Yes, there is some" . . . "Yes" . . . "Somewhat" . . . "Yes" . . . "Very little" . . . "Not any" . . . "She has not been wanting in this respect" . . . "Very much" . . . "Think so" . . . "Yes" . . . "He appears more steady; there is more control of the muscular system and better action, and he is some stronger than when he left us" . . . "I think there is considerable more" . . . "Yes" . . . "There has never been any trouble of that kind in her case" . . . "I think there is" . . . "There seems to be" . . . "Always had fair control of the muscular system" . . . "There is" . . . "Yes" . . . "Happy to say yes" . . . "Yes" . . . "Yes" . . . "Yes, there is" . . . "Much more" . . . "Yes" . . . "Some little" . . . "Some little" . . . "Always had complete control" . . . "There is a decided improvement in this particular; when she entered the institution a sudden noise would cause her to fall prostrate; I don't think it affects her now more than ordinary persons" . . . "Don't apply" . . . "Yes" . . . "I think there is" . . . "If any difference I think she has" . . . "I think there has been some slight improvement in this respect" . . . "Yes."

Does he or she stand more firmly, or walk better?

"A little" . . . "Yes" . . . "He does" . . . "Always good" . . . "Very little" . . . "Yes" . . . "Has always walked good" . . . "About the same" . . . "He walks better, I think; raises his feet more; have to caution him often about such standing and sitting; presume he inherits the habit of drooping his head" . . . "Walks better" . . . "Yes" . . . "Yes, he does" . . . "She does" . . . "He does" . . . "Yes, he stands firmer and walks better" . . . "I don't see much difference as to that" . . . "She does" . . . "Yes" . . . "About the same" . . . "He can walk

good" . . . "Partial improvement" . . . "She does" . . . "She does" . . . "She does" . . . "Yes, a decided improvement in both walking and standing" . . . "I think he walks better than he did before attending the institution" . . . "Yes, both" . . . "Somewhat" . . . "He does much more so" . . . "A little difference" . . . "Yes" . . . "Yes, he stands more erect ; his standing and walking are very much improved" . . . "She walks very much better" . . . "Think he does" . . . "She has always been sound in this particular" . . . "She does a great deal better" . . . "She does" . . . "Always walked well enough, and stood well enough" . . . "He does" . . . "Very—most decidedly" . . . "I think she has improved some in walking" . . . "She does ; can notice a great improvement" . . . "Yes" . . . "He has" . . . "Somewhat" . . . "Yes" . . . "He does" . . . "He does" . . . "Yes" . . . "She does ; seems to have very much better control of all the muscles of locomotion" . . . "Ever since he commenced walking he walked firmly" . . . "She always stood firmly, and walked steadily."

Has he or she more control of his or her arms and hands than formerly ?

"She has" . . . "Yes" . . . "Yes" . . . "Yes" . . . "Yes" . . . "He has" . . . "He has some" . . . "He was always dexterous with arms and hands ; no doubt he has improved in that respect also" . . . "Some improvement" . . . "Yes, he has" . . . "She has" . . . "He has" . . . "Yes, he has" . . . "I don't see that he has ; he always had control enough of them for what I could see" . . . "About the same" . . . "Yes, a little" . . . "I think much the same" . . . "He has" . . . "About the same" . . . "She has" . . . "Yes" . . . "He has" . . . "Yes" . . . "Yes" . . . "Yes" . . . "She has" . . . "We think she has much more" . . . "About the same" . . . "Yes" . . . "Yes, there is a great deal of improvement in the use of arms and hands ; shows a great deal more strength, and handles himself better" . . . "She uses her arms and hands more gracefully than formerly" . . . "Yes" . . . "Nothing has ever been the matter with her arms and hands" . . . "I think she has" . . . "He has" . . . "Yes, she has" . . . "Yes, she directs her hands and arms more skillfully than before" . . . "Yes" . . . "He has" . . . "A little" . . . "I think he has" . . . "He has" . . . "I think he has" . . . "Yes ; their improvement is apparent as that in her lower limbs" . . . "Yes" . . . "He moves easier and walks more manly than before going there" . . . "Yes."

Is he or she less nervous ?

"Yes" . . . "Very, very much better." . . . "He is decidedly so, and the change in this direction is distinctly seen." . . . "Yes." . . . "I do not think he has, he is a very nervous child." . . . "Yes." . . . "Yes." . . . "Not so much as formerly ; as soon as excited he loses all control of himself." . . . "He has improved wonderfully." . . . "She is less nervous." . . . "He is." . . . "She is." . . . "Yes." . . . "She is." . . . "He is." . . . "He is a great deal less nervous." . . . "Yes." . . . "She is." . . . "He is now." . . . "She is not near as nervous." . . . "Yes." . . . "Yes, he has improved in that respect, is a great deal less nervous than ever before." . . . "Yes." . . . "She has never been nervous." . . . "Yes." . . . "He is." . . . "Yes, she is less nervous." . . . "Yes." . . . "Yes." . . . "Yes, very much less." . . . "She is decidedly." . . . "He is." . . . "He could not improve in this, as he never was nervous." . . . "Very much less." . . . "He is." . . . "Yes." . . . "She is just in proportion, as she has the better control of her muscular system generally." . . . "We think she is." . . . "Is not so nervous as formerly." . . . "Great deal less"

Is he or she less awkward ?

"Yes." . . . "Yes." . . . "A great deal less." . . . "He is." . . . "Yes." . . . "He is." . . . "He behaves pretty well." . . . "I think he is a little." . . . "He has always been active physically, his mind now seems more active." . . . "Yes." . . . "Yes." . . . "There is considerable improvement." . . . "She is." . . . "He is."

"Yes." "Yes, I think he is a great deal more handy about doing things than he was before he went to school." "Yes, she has improved very much in this respect." "Yes." "I think there is an improvement." "Yes." "He is." "He is." "She is less awkward and is improved." "We feel that he is." "I think, perhaps, she is." "Yes, he is." "Yes." "Yes." "Somewhat so." "He is." "She is." "About the same." "Yes." "Yes, he has improved in that respect very much." "I think she is a very great deal less awkward." "He is." "Have not noticed her being awkward." "Yes, she has improved very much." "Can see a little difference." "Yes." "He is." "Yes, he is less awkward." "Yes." "Yes." "There is a great improvement, and can answer in the affirmative." "Yes." "He is." "Yes, somewhat." "Much improvement in this respect." "He is." "About the same." "I think he is, some." "Yes." "Much less so." "Yes." "About the same." "Yes." "I think she is." "Yes." "Handles things with much greater ease than formerly." "Great deal."

Is he or she more active ?

"Yes." "Yes." "Yes." "Good deal." "Yes." "Yes." "I think he is." "He wants to make himself generally useful." "I do not know that he could be more active than he was, he never was still from the time he was born." "He has always been active physically; his mind now seems more active." "Yes." "A little." "Yes, he is." "Walks better and more spry." "He is." "Yes, he is." "He was always as active as a cat." "Considerably more than she used to be." "He is." "I think so." "Not perceptible." "She is." "She is more active than formerly." "Yes, he handles himself better." "Yes." "Yes." "Yes." "She is." "See no difference." "I don't know that he is, but his brothers say he is." "A great deal more." "About the same." "Yes." "Yes, is more active and stronger; very much so, indeed, for so short a time." "He is." "Think she is." "Yes, she is." "Yes." "Yes." "He is." "Yes, a great deal." "He is moving from morning until night." "She is." "He has had good use of himself from a child." "Yes, she is active, more so than previously." "He is." "Yes, somewhat." "I think so." "He is." "A little." "Yes, much stronger, her muscles are much better developed and hardened." "No, he was always very active." "I think she is." "Rather." "Decidedly so." "Yes."

Is he or she more fond of childish sports ?

"Yes." "Yes." "No." "About the same; was always fond of childish play." "Yes." "Less; likes to be alone most of the time." "He likes to play with children." "He is as fond of play as ever." "Yes." "No." "Not so much so as before he went to the institution." "I can't tell." "He is." "Yes, he is." "I don't know as he is." "About the same." "No." "I think not." "No." "She is." "Yes." "Yes, very decidedly so." "Yes." "No." "Yes." "Decidedly so." "No difference." "He is now." "She is more fond of sport than work." "She is much more." "Think she is." "No." "About the same as he was before he went to school." "I can't say that she is, though she loves to see children play." "He is." "She is." "Not so much so; she is more steady." "She takes more interest in them than formerly." "Yes." "He is not." "I can hardly say." "She is a great deal more fond of playing than ever before." "Yes; appears to understand the enjoyment better, and shows a fondness." "Not much change." "A great deal." "No change." "No." "Not so much." "I see no difference." "She seems to be; her sphere in this respect is of course enlarged in the school, and her sports

more varied, yet she seems fond of all." "No." "Not so much so." "No." "No, he don't seem as childish as he was." "I think she is." "No, but seems more steady and womanly." "Not so much so as formerly." "No."

Is there any improvement in waiting upon himself or herself, or in behavior at the table; if so, in what respect?

"There is; he uses his knife and fork better." "Yes, he is much better." "There is." "A marked improvement." "Yes, considerable; he will wait until waited upon with patience." "Yes, he behaves better at the table, and if he wants anything he makes motions for it." "Before entering the institution he had to be dressed, washed and waited on at the table; now he does everything for himself." "He is more quiet and does not eat so fast." "He is very quiet at the table, and does not ask for anything." "Yes, he is more quiet at the table." "There is improvement in behavior at the table, and is slower about eating; drinks less; does not desire, as formerly, to drink with every mouthful, nearly; always had to talk to him about it, but could not train him as he had been trained at the institution." "Decidedly better; he now waits until he is helped, and then eats much more carefully than formerly." "Yes, in passing dishes to others and in using his knife and fork." "Yes, there is a marked difference in this respect." "She eats more mannerly than she did formerly." "Less liable to drop his food." "Yes, there is improvement; he eats wiser; he eats very nicely." "Yes, there is improvement in that he can wait on himself better; he is more handy in using his knife and fork; will always wait to be helped; will not take anything without asking for it; he is more quiet at the table." "There is, in both respects." "She is more careful about eating." "He has improved a good deal in waiting on himself and behavior at the table." "A marked improvement in this respect." "More cautious." "There is." "Yes." "Some." "He makes some efforts towards dressing himself, will wait with more patience, and uses knife and fork more than he did." "Better in every respect." "There seems to be some improvement in waiting on himself, he can use his knife and fork better." "Yes, has more control of her muscular system; is more orderly and methodical." "Yes, she dresses more regularly, takes better care of her clothes and behaves properly at the table." "There is a little in governing his appetite." "Yes." "Very little." "A decided improvement; handles her knife and fork with more ease, and has more judgment when she has eaten sufficient." "Very little." "He is neater and shows more desire to wait on others; there is a very great improvement in that respect; he comes to the table when told, and waits until waited upon." "There is a great improvement; she waits upon herself very well, and behaves very nicely at the table." "There is." "Decided improvement." "Yes, there is great improvement; she takes care of herself mostly; a decided improvement at the table." "Yes, he is more patient, and seems willing to wait until he is waited upon." "There is." "Yes, she is improved more than I expected she would." "Yes, very much; at the table he asks for what he wants and behaves very well; in all respects he has improved very much." "Truly, there is; her conduct at the table is very formal and uniform; always passes her plate for what she wants, with great patience, and waits upon herself very readily when she thinks it does not molest any one." "Yes." "There is." "In this he has improved beyond expectation." "There is; he sits straight; uses his knife and fork very well; not so formerly; waits to

be helped, and behaves very nicely." "There is." "Some difference in dressing himself." "There is; he sits more erect, also more mannerly." "Yes." "There is an improvement in her waiting upon herself." "Yes." "He behaves very well at the table." "There is some; has better use of knife and fork, and waits on herself better." "Yes, marked." "Is much more modest at table, helps himself more easily, and behavior is generally much improved." "A great deal, in her manners and behavior."

"Can he or she assist more in dressing or undressing or in taking any other care of himself or herself; if so, to what extent, and in what respect?"

"He can dress himself better." "Yes, he could not dress himself at all, but now can dress and wash himself as well as anybody, and he used to be like a child." "Can dress himself and wait upon himself much better than formerly." "He can; he not only can now dress and take care of himself, but looks after his trunk and clothes very often and carefully." "He takes more pains in dressing himself." "Yes, he can dress and undress himself, and takes more care of himself." "He does everything himself, and needs no assistance." "He can button his clothes and lace his shoes; this he could not do before he went to the institution." "He always dresses himself, combs his hair, and takes general care of himself." "Habits regarding personal cleanliness and neatness of dress are about the same; he is very particular about his looks; think, however, he is more systematic." "Formerly he made no attempt to dress himself, now he can do it with very little assistance; for instance, previous to going to the institution he could not tell one part of his pantaloons from the other; now he puts them on readily." "Yes, he always washes himself now, which he would not do before going to school to you." "Yes, he can; there is a decided improvement, to the extent of buttoning and unbuttoning his clothes, putting on socks, boots, etc." "She has more pride, and keeps herself nicer than formerly." "He requires less assistance than formerly." "Yes, he can; he is better in all." "Yes, he can now dress and undress himself about as well as any other child of his age." "She now dresses and undresses herself entirely; does it quite well; she likes to look tidy and well; is quite particular to comb her hair and to dress her feet, and knows when things compare." "Yes, she can undress herself." "Some better." "He can dress himself, but can't button his clothes; he can take care of himself a great deal better than he could." "He can in all respects." "He can." "She can; she can put on her dress and shoes and stockings." "Does nicely." "He can assist some more in dressing himself, more than before." "Yes." "He can now dress and undress himself without much difficulty." "Yes, considerable." "She takes care of herself generally; better in very many respects." "Some little." "Yes, she can dress herself almost without any help." "A little more than before; she can now lace her over-shoes; she could not do so formerly." "A decided improvement; can dress and undress herself nicely now without any assistance." "He dresses himself with more skill and with more ease." "He can comb his hair and wash his face better; he is able to dress and undress himself very well, and has improved very much in this respect during the last term of your school." "She has improved very much in dressing and undressing herself; indeed, she can attend to those things almost as well as any young lady." "He is improved." "She has." "She dresses and undresses herself, and takes

care of herself mostly."—"Yes, and seems to take more care of his clothes and other things."—"He can now dress and undress himself as well as anybody."—"Yes, in dressing, a great deal, and in all respects."—"She can now dress and undress herself, and do it with the greatest precision; put on her shoes and stockings, lace and tie them, and is very orderly, keeping her clothes in good shape; this is something she could not do at all before she attended the institution."—"He can put on his own clothes and help himself better."—"In this there is great improvement."—"He washes and dresses without assistance; did not when he went to the institution."—"He can put on his clothes."—"Some difference in dressing himself."—"Yes."—"As to this we can't say distinctly; but the last time she was at home there was an improvement as to her dressing herself, managing her clothes, hair, etc., so much so that there is no doubt of improvement in this."—"Yes."—"Yes, he can wash and comb his hair better."—"She can dress herself better, can put her clothes on in a more proper way."—"Yes, is more cleanly and tidy; her general notions in this direction are certainly changed."—"He can."—"He seems to take pride in dressing himself, washing and keeping his person clean; can adjust his clothing, put on and off his shoes, and with much greater ease than formerly."—"Yes."

Is there any improvement in habits of personal cleanliness; any more regard for neatness in dress?

"There is."—"Yes."—"Much improvement, which is a great comfort and satisfaction to the family."—"Yes."—"Yes, he likes to be well dressed."—"Decided improvement in habits of personal cleanliness and neatness of dress."—"There is."—"He is more particular about his looks; think he is more systematic."—"Yes, he scarcely ever dirties his clothes, either with urine or feces; formerly, this was of daily occurrence."—"Yes."—"Yes."—"Decidedly."—"Yes, there is in all."—"Yes, I think he is more particular in trying to keep his clothes clean, and in combing his hair before eating his meals."—"A great deal; very much."—"Yes."—"Yes."—"There is considerable in both respects."—"A very great improvement, both in habits and cleanliness."—"He is."—"She is more cleanly and likes to dress up fine."—"More careful of his clothes."—"Yes, I think there is."—"I think there is."—"Yes, he is very fond of dress."—"He has improved in personal cleanliness, somewhat."—"Yes."—"Yes."—"Yes, there is."—"Yes, she washes herself and combs her hair without being told, which she would never do before, unless she was forced."—"She is now able to wash and dress herself; she was unable to do so before."—"Think there is quite an improvement."—"Probably a little."—"There is improvement in several ways, in cleanliness and more regard for dress, his habits are very greatly improved in many ways."—"She was always clean and loved to look pretty in her dress."—"Yes, considerable."—"There is."—"There is; she is a great deal more particular about her dress, and is very careful of her clothes."—"She takes more pride, seemingly."—"He seems to feel the importance of keeping his person clean."—"Yes, there is a great change in this particular."—"There is."—"Yes, *the most I ever saw* in cleanliness."—"Yes, he is very particular about his dress; blacks his boots every day, and is very anxious to appear well when he goes out."—"He is cleanly in his habits; was always fond of being dressed clean and neat."—"Yes, she wears tight clothes, and does not make half the washing she used to; her personal habits in regard to soiling her clothes and bed are entirely

changed to that of cleanliness and neatness, and has strong respect for neatness in dress."—"There is."—"Yes, there is."—"A very marked improvement in both respects."—"There is."—"Some improvement in cleanliness."—"There is, in cleanliness, and more in neatness of dress."—"Yes."—"Her personal habits of cleanliness were always fair; they are now good; she has a decided taste for dress, and seems to appreciate neatness and tidiness very readily from their opposite."—"Yes."—"He always had a good deal of pride about him, and liked to look neat and clean."—"Yes."—"A little more, I think."—"Very decided improvement in this respect."—"A great deal."

Is he or she less troublesome than formerly?

"Yes"—"Yes"—"Yes"—"Yes"—"Yes"—"Yes"—"He is; he does not run away as previous"—"When he first came home he was a real good boy, but he has run as he chose, and is getting very mischievous"—"Very much less troublesome as regards being boisterous, but have to keep a strict watch over him, it is so easy for him to get excited"—"Yes"—"Yes"—"Yes"—"She is"—"He is"—"Yes, he is less troublesome"—"He is not near so much trouble as he used to be"—"Yes"—"Yes"—"He is less troublesome"—"Much less"—"She is less troublesome, and is gaining in general ideas"—"Oh, so much; our friends all speak of it, we rejoice in this change for the better"—"She is less troublesome and will mind better"—"He has, for he is not so often wandering off and getting lost"—"Yes"—"Yes"—"Yes"—"Much less so"—"Yes"—"She is much less; amuses and takes care of herself"—"A great deal less"—"There is improvement in several ways—in cleanliness and more regard for dress; his habits and ways are very greatly improved in a very great many ways"—"She is no trouble now to what she was before entering the institution; indeed, words can't express her improvement in that respect"—"Yes"—"Yes, she is less troublesome"—"Much less troublesome"—"He is"—"Very much less; in fact, we have very little if any trouble with him"—"Yes, much less"—"Yes, she appears to know right from wrong, and does not give near as much trouble as before"—"He is"—"I can say I feel under great obligation to the institution for this great improvement in our afflicted brother"—"Very much less"—"He is"—"Some"—"He is"—"Yes"—"Very much so; just in proportion as she has control of herself, and more intelligence"—"Yes"—"Yes, a great deal less troublesome than formerly"—"Very much"—"A little less; he don't play tricks as he used to"—"There is to considerable extent"—"Yes."

Is there any improvement in speech; that is, does he or she talk more, or more distinctly?

"Yes, somewhat"—"Yes"—"Some improvement"—"Some, not so much as I expected"—"He knows more, but cannot talk"—"He speaks several English sentences very plainly"—"I think he does"—"Tries to use what little language he can command; makes no new sounds—those he does make are very distinct"—"Talks very little, but what words he does pronounce, he speaks much more distinctly"—"He talks more, but not distinctly"—"He does not talk"—"She does"—"He does"—"Yes, he talks better"—"I don't think there is much improvement in speech, but he talks more"—"There is; she does"—"Yes"—"There is; he joins his words considerably better, and speaks plainer and readier"—"He does"—"Not so much improvement in speech as in other things"—"Yes"—"About the same"—"Yes"—"He talks less than formerly, but

speaks more distinctly"—"She talks much more"—"A very decided improvement; before she went there she could scarcely answer a question, now she will talk to any one, readily"—"We think he talks more, can't see that it is more distinctly"—"She talks more, and more distinctly than formerly"—"Yes"—"She talks more distinctly"—"I think she has improved, she talks more properly"—"Very little"—"He always talked too much; very indistinctly; he now talks much better, and on a greater variety of subjects"—"Yes, some improvement"—"He talks better"—"She talks more"—"Talks too much, yet some improvement in that respect, I think"—"Talks more distinctly"—"He has"—"He does"—"Yes"—"We think she is inclined to talk more"—"Yes, much improvement"—"Yes, I think there is considerable improvement"—"I think she does"—"Very little; this is the main impediment"—"There is; he speaks more steady and distinctly"—"No, is deaf and dumb."

Has he or she any more idea of language; that is, does he or she understand any more what is said to him or her than formerly?

"Yes"—"Yes"—"Yes, a good deal in the English language"—"He has improved greatly"—"He does"—"I think he does"—"Cannot say; as I speak to him in German he seems to understand more of what is being talked about in the family"—"Yes, he does"—"He seems to comprehend more readily; has more energy or readiness to catch what is being said to him"—"She does"—"He does"—"Yes, he has"—"Yes, I think he has; he seems to understand nearly all we say to him"—"Yes"—"She does"—"I think he understands what is said to him, more readily"—"I think he does"—"He understands a great deal better than formerly"—"He does"—"She has, and understands every word that is said to her"—"Decidedly"—"I think she understands better"—"I think he understands a great deal better what is said to him"—"Yes"—"Perhaps so"—"Yes"—"I think he notices things more than he did before going to Jacksonville"—"It seems that she understands what is said to her"—"Very much now; before she went to your school you could not tell whether she understood you or not. as she would talk so little, and when trying to would stammer and hesitate as though she could express no language, now she can express herself with little hesitancy"—"Always understood pretty well"—"He has not improved as much in this as in other ways, but I am satisfied he is better; yes, I am"—"Yes, she understands much better than formerly"—"He has"—"She does"—"Yes, she does a great deal more than she did"—"He does"—"Yes, she has most assuredly"—"She understands language better"—"Yes"—"He has"—"I have noticed a greater improvement in this respect than ever before, and it has been remarked by others how much more readily he understood what was said to him than before"—"He does"—"I think he can"—"Yes"—"She no doubt has; she now seems to appreciate and join in conversation that would not formerly attract her attention at all"—"Yes"—"She does"—"We think she does, and seems more thoughtful"—"He does"—"No."

Does he or she use a greater variety of words?

"Yes."—"Yes."—"Before entering she spoke only some German words, now she speaks all English."—"He does."—"He has several times said mamma, when he has wanted me, as I have tried to have him; when he first came home, I thought he said dear mamma, but could not get him to say it again; as ever before when he tries to say a word he cannot, but sometimes when he is not trying, apparently, he will say a word

very plainly ; it is a great improvement for him to use any language, as he has never done this well before."—"Yes, he does ; but it is very difficult to understand him on account of his being tongue-tied."—"I think so."—"Yes, he does."—"Yes."—"He does."—"She is not much inclined, only when playing in company with children."—"His language is good, much improved in this respect."—"Yes."—"She does."—"Much greater."—"I believe she does."—"He does."—"I think she does."—"Yes, a greater variety of words, and seems to have larger and better ideas than formerly."—"Yes."—"Yes, very much less."—"Yes, she is decidedly."—"Yes."—"He has."—"He has."—"She does."—"Yes."—"She seems to speak more, but not plainly."—"His ideas seem to be more enlarged and comprehends what is said to him much more than formerly."—"No."

Does he or she use more connected sentences ?

"Yes."—"Yes."—"He does."—"Yes."—"Yes."—"He does."—"She does."—"He does."—"Yes, he does."—"She does."—"He does."—He expresses himself more intelligently, and connects sentences well."—"Yes."—"I think he does."—"Perhaps."—"She does."—"A great improvement in this."—"Yes sir, I think he does, some improvement in that way."—"I think he uses more connected sentences."—"He does."—"She talks more connectedly."—"I think she does."—"Yes."—"Yes."—"Yes."—"He does."—"He does."—"Yes."—"Her sentences are more connected and more comprehensive."—"Yes."—"Yes."—"Yes, he does."—"She does."—"Sentences are short, talks but little."—"He does to some extent."—"No."

Is his or her memory improved ?

"Yes."—"Yes."—"Yes."—"Yes."—"A great deal."—"Somewhat."—"He always had a remarkable memory for one who seemed so deficient otherwise."—"Yes."—"I think so."—"It is."—"Yes, it is."—"Very little."—"It is somewhat."—"It is."—"He does."—"It has, in my opinion, greatly improved."—"I think it has."—"Yes, I think so."—"A great deal."—"Somewhat."—"It is very much."—"Considerably."—"Yes, there is quite an improvement in his memory."—"A great deal."—"It is."—"It was always good, and is still better."—"We think it is."—"His memory of faces and localities was always good."—"It is."—"There is some improvement in memory."—"His memory is very good."—"Very much improved ; her memory is stronger and more reliable."—"It is."—"I think it is."—"It is."—"Her memory of certain things was always remarkable, we think it is now more enlarged, and she remembers a greater variety of things."—"His memory is good."—"His memory is good."—"Yes."—"It is to some considerable extent."—"Yes."

Has he or she any more idea of forms and colors ?

"He has."—"Yes."—"Yes."—"Yes."—"I think he has."—"Yes."—"Has an extremely good idea of form, draws better pictures, found the word crimson, and then pointed to the color on dress trimming."—"Yes."—"He is fond of pictures, especially highly colored."—"Yes."—"She has."—"He has."—"Yes, he has."—"A little."—"He has."—"She has good ideas of colors."—"I should think she has."—"Yes."—"Yes."—"She has much better."—"Yes."—"His ideas of forms and colors are not very good."—"She has, very much more."—"He has."—"Have not noticed in this respect."—"She has."—"Yes, and appears to have more intelligible ideas of matters."—"He has."—"Yes, I think she has."—"She

has taken a fancy to bright colors, pointing them out and choosing her color." "He has." "He has." "Yes." "As to color, can't say, there is an improvement concerning form." "Yes." "Yes, a great deal more." "I think she has." "Have not observed any material change in this respect." "Yes."

Does he or she notice more what is going on about him or her, that is, does he or she use his or her senses more?

"Yes." "Yes." "Yes." "He now notices everything, and when told anything, always uses his senses at the instant." "I think he has." "Yes." "Seems to use his senses more." "Yes." "Yes." "She does." "He does." "Yes, he does; guess his senses are better." "She does." "Yes." "I think he does." "He does a good deal." "He does." "He does." "She does, and is entirely broken of the practice of being so sleepy and stupid." "Much more." "I think she does." "Yes, she does." "Yes." "Yes." "Yes." "She does." "A little." "I think he does, a little." "She does, she takes more notice of what is going on about her; her senses are very active." "A little more, and wants to be in company a great deal more than formerly." "Yes, we see very much improvement in this way." "She does notice, very much more, everything that she sees." "Yes." "She now knows everything that is going on about her, and notices what is said to her and remembers it." "We think his mind has expanded considerably." "Yes, and now seems to have intelligible ideas of matters." "He does." "Yes; yes a great deal." "She is more observing than formerly." "She is now very attentive, nothing transpiring about her unless she gives her undivided attention, showing great interest and delight." "He does." "A great sight more." "He does." "I think he does." "Yes." "Undoubtedly; in many respects she is more observing, particularly as to persons, and things generally brought to notice, dress, books, pictures, paintings, and a quantity of such objects brought to attract her attention." "Yes." "Yes, he notices everything." "We think she does." "Yes." "It seems to me he does in some things." "He does." "Yes."

Has he or she made any progress in common school studies, as reading, writing, geography, and the relations of numbers?

"Yes." "Decidedly in reading and writing, has quite a knowledge of numbers and counting, and from this fact, we think, in another year he will have advanced so that he will be able to get out of the mist that has been overhanging him from a child." "Has been too short time in the institution to have any general knowledge." "I think he has." "Has improved fairly as much as can be expected. I have tried him adding numbers together, he can do it by his own way." "Has improved in writing, and has learned to print small letters, also words; carries on quite a conversation by finding words in books and giving me the signs for them; feel indeed very proud of his attainments, and I am sure his parents are highly gratified." "Yes, in reading there is an improvement." "He was not capable of taking lessons in school." "She has." "Has improved in counting." "Yes, he has in all." "Yes, he has improved; he can say most of his letters, and can make quite a good many figures and letters." "A little." "He writes better." "Counts much better, and loves to read aloud; we think in another year he will be able to read without spelling his words; we are delighted with his progress in writing." "She has improved in that respect." "Perhaps some progress." "He has made some progress in them all." "She has

made much improvement; much surprised to see her write her name so nicely, and can read and spell small words nicely; before she went to the institution she attended several schools, public and private, but could never get her to spell a single word correctly, nor count ten; now she will count a hundred or more without a mistake; we never expected her to learn as much as she has already; we feel very much encouraged in this respect."—Yes."—"She has made considerable progress in her studies; reads and writes well; has learned considerable about geography and numbers."—"Yes."—"She has made some progress."—"He has improved very much in reading and delights in it."—"He has."—"Yes, she has made some progress in learning."—"Yes, some."—"She has made some progress in all."—"Has made some improvement in all those branches of study."—"He has."—"We do not expect any improvement in this, for he cannot talk."—"He has."—"Some little."—"Yes, in reading and writing."—"Nothing beyond her alphabet."—"Her progress in these matters is very marked; she reads intelligently, writes pretty, is perfectly familiar with the out-line maps of Europe and the United States; she is remarkable in her attainments in geography, and has made great improvement in numbers; in these respects her teachers have done wonders for her."—"Only in writing."—"Yes, in all except numbers."—"Can't see that he has acquired any idea of letters or numbers, or any common school studies."—"Reads words, writes and counts."

Is he or she more capable of useful occupation ?

"Yes."—"Yes."—"We have always hoped that he was, and now feel very much encouraged."—"He is more capable to work on the farm."—"Yes"..."Too young for that"—"I can send him on errands in the city, where he knows the name of the street, he will find numbers and parties."—"Yes."—"I think he is more so than when I placed him there."—"She is."—"He is."—"Yes, he is."—"He is."—"She is."—"Yes, he has been very helpful this summer and would work more than formerly, and uses more judgment."—"She is not old enough."—"Yes."—"In this there is some improvement."—"Yes."—"Yes."—"She is."—"He is a little."—"Yes, she is."—"Very much more."—"Can attend to home more, and ride horses very well."—"Yes, a little better and more steady."—"I can truly say she is very much more capable of earning her own living."—"Yes."—"She is."—"I think she is some."—"She is."—"Yes."—"Yes, and is more trusty."—"Yes."—"Yes, most assuredly she is."—"She is very much improved in this respect and can do a great many things as well as any person."—"She don't care much about work, but is more handy when she tries."—"Yes."—"Yes."—"He is rather young to tell."—"Some little."—"I think so, he has been quite useful in preparing fuel and carrying water to the hands while harvesting."—"He is rather young to tell."—"Yes."—"In proportion as she has control of herself, in her mental and physical organization, she is, and there is great improvement in both."—"Yes."—"Yes, he can help a great deal in the house."—"He now works some, and can drive team a little."—"Yes."—"He is; can be trusted on many errands, and can comprehend the use of many things not heretofore competent to perform."—"Yes, very; was not when entered the institution, but now she can sew, iron, sweep and perform all kinds of housework nicely."

Is his or her attention more readily fixed upon any object ?

"Yes."—"I think it is."—"Yes."—"Yes."—"A great deal more."—"His attention is very readily fixed, more than before, for it was very hard

to be gained."—"Yes."—"Yes."—"I think so."—"It is."—"It is."—"It is."—"Very much more."—"Yes."—"I think it is."—"Yes."—"Yes."—"Yes."—"It is."—"A little, maybe."—"It is."—"It is."—"Very much so."—"I think it is more, and can understand better."—"Yes."—"Yes, I believe it is."—"Yes, very much more readily."—"It is."—"It is."—"I think it is."—"Yes."—"His attention is more readily fixed, and seems to have a greater gift of conversation."—"It is."—"Yes, more easily fixed."—"Yes."—"Some."—"Yes, she concentrates her attention very readily, and here is an improvement."—"Yes."—"It is."—"Yes."—"It is."—"Yes."—"Yes, decidedly."—"Yes."—"Yes."—"Yes."

Has he or she any more judgment in practical matters of every day life ?

"He has at times."—"Yes."—"He has."—"I think he has."—"Some."—"Yes."—"I think he has."—"Yes."—"More so than before."—"Quite an improvement in this respect."—"He has."—"It is."—"She has."—"Some."—"He has."—"She has."—"Yes."—"Yes."—"She has."—"He has."—"A very great improvement in that respect."—"I think he has, so he can work with his brothers."—"Yes."—"Yes."—"Yes, a great deal more. I think."—"He has."—"She has."—"She has a great deal more."—"Yes, very much more readily."—"He has."—"He has."—"A great deal."—"Yes, very much more."—"Yes, a little."—"Yes, some."—"She appears to understand better the daily transpirings, showing an improvement."—"Yes."—"He is too young to tell."—"Yes, he has."—"Much more; he performed the service above mentioned with judgment."—"He is too young to tell."—"Yes."—"Yes."—"Considerable more."—"Yes, much improvement."—"We think he has a little more."—"Yes."—"I think he has a little more."—"Yes."—"I think he has a little."—"Yes, for cleanliness and inclination in assisting in everything about the house; a change for the better."—"Some improvement in this respect."—"Very much more."

Has he or she any more self-control ?

"Yes."—"Yes."—"Yes."—"Yes."—"Yes."—"A great deal."—"He has."—"He knows that he is under control, but he always likes to see what is going on."—"I think he exercises more self-control."—"Much more."—"Yes."—"I think she has."—"She has."—"She has."—"Yes."—"I think she has."—"Yes."—"He has."—"He has."—"She has."—"I think she has."—"Yes."—"She has some."—"Yes."—"Yes."—"Yes."—"He has a little."—"It seems so."—"She has much more."—"I think he has."—"Yes, a little, I think."—"She has very much more self-control."—"He has."—"He has."—"Yes, she has."—"Perhaps she has."—"Cannot say that he has, but is much easier controlled as to labor, etc."—"He has."—"A great deal."—"Yes, much more."—"She has, which is another great improvement."—"Yes."—"He has."—"Yes, he has."—"Much more."—"He has."—"Yes."—"She has more control of her muscles and temper; she was formerly very easily angered and would get into violent passions upon small or trivial provocations; she is much less so now; much more tractable in this regard."—"Yes."—"Yes, her ideas are enlarged, and this gives self control."—"Has improved considerable in this respect."—"Yes."

Does he or she wish to return to the institution ?

"Yes; at first he did not want to stay with me at all; he said he wanted to go back home."—"He is very anxious to go back."—"He is exceedingly anxious to return to the institution, and often wants me to

write to you to let him come back now ; says that he would much rather be at Jacksonville than at home."—"Yes, he does."—"Yes."—"He speaks of returning every day."—"He does ; he talks of it nearly every day ; he says he has a good time at Jacksonville."—"He would like to go back to the institution, and when asked what he would rather do, learn a trade or go back to the institution, he says he would like to go to the institution again."—"He examined the circular ; I told him Dr. Wilbur wanted to know if he wanted to go back ; told him if he did to nod his head ; he made a very profound bow ; then I asked him, to be sure that he understood me, if he did not want to go back to say no ; but he gave me another affirmative."—"I cannot tell."—"Yes."—"She does."—"He does."—"She does."—"Yes."—"Yes."—"He does."—"He does."—"He does."—"He does."—"When asked where she wants to go, she says to Jacksonville."—"She does not express her wish."—"Yes, he does."—"He has wished to return a great many times."—"Very much."—"She does."—"Yes, she wants to, very much."—"She answers this question sometimes affirmatively, and sometimes negatively."—"She does ; and since the first two or three weeks after her return, has been counting the weeks, and is much more anxious than she was last year."—"He says now he does not ; but when school commences he generally wants to go."—"He would like to go back to the institution very much."—"She says she does not wish to return, though she loves all the inmates of the institution ; she wishes to remain at home and learn all the general branches of housework."—"He does."—"He does."—"She wishes to return."—"She does."—"Yes, she wishes to return."—"He don't say."—"Yes, he wishes to return."—"Yes."—"Yes, she is anxious to get back."—"He would be willing to return."—"Last year she packed her trunk, and showed a great pleasure in going ; evidently she will this year."—"He does."—"Yes, he does wish to go back."—"Yes."—"He does."—"Very anxious to return."—"Yes."—"Yes."—"Yes."—"Very much ; is real anxious."—"She does."—"He did."

Do you wish to send him or her back, the next school year ?

"Yes ; he is not well enough to be left here."—"I do, very much."—"We are very anxious to have him return when I now go ; you told me when I saw you, I ought to send him at least two years ; we have always meant to send him back with Mrs. ———, when she takes her child."—"Yes."—"Yes."—"Yes."—"Yes."—"We do."—"I wish to send him to school again for another term."—"Yes, we want to do all we can for him, and leave the results with God."—"Yes ; I wish to send him back, though I wish I could keep him with me and teach him myself ; he has always been such a pet, I miss him very much when away."—"Yes."—"Yes."—"Yes, sir, I do."—"I do."—"I do."—"Yes, we do."—"Yes, we want him to go back."—"We do."—"We do."—"We do."—"I do."—"I do."—"I do wish her to return to the institution."—"We do ; we esteem highly the system of instruction given at the school. I think it is the only way such children can make progress in their education."—"I would like to have her return."—"Yes."—"I do."—"Yes."—"We do greatly."—"Yes."—"I would like to send her again."—"I will try it again."—"We do, as we think that is the best place for her if we wish her to improve."—"Yes."—"Yes."—"I would like to send him back this next term ; please accept him."—"I need my daughter's assistance at home."—"I do."—"We do."—"Yes, I do."—"We do."—"We ask you to accept him another year."—"I do."—"Yes, if it be God's will."—"Yes."—"Yes."—"We should have been thankful for the privilege."—"We do ;

please do not give up her place, for her improvement is great, for which we are very thankful."—"I do."—"We undoubtedly do."—"Yes."—"I do."—"Yes."—"Yes, want to send him as long as there is any hope of improvement."—"Yes."—"Yes."—"Yes."—"Yes, if he improved as much the next term as he has the last, I would not miss having him go for anything."—"I do."—"Yes, I expect to do so."—"We do."—"They did."

Has he or she any more steadiness of purpose or perseverance in accomplishing anything he or she wishes, or in obeying any command?

"Somewhat."—"Yes."—"He seems so."—"He accomplishes now everything he undertakes."—"Yes."—"Yes."—"Yes."—"Obeys at the word; is a very good boy."—"In accomplishing his wishes he is very smart; there he always finds his best advantage."—"He seems to have more steadiness of purpose; always had much perseverance; obeys quite readily usually."—"Yes."—"He obeys better."—"Yes, and obeys requests more readily than before."—"She has."—"He has."—"Yes, he has."—"Yes, he is a great deal better in minding what is said to him than he was before he went to school."—"About as usual, she obeys very readily."—"Considerable."—"Yes."—"He has improved."—"She has."—"I think she has."—"I can only say that he obeys a great deal better."—"Yes."—"Yes."—"Yes."—"She has."—"Has improved in that way some little."—"I think she has."—"I think yes to those questions."—"Yes; there is also improvement in regard to steadiness; he is obedient now as you could expect, and is good to obey."—"She has very much more."—"There is a marked improvement."—"He was."—"Yes, a great deal."—"Very much more; anything that he considers is expected he should do, he works with untiring energy; we are surprised often with his perseverance."—"Sometimes, if she takes the notion to do anything; she don't seem to get tired as soon."—"Has some more perseverance."—"Yes, more steadiness of purpose in accomplishing anything she wishes, and is more obedient."—"Yes."—"He has."—"Yes, I think he is more steady of purpose, and as for obeying any command, he always was good."—"Yes."—"I think not; this development, in our opinion, keeps more than pace with her age, and is more obedient than formerly, from a sense that it is her duty."—"Yes, is obedient, and formerly was very much the reverse."—"There is some little improvement."—"I think he has."—"Yes."

Is he or she more quiet in his or her manners?

"Yes."—"Yes."—"Yes, much more."—"Yes."—"Yes."—"He is."—"He is very quiet and behaves well."—"He was very quiet when he came back."—"He is more quiet and I may add more dignified."—"Yes."—"Yes."—"He is, and not so dull and sluggish."—"She is."—"He is."—"He is."—"Yes, he is in his manners."—"A great deal more so."—"Yes."—"He is."—"He is."—"Yes."—"He is."—"She is more active."—"He is."—"A little."—"Somewhat."—"Yes a great deal."—"Yes."—"Yes."—"Decidedly more quiet."—"She is tolerably quiet."—"He is much more so."—"Yes."—"A great deal more; he is more active and not so inclined to sleep as before, and does not cause any trouble."—"She is; she is now a quiet and very amiable girl."—"He is."—"Decidedly."—"She is."—"He is."—"She is a great deal more so."—"Yes, there is a great change in his manners, and he is very quiet; in this respect there is an entire revolution."—"Yes."—"Yes, is more quiet and reserved in her manners, a great improvement."—"He is."—"A great improvement."—"Yes, much more."—"He is."—"Yes."—"As formerly stated, she was easily excited and passionate; this, to a great proportion, has left her, and is more quiet; indeed, her manners are very good, her deportment generally

commendable."—"I think he is."—"Yes, he don't talk so much while others are talking."—"Yes."—"Very much."—"He is more quiet and modest."—"Very much more."

Is he or she more obedient ?

"Yes."—"Yes."—"Yes."—"Yes."—"Yes."—"He is more obedient than he has been before."—"Yes."—"He is."—"Yes."—"Yes."—"She is."—"He is."—"Yes."—"She has never made trouble in this respect."—"Yes, a little."—"He is."—"He is."—"Yes."—"He is."—"Yes."—"She is ; obeys every word quick, without a word."—"Obeys more readily than formerly."—"Yes."—"Yes."—"He is."—"Yes."—"Yes."—"Yes, much more so."—"I think he is."—"Yes, she is."—"Yes, think she is."—"Yes."—"Very much so ; yes decidedly."—"Yes, very much more."—"He is."—"She is."—"She is."—"I think so."—"Very much more so."—"He is."—"Yes, very much more so."—Yes, he is very obedient now, and will go and do anything he is told ; a great change in this respect."—"Has improved some, but is not as obedient as I could wish yet."—Yes, she is very obedient, using great care and patience."—"He is."—"Yes."—"Yes."—"He is."—"He obeys me readily, but when mad or fretted refuses to obey any other member of the family."—"Very much more so."—"I think a little."—"Yes."—"I think she is."—"Yes."—"Quite obedient."—"Yes."—"He was decidedly so."—"Yes."

Is he or she more affectionate and good tempered ?

"Yes."—"We think he is."—"Yes."—"Yes."—"He always was mostly at home, and prefers staying with his friends to running about."—"Yes."—"In his temper we can't complain, it is generally good."—"He was always affectionate and good tempered."—"Yes, much more so."—"Yes."—"As much change as could be hoped for."—"Some improvement."—"She is."—"Yes, he is a great deal more even tempered than before."—"Yes."—"She is very affectionate and good dispositioned, we think."—"Always good tempered and affectionate."—"I think so."—"Yes."—"She is."—"She is."—"I think there is some change for the better in this respect."—"Yes."—"Was always affectionate and good tempered to a high degree."—"Not as much difference in this respect, as she was always affectionate to any one that treated her kindly, and her temper was never very bad."—"Think he is some."—"Yes."—"As great a change here as could be expected."—"She was always very affectionate ; her temper is very much better."—"I think he is."—"She is."—"I think she is some little."—"Yes, if properly treated."—"He is."—"Very much more."—"He is very affectionate and good tempered generally, but if any person is unkind to him, and he gets excited, his temper is up in a moment, but he soon gets over it."—"Was always an affectionate child ; much better tempered."—"Yes, her disposition is mild and very good ; very affectionate, and will not quarrel with other children."—"He is."—"Yes, he is."—"In this there is marked improvement."—"He is."—"About the same, very affectionate and good tempered."—"Yes."—"Can't say that she is more affectionate ; was always very much so to those she loved, but as indicated above she is very much improved as to her temper."—"He don't seem quite so disagreeable as before."—"Yes."—"Some little improvement."—"Yes, improvement in this respect."—"Always was very affectionate."—"He is decidedly so."—"Yes."

Is he or she less selfish ?

"Yes."—"About the same."—"Yes."—"I think she is."—"Yes."—"He is not selfish ; if he gets anything, he likes to divide it."—"He never appeared selfish."—"Yes."—"About the same."—"Yes."—"She never was

selfish."—"He is."—"She never was."—"About the same."—"About the same."—"Yes."—"I think she is."—"I think so."—"He never was of a selfish disposition."—"He never showed any selfishness."—"Sometimes."—"Think so."—"Yes."—"He is very much so."—"I can't say that she is, for she never was a selfish child."—"He is."—"Have not noticed her in this respect."—"She is about the same, not very selfish."—"She is not, that is I have never considered her selfish before."—"Never considered him selfish in the least."—"He is."—"She is less selfish."—"He never was a selfish child, in the common acceptation of the term; the only way he shows himself selfish is shirking from duties, not being willing to lighten the burden of others at times."—"Yes, she is kind to the children; not selfish at all."—"He is."—"Yes, sir."—"Can't say; never was very selfish."—"Yes."—"She was always very generous, and we do not know whether she is more so or not; we think, however, she would share her books or other articles with her mates more freely than formerly; this, of course, would be regarded as less selfish."—"Yes."—"He has improved considerable in this."—"Some less."

Does he or she recognize more clearly the distinction between right and wrong?

"Yes."—"Yes."—"To some extent."—"I think he does."—"Yes."—"Yes."—"He knows well enough what is right and wrong, but sometimes he does what is wrong, knowing it."—"I think he does some."—"I certainly do not know; he knows he ought to do as I wish him, and acts ashamed if he does wrong."—"He does."—"He always had a good idea of right and wrong in others."—"I think he does."—"He does."—"She does."—"Yes."—"Some."—"I think she does."—"I think so."—"I think he does."—"Yes."—"She does."—"He does."—"She does."—"She does."—"I believe he does."—"Yes."—"I think he does."—"Yes."—"She does."—"It seems to me she does."—"Think she does; much more; as she never used to have any idea of it."—"Yes."—"Yes."—"But very little."—"She does, for now she does not wish to do what is wrong in the sight of Jesus."—"He does."—"He does."—"She does."—"Perhaps she does."—"He does."—"He does."—"She does, more clearly."—"Yes, I think he, recognizes more clearly the distinction between right and wrong, which is an improvement, making less trouble in the family."—"Yes."—"He does."—"Yes, he does."—"I have observed that, more this vacation than ever before."—"He does."—"I think he does."—"Yes."—"Undoubtedly so."—"She seems to have quite a distinct moral perception of those things coming within the range of her knowledge."—"Yes."—"Yes."—"He does."—"Yes."

In what respect are you disappointed in his or her progress since he or she came to the institution?

"Not any."—"In no respect are we in the least disappointed, but on the contrary found the improvement beyond our expectation, for which we are very grateful to you and your noble institution, and please accept our most hearty thanks."—"That he does not improve in speech."—"I am not disappointed at all."—"In his personal appearance, and his regard for cleanliness, and his idea of things and places; also in his dressing and undressing of himself, in which he has improved more than we expected, so that we are gladly disappointed in the progress he has made, and think that finally he can be made self-sustaining."—"In no respect, whatever; believe that a few more years at the institution will make him a useful member of society for life."—"I am not disappointed whatever; he learned as much as could be expected, and only

hope he can learn more reading and writing next year."-- "I cannot say as I was much disappointed, but still I was looking for more than could be expected; there was a doctor attending him when he went away, and he said he would talk, and I was in hopes he would, but now I think different about it; he has improved as much as could be expected in the time he was there."--"Cannot say that I am in any way agreeably disappointed at his progress, for I had not allowed myself to expect much; have had my hopes raised so many times to fall."--"I am not disappointed."--"Not in any way."--"In none, whatever; I think the institution not only a blessing to me and my child, but to all others that are placed in our conditions here on earth."--"She has improved beyond my expectations."--"In making more improvement than I anticipated."--"In none; he has done well."--"I am not disappointed in anything."--"I am satisfied; he has learned as much as I expected in the time that he has been in the school."--"In not any."--"I would have been glad to have seen more improvement in book knowledge."--"I cannot say I am disappointed, as there is decided improvement in many ways which I cannot express, and finally hoping he may learn to read in the future."--"In none."--"I am very grateful for the manner he has been treated, and am highly pleased with his advancement."--"Not any."--"He has improved beyond my expectations."--"In no respect."--"We are not disappointed."--"Well, I cannot say that I am disappointed in any respect, but am satisfied with her improvement."--"I am not disappointed."--"None, whatever, as he has improved in every respect."--"I am entirely satisfied with his progress."--"Am well satisfied; but had hoped she would have made more progress in learning to talk."--"In all respects most fully satisfied."--"In his common school learning."--"Considering the short time she has been at the institution, I must say I am satisfied very well."--"In no respect are we disappointed that she has not made all the improvements we expected, for her improvement, in every respect, has reached higher than we ever expected her to attain, and we, with all her friends, are very much pleased with her advancement, and feel very thankful that there was a place open for us to place her where we feel so safely about her, and where she can be done so much better by, than we could possibly do."--"He has been doing as well as we expected."--"Not in any; I did not expect a great change in the first term, and, on the other hand, we are certainly satisfied with this the result of the first year."--"I am indeed very happily disappointed, for she has made greater progress than I ever thought she would be capable of making, and I can truly say, what would I have done had it not been for that school and the kind superintendent."--"I am not disappointed, but, on the contrary, highly pleased."--"I was disappointed that she did not learn to read, but I hoped for too much; but she has improved in a great many things, and I am satisfied and very thankful."--"We are disappointed only in her talking."--"In no respect; and we are very thankful for the privilege we believe him to have enjoyed, and are satisfied that he is in a more congenial atmosphere with you than with us, and is saved from the scoffs and jeers of his comrades."--"In talking."--"In none; in some she has went over our expectations."--"In no respect."--"Thankfully acknowledge you have done much, yes, very much for him, and that he is much improved."--"We, instead of being disappointed, are very much delighted at her progress made while at the institution, and we are very thankful to you for the good you have done her, and hope she will continue to improve under your care, as she has

done, which will be a blessing to us."—"Have never been disappointed; she has done better than I expected she would."—"Not any."—"In no respects, whatever; and we feel under great obligations to the officers and teachers of the institution for our brother's great improvement."—"He has made greater progress than I expected."—"Not any."—"Nothing particular."—"None at all."—"In no respect; I am satisfied with his progress."—"We are not disappointed in any respect, for with us it was a question whether she could in any way be benefited in any institution, and her improvement and progress in many respects has been so marked, that, instead of being disappointed, we are gratified, and think there is being done for her what never could have been done at home, and which will result in great and lasting benefit to the child."—"Not in any."—"In nothing."—"Very much pleased, and think there is a great improvement."—"Nothing."—"I am well satisfied."—"I feel entirely satisfied with his progress in all respects; would most desire that he might make some progress in language and letters if possible."—"Not disappointed in any respect; did not expect to find as much improvement as I have, and I feel very grateful and thankful for the same."

The following are extracts from the letters of parents which have been received during the year :

C—. is well and doing very well. He has been our chief herder for the past month. He is quite steady. We most gratefully acknowledge the usefulness of your institution, and your labors have been a great blessing to us, for which we feel under deep obligation."

"Charlie is very anxious to go back to school, is almost frantic about it. We are glad he likes you so well."

"We feel truly grateful to you and Mrs. W. for the kindness manifested in his behalf during his long sojourn in the institution; only sorry that the connection ceased, but we must be content, as we very well understand the difficulty of his longer stay in the institution."

"We are much gratified with the improvement we discover in L—. All our friends have noticed a marked improvement for the better, and we hope and trust that his mind may continue to improve and strengthen. You are indeed doing a grand and noble work, and may the Lord reward you for your labor of love and good works."

A lady writes of her son: "He has improved more in behavior this last year than years previous. I cannot express by words the thankfulness of heart I have felt towards you and your institution, for the relief and rest of mind it affords those who are parents and guardians of such children. May the blessing of God rest upon you, is my heartfelt wish."

CIRCULAR.

The Illinois Institution for the Education of Feeble-Minded Children was organized in 1865, and has since been incorporated as one of the permanent charitable Institutions of the State.

The design and object of the Institution are not of a custodial character, but to furnish the means of education to that portion of the youth of the State not provided for in any of its other educational institutions, who are of a proper school-attending age, and who shall remain such periods of time as shall, in the estimation of the Superintendent and Board of Trustees, suffice to impart all the education practicable in each particular case, and in conformity with regulations hereinafter specified.

Children between the ages of ten and eighteen who are idiotic, or so deficient in intelligence as to be incapable of being educated at any ordinary school, and who are not epileptic, insane, or greatly deformed, may be admitted by the Superintendent.

Pupils from Illinois are supported free of charge. Board, tuition and washing are furnished gratuitously by the State.

The parents or guardians of those in whose behalf applications are made for admission as pupils, will be required to answer, in writing, such questions as the Superintendent may prescribe.

All pupils will be received upon trial, and will be expected to come to the Institution provided with a supply of neat and substantial clothing.

A bond will be required, in all cases, (except pauper pupils,) with securities, accompanied by a certificate of the county clerk that the sureties are responsible, to insure the removal of the pupil, when required by the Superintendent, free of expense to the Institution, its officers or agents, and the provision of comfortable and suitable clothing or pay for such as may be furnished the pupil during its continuance in the school.

Pauper pupils must have a certificate from the county judge, that the county court or board of supervisors have passed an order that the county from which they are sent will be responsible for clothing, incidental expenses and traveling expenses incurred on account of said pupils; also guaranteeing that said pupils shall be taken away during the annual vacation each year, without expense to the Institution, or any of its officers or agents.

FORM OF BOND.

Know all men by these presents, That we as principal, and as security, are held and firmly bound unto the Board of Trustees of the "Illinois Institution for the Education of Feeble-Minded Children," in the penal sum of dollars, for the true payment whereof we bind ourselves, our heirs, executors, administrators or assigns, jointly and severally, firmly by these presents.

Sealed with our seals, and dated this day of, 18 ..

The conditions of the above obligations are such, that whereas the said has placed in charge of the said obligees an imbecile child, for the purpose of being trained and instructed, as provided for by an act of the General Assembly of the State of Illinois, entitled "An act incorporating the Illinois Institution for the Education of Feeble-Minded Children," approved the 6th of April, 1871, and has agreed to furnish the said child with comfortable and suitable clothing, or

pay for such as may be furnished during continuance in the school, and also to remove the said child from the Institution whenever required, without charge to the Institution or any of its officers or agents.

Now, if the said shall well and truly perform the conditions aforesaid, then this obligation to be void : otherwise to remain in full force and effect.

FORM OF CERTIFICATE FOR PAUPER PUPILS.

STATE OF ILLINOIS, }
County of } ss.

C. T. WILBUR, M. D.,

Superintendent Illinois Institution for the Education of Feeble-Minded Children :

SIR: By virtue of an order of the county, passed 18 .., and in accordance with the provisions of section 11 of "An act incorporating the Illinois Institution for the Education of Feeble-Minded Children," approved April 6th, 1871, I, Judge of the County Court of county, do hereby certify that is a resident of county, that he is a pauper, and proper subject for the care of said Institution, under the provisions of section 11 of said law.

Therefore, county will be responsible for all necessary clothing, and also all traveling expenses incurred in the transportation of said to or from the Institution to said county.

And it is hereby understood and agreed, that said shall be returned to said county during the annual vacation, each year, or whenever the superintendent of said Institution shall so order, at the expense of said county, unless other arrangements be made, satisfactory to said superintendent, at expense of said county.

In testimony whereof, I herewith subscribe my name, and cause the seal of the County Court to be attached thereto, this day of 18 ..

ATTEST: _____, Judge of the County Court of County.
_____, Clerk of the County Court of County.

Printed blanks of the bond and of the certificates for pauper pupils, can be had by applying to the Superintendent of the Institution, free of charge.

The education furnished by the Institution will include not only the simpler elements of instruction usually taught in common schools, where that is practicable, but will embrace a course of training in the more practical matters of every-day life, the cultivation of habits of decency, propriety, self-reliance, and the development and enlargement of a capacity for useful occupation.

There will be a vacation during the months of July and August, at which period all pupils must be removed from the Institution by their parents or guardians, if required by the Superintendent.

The combination which this Institution presents, of practical medical experience and proper physical training, with efficient educational resources, will supply, it is hoped, a want which has long been felt by the parents of children of this unfortunate class in the State.

The improvements and progress of the pupils have been very encouraging, and parents and friends in almost every instance have expressed satisfaction with what has been accomplished in the short time since the school was organized.

The Institution is open to the inspection of the public at all reasonable hours ; and all are not only cordially invited, but are earnestly requested to visit the school.

It is the desire of the trustees to ascertain accurately the number of this class of children in the State, and persons knowing the residence of feeble-minded children in Illinois, will confer a favor by writing to that effect to the undersigned, as it is desirable that reliable statistics may be gathered in order that proper legislation may be made in behalf of all of this unfortunate class of children in the State.

Application for admission, information, etc., should be directed to

C. T. WILBUR, M. D., *Superintendent,*
Illinois Institution for Feeble-Minded Children,
Jacksonville, Illinois.

JOHN D. HAMILTON.

REPORT OF THE COMMISSIONERS.

ILLINOIS STATE PENITENTIARY,
JOLIET, December 1, 1874.

To His Excellency, JOHN L. BEVERIDGE,
Governor of Illinois :

SIR—We have the honor to submit the biennial report required by law of the condition of the Penitentiary, and in so doing congratulate you that we are not compelled to ask any appropriation from the State to aid in the support of the same.

Under the law governing it at the present time, and the contract system under which it is operated, by a judicious expenditure of its earnings, good discipline and constant industry of its inmates, the Penitentiary, formerly a burden to the people of the State, has become a paying institution. As to whether its important object, the repression of crime and reformation of criminals, can be most largely accomplished under this law and the contract system, is still an undecided question among the most experienced and enlightened prison men of the world, yet we have reason to believe from the appended reports of its officers, who have been brought, by their duties, into closer personal contact and relations with its inmates, that the efforts to make this, as is required by law, a reformatory institution have been as far successful as is susceptible of proof at the present time, but that if the State and society will take steps to substantially aid and encourage the well disposed convict upon his discharge, by furnishing him some avenue through which he may obtain employment, and thereby earn an honest livelihood, its object will be very much more nearly accomplished, and greater and better results follow therefrom.

The panic, so generally disastrous and depressing to business interests of this country, has had very little effect upon this institution, our contractors showing themselves to be sound financial and business men, and although obliged by their contracts to keep their men constantly employed, and consequently to carry large stocks of both raw and manufactured material, have thus far proven themselves equal to the emergency, and have met and paid their labor bills in such a manner as to enable us to discharge all our financial obligations up to this date, and to have a cash surplus on hand.

At the date of the last report, December 1, 1872, there were confined in this Penitentiary twelve hundred and fifty-five convicts. Since that time and during the three months last past, the number of convicted criminals throughout this country has rapidly increased, until of the estimated 40,000 convicts in confinement in the United States there is now

an aggregate of thirteen hundred and fifty-three in this Penitentiary—thirteen hundred and thirty-eight men and fifteen women.

These convicts are employed as follows :

Employed under contract.

Department.	No. of men.	Contractors.	Contract price.
Cigar department.	157	Reed, Jones & Co.....	\$3 25 per 1,000 cigars mYd.
Harness ..	35	Short & Brayton.....	75 cents per man per day..
Stone ..	234	Wm. D. Richardson.....	81½ " " " "
Shoe ..	366	M. Selz & Co.....	65 " " " "
Cooper ..	188	J. H. Winterbotham.....	70½ " " " "
Butt ..	92	Frank Swan.....	65 " " " "
Total.....	1673		

Employed for the State.

Department.	No.	Character of work.
Machinery department.....	46	Employed on permanent improvements, repairs, etc.....
Outside	44	At work during Oct. and Nov., making "ice pond.".....
Stables.....	15	Employed as hostlers and teamsters.....
Yard	28	Policing yard and tending gates.....
Store and farm	17	Butchers, gardeners, farm hands, etc.....
Convict kitchen.....	18	Bakers, cooks, and kitchen help.....
Wash room.....	24	Tailors, washers, barbers, coblers, etc.....
Hospital	5	Nurses, cooks, etc.....
Warden house.....	30	Cooks, bakers, waiters, chambermen, runners, etc.....
Female prison.....	15	Washing for Warden house, making and repairing clothing..
Court solitary.....	6	Sentence pronounced by courts.....
Total.....	281	Making total count, Nov. 30, 1874, 1,353.....

Of the convicts employed at the trades as above stated, it may be said that a majority may become sufficiently skilled to earn a livelihood upon their discharge, if they can obtain employment, and are disposed to work thereat. The increased number of convicts now in the Penitentiary—the contracts being filled—renders it necessary to employ more labor on State work than we otherwise would, or than will be when arrangements shall have been completed for a full force of workmen upon a new contract just entered into.

During the two fiscal years ending November 30, 1874, from the receipts and labor of the Penitentiary it has paid its current expenses, made all necessary repairs of buildings, machinery, etc., amounting in value to \$6,458 16; expended in necessary permanent improvements, \$32,702 48, and it now has on hand \$12,520 83 in cash; supplies of subsistence and clothing amounting at a cash valuation to \$54,769 50, and bills receivable, less salaries not yet due, and convict money on deposit, amounting to \$44,141 15.

On the 10th day of May, A. D. 1873, Theodore Canisius, Moses M. Bane and Joseph W. Wham, appointed by your Excellency, succeeded and relieved the Board of Commissioners previously elected or appointed by your predecessor. They ordered a new inventory taken of all property belonging to the Penitentiary at that date, and the amount of that inventory has been the cash basis of the institution since that date. The following financial exhibit shows a net gain of receipts over expen-

ditures from said date of May 10, 1873, to the date of this report, a period of about nineteen months, of \$33,099 00:

Exhibit of financial condition of Illinois State Penitentiary, from May 10, 1873, to November 30, 1874.

On May 10, 1873, we commenced operations with an inventory of chattels and supplies of.....	\$115,534 26
And an amount of debts due the Institution, including cash on hand, of \$88,530 45	
Less the indebtedness of the Institution on same date.....	19,086 52
	69,443 23
Total	\$185,978 19
On November 30, 1874, (date of this report), we show the following to be our net assets:	
Inventory of supplies in store.....	\$42,426 97
" Fixtures, furniture.....	
" Convict clothing, etc., etc.....	57,296 14
" Machinery department.....	44,003 21
" Real estate, (Nebraska City).....	1,200 00
" Stone in quarry.....	175 00
Total	145,095 32
Inventory of permanent improvements made from May 10, 1873, to November 30, 1874.....	28,925 09
Debts due to Penitentiary:	
Cash.....	\$12,520 83
Owing by contractors, a portion of which is not yet due.....	23,299 97
Other bills receivable.....	16,009 13
Total	\$51,829 23
Less amount of indebtedness:	
Convict money on deposit.....	\$2,530 65
November pay-roll, not due before December 15.....	5,039 94
Chas. E. Page & Co., B. E. Cole, (in dispute).....	110 49
	\$7,681 08
Net debts due	44,141 15
We are, besides, entitled to credit for payment of old accounts, contracted prior to May 10, 1873, and not appearing as indebtedness on that date, but audited since then.....	915 63
Total	219,077 19
Leaving a surplus or gain in our favor on business transacted from May 10, 1873, to November 30, 1874, of.....	\$33,099 00

NOTE.—For as full and complete a history of the financial transactions of this Institution as can be given from the records, we respectfully refer you to the Warden's report, and the very complete exhibits and statistical tables appended thereto.

Of permanent improvements made during the two years covered by this report, in addition to the shops erected and fitted up at a cost of upwards of sixteen thousand dollars, a large amount of branch sewerage has been made, and water pipes laid in the yard; a large steam pipe laid from Boiler House No. 3, to West Wing, and through Warden House to the East Wing and Female Prison, and considerable smaller pipe elsewhere. A new slate roof put upon the Foundry to replace the roof burned off; the State machine department fitted up and a new warehouse built therefor; water closets placed in Butt and Cornice Shops, with tank and connections for same; Shoe Shop No. 6 fitted up and improved and warehouse built therefor; a new slaughter house built; an excavation made for an ice pond at spring to enable us to cut our own ice, frozen of pure spring water, which we have heretofore been obliged to buy. Owing to the partial failure of our artesian wells, your Board were last summer obliged to cause to be built a large reservoir, near the center of the Prison yard, to hold and keep for use the waste water, which heretofore run from said wells during the night time. This we regard as one of the most important improvements made at the Prison. It has a capacity of four thousand barrels, and all parts of the

Prison are connected with it by pipes, giving an ample supply of water for all purposes, and in case of fire, giving us a full head to draw from at the various plugs and steam fire pumps in the Prison. In connection with this we have overhauled our fire apparatus, purchased an ample supply of new hose, and relieved all about the Prison from an anxiety about and dread of fire, long felt. For further particulars as to items of permanent improvements we refer you to statement of same hereto appended, marked "F."

In respect to these improvements, we should be remiss in our duty did we not mention the valuable services of our Chief Engineer, Capt. James Miller, to whose ingenuity and ability we are indebted for many of them, as also the economical, profitable and successful management of the machine department of this Prison.

The Board of Commissioners, first appointed under your administration, upon taking charge of this Institution found that their predecessors had leased and contracted to furnish the labor of one hundred and fifty convicts to the Illinois Car Company for the manufacture of cars, and shops for this purpose were being erected by the Penitentiary authorities. The panic of September, 1873, so severe upon railroad interests in this country, caused such a suspension of demands for cars that this company was obliged to cease operations in consequence. By the terms of their contract, as modified by your board, they were to complete the erection of all necessary shops at their own expense, and be reimbursed in three installments, on the first day of March, in the years 1875, 1876 and 1877, respectively, for the money expended by them in so doing. Although these payments were not due yet, this company being anxious to obtain the amount so expended by them, and offering to discount their bill of twelve thousand eight hundred and ninety-eight dollars and one cent, upon consultation with and advice of the Attorney General, the matter was finally adjusted by paying to said Car Company six thousand five hundred and forty-one dollars and sixty-six cents, and they releasing their interests in the shops to the Penitentiary, and canceling their contract therewith. Nothing has been lost to the State by this transaction, as we had ample funds on hand, and paid less than the cost and value of the buildings, which are fine, substantial stone structures, and are now occupied and absolutely necessary for work shops with our present number of convicts.

After duly advertising, according to law, proposals soliciting bids for the labor of from seventy-five to one hundred and twenty-five convicts, the Board of Commissioners, on the 23d of January, 1874, awarded and executed a contract to John H. Winterbotham, upon his bid for the labor of from ten to thirty-five convicts at seventy and one-third cents per man, per day, until the second of April, A. D. 1879, to be employed in the manufacture of chairs, wagon-work and cooperage; and on the twenty-first day of February, 1874, contracted the labor of the balance of said number of men to Messrs. Reed, Jones & Co., of Joliet, upon their bid, to manufacture cigars at three dollars and twenty-five cents per thousand. These being the highest and only bids for the labor of said men.

Upon this contract all aged, crippled and disabled convicts are employed, and labor thus utilized that could not be well otherwise used in the prison, and such convicts taught the only trade they could learn here, and find employment at upon their discharge.

The recent large increase of the number of convicts giving us a surplus of labor, after duly advertising the same, the labor of seventy-five

convicts was, on the tenth day of November, 1874, leased to George A. Haley, Esq., for the Gowen Marble Works of Chicago, for the manufacture of marble mantles, monuments, etc., at the rate of seventy cents per man per day, thus introducing a new and useful trade into the prison.

These are all the labor contracts entered into since the date of our last report.

Our supplies have, so far as possible, been furnished upon contracts awarded to the lowest bidder, after duly advertising for the same, and are of the best and most substantial kind and quality. For prices paid as well quantity and character of same, we refer you to abstracts G and H, Warden's report, hereto appended.

For a full and complete history of the transactions of this Board we beg leave to refer you to the official record.

The statistics appended hereto will show many interesting facts, of which we cite a few :

Of the convicts here confined, 48 are sentenced for life, 145 for murder, 34 for manslaughter, 172 for burglary, 68 for burglary and larceny, 554 for larceny, 57 for assault to kill and murder, 19 for rape, 27 for assault to commit rape, and 379 for other crimes; of which, by occupation, 239 are farmers, 369 laborers, 30 clerks, 37 carpenters, 40 shoemakers, 28 stonecutters, 23 teamsters; of which 1,013 are native, and 340 foreign born; and of the foreign born, 101 are Irish, 90 Germans, 50 English, 51 Canadians; and of colored, 165. That Cook county sends upwards of 25 per cent. of all; that the average length of sentences, exclusive of life, is about 4 years and 11 months; the aggregate years of sentence, 6,352. And that of religions there are 289 professed Roman Catholics, 81 Methodists, 23 Presbyterians, 52 Lutherans, 49 Baptists, and 808 make no profession; 40 per cent. profess denominational religious belief; 1,026 can read and write, 127 read only, and 200 have no education; 76 per cent. read and write, 14 per cent. have no education, and about 8 per cent. read only; 589 of temperate habits, 764 of intemperate habits; and that in 1873 there were 45 re-commitments for the second term, and 6 for the third term; in 1874, 88 re-commitments for the second term, 15 for the third, 4 for the fourth, 1 for the fifth and 1 for the sixth term in this prison. In how many other prisons they may have been we have no record or means of knowing to a certainty. That, from an imperfect record, we know of those now confined here, upwards of 10 per cent. have been here before, and many of them several times.

We herewith submit the report of Dr. A. W. Heise, Physician of the Penitentiary. The general good health of the convicts here confined is truly remarkable. This we attribute to the skillful medical treatment of the sick, careful precautionary and hygienic regulations, plain wholesome food, regular habits, and the use of no stimulants. The successful management of men in a prison, financially and otherwise, depends very much upon its Physician. Feigned and imaginary sickness is frequently reported when none really exists. To Dr. Heise, for the careful and economical management of his department and the men who come before him for treatment, much credit is due.

We herewith submit the report of the Rev. A. T. Briscoe, Chaplain of the Penitentiary, and respectfully call your attention and that of all readers of this, to the facts set forth therein, as showing the results of religious and moral efforts among the class of men we have in charge. His efforts have been earnest and persistent, and certainly the results as seen by all in the institution, in the improved demeanor and behavior of many of the convicts—some of whom have been the most incorrigible

ever in the prison—must certainly be very encouraging to him, and is very satisfactory to us. He holds interesting and impressive divine services in both the chapel and female prison every Sabbath, and labors almost constantly, both day time and evenings, during the week: repeatedly visiting and encouraging the sick in the hospital, writing letters for both sick and well, finding situations for and corresponding with discharged convicts, thereby rendering substantial as well as moral and religious aid, visiting, conversing with and instructing prisoners in their cells nearly every evening, and inspiring them to hope and a better life, thereby affording them much valuable assistance, mentally and morally, and making his services particularly valuable by reading and carefully explaining to each and every convict, when he first comes into the Penitentiary, all the rules for his conduct while here, the provisions and benefits of the good-time law if he commits no infraction of the rules, and showing to them the necessity and personal advantage it will be to them to render a hearty and cheerful obedience thereto, and thus, we have no doubt, saving many from days of punishment, rendering material, moral and financial benefit to the prison and its inmates. In fact, there is neither officer nor convict who does not cordially attest the very great value of the missionary works of the Chaplain.

Individualization is an essential principle of prison discipline. To insure their highest improvement prisoners must, to a certain extent, be treated personally, and no one is better fitted, or can do such duties more successfully than a Chaplain. We know that many a hardened reprobate, through his efforts, has become an orderly, well-behaved man and professed christian, giving indications that he will hereafter lead an honest, upright life.

Your Board, appreciating the long continued valuable services of Chaplain Briscoe, re-appointed him for three years, to date from August 4th, 1874.

The report of our prison instructor, Mr. James L. Wheat, we think shows as satisfactory results as the means at his command would warrant us in expecting, and plainly shows as practical the theory, as well as the legislative design, of making the term of imprisonment in our Penitentiary one of reformation as well as punishment.

We are aware that in the minds of many there are objections to such attempts at ameliorating the condition of men who are sentenced to punishment for a term of years at hard labor, but observation of, and direct contact with the convicts, convince us that the self inspiring problem of individual improvement directly connected with the punishment for crime, as evolved by a system of mental culture, even though in a most limited form, as adopted here and in some other prisons of this country, is no longer one of experiment, but ascertained to be of importance in comparison to which none other has or should have paramount consideration by intelligent prison officers; and while we would not attempt to thwart, misconstrue or misapply the probable justice of the sentences of the various courts of our State in the case of criminals who are sent here for punishment, we are heartily in accord with the humane and philanthropic idea of making prominent in institutions of this kind this feature of prison reform.

The inclination is to regard a person sent to the Penitentiary as so out of the reach of, below and beyond the effect of any attempts at reformation, that the principles here enunciated are entirely too sentimental and utopian to be of practical utility, but we here take the liberty and

responsibility of saying, that in our opinion, we are swiftly approaching a day when it will be practically demonstrated to the world (with all due respect to the opinions of the past) that convicts are to be more economically, efficiently and in all respects better governed and controlled by appeals to their intelligence and individual manhood than by the application of former physical and cruel methods of punishment.

During the two years last past there have been added to our prison library about 2,000 volumes, carefully selected with special reference to the use intended. The books are circulated freely among the convicts, and we believe more reading is done by them here than by four times the number of men of the same class outside. About 3,000 newspapers circulate among them monthly, and we hope to, and shall as soon as circumstances will permit, provide a large school room, where all may receive such education as is best, or can be given by us.

We append herewith the rules for the government of convicts, and the good-time law. These rules are read and carefully explained to every convict upon his entrance into the prison, and a copy of them is kept constantly hanging in his cell, so that he may know at all times what they are, and if he disobeys it is not through ignorance of what is required of him. The necessity of discipline in an institution of this kind and size, (the number of men here confined being greater than in any prison on this continent, if not in the world,) and with the vast amounts of property and interests connected therewith, must be apparent to every intelligent person. Without discipline the value of its labor depreciates, property is destroyed, and hope for the reformation of the convict becomes impossible. How to maintain such discipline at its present high standard with as little punishment and the kind to be used, has been a subject of the most earnest consideration by the officers of this prison. When it is considered that our prison is on the congregate plan, and that, by rule, strict silence must be observed by the convict, hundreds of them working side by side, for days and years, without being allowed to speak or hold communication by word or sign, and that with upwards of thirteen hundred men of all conceivable natures, dispositions, impulses and grades of intellect, and many of them reckless and desperate characters, better order and discipline must be maintained in all parts and departments of the prison than in any school in the land, it will not be surprising to learn that willing obedience is not always given or to be expected by all. How to enforce such discipline in a manner consistent with the feelings of an enlightened humanity in the age in which we live, is a question agitating the minds of the thinking prison men of the world to-day. It is useless to say what kind of punishments have been in vogue or have been abolished in prisons throughout the world; suffice it to say that the only severe punishment now inflicted in this prison is solitary confinement, in a large, light and well ventilated cell, with pine floor, on a scanty diet of bread and water until submission and obedience is promised and insured. The prisoner is simply left alone, no torture is applied, no anger is aroused; but with the passing away of his exuberance of animal life his turbulent and rebellious feelings disappear; reflection comes, complete submission soon follows, and he begs to be put to work with his comrades. The moral effect of such a mode, when contrasted with corporal punishment, which degrades both the convict and the person who inflicts it, must be apparent. One arouses the baser passions—the other acts upon the reflective and reasoning faculties; one is brutal, the other is humane; one accomplishes the desired end, the other only overcomes the

powers of a convict for physical endurance and suffering, and debases and excites him to fresh insubordination when opportunity shall occur.

Dr. A. W. Heise, our able Prison Physician, to whom this subject was referred for his professional opinion, and who approves and advises this mode, in an exhaustive report, says: "This method compels reflection upon the convict unaccompanied by those feelings of anger and revenge which attend upon the knowledge that his punishment is degrading to his manhood, and at the same time a matter of notoriety among his fellows." For slight offenses, a reprimand or deprivation of some privilege is found the most effectual and beneficial.

This theory of punishing convicts as men, instead of simply animals, is securing great consideration by the best and most experienced prison men of our country, and while the experience and observation of the officers of this prison in this regard, are of necessity limited, we feel assured that the record of the kind and quantity of punishment, as well as the present state of discipline in the Illinois State Penitentiary, proves beyond question that a much more humane system of prison discipline is to be ushered upon us, and that the legitimate results of its adoption here are everything that could be expected—not fictitious and unreal, but eminently practical and satisfactory.

This mode of punishment, taken in connection with the good-time law, under which, if no infraction of the rules is committed, sentences are diminished on the average five and two-fifth months per year, or, if he disobeys and is punished, the convict resentences himself to so much longer term—shows him that solely upon his behavior depends the amount of his punishment. In our opinion, no one thing exerts so strong an influence over the conduct of these men as the "Good-time" law, showing that no matter what a man's nature may be, the deprivation of liberty, and the hope of obtaining it, will tame and control him. This shows to us conclusively that the hope of reward in other ways held out to the criminal after severe punishment will have a beneficial effect.

Under the "Good-time" law, in force previous to July 1, 1872, a convict, for a single offense or infraction of the rules, if punished therefor, lost all his good time previously made. When it is considered that justice is not nor cannot always be done by prison officers, and as many old time convicts here have thereby lost a large amount of good time, we would respectfully indorse the recommendation made in the Warden's report, and ask that legislation be recommended to empower the Board of Commissioners, in their discretion, to restore the good time of any convict lost prior to July 1, 1872.

To obtain the confidence of the convict, prove to him that his custodians are not his enemies; that good conduct here will merit and receive its own just reward; that the law is made for his protection as well as punishment; and, finally, if its requirements are fulfilled, society will still honor and respect him—is the aim and duty of the officers of this institution.

Probably no more truthful lines were ever written than that "No rogue e'er felt the halter draw, with good opinion of the law," and it is with feelings of prejudice and generally hatred of society, mankind, and all law and restraint, indulging in bitter feelings against its officers, judges and juries for long, and, to their minds, disproportionate sentences for offenses sometimes provoked, and in their judgment justifiable, disgraced by society, neglected and deserted by his friends, and with a horror of prisons and uncertainty and anxiety as to his treat-

ment and fate herein and hereafter, the average convict usually enters the Penitentiary. We believe that a convict is neither a brute nor a saint, and to treat him as either, whether before or after coming to the Penitentiary, is equally injurious to himself and to society, and that, in order to procure his reformation, justice must be meted out to him both in the manner of procuring his conviction and sentence and in his treatment afterwards. To find the most effective method, and subordinates for so doing while here, is our constant aim. As good men for guards and keepers as can be procured for the prices our income will warrant, are employed, and among them are many excellent, and, we think, no bad men, yet we hope for constant improvement and more efficiency in this respect as they shall become better educated and more experienced, and as we all become better enlightened in all matters pertaining to prison management and discipline. No hard or over-laborious tasks are imposed upon convicts, but industry and hard labor are required. All officers and keepers are required to speak to and treat convicts kindly but firmly, and in no case can any punishment be inflicted upon a convict unless first ordered by the Warden or his Deputy, and this only after a thorough investigation by them of the cause and nature of the complaint, the convict and his accuser being brought face to face in order that no injustice may be done; and after punishment is ordered and being inflicted, if the convict can satisfy the officer constantly near him of his submission and determination to obey in future, he is at once released. Punishments are always intended to be commensurate with the offense committed, and no harsh or cruel mode is allowed. Of course, all human agencies and judgments are imperfect, but it is safe to say that if the convict shows a willing obedience to all the rules, he can avoid all punishment; if not, it is certain to follow; but under this mode no great injustice can be done him.

For the habitual and professional criminal we have no sympathy, and in his reformation very little hope. What, then, is to be done with him? We believe that, when society becomes thoroughly aroused and determined to rid itself of such, that a system of indefinite sentences or terms of imprisonment, to only expire when their conduct shall warrant their discharge, will be found the most effectual prevention of crime. Our Penitentiary is now required, by law, to be made a place for the punishment and reformation of criminals, and they are sentenced here for that purpose. Is it not absurd to suppose that a judge or jury can, in the few hours, or perhaps but the few minutes which they have the criminal before them, deal out just the correct amount of time in years and months in a sentence that it will take to effect his reformation and render him fit to be returned into society? Is it any more reasonable to suppose that a Legislature that never saw him can, by enactment, state the time with any more exactness? Both may say what amount of punishment he shall receive for having outraged society and disobeyed the law, but who, better than Prison officers, who see and know his every act, learn his disposition, nature, vices, instincts, impulses, and intentions for the future, can judge of his fitness to be returned to society?

Mr. Z. R. Brockway, the able Superintendent of the Detroit House of Correction for eleven years, in his last annual report, in discussing this subject, says: "I scarcely need to add that no just judgment of the amount of time required to protect society from criminals by their restraint and reformation can be had save from those who have opportunity to observe them while under treatment, and to apply practical tests

to apparent progress." This subject is worthy the consideration of all good citizens, whether legislators or not, who desire the repression of crime and reformation of criminals.

It has been said, with reason, that there was no good Penitentiary system without aid to discharged prisoners. We will state that, in our judgment, there is no properly organized government without some provision for the aid of the well disposed convict upon his discharge from imprisonment. And while we are technically only required to report upon the condition of the Penitentiary, yet it, its object, management, inmates while here and after their discharge, and all criminal laws, are so intimately connected, that it is impossible to properly report upon one without remarking somewhat upon all; and while any lengthy views or recommendation by us might be considered improper, yet a few facts taught us here, or views from our standing point, may be of value in the discussion of this question, and assist in accomplishing some good result. Convicts upon their discharge now receive ten dollars and their reasonable expenses to the place of their conviction, to which, of all places, many of them do not desire to go.

In our treatment of convicts here, we are endeavoring to show to them that the awful sentence, "Who enters here leaves hope behind," is no part of our creed. Can society say that such is no part of its law with reference to the discharged convict? It is said that confidence is a plant of slow growth. The convict, however, has paid the full penalty for his crime; and, assuming that the State has placed no obstacle in the way of producing the condition sought, to-wit: his penitence and reformation, either by the manner of conviction or treatment afterwards, and the Penitentiary to have accomplished the purpose which its name indicates, (which, if our system is not a failure and its name a mockery, should be the case, or the convict not discharged,) and the convict leaves it with the best of intentions, and desirous of obtaining an honest livelihood and becoming a law-abiding and good citizen, society and the State not only fail to lend him any assistance, but obstacles are thrown in his way, employment refused where known, and he must conceal and falsely deny that he has been a convict, or fail in his efforts and lose the confidence to which he is perhaps entitled. We believe in compensation, or at least in justice by governments. The State and society have, by his conviction and incarceration, made public his disgrace, and to a certain extent the convict is civilly dead. Shall they still continue the disgrace and persecution, and thus prove to him that there is punishment after death, and no hope for him in this country with its boasted Christian civilization? But suppose society, which in its social intercourse knows no law, refuse, or at most only extends moral aid, does not the State owe a duty to such men? Certainly as much as to provide an avenue or agency through which they may obtain employment to earn a livelihood.

When those who have been good citizens all their lives cannot obtain employment, what, then, is he to do who is ostracized from association with his fellow men, and never perhaps before tried to obtain honest labor, and is a comparative stranger to it and the way of obtaining the same? Moral aid and support is a good thing—all circumstances being favorable; but when starvation stares a man in the face, and stealing is the only trade he thoroughly understands or can find ready employment at, he is likely to ply his vocation, take his chances of punishment, and leave moral reform to some more convenient season:

We ask for this class of men no maawkish sympathy or misguided philanthropy, but they must exist somewhere: either at large among their fellow men, or be returned to prison—and as to which, very much depends upon their treatment and opportunities. There have been, during the past year, eighty-eight re-commitments to our Penitentiary. Is this by reason of the neglect of any duty on the part of the State, and, if so, in what direction? And when it is considered that about six hundred convicts are received and discharged from this prison yearly, we recommend the subject and importance of attention to them through you, to all legislators, prison reformers, and good citizens generally, believing that when understood, the surveillance of and attention to the convict will not cease upon his leaving the prison. Massachusetts and New York have their Prisoner's Aid Associations, California its State Agency, and various other States similar provisions by law, and appropriations for the same. Shall Illinois do less?

It may not be improper, here, to remark further upon the importance of the subject of prison management, and to say that, in the opinion of this Commission, the successful conduct of a prison, like the one over which we have the honor to preside, is not wholly the result of accident or experiment, but that the most desirable results can only be accomplished by a most careful study of and inquiry into the philosophy of the human mind, as connected with the operations of the physical system.

The end to be attained must, if at all, be accomplished after ample experience, education, and an intelligent and honest desire to make such institutions a credit to our State and the greatest benefit to humanity—accomplishing the double purpose of punishment and reform, and mingling with the stern rules of justice those also of kindness, sympathy and Christian charity.

To correctly arrive at and understand the proper proportion of these, to be administered to a class of men whom the world regard and our laws have pronounced felons, is an occupation and a study well deserving the thoughts and consideration of a life time, and induce the feeling in this Board that upon us is a duty and responsibility which can only be discharged and intelligently borne after much laborious thought and careful study.

We therefore, through the honorable Executive of this State, earnestly solicit, as circumstances and inclination may give opportunity to citizens of all classes and occupations, such attention on their part as will correctly inform them of what and how conducted is the Penitentiary of Illinois, in order that, by their additional knowledge, observation and suggestions, this perhaps the most important public institution of our great State shall continue, as now, financially sound and self-supporting, doing credit to the State, to the Executive, and to all those having connection with it.

Thanking your Excellency for many wise suggestions and earnest efforts in behalf of the institution,

We are, very respectfully,
Your obedient servants,

WOODBURY M. TAYLOR,
JOHN M. SOUTHWORTH,
JOSEPH W. WHAM,

Commissioners.

RULES FOR GOVERNMENT OF CONVICTS.

RULE 1.—The first duty of the convict is strict obedience, and it will be for his interest to obey all rules and regulations.

RULE 2.—Strict silence must be observed. No conversation allowed except by permission of the officer under whose charge they may be.

RULE 3.—The convict must not speak to any visitor; give to, or receive from them, anything without permission of the Warden or Deputy.

RULE 4.—Convicts must not leave the line, or their place of employment, without permission. If sick or unable to work, must make it known to the officer in charge, and act as he may direct.

RULE 5.—Convicts must approach an officer in a respectful manner—*always* touching his cap or forehead before speaking. He must be prompt in taking his place in line, march lock-step with his right hand upon the shoulder of the man in advance, incline his face towards the officer, and attend to and promptly obey his orders. Convicts passing through the yard must walk in file (never abreast).

RULE 6.—On entering the cell-house, convicts will stand at cell with their right hand on the door. At a given signal, will open the same, step in, close within six inches, keep hold until the second signal is given, when they will close altogether, remaining with their hand upon the door until the bar is closed and the count is made. In case of miscount, he will resume his position at the door until the count is correct.

RULE 7.—He must keep his cell and furniture clean and in good order. No marking or scratching the walls, nor spitting upon the floor, will be allowed. At the ringing of the 9 o'clock bell, P. M., all convicts must put out their lights, undress and retire.

RULE 8.—At the ringing of the morning bell, he must turn out, dress, make up his bed neatly, and be ready for marching out. At the signal, he must open the door, step out, close the same—holding on until the bar is closed—and stand erect until ordered to march.

RULE 9.—No convict will be allowed to gaze at visitors or strangers passing through the prison; neither will they be allowed to make any alteration in their clothing or the furniture of their cells.

RULE 10.—All convicts not employed in the Warden's office, or about the Warden House, on entering, must uncover.

RULE 11.—All convicts are required to attend religious services on Sunday, unless sick or excused by the Warden or Deputy. In chapel, silence must be observed. No reading will be allowed, and strict attention must be given to the service. Spitting upon the floor, shuffling of the feet, or any unnecessary noise is strictly forbidden.

RULE 12.—Insolence in any form will not be tolerated. No smoking by convicts allowed on the prison premises.

RULE 13.—Convicts will be required to bathe once a week in summer, and once in two weeks in winter, unless excused by the Physician, Warden or Deputy.

RULE 14.—Every convict shall have permission to write once in five weeks. In case of special letters, written permission must be obtained from the Warden or Deputy. All letters written or received must first be examined at the office, under the direction of the Warden, before sent or delivered. Visits from friends allowed once in eight weeks. The permission to write or receive letters and visits from friends is dependent upon general correct deportment and obedience to rules.

RULE 15.—The use of library books, and all reading matter, may be suspended by the Warden for violation of library rules.

R. W. McCLAUGHRY,

Warden.

January 1st, 1874.

GOOD TIME LAW.

SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly, That every convict who is now or who may hereafter be confined in the Illinois Penitentiary, and who shall have no infraction of the rules or regulations of the Penitentiary or laws of the State recorded against him, and who performs in a faithful manner the duties assigned to him, in an orderly and peaceable manner, shall be entitled to the diminution of time from his sentence as appears in the following table, for the respective years of his sentence, and pro rata for any part of a year where the sentence is for more or less than a year :*

Number of years of sentence.	Good time granted.	Total good time made.	Time to be served if full time is made.
1st year.....	1 month.....	1 month.....	11 months.....
2d ".....	2 ".....	3 ".....	1 year and 9 months.....
3d ".....	3 ".....	6 ".....	2 ".....
4th ".....	4 ".....	10 ".....	3 ".....
5th ".....	5 ".....	1 year and 3 months.....	4 ".....
6th ".....	6 ".....	1 ".....	5 ".....
7th ".....	6 ".....	2 ".....	6 ".....
8th ".....	6 ".....	3 ".....	7 ".....
9th ".....	6 ".....	4 ".....	8 ".....
10th ".....	6 ".....	5 ".....	9 ".....
11th ".....	6 ".....	6 ".....	10 ".....
12th ".....	6 ".....	7 ".....	11 ".....
13th ".....	6 ".....	8 ".....	12 ".....
14th ".....	6 ".....	9 ".....	13 ".....
15th ".....	6 ".....	10 ".....	14 ".....
16th ".....	6 ".....	11 ".....	15 ".....
17th ".....	6 ".....	12 ".....	16 ".....
18th ".....	6 ".....	13 ".....	17 ".....
19th ".....	6 ".....	14 ".....	18 ".....
20th ".....	6 ".....	15 ".....	19 ".....
21st ".....	6 ".....	16 ".....	20 ".....
22d ".....	6 ".....	17 ".....	21 ".....
23d ".....	6 ".....	18 ".....	22 ".....
24th ".....	6 ".....	19 ".....	23 ".....
25th ".....	6 ".....	20 ".....	24 ".....

§ 2. In case any convict shall be guilty of the violation of any of the rules or laws of the Penitentiary, or of the State, as above provided, and has become entitled to any diminution of his sentence by the provisions aforesaid, he shall, for the first offense, forfeit, if he has made so much, two (2) days; for the second offense, four (4) days; for the third offense, eight (8) days; and for the fourth offense, sixteen (16) days; and in addition thereto whatever number of days more than one, that he is in punishment, shall also be forfeited; for more than four offenses, the Warden shall have the power to deprive him, at his discretion, of any portion, or all of the good time that the convict may have earned, but not less than as provided for the fourth offense.

§ 3. That whenever any convict is or has been committed under several convictions, with separate sentences, they shall be considered as one continuous sentence under this law, in the granting or forfeiting of good time.

§ 4. The Warden, in computing the diminution of time for those convicts now in the Penitentiary, shall allow them the "good time granted," but not the "good time made," for the year or part of a year of their unexpired sentence, the same as if this law had been in effect at the commencement of their sentence.

CHAPLAIN'S REPORT.

ILLINOIS STATE PENITENTIARY,
JOLIET, ILL., Dec. 1, 1874.

To the Hon. Board of Commissioners :

GENTLEMEN:—As Chaplain of the Illinois Penitentiary, in presenting my biennial report, I would most humbly thank Almighty God for the blessings conferred by Him on my feeble efforts here to raise the fallen. Within the past two years many prisoners have been persuaded to listen to the voice of mercy—to trust in the Sinners' Friend, and have become earnest praying men and women.

LABORS OF THE SABBATH.

I hold, regularly, four meetings every Sunday—preaching twice and holding two society meetings. Preaching services commence with the male prisoners in the chapel at 9 o'clock A. M., and continue until half past 10; then the congregation is dismissed, the members of the praying band—religious society—remain, and they sing, pray and talk together until a few minutes of twelve o'clock, and then they are sent to their cells. At two o'clock, P. M., preaching services commence in the female prison, and the same services are held as with the males, but not so extended; the time occupied from one and a half to two hours.

We have a choir of twenty singers among the men, who lead the singing at preaching services in the chapel; they are trained and led by Captain J. L. Wheat, usher of the Penitentiary, and Mrs. J. L. Wheat is employed as organist, both for chapel services and singing school.

VISITS FROM FRIENDS, ETC.

Various ministers, lecturers and pious persons have visited and labored with us on Sabbath and holidays, much to the edification of all present. Venerable Elder Knapp and Elder Brackenridge, of Joliet, and Elder John Beggs, of Plainfield, Will county, and many others, both ministers and laymen, have exhibited deep interest in the reformation which has been going on here among the prisoners.

There are at the present time 395 members belonging to the praying band; many of these are truly devout and earnest seekers after salvation from sin. I am in receipt of many letters from discharged prisoners, who were converted here, stating their whereabouts and of their continued faithfulness in the services of God; also, stating their union

with the various branches of the christian church, and also several who are prominent and active members, and are esteemed by the churches for their zeal and piety.

CHAPLAIN'S WORK THROUGH THE WEEK.

Frequently visiting the prisoners at their cell, at night, giving words of encouragement; daily visiting the sick in the hospital; writing letters and attending to their many little wants; he thereby gains their esteem and confidence.

At these interviews many are brought to feel deeply for the past of their lives, and by prayer they take hold on God's promises and are saved; but there are very many of whom, I regret to say, I cannot hope for their recovery from a sinful life, for they are professionals in crime; yet there are many who are not criminals by profession or in heart; many young men who have had and still have good and honorable parents, and have been well raised, and many men who have seen better days, but who have been seduced from their homes and families by bad associations, and by the cause of all causes in our day, whisky, which has covered our land with disease and crimes; filled our jails and asylums, and especially our penitentiary. Among these I find many susceptible of the influences of the gospel. The golden rule works nowhere else better than among these unfortunate beings.

The cause of crime, aside from human depravity, lies so hidden in the domestic circle and early associations of our convicts, and their own statements are often so contradictory, it becomes exceedingly difficult to present any reliable statistics from which just conclusions may be drawn. One result, on this subject, however, is a deep conviction of the utmost importance of a more thorough religious education in childhood, for a just tribute is often paid unconsciously, behind iron bars, to the little religious influences exerted upon them when young, by acknowledging their wandering from the precepts received from their parents, especially their mothers.

A QUESTION OFTEN ASKED:

What is the greatest incentive with the convict to good morals, that is, constant obedience to the laws, rules and regulations? While there are combinations of influences constantly brought to bear to control them, strict discipline with moderation, and dealing justly with them by supplying the real necessities and comforts of life, and making them feel they are cared for, yet, I am fully impressed, there is no one thing, perhaps, has so much influence upon the prisoners, taking them in a mass, as the good-time law, for it appeals directly to their interests, and encourages them to obtain that which they love the most dearly in this life, liberty.

THE LIBRARY

As a reformatory agency, is of incalculable value. It is both a means of instruction and has a good influence on discipline. The desire for companionship of books with those who are in any degree educated, and the anxiety to learn on the part of those who are illiterate, becomes a power in the hands of the Warden for commanding obedience, while the prisoner becomes better informed as to the duties of heart and life.

During the past year, from the visitors' fund, which has been set apart to the support of the library by the Honorable Board of Commissioners, eighteen hundred volumes of valuable reading books have been added to the library; also, a catalogue of the books in library has been printed by that fund, and one copy is placed in each cell, in company with Bible and small slate for library purposes.

VOLUMES IN LIBRARY.

English reading books.....	3,700	
English school books.....	888	
German reading books.....	330	
English and German Bibles.....	1,500	
Total number of books.....		6,300
Large slates for school.....	500	
Small slates for cells.....	1,200	
		1,700

And we have, also, some charts for school purposes.

There are many prisoners here who will tell you that they have read more useful and instructive books, and have acquired more substantial information in this prison than, in all their former lives. For such there is always hope in the future. Combined with the instruction received from our school and reading books, and the influence of the Gospel, many are returned to the world wiser and better men, and they are much better able to fight life's battle than they were previous to their coming here. We are trying to make this a real penitentiary—not only a place of correction but of reformation.

PRISON SCHOOL

Has been a permanent benefit to many. Some who did not even know the alphabet, and many who could spell very imperfectly, can now read fluently, write intelligibly, and are quite proficient in figures. For particulars see Teacher's report.

In conclusion, permit me to express to you, gentlemen, the pleasure I have enjoyed in attending to my duties here as Chaplain, and to acknowledge with unfeigned gratitude the constant kindness and the uniform encouragement I have received from your honorable Board, and from the Warden, and also from all the officers of this prison.

I am, very respectfully,

A. T. BRISCOE, *Chaplain.*

TEACHER'S REPORT.

ILLINOIS STATE PENITENTIARY,
JOLIET, ILL., Dec. 1, 1874.

HONS. W. M. TAYLOR, J. M. SOUTHWORTH, and J. W. WHAM,
Commissioners of the Illinois State Penitentiary:

GENTLEMEN:—In accordance with your request, I have the honor to submit a brief report of the present condition of the Prison School; also, a statement of what has been accomplished during the past year.

I took charge of the school in November, 1873, and regular sessions were held three evenings of each week during the winter, and until the warm weather compelled a suspension. During this time over two hundred men received instruction in the rudimental branches. Many more would have gladly availed themselves of the school privileges, but for want of room, our efforts were necessarily limited to those most in need of assistance. The progress of the men, while not as rapid as would be shown in a school of children, was, on the whole, fully as great as could be expected, and, in some cases, very marked.

That their progress is slow, will not be wondered at, when you remember that many of them are now, for the first time, trying to use the God-given faculties, so long dormant, to acquire that knowledge, which in earlier years they neglected to secure. In some who have spent most of their time in idleness, and who have ruined their constitution by the use of intoxicating liquors, memory is necessarily defective, and it often seems a hopeless task for them to learn to read and write; but the great desire to be able to correspond with friends outside is a powerful incentive, and urges them on to renewed efforts. This, with many, is the height of their ambition, and they gladly avail themselves of the privileges that all have of writing, once in five weeks, one letter to whomsoever they please. To show how generally this privilege is used, I will say that there are, on an average, nine hundred letters sent out by the inmates of the prison each month. These all pass through my hands, are examined and posted if nothing improper is found in them.

The letters received by the inmates number fully one thousand per month, and in this there is no restriction, although I read every letter and it is stamped *permitted*, before it is sent to the cell.

Another great inducement for them to learn is, that they may be able to read the newspapers which are allowed in this prison—sporting and daily papers excepted—all of which are examined, and objectionable matter cut out. The men who have money, and many earn it by over-work, are allowed to subscribe for weekly papers, which, with those donated by the different contractors, and those sent by friends, make the number of papers alone, stamped and sent into the cells each month, fully three thousand.

Having been brought in closer contact with the members of the school than any of the rest of the inmates, I have, from time to time, as opportunity offered, spoken individually with those in the school as to their habits before coming here, and fully three-fourths of them admitted that the use of intoxicating drinks was the cause of their being here. Many

stated freely that there coming here would be the means of making temperate men of them. I prepared a pledge to which one hundred and twenty-eight of the members of the school signed their names or mark, voluntarily pledging themselves to abstain, in future, from the use of all intoxicating liquors, including beer and cider.

As all agree that the welfare of society, as well as that of the criminal, who is soon to be released, depends in a great measure upon the change wrought in him while a prisoner, it would seem that any means which would tend to elevate and lift him up to a higher and better life that can be used in connection with his imprisonment, should be; and, as ignorance and crime go hand in hand, a systematic effort to separate these twin sisters should be one essential in every prison, and I believe that our great instrument in the hands of the prison managers to reach this end is the school.

Implant in a man's mind a desire to obtain knowledge, build up in him a wish to better his condition mentally, quicken his intellect, awaken his self-respect, and the desire to study develops; he eagerly seizes the opportunity offered, as is seen here, where men who labor hard all day, and come to their cells at night tired and sore, are ready to spend their evenings in study.

This desire for improvement, once awakened, is genuine, as was shown by the eagerness manifested by many of the men who attended school last winter to receive admission again, and upon being refused, owing to lack of room, actually begged not to be crossed of the list. At present, we have on our roll the names of but sixty men who attend school, which is as many as we can accommodate. These are selected from the many as being the most illiterate. The majority of them are unable to read. The same men attend school two evenings each week.

From the most reliable statistics to be obtained—at the best, but the prisoner's statements—of the 1,353 inmates of the prison, on the 30th of November, 1874, there are 200 who can neither read nor write, while 127 more can read very little; showing over 14 per cent. entirely unable to read, and nearly 25 per cent. who are but little farther advanced, and I have no doubt, if the facts could be ascertained, that fully 50 per cent. of the inmates would be classed as illiterate. The records show about the same percentage of illiterate men among those received in any one year.

I am indebted to Mr. Gallus Miller, our very efficient clerk, for the above figures.

Arguments in favor of schools in prisons are many, and have been ably set forth by competent and earnest writers, and their influence will continue to be felt until such a system shall be devised as will meet the requirements, and not interfere with prison rules and discipline.

Our school is yet in its infancy, or more properly, an experiment; but I fully believe that with the arrangements perfected, now under consideration by your honorable Board, and which I hope will result in a school room properly furnished, and large enough to accommodate, at least, the most needy and deserving, we may be able to build up such a school as shall be of untold benefit to the inmates and an honor to the State.

In conclusion, I desire to express my appreciation of the kind co-operation and assistance of our Chaplain, A. T. Briscoe, who, in connection with his spiritual duties, has taken a deep interest in the school.

Thanking you for the many courtesies extended to me, I am, gentlemen, very respectfully,

JAMES L. WHEAT, *Instructor.*

PHYSICIAN'S REPORT.

ILLINOIS STATE PENITENTIARY,
JOLIET, ILLINOIS, *December 1, 1874.*

To the Honorable Board of Commissioners :

GENTLEMEN: In accordance with the requirements of the laws of the State, I have the honor to submit the following report of the medical department of this institution, for the two fiscal years ending November 30, 1874. This report, up to February the 28th, 1874, is necessarily taken from the hospital record, as my connection with the institution commenced on that date.

On taking charge of the hospital, I found nine patients therein, six of whom were affected with fatal disease, as follows: Three with Tuberculosis, two with Phthisis Pulmoralis, and one with organic disease of the heart. All of these have since died. Aside from them, there has been but six deaths during my administration, from a total of over 1300 convicts.

A reference to the tabulated statements submitted herewith will show that the general health of the convicts is constantly improving, and the number of days' labor lost through sickness is steadily decreasing.

Taking into consideration the fact that a large number of convicts received into the penitentiary are affected with diseases of an immoral character, it will be difficult to find a class of community so comparatively free from disease as the convicts in the institution.

The average number in the hospital, as shown by the tabular statement, is indeed remarkably small for a community averaging about 1300 in number. This result is due to the high state of discipline, the perfect hygienic regulations, and the wholesome food provided for the convicts. Naturally the decrease in sickness is accompanied by a corresponding decrease of expenses of the medical department, as the tables will show.

In the discharge of my duties as physician of this institution, I have found that the convicts, as a class, were not so insensible to moral influences as is commonly supposed, and that kindness, while mingled with firmness, meets with its own due return, as well in the improved physical condition of the convicts as in their moral teachings, to a certain extent.

However degraded a convict may be, there are very few who are not sensitively alive to kindness, particularly on the part of their physician; and in pursuing a system of patience and kindness, I have had no difficulty in managing the patients under my charge.

I do not consider it necessary to particularize further in relation to the matter pertaining to my department. My duty is to simply set forth the facts within my province as I find them. These facts are truly set forth in the tabular statements accompanying my report, which I cheerfully submit for the inspection of all whom it may concern, confident that the conclusion at which they point is in favor of the present management of the institution.

I am, gentlemen, very respectfully,

Your most obedient servant,

A. W. HEISE, *Physician, I. S. P.*

WARDEN'S REPORT.

ILLINOIS STATE PENITENTIARY, WARDEN'S OFFICE,
December 1, 1874.

To the Honorable Board of Commissioners, Illinois State Penitentiary :

GENTLEMEN : The history of this department, since December 1, 1872, must necessarily be compiled from the records of the institution, up to the 31st day of July, 1874, the date of my appointment as Warden.

The last biennial report from this office was made by Major A. W. Edwards, Warden, December, 1872. At that date there were incarcerated in this Penitentiary 1,255 convicts, 16 of whom were females. During the two years ending November 30, 1874, our records show as follows :

	<i>Males.</i>	<i>Females.</i>
Received.....	1, 958	23
Discharged by expiration of sentence.....	965	26
Pardoned.....	149	3
Removed to Insane Asylum.....	10	1
Released by reversal of judgment.....	2	..
Escaped.....	5	..
Died.....	35	..
Total of those who have left the institution.....	1, 159	24
Leaving on hand at date of this report.....	1, 338	15

Of this number 48 males are committed for life. For information in detail as to average number received and discharged per month, and many other items of interest, I refer you to the very complete tabular statements which accompany this report. These tables, together with the financial exhibits and comparative statements herewith submitted, are principally the work of Mr. Gallus Miller, chief clerk, whose efficiency and courtesy in discharging the varied duties of his department are worthy of especial mention.

On the 10th day of May, 1873, M. M. Bane, Theodore Canisius and J. W. Wham succeeded John Reid, Richard Rowett and Casper Butz, as Commissioners of this Penitentiary. They appointed John W. Smith, Warden, to succeed Major A. W. Edwards. The vacancy caused by the death of Warden Smith, which occurred August 18, 1873, was filled August 20, 1873, by the appointment of Major J. W. Wham, then commissioner, who was succeeded on the 31st day of July, 1874, by the undersigned.

The Board of Commissioners which came into authority May 10, 1873, ordered an inventory taken and balance sheet made as of that date, to show the condition of the institution when they took charge. A copy of said balance sheet (see statement A) is herewith submitted. It shows a diminution of \$144,825 97 in stock account from the amount reported November 30, 1872. The accompanying explanations (see statement B) show that this diminution is fully accounted for, as follows:

Stock account as reported November 30, 1872.....	\$330,804 16
Net decrease of inventory from Nov. 30, 1872, to May 10, 1873, caused by its being made on a strictly cash valuation.....	\$45,909 77
Losses on settlement of old claims which were contracted prior to December 1, 1870, and settled between November 30, 1872, and May 10, 1873.....	2,695 96
Loss in 'stone department' accounted for by the unadjusted error of \$29,752 54 of new State House Commissioners, and by final settlement with W. D. Richardson.....	31,110 45
Removal from the books of all claims pronounced "doubtful" and "worthless" by legislative committee of 1871, and on which nothing has since been collected.....	65,109 79
	<hr/> \$144,825 97
Leaving a balance of.....	\$185,978 19

on which the institution commenced work May 10, 1873, under the new management. Balance sheet (C) is an exhibit of the financial condition of the Penitentiary at the date of this report. It shows a net gain of \$33,099 00 on the business of nearly nineteen months. I may add that the inventory of this date is taken on a strictly cash valuation, and the statement of gains is believed to be in no degree fictitious.

By reference to the inventory it will be seen that we now have on hand, among other supplies, the following: 54,500 pounds of mess pork and hams, 95 fat hogs, weighing in the aggregate 22,800 pounds; 72,400 pounds of beef, 5,000 pounds of lard, 8,500 pounds of tallow, 6,000 bushels of potatoes, 350 bushels of white beans, 500 bushels of turnips, 650 bushels of onions, 100 bushels of beets, 200 bushels of parsnips, 55 barrels of apples, 95 barrels of kraut, 1,000 bushels of corn, 40 tons of hay, 140 tons of hard coal, and 120 cords of wood.

During the two years just closed, several valuable and necessary permanent improvements have been added to those already connected with the institution. Among the most important are the spacious shops, originally designed for the use of the Illinois Car Company, but now occupied by the contractors in stone and marble work. Since their completion the convicts, who were formerly worked in wooden shanties, exposed to the severe extremes of heat and cold, common to this climate, have been comfortably housed while at their work, with the result of better work for the contractor, better health for the convicts, and a gratifying decrease of friction and trouble in their management.

For several years past, and particularly since the Chicago river was turned through this valley, it has been almost impossible to secure pure ice sufficient for the needs of the prison, except at an enormous expense. This difficulty has been obviated by making a pond at the base of the bluff, near the spring house. It has already been flooded with water from the spring, and we only await freezing weather to secure a full supply of excellent ice, at a cost merely nominal compared with that of former years.

Inside the prison yard a reservoir, with capacity of 120,000 gallons, was completed in October, and is kept full from the artesian wells, thus furnishing an abundant reserve supply of water. Connecting pipes have been inserted in the same, to which hose can be attached in case of fire. Three hundred feet of new hose have been added to our supply within the last three months, so that we are in much better condition now to fight fire than ever before.

The foregoing statement of improvements made, and of the financial condition of the prison, is respectfully submitted as showing conclusively that, under proper management, this Penitentiary will not only be self-sustaining in future, but will yield enough surplus to complete the buildings and grounds according to the original designs, add many needed improvements, which experience shall show to be necessary to the pro-

per treatment of convicts, and eventually yield a revenue, to be disposed of as enlightened legislation may direct.

But gratifying as the financial success of the Penitentiary may be, it is of but little importance compared with the intellectual and moral improvement of its inmates. The matter of money is of but little moment to the people of this great State, compared with the question whether the six hundred convicts, who annually return from this Penitentiary into society, go back better or worse for their treatment and experience here. The report of the chaplain will disclose to you more fully the condition of the moral and religious work, of which he has special charge. To his long experience and faithful labor is due very much that is cheering in the moral condition of the convicts. His efforts for their welfare have been ably seconded by the labors of Mr. J. L. Wheat, Instructor, who has had immediate charge of the prison school. The Instructor's report will inform you of the success he has met with in his department, and will also show that his efforts are greatly crippled for want of more enlarged accommodations for the night school, which I trust your board will provide at the earliest day possible.

The library has been increased, during the past year, by the addition of nearly two thousand volumes, and is coming daily into more general use by officers and convicts.

In addition to these reformatory agencies, which have received my hearty support and encouragement, the duty is carefully enjoined on all keepers, guards and foremen, to treat the convicts under their charge in such a manner as to cultivate in them a spirit of manhood, responsibility and self-respect, at the same time relaxing in no degree the discipline which our rules require. Profane and abusive language toward convicts on the part of keepers and employees is strictly forbidden, as not only wrong in itself, but because it is cowardly, degrading to both keeper and convict, and ruinous to discipline. The rules of the prison are read and carefully explained to each convict when he is received, and a printed copy is furnished each cell. Keepers and foremen are also forbidden to reply in like terms to abusive language from convicts, but required to report the same to the Warden or Deputy Warden. Cruel and degrading punishments are positively prohibited; indeed, the character of this part of prison discipline has almost wholly changed within the last few years. Whipping was abolished by law in June, 1867. "Bathing" has since been prohibited by order of your board. The "ring bolts" in the solitary cells have not been used since August 3, 1874, and the good effects following their disuse have warranted me in favorably endorsing the recommendation of the Deputy Warden, made September 12, 1874, that they be entirely removed from the cells. The most severe punishment now inflicted consists of solitary confinement in a warmed and lighted cell, floored with pine, eight by sixteen feet in size, without furniture and upon a scanty diet of bread and water. For minor offenses, such punishments as taking away the usual allowance of candles or tobacco, or withdrawing for a time the permit to receive visits from friends, have been found sufficient. Tabular statement "T," herewith submitted, shows a gratifying decrease in the number and percentage of punishments during the past two years; and it is believed that with vigilance, firmness, promptness and kindness on the part of officers, keepers and employees, the above punishments are all that will be necessary to maintain good discipline in this prison in future.

The conduct of the convicts, with few exceptions, has been uniformly

good. This is due, largely, to the firm, even discipline which prevails, and to the salutary effect of the "Good Time Law," which sets before the convict an object for which to strive. As a matter of justice to many of the prisoners who have served here many years, and who have lost a large amount of good time by, perhaps, only a single offense, committed under the laws in force prior to July 1, 1872, I would recommend that legislation be asked which will give the prison authorities power to relieve the hardship of such cases, by restoring a part, or all, of his good time so lost, when the conduct of the convict under the present law has been unexceptionable.

The law which gives each prisoner ten dollars upon his discharge, in addition to his fare to the place of conviction, has also produced most excellent results, not only on the minds of the convicts here, by disabusing them of the idea that society is their enemy, but by enabling many a man to subsist himself until he can find employment, thus relieving him of the seeming *necessity* of stealing in order to maintain existence. There need be no fear that such enlightened legislation will "destroy discipline," or fail to meet with a hearty response in the good conduct of those most affected by it.

While the condition and earnings of the female department cannot well be shown in a separate report, it is due to that department to say, that under the excellent management of its efficient Matron, Mrs. J. E. Judson, the earnings of each prisoner have averaged as much as those of the male department, and the prison itself is a model of neatness and order.

I cannot close this report without bearing testimony to the efficiency of Captain James P. Hall, Deputy Warden. Much of the success which has been attained here, is due to the careful, conscientious and humane manner in which he has performed the varied and perplexing duties with which he is charged. Assistant Deputy Sleeper has fully maintained his long established reputation as a valuable prison officer; and the keepers and guards have, in general, discharged their duties in a manner highly commendable.

To yourselves, gentlemen, I tender my sincere thanks for the support I have received at your hands in my efforts for the welfare of this institution, and congratulate you upon its success under your management.

Very respectfully your obedient servant,

R. W. McCLAUGHRY,
Warden

* See statement "B."
 (1) Assets and Liabilities previous to Dec. 1, 1873.—Debts due from penitentiary prior to Dec. 1, 1873, not appearing on the books, but audited and paid or settled for subsequent to that date.
 (2) Library.—Inventoried with general expense.
 (3) Round House.—Account commenced for erection of buildings for the Illinois Car Company.
 (4) Bills Payable and Debts due from Penitentiary.—The apparent "gains" in the "cash and coin" column of these accounts are the settlement of accounts of such persons who, while employed at the penitentiary, were at the same time and for larger amounts, its debtors. As debitors they were under the category of "dishful" and "worthless." See statement "B." A true and correct balance sheet.
 (GALLUS MILLER, Clerk.)

"B."—STATEMENT explanatory to "Losses and Gains," in Balance Sheet of Illinois State Penitentiary, May 10 to 12, 1873, "A."

LOSSES, per balance sheet, on inventoried accounts:		
Quarry department	\$2,352 89	
Machinery department	881 54	
Real estate	3 80	
Expenses	126,633 69	
Permanent improvements	3,960 64	
Total		\$133,832 26
GAINS, per balance sheet:		
Labor account	\$87,817 04	
Interest account	105 45	
Total		87,922 49
NET LOSSES, which can be accounted for by the decrease of inventory:		
From Nov. 30, 1872	\$181,258 94	
To May 10, 1873	116,534 26	
Difference	\$64,723 98	
Deducting the above	45,909 77	
An allowance of	\$18,814 21	
Is still made for the use, from Nov. 30, 1872, to May 10 to 12, 1873, of such property which had been inventoried, on hand Nov. 30, 1872, as meat, potatoes, groceries, convict clothing, etc.		
ADD TO THE ABOVE NET LOSS:		
1. Loss on settlement of old claims between Nov. 30, 1872, and May 10, 1873, as per ledger account: assets and liabilities previous to Dec. 1, 1872. See "A," remark 1		2,695 96
2. Loss of stone department (no inventory); mostly accounted for by the unadjusted error of \$29,752 54 of new State House Commissioners, and by final settlement with W. D. Richardson, under date of May 12, 1873.		31,110 45
3. Taking off the books all claims pronounced "doubtful" and "worthless" by legislative committee of 1871, which claims were contracted, with very few exceptions, previous to Dec. 1, 1870		65,109 79
May 10 to 12, 1873. Total decrease on stock account, per balance sheet		\$144,825 97

REMARKS:

- (1.) Expense—In this account is inventoried all property necessary for subsisting, clothing, bedding and keeping convicts, supplies on hand for future use, as well as goods issued and now in use.
- (2.) Machine department.—All machines, boilers, engines, tools and materials on hand for permanent improvements and repairs, coal on hand, etc., etc., are inventoried in this department.
- (3.) See remarks 2 and 3, receipts, table "D" b.
- (4.) See table "F" a and b.
- (5.) See table "D" b, remark "g," expenditures.
- (6.) See table "D" a and b.
- (7.) See table "E."
- (8.) Due by contractors, \$23,299 27. Old book accounts, considered good, \$16,002 13.
- (9.) In dispute by Chas. E. Page & Co., Chicago, and B. E. Cole, Boston.

transacted from May 10-12, 1873, to November 30, 1874.

*These amounts have been paid to the Warden on estimates and by vouchers of the Board of New State House Commissioners. They do not make a part of our cash receipts and expenditures, with the exception of one item of \$5,000 00, in August, 1873. See remarks in "Receipts," and "p" in "Expenditures," as the amounts were paid over to sub-contractors as fast as received, and journal entries of transfer were made of such transactions.

**Interest on note of W. D. Richardson.

†Traveling expenses refunded.

‡Money received from contractors for rent of shops.

||Interest on deposits in banks, from August 1, 1874, to date.

]-CHRONOLOGICAL STATEMENT of "permanent improvements"
made at the Illinois State Penitentiary from May 10, 1873, to No-
vember 30, 1874, (as charged by State Machine Department, Etc.)

J	Running steam pipe from engine No. 1 to old store.....	\$195 73
	Running steam pipe from boiler house No. 3 to female prison.....	67 50
J	Hose connection on hoop tank.....	14 20
J	Stairs to chapel, (south side of building).....	48 33
J	Sewer connection from main sewer to "Round House".....	98 70
J	Sidewalk from chapel to Warden house.....	59 84
J	Pipe from spring to boiler house No. 3.....	353 89
J	Steps and stairs to old "paint shop".....	49 46
J	Chimney for stable.....	25 61
a.	Fitting up new machine shop, roofing, lights and windows, connections with sewers, water and steam.....	453 30
	Arch boiler house No. 1, and connection with stove shop.....	78 19
	Building "car round house".....	16,746 00
	Building car dry kiln.....	845 36
	Fitting up and improving "car pattern shop".....	316 16
	Fitting up and improving car, blacksmith, machine and wood-working shops.....	1,989 18
a.	Building machine department, warehouse and office.....	424 17
	Building lime house.....	78 50
	Sewer connection with bath house.....	31 25
b.	Chimney round house.....	82 64
ch	Exhaust pipes, east and west wings, bath house, kitchen and bake house.....	282 70
	Ventilator screens in all cells, east and west wings.....	56 00
	Chimney bath house.....	20 78
	Mortar bed, lime house, and water gutters, machine shop warehouse.....	13 89
	Shoe shop No. 6 and shoe shop warehouse.....	901 50
cell	Enlarging slaughter house and tallow kitchen.....	62 38
	Street crossings and sidewalks in prison yard.....	425 63
	Building sand house and water connection.....	58 96
gray	Planting trees in front of prison.....	183 25
	Sewer and open sewer, west wing.....	251 24
	Iron door for armory, \$42 20; Lumber rack, machine department, \$20 34.....	62 54
Ma	Fitting up new blacksmith shop.....	240 12
me	Water connection with lime house.....	24 19
	Partition old paint shop, \$10 02; Steps front of Warden house, \$2 01.....	12 03
	Windows in carpenter shop, \$11 08; Wagon shed near stable, \$118 88.....	129 96
pt.	Laying water pipe from "main" to stone sheds 3 and 4.....	107 52
	Permanent partition in female prison.....	41 79
	Laying pine floors in solitary cells.....	37 68
set.	Building reservoir in yard, excavating, etc.....	1,877 54
	Scales put up on west gate, \$28 98; Chimney, north cell house, \$6 54.....	35 52
	Large addition to slaughter house.....	283 53
sv.	Ventilators (galvanized iron) on shoe shops.....	138 91
	Excavating and building ice pond at spring.....	1,705 63
	Total as per ledger account.....	\$28,925 09

"L."—TABLE showing the number of Convicts from the different counties of the State, received in the Illinois State Penitentiary, during the two fiscal years ending November 30, 1874; also the number of Convicts from each county on hand, November 30, 1874.

INSURANCE REPORT.

PART I.

FIRE, MARINE AND INLAND INSURANCE.

AUDITOR'S OFFICE, ILLINOIS,
SPRINGFIELD, *March 9, 1875.*

His Excellency, JOHN L. BEVERIDGE,
Governor of Illinois :

SIR—I have the honor to hand you herewith my report, exhibiting the business of Fire, Marine and Inland Insurance, in the State of Illinois, for the year ending December 31, 1874, presented in the annual statements of companies filed in this Department, as required by law.

Since the date of my last report the following companies, incorporated under the laws of this State, have complied with the provisions of the act of March 11, 1869, and received authority to transact business :

I. The Union Insurance Company of Chicago, received authority to transact business August 24, 1874, with a paid up capital of \$100,600. This company was incorporated February 21, 1867. In January, 1875, the company discontinued business, having reinsured its outstanding risks in the Empire Fire Insurance Company, and has not applied for authority to transact business during the current year.

II. The Empire Fire Insurance Company of Wheaton, Illinois, principal office at Chicago, Illinois, incorporated February 16, 1857, received authority to transact business October 14, 1874, with a paid up capital of \$104,000. This company filed a statement on the 26th of January, 1875, showing an increase of capital to \$186,500.

III. The Forest City Insurance Company of Rockford, Illinois, organized under the act of March 11, 1869, received authority to commence business on July 21, 1874, with a paid up capital of \$100,000.

In the month of March, 1874, an examination of the Ætna Insurance

Company disclosed that its affairs were in an unsound condition, and that much of the evidence of valuation on which the securities were originally accepted was fraudulent. The company stopped doing business, and as at that time its assets were largely in excess of its liabilities, there was no ground for me to make application to put it in liquidation. Later in the month of September, 1874, the company was put in liquidation by the Superior Court of Cook County, on the application of a creditor, and V. A. Turpin, Esq., was appointed Receiver. The following is his annual report made in pursuance of law :

TO THE HON. C. E. LIPPINCOTT,

Auditor of the State of Illinois, Springfield :

SIR—The undersigned, appointed Receiver of the estate of the *Etna Insurance Company of Chicago*, by the Superior Court of Cook County sitting in chancery in the cause wherein *Haynes, Jordan & Co.* were plaintiffs and the *Etna Insurance Company* was defendant, beg leave to submit the following report :

I was qualified by filing an approved bond in the penal sum of fifty thousand dollars, on the 18th day of September, A. D. 1874. On taking possession of said estate, I received from the officers of the Company, the following assets: Notes due 10 years after date, at interest at 8 per cent., and purporting to be secured on real estate, \$134,200.

Upon careful examination into the value of the bonds mortgaged to secure these notes, I find a part of them having prior incumbrance quite equal to the value of the lands, and much of the remainder of very small value. The whole is not probably worth more than twelve thousand to fifteen thousand dollars. From sworn reports made to the Auditor of this State, and to the Insurance Department of the State of Missouri, I find that notes and stocks of the nominal value of \$143,200, the property of the Company, have been abstracted without, so far as I can ascertain, any consideration. By the advice of my attorney I have commenced legal proceedings to compel the return of the property surrendered. If I am successful in these suits, I shall be able to pay all of the liabilities of the Company in full, except for the stock. The liabilities of the Company, so far as I have been able to ascertain, are as follows :

Adjusted losses	\$20,305 1/2
Unadjusted losses (about).....	10,000 00
Due officers and employees of the Company (about).....	4,500 00
Unsettled account for rent (say).....	2,500 00
Due for unearned premiums (estimated).....	20,000 00
	<hr/>
	\$57,305 1/2

The court fees and attorney's fees for closing up the business will be large, in proportion to the value of the assets and liabilities.

Respectfully submitted,

V. A. TURPIN, Receiver.

CHICAGO, February 8, 1875.

After the Chicago fire of July 14, 1874, I examined the *Atlantic and Pacific Insurance Company of Chicago*, and found it in an insolvent condition. It transpired that the most valuable assets held by the Company were either borrowed, and the liability created therefor not admitted in the statement, or had been paid in on account of stock subscription by stockholders, who held special preference contracts, under which at their option, at short notice, they might surrender their stock and withdraw their securities. As the liabilities exceeded the assets of the Company, I communicated the fact to the Attorney General, who made application to the Superior Court of Cook County, to decree the dissolution of the Company and the appointment of a Receiver. This application was resisted by certain stockholders for purposes of delay,

but a decree was finally rendered, and V. A. Turpin, Esq., was appointed Receiver on September 1, 1874. The following is his annual report made in pursuance of law :

HON. C. E. LIPPINCOTT, *Auditor of the State of Illinois, Springfield :*

Sir:—The undersigned, appointed Receiver of the estate of the "Atlantic and Pacific Insurance Company of Chicago," by the Superior Court of Cook county, Illinois, sitting in chancery in the cause wherein the People of the State of Illinois was plaintiff, and the Atlantic and Pacific Insurance Company was defendant, beg leave to submit the follow report:

I was qualified by filing an approved bond in the penal sum of three hundred thousand dollars, on the 3d day of September, A. D. 1874. On taking possession of the said estate, I received from the late officers of the Company the following assets—

Notes purporting to be secured by mortgages on real estate	\$226, 750 00
Past due checks of sundry persons	700 00
Office furniture and fixtures	1, 000 00
Cash in bank	749 51
Real estate (nominal value)	13, 025 00
Notes without security	3, 200 00
Notes with personal security	1, 900 00
Total nominal assets	\$247, 324 51

On my petition, the court appointed Messrs. Storrs and Ware, real estate dealers in this city, appraisers of the real estate mortgaged to the Company.

Messrs. Storrs and Ware appraised the property at \$182, 327, on the basis of one-quarter cash, and the balance at one, two and three years, with interest at 8 per cent. per annum. This appraisal is, however, subject to the following deductions:

Two parcels of land is valued at	\$36, 950 00
On which the Company has mortgages for	3, 850 00
	<u>\$33, 100 00</u>
Also, prior incumbrances—	
Nine parcels land	24, 706 83
Total amount to be deducted	\$57, 806 83

Leaving property that will probably come into the hands of the Receiver of the appraised value of	\$124, 520 17
To which may be added the probable value of furniture, notes and cash	2, 500 00
Total value of assets (estimated)	\$127, 020 17

Notes to the value of about ten thousand dollars were surrendered to the makers, by the officers of the Company, prior to my appointment as Receiver, by agreement (illegally, as I am advised), without other consideration except the return of the stock of the Company issued for said notes.

Acting under the advice of my attorneys, I have commenced legal proceedings to compel a return of the notes and mortgages so released and surrendered.

LIABILITIES.

Adjusted losses	\$176, 248 81
Unadjusted losses	39, 251 66
Taxes on real estate (estimated)	3, 000 00
Bills for advertising, and other expenses (estimated)	1, 500 00
Due, salaries of officers and clerks	9, 424 28
Due policy holders for canceled policies (estimated)	50, 000 00
Total liabilities (estimated)	\$279, 424 75

As a good title to a large proportion of the lands mortgaged to the Company can be obtained only by foreclosure and sale, the expense for legal services will necessarily be large.

Respectfully submitted,

V. A. TURPIN, *Receiver.*

CHICAGO, February 6, 1875.

Under the 26th section of the act approved March 11, 1869, the Receivers appointed for the insolvent companies below named filed in this

office, in the month of January last, their reports for the year ending Dec. 31, 1874:

PEORIA FIRE AND MARINE INSURANCE COMPANY—PEORIA, ILLINOIS

ASSETS.	
Cash in hand of Receiver	\$1,014 83
Cash in hands of Attorneys	539 45
	\$1,554 28
Collections in hands of Attorneys (doubtful)	4,021 75
Notes, judgments and accounts (desperate)	26,023 23
	\$35,167 54
LIABILITIES.	
Claims proven before Master-in-Chancery	\$85,579 04
Estimated costs and Attorney's fees in closing business of Company	2,500 00
	\$88,079 04

Sworn to by W. M. DODGE, Receiver.
 Before FRANK E. PURPLE, Notary Public

FARMERS' AND MERCHANTS' INSURANCE COMPANY—QUINCY, ILLINOIS

Whole amount of capital actually paid up in cash

ASSETS	
Bills receivable (notes for first premiums, etc.)	\$10,790 15
Installment notes	72,443 20
Due from agents and others on account	14,002 33
Judgments in favor of Company	3,000 00
Due from Collectors	304 12
Office furniture	200 00
Due on assessments on mutual notes	12,374 22
Fulton County Bank stock, no value	000
	\$113,943 00

Amount which should be deducted from above on account of bad and doubtful debts and securities

LIABILITIES.	
Losses in judgment	\$25,513 36
Losses resisted	19,817 87
	\$45,331 23
Due sundry persons	4,648 00
Bills payable	2,207 00
	\$52,186 23

Besides the above, there are unpaid claims for attorney's fees, service, etc., incurred under the co-ownership, the amount of which is unknown. The above statement is also subject to a charge of \$6,769 15, as found by decree of Adams county circuit court, if the same shall not be modified

INCOME.	
Income received from collection of assets	\$453 00

EXPENDITURES.	
Expenses as per schedule furnished	\$227 00

Sworn to by WILLIAM H. BENNESON, Receiver.
 Before GEORGE M. JAMES, Notary Public.

Since the date of my last report, authority to do business in this State has been given to twenty-five Fire and Fire-Marine Insurance Companies that had not, prior to the date of such authority, been doing business in Illinois.

Table No. 1 gives the name, location, and amount of paid up capital stock of each company so admitted. Each company named has complied with all the requirements of the Insurance laws of this State:

	Totals.....	\$3,150,000 00

There are now one hundred and fifty-seven Fire and Fire Marine Insurance Companies complying with the laws of this State, divided as follows :

- 10 Joint stock companies of Illinois.
- 127 Joint stock companies of other States.
- 7 Mutual companies of other States.
- 13 Foreign companies.

157

SECURITIES DEPOSITED WITH THE AUDITOR.

Securities are now held in this Department for the protection of policyholders, for companies, and in amounts as follows :

Name of Company.	Location.	Kind of Securities.	Par value of stock or amount of mortgage.
Old Dominion.....	Virginia.....	City of Richmond Bonds.....	\$12,000
Royal.....	England.....	U. S. Registered 6 per cent. Currency Bonds.....	200,000
Mobile Fire Department.....	Alabama.....	Missouri 6 per cent.....	10,000
		Total.....	\$222,000

The securities of the "Old Dominion," of Virginia, and Mobile Fire Department of Alabama, were deposited under the provisions of the reciprocity section of the Illinois law, as the laws of those States require similar deposit before admitting companies of this or other States to do business in said States.

The following tables (Nos. 3 to 10, inclusive) exhibit the general business done in the year 1874, by all the companies complying with the laws of this State:

TABLE NO. 3.

Detailed Statement of Assets of each Fire and Fire-Marine Insurance Company complying with the Insurance Laws of Illinois, as shown by their Annual Reports, for the year ending December 31, 1874.

TOWNSHIP AND OTHER MUTUAL FIRE INSURANCE COMPANIES OF THIS STATE.

From the following tables, Nos. 11 and 12, it appears that fifty-six companies organized under special charters or under "An act to incorporate and to govern Mutual Fire Insurance Companies in townships," in force July 1, 1872, and the revised act, in force July 1, 1874, have filed statements and received certificates of authorities to continue business the ensuing year. Thirteen companies have organized under the provisions of the revised township insurance law, since January 1, 1875, and have authority to transact business.

TABLE No. 11.

Showing the name and location of Company, names of Officers, under what Law organized, and date of commencing Business, of the Township and other Mutual Fire Insurance Companies of Illinois, which have received authority to transact business for the year 1875.
